2017 初赛第一场

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: *Read the following excerpts. Match the excerpts with the book title. Please note there are three extra options you do not need.*

A. *A Tale of Two Cities*

B. *Pride and Prejudice*

C. *The Great Gatsby*

D. *Little Women*

E. *Hard Times*

F. *Jane Eyre*

1.

B Pretend modesty often is nonsense, sometimes just is the beat around the bush boast.

答案: B

2.

F Life is too short to continue hating anyone for a long time.

答案: F

3.

C Whenever you feel like criticizing any one, just remember that all the people in this world haven' t had the advantages that you' ve had.

答案: C

Question 4 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Common sense might suggest that children inherit intelligence from both parents. However, certain genes operate differently, depending on whether they are from the mother or father. The genes that determine intelligence are located in chromosome X. Because women carry two X chromosomes and men carry only one, children are twice as likely to get their intelligence from their mom.

4. Where is the piece of text most probably taken from?

考试时的选项顺序

A) A notice.

B) A research. ✓

C) An advertisement.

D) An instruction.

原始的选项顺序

- A) An advertisement. B) An instruction.
- C) A research. ✓ D) A notice.

Question 5 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

When friendships were reported as being stressful, people reported higher rates of disease. When friends were supportive, people were healthier. Most of the friendships were reported as being supportive. Family, however, were found to have little influence on an individual's health and wellbeing. Spouses and children had some effect on an individual's health and wellbeing, but not as much as friends. With friends you are more likely to do activities—they provide an outlet. You can say things to friends and they are less judgmental. There is a distance there that provides a level of honesty.

5. What is the main idea of this text?

考试时的选项顺序

- A) The ways to relieve stress.
- B) Friends versus family.
- C) The effects of friendship on health. ✓
- D) The benefits of having friends.

原始的选项顺序

- C) The benefits of having friends.
- D) The effects of friendship on health. ✓

Question 6 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

With JourneYou, save \$200 on select departures of its Essential Peru tour. The seven-day trip starts at \$899 per person double and includes hotel accommodations in Lima, Cusco and the Sacred Valley; ground excursions; daily breakfast and some lunches; flights within Peru; expedition train to Machu Picchu; entrance fees; and taxes.

6. What is the most possible type of the text?

考试时的选项顺序

- A) A tour guide.
- B) An advertisement. ✓
- C) A presentation.
- D) An expert' s advice.

原始的选项顺序

- A) A presentation.
- B) An expert' s advice.
- C) An advertisement. ✓
- D) A tour guide.

Question 7 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Welcome to Vatican City, the smallest country (by area AND population!) in the world. Surprised? You might have heard of it, but you might not have guessed that many consider the Vatican a country.

While it could be argued that the Vatican isn't technically an independent nation—it doesn't have a seat at the United Nations—others would dispute that claim. The Vatican abides by the 1933 Montevideo Convention's definition of a country, after all. Article One of the Convention says: "The state as a person of international law should possess the following qualifications: a) a permanent population; b) a defined territory; c) government; and d) capacity to enter into relations with the other states."

According to that definition, the Vatican meets all of the criteria for statehood.

7. Vatican is seen as a nation because it _____.

考试时的选项顺序

A) possesses an established government ✓

B) abides by the international law

C) has a seat at the United Nations

D) holds a written constitution

原始的选项顺序

A) has a seat at the United Nations

B) abides by the international law

C) possesses an established government ✓

D) holds a written constitution

Question 8 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

BSG Wood.b Duomatic

Country of origin: France

Details: French bikemaker BSG' s Wood.b line of cycles combine metal pieces with structural components made of exposed ash plywood. The finished product—which is every bit as pricey as it looks—seems closer to art than machinery. Don' t be fooled: BSG' s frame promises exceptional durability, and the use of painted aluminium components keeps weight to a manageable 35lbs. This beauty is a beast.

Price: €3190 (about \$4230)

8. What do you know about BSG's Wood.b bicycles from the text?

考试时的选项顺序

- A) They are made out of pricey wood.
- B) They are durable. ✓
- C) The components are exposed.
- D) Their artistic values outweigh practical values.

原始的选项顺序

- A) They are made out of pricey wood.
- B) The components are exposed.
- C) Their artistic values outweigh practical values.
- D) They are durable. ✓

Question 9 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

We all know the drill. For the last decade, smartphones have gotten thinner and faster and thinner and faster and, well, you get the picture.

But it's too soon to write off our smartphones as boring. The gadgets are still evolving with new technologies. And for a clue as to what the

smartphone of the future might look like, turn your attention to the device' s cameras and the software and sensors that make them tick.

Here' s a peek into how the camera may come into play: As soon as you pick up your gadget, it will see you and know you are the owner and unlock the screen. Overseas, you will be able to point the camera at a restaurant menu to translate items into your native language. When shopping for furniture, you can point your phone camera at your living room floor and place a virtual rendering of a coffee table down to see how it looks and move around and peek underneath it.

Some of this futurism is already starting to happen.

9. What is the most probable title of the text?

考试时的选项顺序

- A) How to Keep on Top of Technology with Your Smartphones
- B) The Smartphone' s Future: It' s All About the Camera ✓**
- C) Updating Your Smartphone Sensors for Better Functions
- D) Smartphones: Changes in Ten Years

原始的选项顺序

- A) The Smartphone' s Future: It' s All About the Camera ✓**
- B) Smartphones: Changes in Ten Years

C) Updating Your Smartphone Sensors for Better Functions

D) How to Keep on Top of Technology with Your Smartphones

Question 10 (Suggested completion time: 5 minutes)

Directions: *The bar chart shows the number and proportion of urban population living in slums in developing regions from 1990 to 2014.*

Answer the question according to the information in the chart.

(Source: The Millennium Development Goals Report, 2015)

10. Which of the following is an INCORRECT description about the chart?

考试时的选项顺序

A) The proportion of population living in slums of developing regions was declining, but their numbers remained high.

B) The year 2012 saw the largest population living in slums in urban areas of developing regions.

C) From 1990 to 2014, urban populations living in slums in developing regions have been on the rise. ✓

D) The proportion of urban population living in slums fell to nearly 30% in 2014, which is almost 17% lower than that in 1990.

原始的选项顺序

A) The proportion of population living in slums of developing regions was declining, but their numbers remained high.

B) From 1990 to 2014, urban populations living in slums in developing regions have been on the rise. ✓

C) The proportion of urban population living in slums fell to nearly 30% in 2014, which is almost 17% lower than that in 1990.

D) The year 2012 saw the largest population living in slums in urban areas of developing regions.

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 40 minutes)

Questions 11-12 (Suggested completion time: 10 minutes)

Directions: *Read the definitions of two types of logical fallacy. Answer the questions according to the definitions.*

Equivocation

Equivocation is a fallacy that exploits the ambiguity of language by changing the meaning of a word during the course of an argument and using the different meanings to support an ill-founded conclusion.

Appeal to Force

An *appeal to force* is a fallacy that relies on force or intimidation (scare tactics) to persuade an audience to accept a proposition or take a particular course of action.

11. Which of the following provides a typical example of *Equivocation*?

考试时的选项顺序

A) Ten million Americans can't be wrong, can they? So buy it.

Read it.

B) The work permits would run counter to our traditional freedoms and would be the first step toward a police state.

C) The sign said "fine for parking here" and since it was fine, I parked there. ✓

D) Scientists tell us we all come from monkeys, and that's why I homeschool.

原始的选项顺序

A) Ten million Americans can't be wrong, can they? So buy it.

Read it.

B) Scientists tell us we all come from monkeys, and that's why I homeschool.

C) The work permits would run counter to our traditional freedoms and would be the first step toward a police state.

D) The sign said "fine for parking here" and since it was fine, I parked there. ✓

12. Which of the following provides a typical example of an *appeal to force*?

考试时的选项顺序

A) An environmental group illegally blocked loggers and workers at a nuclear plant. Therefore, environmentalists are radicals who take the law into their own hands.

B) If you don't accept that the Sun orbits the Earth, rather than the other way around, then you'll be excommunicated from the Church. ✓

C) Why are you asking me about Mary's message? I resent her question.

D) Noisy children are a real headache. Two aspirin will make a headache go away. Therefore, two aspirin will make noisy children go away.

原始的选项顺序

A) Why are you asking me about Mary' s message? I resent her question.

B) Noisy children are a real headache. Two aspirin will make a headache go away. Therefore, two aspirin will make noisy children go away.

C) An environmental group illegally blocked loggers and workers at a nuclear plant. Therefore, environmentalists are radicals who take the law into their own hands.

D) If you don' t accept that the Sun orbits the Earth, rather than the other way around, then you' ll be excommunicated from the Church. ✓

Questions 13-14 Challenge your brain. (Suggested completion time: 6 minutes)

Directions: *Read the following texts and answer the questions according to the texts.*

13.

A food company once said in their advertisement: "Recent studies have

highlighted the harmful effects of additives in food (colors, preservatives, flavor enhancers etc.). There are no synthetic substances in the foods we produce. We use only natural ingredients. Hence you can be sure you are safeguarding your family' s health when you buy our products."

Which of the following, if true, would most weaken the contention of "the foods we produce" ?

考试时的选项顺序

- A) Food without additives is unlikely to taste good.
- B) Some synthetic substances are not harmful.
- C) Some natural substances found in foods can be harmful.
✓
- D) Without preservatives some foods could cause harm.

原始的选项顺序

- A) Some synthetic substances are not harmful.
- B) Food without additives is unlikely to taste good.
- C) Without preservatives some foods could cause harm.
- D) Some natural substances found in foods can be harmful.
✓

14.

One man has a nice portrait in his library. When he was asked whom is represented, he replied:

Uncles and brothers
Have I none,
But that man' s father
Is my father' s son.

What relation was the subject of the portrait to that man?

The portrait is **the man' s son/his son**.

答案: the man' s son/his son

Questions 15-17 (Suggested completion time: 6 minutes)

Directions: *Read the text about food tastes. Answer the questions according to the text.*

Saliva can alter the taste of food.

Saliva is vital in helping us eat food safely, and it lubricates and transports taste molecules from food to our taste buds.

Saliva contains an enzyme called amylase, which breaks down starch into

sugars. If you' ve ever noticed that some children keep bread in their mouth for a long time, it' s because as the amylase in their saliva acts on the starch, 15.

There are other enzymes in saliva that act on fat and protein, and control how we perceive food. The composition of saliva in each person is different. It changes throughout the day, and is influenced by what you eat, what exercise you have done, your mood, and even whether it is light or dark outside.

Proteomics (the study of proteins and their function) is an approach that can measure differences in the protein composition of different people' s saliva. The types and level of proteins and enzymes present in saliva vary from person to person, and this changes the way flavour is released from food in our mouth.

The bacteria that live in our mouths, part of our microbiome, also have an influence. For example, bacteria change the flavours of food by increasing the production of molecules that create particular taste experiences. The types of bacteria that are present create a unique response in each individual.

Research into individual food preferences—whether they be as a result of our genetics, saliva or the way we chew—may one day guide food manufacturers to produce healthier options of our everyday foods.

Hopefully this may contribute to consumers making better menu selections and decrease the number of food-related diseases.

15. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

- A) the bread is easier to be chewed and digested
- B) more nutrients could be transported from food to our mouth
- C) the digestion process is faster
- D) more sugar is produced and the bread tastes sweeter ✓

原始的选项顺序

- A) the digestion process is faster
- B) the bread is easier to be chewed and digested
- C) more sugar is produced and the bread tastes sweeter ✓
- D) more nutrients could be transported from food to our mouth

16. Which of the following is NOT true about enzymes?

考试时的选项顺序

- A) It alters the flavours of food by increasing the production of molecules. ✓
- B) It is one of the key compounds in the composition of saliva.
- C) It can act on starch, fat and protein in food to create different flavours.
- D) Its types and level have personal variations which contribute to different tastes of food.

原始的选项顺序

- A) It is one of the key compounds in the composition of saliva.
- B) It alters the flavours of food by increasing the production of molecules. ✓
- C) It can act on starch, fat and protein in food to create different flavours.
- D) Its types and level have personal variations which contribute to different tastes of food.

17. Which of the following can be inferred from the text?

考试时的选项顺序

A) The bacteria in our mouths would spoil the tastes of food.

B) This study of taste can help customers choose healthier diets. ✓

C) That we have different tastes to the same food is because of enzymes in our saliva.

D) The ingredients of your saliva remain the same when you're happy or not.

原始选项顺序

A) The bacteria in our mouths would spoil the tastes of food.

B) This study of taste can help customers choose healthier diets. ✓

C) The ingredients of your saliva remain the same when you're happy or not.

D) That we have different tastes to the same food is because of enzymes in our saliva.

Questions 18-19 (Suggested completion time: 5 minutes)

Directions: *Read the text about Saturn. Decide whether the statements are True or False according to the text.*

Saturn in natural color, photographed by *Cassini* in July 2008

NASA announced new discoveries that would help in the search for life beyond Earth. The new data comes from the space agency' s *Cassini* spacecraft, which orbits the planet Saturn and its moons. *The Hubble Space Telescope*, which was launched into Earth orbit in 1990, provided additional information. It has studied the planet and its many natural satellites since arriving there in 2004. In one key finding, *Cassini* scientists have determined that plumes of gas erupting out of Saturn' s icy moon Enceladus contain hydrogen. The researchers also discovered hydrogen gas pouring into Enceladus' s subsurface ocean from hydrothermal activity on the seafloor. Hydrogen gas could potentially provide a

chemical energy source for life. On Earth, hydrothermal vents are filled with microscopic life forms. Confirmation that the chemical energy for life exists within the ocean of a small moon of Saturn is an important milestone in the search for habitable worlds beyond Earth.

18. *Cassini* is a spacecraft orbiting Saturn and has studied Saturn for at least nine years.

A) True ✓ B) False

答案: A

19. The detection of hydrogen gas is a powerful evidence of the habitability of Saturn.

A) True B) False ✓

答案: B

Questions 20-21 (Suggested completion time: 6 minutes)

Directions: *Read the text and answer the questions according to the text.*

Ten thousand years from now (assuming humans haven' t been wiped out by a plague, space rock or our own destructive tendencies,) it' ll probably be fairly easy for the average person to research what life was like in 2017. For us here today, finding out what life was like in 11,000 BC

is much more challenging, but by studying ancient stone carvings and pairing the somewhat confusing messages with archeological data, researchers believe they' ve discovered concrete evidence that may have altered the future of mankind: a comet strike.

The study, performed by a team of researchers from the University of Edinburgh, suggests that a potentially cataclysmic comet strike rapidly and dramatically altered the Earth' s climate for hundreds of years, sending humanity into a mini ice age with nearly glacial conditions. The time period when this occurred is known as the Younger Dryas, and has been well-documented thanks to ample evidence of the cooling found in core samples, but its cause has been theorized and debated for a long while. Now, thanks to stone carvings left by ancient people in modern day Turkey, researchers believe that a comet was the culprit.

The carvings are remarkably preserved and appear to have been created to document an apocalyptic event which devastated the land. Figures depicted in the carvings, including apparently deceased, headless human bodies and other wildlife, were made at around the time the Younger Dryas began, suggesting that the event archived in stone could have been the same one that caused the thousand-year cold snap. The carvings were found at what is considered to be one of the oldest and

most important temple sites on the planet, and for the images to appear there suggests that they have enormous historical significance.

The Younger Dryas is often credited with pushing ancient humans to band together out of pure necessity, forming the foundation of modern agriculture and other huge advancements in civilization. The idea that a comet may have been responsible for pushing humanity forward is an extremely interesting, and potentially frightening possibility.

The findings are far from an iron-clad confirmation, but the timing matches up shockingly well and would have to be a fantastic coincidence if the two events are actually unrelated.

20. Which of the following is TRUE about the Younger Dryas according to the text?

- A) A comet devastated the land and killed living creatures during the Younger Dryas.
- B) The recent research findings prove that the Younger Dryas is related to a comet strike.
- C) Many stone carvings were well-preserved and discovered in the Younger Dryas.
- D) The Younger Dryas is usually considered as the foundation

of modern agriculture. ✓

答案: D

21. What is the possible main idea of this text?

考试时的选项顺序

- A) Early civilization began in the Younger Dryas.
- B) Ancient stone carvings help a lot in archaeology.
- C) A comet strike may have changed human' s history. ✓
- D) Researchers found the cause of climate change.

原始的选项顺序

- A) A comet strike may have changed human' s history. ✓
- B) Ancient stone carvings help a lot in archaeology.
- C) Early civilization began in the Younger Dryas.
- D) Researchers found the cause of climate change.

Questions 22-23 (Suggested completion time: 7 minutes)

Directions: *Read the text about tardigrade. Answer the questions according to the text.*

The world' s most indestructible species—a stout, microscopic animal with four pairs of legs, known as the water bear or tardigrade—will survive until the sun dies, according to new research from Oxford University and the Harvard-Smithsonian Center for Astrophysics (CfA).

_____ 22 _____ The water-dwelling micro-animals are known to be able to live for up to 30 years without food or water. They can endure temperatures of up to 150 degrees Celsius, the deep sea, and the frozen vacuum of space.

And they can even survive the risk of extinction from cosmic catastrophes—asteroids, supernovas, gamma ray bursts—and likely last for at least 10 billion years, far longer than the human race, according to the new study published in *Scientific Reports*.

Not bad for an animal that grows to a maximum size of 0.5mm.

“A lot of previous work has focused on ‘doomsday’ scenarios on Earth—astrophysical events like supernovas that could wipe out the human race. Our study instead considered the hardiest species,” said David Sloan, co-author and postdoctoral research associate in the Department of Physics at Oxford University.

Sloan said researchers were surprised by the extent of the tardigrade’s resiliency. “It seems that life, once it gets going, is hard to wipe out entirely. Huge numbers of species or even entire genera may become extinct, but life as a whole will go on.”

The research implies that life on Earth will extend as long as the sun keeps shining. It also reveals that once life emerges, it is surprisingly difficult to destroy, opening the possibility of life on other planets.

“Tardigrades are as close to indestructible as it gets on Earth, but it is possible that there are other resilient species examples elsewhere in the universe,” said Dr. Rafael Alves Batista, co-author and post-doctoral research associate in the Department of Physics at Oxford University.

22. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

- A) Tardigrade reproduces through sexual and asexual reproduction, depending on the species.
- B) Tardigrade may be little but they are the toughest form of life on Earth. ✓**
- C) Tardigrade’ s legs resemble those of crabs, spiders, and other bugs of similar genera.
- D) Tardigrade’ s truly bizarre genetic constitution is revealed by geneticists.

原始的选项顺序

- A) Tardigrade may be little but they are the toughest form of life on Earth. ✓**
- B) Tardigrade’ s truly bizarre genetic constitution is revealed by geneticists.
- C) Tardigrade’ s legs resemble those of crabs, spiders, and

other bugs of similar genera.

D) Tardigrade reproduces through sexual and asexual reproduction, depending on the species.

23. What would the author most likely write about in the following parts of the text?

考试时的选项顺序

A) Previous research on the influence of “doomsday” scenarios.

B) The resilience of life in general beyond the scope of Earth.

✓

C) The situations when new threats to tardigrades occur.

D) The reasons for species to survive extreme conditions in the universe.

原始的选项顺序

A) The situations when new threats to tardigrades occur.

B) The resilience of life in general beyond the scope of Earth. ✓

C) Previous research on the influence of “doomsday” scenarios.

D) The reasons for species to survive extreme conditions in the universe.

Directions: In Part III, you will read three passages on the same subject.

You are required to identify the writer's position and evaluate the effectiveness of the writer's arguments. (Time allowed: 30 minutes)

Questions 24-31 (Suggested completion time: 30 minutes)

Directions: Read three passages about game addiction. Answer the questions according to the passages.

Passage A

Chinese games giant Tencent intends to calm parents' fears of gaming addictions by introducing time limits for younger players.

The firm has begun by implementing restrictions in mobile title *Honour of Kings*, one of its most popular games with 200 million users.

Reuters reports that users aged 12 or younger will only be able to play the game for one hour per day, with this extending to two hours for those between 12 and 18 years old.

Tencent has also said it will lock under-12s out of the game if they attempt to log in after 9 pm. It will even increase restrictions on how much money kids can spend in the game.

Honour of Kings will be the first title to impose these limits, but Tencent has also said it will make improvements to the rest of its portfolio, which encompasses more than 200 games.

Planned measures include an upgraded parental control platform, so parents will be able to monitor their children's gaming activities, and an increased requirement for users to register under their real names.

"There are no rules to prevent indulgence in online games in China, but we decided to be the first to try to dispel parent worries by limiting play time and forcing children to log off," a Tencent spokesperson wrote.

Mobile games in particular have been under scrutiny by parents for years—particularly those that easily allow in-app purchases, with countless reports of children racking up huge bills through microtransactions. With mobile very much the dominant games platform for kids around the world, not just in China, it's not

unlikely we'll see more companies introduce similar measures to *assuage* fears that children are becoming addicted to such titles.

Passage B

Most addictions, such as substance abuse addictions have a set ability to be defined based on use of a substance alone. Unfortunately, video game addiction cannot be defined quite so easily. It can take more than just insight into one's ability or enthusiasm in a video game to define it as an addiction. A true video game addiction is a compulsive disorder, a clinical impulse to play a video game. Psychiatrist Michael Brody defines video game addiction as:

1. A need for the person to play the game constantly or take part in gaming activities more and more frequently
2. Irritability or miserableness related to not getting the video game action one desires

These signs are really no different than those present with a substance abuse addiction and in many ways, compulsive video gaming can be treated using similar methods that are used to treat substance abuse. Compulsive gaming not only has many of the same signs as substance abuse addictions or problems, it also has many withdrawal symptoms or stages that come when the addict stops playing video games such as insomnia, anger, violent behaviors and other disorders, most of which are treatable with time and therapy. According to the National Academic Advising Association, an excessive gaming problem becomes an addiction when it is used to change a person's mood.

Many methods of treatment can be found to help those who are addicted to video games to stop the cycle of gaming and get on the right track to social and emotional recovery. Because many video game addictions are the result of an inept social being or the result of masking emotions, most treatment methods revolve around helping the teen, child or adult to become more social, overcome negative emotions and reduce boredom by finding more productive things to do. In many ways, treatment for video game addiction is treated the same way as the treatment for any other addiction such as a substance abuse problem or alcoholism.

Passage C

Adam figured he needed to avoid temptation, so he limited his contact with friends who were hardcore gamers. He used filters on the popular Reddit website to avoid any

discussion of gaming topics.

And in the most radical step, he rendered his online gaming account unusable by resetting his username and password to strings of randomly generated numbers and letters. He then burned the paper on which he had written them, ensuring they were lost forever.

“Once I removed all stimulation that was game-related, not playing became very easy,” he said.

As Adam’s obsession cooled, he grew interested in meeting others who had endured similar experiences. He formed a Chicago chapter of Computer Gaming Addicts Anonymous, a support group that loosely follows the 12-step approach to recovery (it recently began holding weekly meetings at the Hazelden Betty Ford Foundation on the Near North Side).

Through the group, Adam met a 55-year-old Chicago woman with a very different gaming problem. She didn’t get sucked into elaborate fantasy worlds or high-adrenaline shooters—her issue was smartphone games like *Burger Shop* and *Words with Friends*. “I lost a good job six years ago, and maybe a contributing factor was being tired from being up until 3 a.m. playing games on my phone,” she said.

Therapy, prayer and traditional 12-step meetings didn’t provide much help. But when she met Adam, talking things over in a Chicago coffee shop, she found someone who understood her issues and kept her accountable when she tried to stop.

The woman said she played her last video game in 2015, though she still finds herself pulled toward text-based trivia games.

“It’s not that fun, but I think there’s still some dopamine in it,” she said. “Things are moving on my phone.”

As for Adam, he works as a computer programmer, a situation he jokes is similar to a recovering alcoholic working in a liquor store. Constant proximity to a screen has not led him back into uncontrollable play, he said, though he still fools around with simple computer games for a few minutes a week.

In the end, he sees himself as a recovering addict, but he says the label isn’t important. Video games were his deliverance from depression, loneliness and social anxiety.

When he finally dealt with those problems, he said, he didn't need the games anymore.

24. According to Passage A, Tencent plans to take the following anti-addiction measures EXCEPT _____.

- A) an increased requirement for real-name registration
- B) an improved parental control system
- C) a limit on the sum of in-game purchases ✓
- D) a curfew on the players aged 12 and under

答案: C

25. The word *assuage* in Passage A is closest in meaning to _____.

- A) confront B) inspire C) fuel D) relieve ✓

答案: D

26. It can be learnt from Passage B that video game addiction _____.

- A) can be defined similarly as substance abuse addictions
- B) can be treated the same way used to treat most addictions ✓
- C) has exactly the same symptoms as substance abuse addictions
- D) has restricted withdrawal symptoms compared with other addictions

答案: B

27. According to Passage B, which of the following group of people are more likely to be addicted to video games?

- A) Those who are pessimistic.
- B) Those who are not socially skilled. ✓
- C) Those who cannot control their emotions.
- D) Those who are afraid of challenges in real life.

答案: B

28. The game addict Adam in Passage C has taken all the following ways to recover himself from game addiction EXCEPT _____.

- A) keeping himself away from computer ✓
- B) making his online gaming account unusable
- C) reducing his contact with game-loving friends
- D) forming a support group that follows recovering steps

答案: A

29. The 55-year-old Chicago woman in Passage C found it helpful for her recovery from game addiction when she had _____.

- A) found some creative things to do
- B) participated in 12-step meetings
- C) talked things over with Adam ✓
- D) received therapy and kept praying

30-31. Decide whether the statements are True or False according to the three passages.

答案: C

30. From Passage B and Passage C it can be inferred that many game addicts may get better if they can solve their social and emotional problems.

- A) True ✓
- B) False

答案: A

31. All the three passages point out the bad effects of game addiction and provide some solutions.

- A) True
- B) False ✓

答案: B

2017 初赛第二场

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: *Read the following quotes. Match the quotes with the people. Please note there are two extra options you do not need.*

- A. *Winston Churchill*
- B. *Stephen Hawking*
- C. *Aristotle*
- D. *Benjamin Franklin*
- E. *Hendrik van Loon*

1.

DAt twenty years of age, the will reigns; at thirty, the wit; and at forty, the judgment.

答案: D

2.

AI have nothing to offer but blood, toil, tears, and sweat.

答案: A

3.

EHistory is the mighty Tower of Experience, which Time has built amidst the endless fields of bygone ages.

答案: E

Question 4 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Effective naps aren't just shorter bouts of deep, nighttime sleep; they're lighter rest periods for the brain. "You don't want to nap too long because you start getting into deeper stages of sleep, and when you wake up from those naps, you feel tired and horrible and cranky," says Grandner, who's an assistant professor of psychiatry, psychology and medicine at the University of Arizona College of Medicine. For Strutner, a 25-year-old *Huffington Post* editor, just 20 minutes did the trick. Afterward, she says, "it's like a whole new day."

4. What is the best title for this text?

考试时的选项顺序

- | | |
|------------------|-----------------------------|
| A) To Nap or Not | B) Naps Make You Refreshed |
| C) Nap Briefly ✓ | D) Long Naps Are Exhausting |

原始的选项顺序

- A) Long Naps Are Exhausting B) Naps Make You Refreshed
- C) To Nap or Not D) Nap Briefly ✓

Question 5 (Suggested completion time: 2 minutes)

Directions: *Read the following book reviews and answer the question.*

"The Elements is a loving reimagination of the classic table." —Wired

"Gray's trademark dry wit and historical anecdotes bring even the most basic lumps to life." —Popular Science

"A great mix of science and art." —Discover

"The Elements is a photographic tour de force of items from Theo Gray's personal collection of element samples. If he were to put on a museum show or do a PBS series, this would be the companion book." —Gavin Scott

"Awesome book! Lots of neat facts to read and lots of photos to help with memorization! And the mini poster of the periodic table is a helpful

visual tool!" —T.M.

"I don't know if this is the first coffee-table book paying lush photographic homage to the periodic table, but it is certainly the most gorgeous one I've seen." —John Tierney, *The New York Times*

5. What is this book about?

考试时的选项顺序

- A) Architecture. B) Cookery.
C) Chemistry. ✓ D) Painting.

原始的选项顺序

- A) Architecture. B) Chemistry. ✓
C) Cookery. D) Painting.

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

"We have to think about hibernation and torpor as a continuum rather than discrete things," agrees Frank van Breukelen. He's a biologist at the University of Nevada in Las Vegas.

To scientists like him, torpor and hibernation all start with **metabolism**.

As animals slow their metabolism, body temperatures will drop. Slowing metabolism a little and for just a brief period produces slow-wave sleep. Slow it more and longer and it becomes torpor. Slow it dramatically for prolonged periods and you get hibernation.

The idea of such a hibernation continuum places all mammals on one continuous line. At one end are animals that never go torpid. People fit into this group. At the other end are bears, bats and other animals that may hibernate for months straight.

6. The word ***metabolism*** is closest in meaning to _____.

考试时的选项顺序

A) the rhythmic movement of the body in accordance with the environment

B) synthesis of chemical compounds with the aid of radiant energy and especially light

C) the different stages of sleep that overall determine one's sleep quality

D) the chemical processes occurring within a living cell or organism that are necessary for the maintenance of life ✓

原始的选项顺序

energy and especially light

B) the chemical processes occurring within a living cell or organism that are necessary for the maintenance of life ✓

C) the different stages of sleep that overall determine one's sleep quality

D) the rhythmic movement of the body in accordance with the environment

Question 7 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

In public education, the District of Columbia may be the nation's most interesting laboratory. It is the only city with two public school systems of roughly equal size, each with a different governance model. The results of this competition have profound implications for the future of public education nationwide.

The older of the two, the District of Columbia Public Schools, uses the "_____" governance model that emerged more than a century ago, in which the district operates all but one of its 113 schools and employs all the staff, with central control and most policies applied equally to most schools.

7. Which word may probably appear in the blank?

考试时的选项顺序

A) comprehensive B) advanced C) unified D) flexible
✓

原始的选项顺序

A) unified B) advanced C) comprehensive D) flexible
✓

Question 8 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Despite entering the fight as an out-of-sight underdog at +425 against the only eight-division champion in the sport's history, Horn surprised most fans by making it through all 12 rounds against Pacquiao—and then shocked everyone minutes later by being declared the winner. Horn landed far fewer punches than his favoured opponent, 93 to Pacquiao's 183, but the judges seemed to reward him for the aggressiveness he showed from the outset of round one.

In no way overwhelmed by the biggest bout of his career in front of 50,000-plus fans at Suncorp Stadium, Horn kept trying to land heavy punches on Pacquiao throughout the match. Despite that, it was Horn

who was in serious danger of being declared the loser after a round nine bludgeoning that prompted referee Mark Nelson to tell the Australian's corner that he was prepared to stop the fight if Horn didn't show him something in round 10.

8. Which sport does the text describe?

考试时的选项顺序

- A) Wrestling. B) Shooting. C) Boxing. D) Fencing.

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 40 minutes)

Question 11 (Suggested completion time: 5 minutes)

Directions: *Read the definition of the following logical fallacy, and answer the question according to the definition.*

Slippery Slope

A *slippery slope* argument attempts to discredit a proposition by arguing that its acceptance will undoubtedly lead to a sequence of events, one or more of which are undesirable. Although the sequence of events may be possible (each transition occurring with some probability), this type of argument assumes that every transition is inevitable while providing no evidence in support of that. This fallacy plays on the fears of an audience and is related to a number of other fallacies, such as *the appeal to fear*, *false dilemma*, and *the argument from consequences*.

11. Which of the following provides a typical example of *slippery slope*?

考试时的选项顺序

- A) Happiness is the highest good for a human being, since all other values are inferior to it.
- B) Most of my friends say they stopped thinking about philosophy the minute they got through the semester, so I know this class is worthless.
- C) Today late for ten minutes, tomorrow late for an hour, and

then someday you will simply cease to show up. ✓

D) Medical student: "No one objects to a physician looking up a difficult case in medical books. Why, then, shouldn't students taking a difficult examination be permitted to use their textbooks?"

原始的选项顺序

A) Happiness is the highest good for a human being, since all other values are inferior to it.

B) Medical student: "No one objects to a physician looking up a difficult case in medical books. Why, then, shouldn't students taking a difficult examination be permitted to use their textbooks?"

C) Today late for ten minutes, tomorrow late for an hour, and then someday you will simply cease to show up. ✓

D) Most of my friends say they stopped thinking about philosophy the minute they got through the semester, so I know this class is worthless.

Question 12 (Suggested completion time: 5 minutes)

Directions: *Look at the following picture and then answer the question.*

12. Which of the following logical fallacies does the picture illustrate?

考试时的选项顺序

A) *Hasty Generalization*: a fallacy committed when one forms a conclusion from a sample that is either too small or too special to be representative ✓

B) *False Dilemma*: an argument that presents a limited set of two possible categories and assumes that everything in the scope of the discussion must be an element of that set

C) *Guilt by Association*: a fallacy used to discredit an

argument for proposing an idea that is shared by some socially demonized individual or group

D) *No True Scotsman*: an argument coming up after someone has made a general claim about a group of things and then been presented with evidence challenging that claim

原始的选项顺序

Questions 13-14 Challenge your brain. (Suggested completion time: 5 minutes)

Question 13

Directions: *The following brain teasers are to sharpen brains. Your goal is to find a third word that is connected or associated with the two words given.*

For example: LOCK – PIANO ____key____

13. EGYPTIAN – MOTHER Mummy

Question 14

Directions: *Read the following text and answer the question according to the text.*

Anderson, Biggs, and Carpenter were staying together at a place by the seaside. One day they went out in a boat and were a mile at sea when a rifle was fired on shore in their direction. It seems that Anderson only heard the report of the gun, Biggs only saw the smoke, and Carpenter merely saw the bullet strike the water near them.

答案: Mummy

14. Which of them first knew of the discharge of the rifle?

考试时的选项顺序

A) Carpenter **B) Biggs ✓** C) Anderson

原始的选项顺序

A) Anderson **B) Biggs ✓** C) Carpenter

Questions 15-17 (Suggested completion time: 7 minutes)

Directions: *Read the text about the toco toucan and answer the questions according to the text.*

Measuring 63.5 cm (25 in.) in length, the toco toucan is the largest of all toucans. Its black body and white throat are overshadowed by its most recognizable trait: a large colorful beak.

The bright orange beak is about 19 cm (8 in.) long—one third of the bird's total length. But despite its substantial size, the beak weighs less than you may think. Composed of the protein keratin, the structure of beak incorporates many air pockets allowing for a very low mass.

Furthermore, recent research has concluded that toucans regulate body temperature by adjusting the flow of blood to their beak. More blood flow means more heat is released. When toucans sleep, they tuck their beak under their feathers to keep them warm.

Toco toucans also use their beaks to pluck and peel fruit, their main source of food. In addition, the beak houses a flat tongue of the same length, which helps the toucan catch insects, frogs, and reptiles. Toco

toucans also occasionally eat the eggs of other birds.

Although they spend a lot of time in trees, they are not very good at flying. Toucans mainly travel among trees by hopping. When they do take flight, they flap their wings vigorously and glide, traveling only short distances.

Toucans nest in the hollows of trees. They often move into *cavities* created and abandoned by woodpeckers.

Several toucans live together in a single hollow. It is in these hollows that they lay their eggs, generally two to four a year. Both parents incubate the eggs for 16-20 days. Once the chicks hatch, both parents continue to care for the young. Baby toucans are not born with an excessively large beak; their beaks grow as the birds develop.

15. Which of the following pictures is a toco toucan according to the text?

考试时的选项顺序

A)

B)

✓

C)

D)

原始的选项顺序

A)

B)

✓

C)

D)

16. Which of the following descriptions is NOT true about toco toucans' beaks?

考试时的选项顺序

A) A high mass means the beaks containing sufficient protein

keratin. ✓

B) The beak is composed of many air pockets which lower its weight.

C) Toco toucans can remove the skin from the fruit with their beak.

D) Toco toucans use their beaks as a radiator to remove heat from their blood.

原始的选项顺序

A) Toco toucans use their beaks as a radiator to remove heat from their blood.

B) Toco toucans can remove the skin from the fruit with their beak.

C) A high mass means the beaks containing sufficient protein keratin. ✓

D) The beak is composed of many air pockets which lower its weight.

17. The word **cavities** in Paragraph 6 is closest in meaning to _____ .

考试时的选项顺序

A) nests B) hatches C) branches D) hollows
✓

原始的选项顺序

A) hollows B) branches C) nests D) hatches
✓

Question 18 (Suggested completion time: 5 minutes)

Directions: Read the text about a famous experiment in history, and

answer the question according to the text.

The Milgram Experiment

Humans could be trained to take directions from authority figures. An experiment conducted in 1961 by Yale University psychologist Stanley Milgram measured this willingness to obey authority figures by instructing people to perform acts that conflicted with their morals. Participants were told to play the role of “teacher” and administer electric shocks to “the learner,” who was supposedly in a different room, every time they answered a question incorrectly. In reality, no one was actually being shocked. Instead, Milgram played recordings to make it sound like the learner was in a great deal of pain and wanted to end the experiment. Despite these protests, many participants continued the experiment when the authority figure urged them to, increasing the voltage after each wrong answer until some eventually administered what would be lethal electric shocks. Similar experiments conducted since the original have provided nearly identical results, indicating that people are willing to go against their consciences if they are being told to do so by authority figures.

18. According to the text, we can know that the “teacher” ____.

考试时的选项顺序

- A) acted as the authority figures
- B) was the experiment subject ✓
- C) didn' t administer shocks
- D) was from Yale University

原始的选项顺序

- A) was from Yale University
- B) didn' t administer shocks
- C) acted as the authority figures
- D) was the experiment subject ✓

Questions 19-21 (Suggested completion time: 7 minutes)

Directions: *Read the text about a science discovery, and answer the questions according to the text.*

Language & Personality

If you overheard a conversation on a bus, do you think you could tell, from the words that were used and the topics discussed, the personality of the people who were chatting? What about if I showed you a short story? Could you glean something about the character of the author

from their language?

We're often reminded "choose your words carefully" —it turns out the words themselves may reveal far more than what we're actually trying to say. There's mounting evidence that our personality is written, quite literally, in the language that we use, from the tweets we send to our choice of email address.

Not all findings are particularly surprising. Those who score highly on extroversion really are a lot louder and chattier than their more introverted peers. They also tend to speak more quickly. Female extroverts, but not males, are more likely to have group chats, while introvert men (but not women) spend more time talking to themselves.

Introverts and extroverts also use language very differently. A few years ago, a group of researchers led by Camiel Beukeboom at VU University, Amsterdam, asked a group of 40 volunteers to look at photos of different social situations and describe out loud what was going on. They found that extroverts' language tended to be more abstract and "loose", while introverts spoke in more concrete terms. In other words, introverts tend to be a lot more specific.

In line with this, other research has found that introverts tend to use more articles ("the" / "a")—which, by definition, refer to individual objects or events. They also tend to be more cautious in their language: that is, they use more hedging ("perhaps" , "maybe"), and more quantifiable terms, such as referring to specific numbers.

All of this makes psychological sense. Most extroverts enjoy the fast life, being more likely to drink, sleep around and take risks than introverts; every time they open their mouths, too, extroverts are prepared to take greater risks with the accuracy, spontaneity and reach of what they say.

The links between personality and language also extend to the written word. When Jacob Hirsh and Jordan Peterson from the University of Toronto asked students to write about past experiences and future goals, they found that those who scored higher in extroversion tended to make more mention of words pertaining to relationships, which makes sense, the researchers said, as extroverts are "active social explorers" .

But it' s not just about extroversion vs introversion. Their language also revealed other aspects of their personalities — including how open-minded they were (the liberal used more words pertaining to the senses), how neurotic (the highly strung referred more often to

emotional angst) and how conscientious (more diligent students used more achievement and work-related words).

19. Tweets can reveal more information about personality than emails.

- A) True B) False ✓

答案: B

20. Extroverts would say: "This article is excellent" rather than "This article is very informative" .

- A) True ✓ B) False

答案: A

21. According to the text, the correct order of the statements should be_____ .

1). The open-minded say:	
2). The neurotic say:	a. "We can work on it."
3). The conscientious say:	b. "You just need to be heard."
	c. "I carry around a monstrous sadness."

- A) 1). a; 2). c; 3). b B) 1). b; 2). c; 3). a ✓
- C) 1). b; 2). a; 3). c D) 1). c; 2). a; 3). b

答案: B

Questions 22-23 (Suggested completion time: 6 minutes)

Directions: *Read the text about drones and answer the questions according to the text.*

Drones Are Everywhere Now

But How Did They Get Their Name?

When did unmanned aircraft become known as drones? It was probably earlier than you think.

Unmanned aerial vehicles (UAV) were used during World War II as targets for fighters and antiaircraft guns, which had to have something to practice with. These radio-controlled aircraft were called RPVs, or “remotely piloted vehicles,” but their military creators and users soon

gave up the acronym for something a little more prosaic.

There were two meanings for “drone” then: a “male bee,” or a
“monotonous, sustained sound.” 22

The aircraft’s function can clue you in: it’s an extension of the “bee” meaning. Drones are bigger and heavier than worker bees, and they leave the hive and swarm in the fall. They are renowned for a sort of mindless, driven existence: they don’t gather honey, they don’t defend or maintain the hive, and their only purpose is to impregnate a queen bee.

Using “drone” for the RPVs emphasized the fact that they had no mind of their own. And no doubt the buzzing flight of an RPV also reminded them of another flying buzzer.

The word “drone” was first used of an UAV in 1946, but advances in drone technology in the past few years have made the term much more common. And while they may have no mind of their own, they may soon be connected to yours and be controlled by brainwaves.

22. Which of the following best fits in the numbered space in Paragraph 3?

考试时的选项顺序

- A) Both of the meanings have been constantly used.
- B) But one meaning is distinct from the other.
- C) The term “drone” becomes the ideal choice.
- D) Which was the inspiration for applying the term? ✓

原始的选项顺序

- A) Both of the meanings have been constantly used.
- B) Which was the inspiration for applying the term? ✓
- C) But one meaning is distinct from the other.
- D) The term “drone” becomes the ideal choice.

23. From the text, we can know that _____.

考试时的选项顺序

- A) the popularity of drones is largely due to their novelty
- B) drones could be auto-controlled in the near future
- C) human brainwaves will help drones to “think” ✓
- D) the design of drones resembles worker bees

原始的选项顺序

- A) the design of drones resembles worker bees

B) human brainwaves will help drones to “think” ✓

C) the popularity of drones is largely due to their novelty

D) drones could be auto-controlled in the near future

Directions: In Part III, you will read three passages on the same subject.

You are required to identify the writer’s position and evaluate the effectiveness of the writer’s arguments. (Time allowed: 30 minutes)

Questions 24-31 (Suggested completion time: 30 minutes)

Directions: *Read three passages about the sharing economy. Answer the questions according to the passages.*

Passage A

Bike-sharing startups in China sport a parade of colorful branding for their nifty-looking bikes—orange for Mobike and yellow for ofo, to name two market leaders among some 30 companies that have jumped into this sector. The race is on for dominance just as it has been with taxi-hailing services.

Mobike has drawn more than \$300 million from Temasek, Hillhouse Capital, Sequoia Capital and Tencent’s Xuanwu Lab. ofo, its chief rival, has attracted \$450 million from Didi Chuxing and DST—not to mention a plug by Apple CEO Tim Cook, who recently visited and rode a bike at ofo.

You might say, bike sharing is nothing all that new or exciting. After all, bike-sharing services have popped up in New York City and London.

But the business model and technology for bike sharing in China is more advanced than in the West—one more sign of that skillful Chinese micro-innovating gene. In China, you can drop your rented bike wherever you want to instead of at an assigned docking station—thanks to GPS technology that locates and tracks the position for each bicycle.

In Beijing and Shanghai, bikes are being dropped randomly at street corners, subway stations, campuses, restaurants, shopping malls and you name it. These branded bikes are starting to crowd city sidewalks so much now that talk is that government regulations could be coming to control parking of the bikes only in authorized specific zones.

Just as with Uber and Didi, you can bet that this new startup craze will see price wars and battles to the finish to win—whether it’s an acquisition or an IPO (initial public offering: a company’s first stock offering to the public). Already, these bike-sharing entrants are trying out new business tactics to tackle some of the challenges of bike-sharing efficiency.

On a panel I moderated recently at Peking University, Mobike CTO (Chief Technology Officer) and co-founder Joe Xia said the company is having initial success with a recently introduced red packet promotion that rewards bikers for returning their bikes to a designated parking spot. Clever!

The bike-sharing services are starting to go global too—at least where flat landscapes and city density makes bicycles a popular form of transportation. Mobike is venturing outside China by entering the Singapore market. To be sure, Mobike does not have an open road—it will compete with Singapore’s own O Bike, as other Asian markets begin to adapt this new startup trend.

Passage B

Most sharing economy websites advertise their green credentials, and many users care about their ecological impact. The ecological benefits of sharing are often seen as obvious: secondary markets reduce demand for new goods, so footprints go down. Staying in existing homes reduces the demand for new hotels just as tool-sharing reduces new tool purchases. However, despite the widespread belief that the sector helps to reduce carbon emissions, there are almost no comprehensive studies of its impact. At this point, they are long overdue.

An exception is a recent study of car-sharing. It found a measurable reduction in greenhouse gas emissions, but only because of substantial reductions from a small fraction of households. For the majority, car-sharing, by expanding access to cars, increased emissions.

The ordinary assumptions about ecological impacts are generally about the first, visible shifts made by a consumer—purchasing used products rather than new ones, or staying in a private home rather than a hotel. To assess overall ecological impacts, however, we have to consider ripple effects. What does the seller or the host do with the money earned? She may use the money to buy high-impact products. Does the appearance of a market for used goods lead people to buy more new things that they

intend to sell later? If travel becomes less expensive, do people do more of it? All of these effects raise ecological and carbon footprints.

There is also the question of impacts at the level of the economy as a whole. The platforms are creating new markets that expand the volume of commerce and boost purchasing power. The larger, for-profit companies are claiming to generate substantial business and income for their providers. If so, they are likely to create economic activity that would not have existed otherwise—more travel, more private automobile rides—and not just shifting purchasing from one type of provider to another. My students and I have found that Airbnb users are taking more trips now and that the availability of cheap ride services is diverting some people from public transportation. That means the platforms result in higher carbon emissions, because their services use energy. The companies can't have it both ways—creating new economic activity and reducing carbon emissions—because the two are closely linked.

Passage C

The uniqueness of the sharing economy poses several new challenges for regulators in countries across the world. The inherent objective of regulating such sectors is to encourage competition that will eventually lead to innovation, lower costs, and better products and services.

Regulators are inherently reactive, and very slow to respond to changes in the sharing economy. 28

In the digital age, technological advancements bring increasing efficiency. However, existing regulatory organizing bodies lack coordination between the different levels of the government. The lack of a collaborative system results in confused mixes of policies that trickle down through official levels. One such example is Uber being branded as an illegal “bandit taxi-service” in the city of Ottawa. Municipal employees are not provided reimbursement if travelling by an Uber, even though their travel allowance covers licensed taxis. In the Canadian federal government, policy responses are not yet concrete even though they are aware that their own employees take Uber to get to work. Political parties have not identified an approach to regulating the sharing economy.

In India, the High Court of Delhi has asked the government of India to develop guidelines for regulating taxi cab aggregators. This is an important exercise which needs to be based on real world data and also needs a simple enforcement mechanism. The more stringent the regulatory guidelines, the higher the regulatory capacity must

be to monitor and enforce these guidelines.

Regulation should only be changed when there is an immediate need, such as market failure. There is no such need for the sharing economy.

Commercial activities in the sharing economy blur lines between the personal and professional. For example, most Airbnb hosts are not professional hoteliers, and a large fraction of Lyft and Uber drivers are not professional drivers and are only active on the platform fewer than fifteen hours per week. Applying a regulatory regime to these businesses might create an entry barrier. Absence of regulations, on the other hand, can lead to more part-time supply and that forms part of a self-regulatory solution.

24. According to Passage A, what makes the bike sharing in China different from the West?

考试时的选项顺序

- A) The bikes are attractive in appearance.
- B) The number of bikes is enormous.
- C) It is very cheap to rent a bike.
- D) No assigned docking station is needed. ✓

原始的选项顺序

- A) No assigned docking station is needed. ✓
- B) The bikes are attractive in appearance.
- C) It is very cheap to rent a bike.
- D) The number of bikes is enormous.

25. What kind of attitude does the author have towards the red packet promotion introduced by Mobike in Passage A?

考试时的选项顺序

- A) Skeptical
- B) Ambivalent
- C) Critical
- D) Favorable ✓

原始的选项顺序

- A) Ambivalent
- B) Critical
- C) Skeptical
- D) Favorable ✓

26. It can be inferred from Passage B that car-sharing business may increase carbon emissions because _____.

考试时的选项顺序

- A) more cars will be purchased
- B) people will travel a lot more
- C) private cars will be used more ✓
- D) taxi drivers will work longer hours

原始的选项顺序

- A) people will travel a lot more
- B) private cars will be used more ✓
- C) taxi drivers will work longer hours
- D) more cars will be purchased

27. The author of Passage B holds the following views EXCEPT that_____.

考试时的选项顺序

- A) most people overlook the impact of sharing economy ✓
- B) carbon emission will be increased by sharing economy
- C) sharing economy has created more economic activities
- D) more comprehensive studies should have been done

原始的选项顺序

- A) sharing economy has created more economic activities
- B) carbon emission will be increased by sharing economy
- C) most people overlook the impact of sharing economy ✓
- D) more comprehensive studies should have been done

28. Which of the following best fits in the numbered space in Passage C?

考试时的选项顺序

- A) They play a catch-up role. ✓
- B) They find it unnecessary.
- C) They need more data.
- D) They are reluctant to do so.

原始的选项顺序

- A) They play a catch-up role. ✓
- B) They are reluctant to do so.
- C) They find it unnecessary.
- D) They need more data.

29. According to Passage C, we can infer that the regulation the sharing economy needs should_____.

考试时的选项顺序

- A) encourage
- B) establish entry

competition ✓ barriers
C) quickly respond to D) create more part-time
changes jobs

原始的选项顺序

A) quickly respond to B) establish entry
changes barriers
C) encourage D) create more part-time
competition ✓ jobs

30. Which of the following types of sharing economy is mentioned in all three passages?

考试时的选项顺序

A) tool B) bike C) home D) car
sharing sharing sharing sharing ✓

原始的选项顺序

A) bike B) car C) tool D) home
sharing sharing ✓ sharing sharing

31. Which of the following statements about sharing economy is TRUE according to the three passages?

考试时的选项顺序

A) Sharing economy brings about challenges as well as chances. ✓
B) Authority regulations are badly needed for sharing economy.
C) Uber, Airbnb and Mobike have been successful worldwide.
D) China has become a leading country in sharing economy.

原始的选项顺序

A) Uber, Airbnb and Mobike have been successful worldwide.
B) China has become a leading country in sharing economy.
C) Authority regulations are badly needed for sharing economy.
D) Sharing economy brings about challenges as well as chances. ✓

2017 初赛第三场

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: Read the following quotations. Match the quotes with the people. Please note there are three extra options you do not need.

- A. Franklin Roosevelt
- B. Francis Bacon
- C. Socrates
- D. Oscar Wilde
- E. Plato
- F. Winston Churchill

1.

A The only limit to our realization of tomorrow will be our doubts of today.

答案: A

2.

D There is only one thing in the world worse than being talked about, and that is not being talked about.

答案: D

3.

C Other men live to eat, while I eat to live.

答案: C

Question 4 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Oddly in synch with the narrative strategy (though without the imposing visual panache) of *Dunkirk*, the other historical drama of the moment, director Kathryn Bigelow's *Detroit*, is an artfully frazzled mosaic of suffering, putting the audience through the wringer in the name of truth, injustice and what many see, still, as the American way with police brutality.

4. Where is the piece of text most probably taken from?

考试时的选项顺序

A) a	B) a	C) a	D) a
novel	poster	report	review ✓

原始的选项顺序

A) a	B) a	C) a	D) a
------	------	------	------

poster review ✓ report novel

Question 5 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Your speech may, um, help reveal if you're uh ... developing thinking problems. More pauses, filler words and other verbal changes might be an early sign of mental decline, which can lead to Alzheimer's disease, a study suggests.

Researchers had people describe a picture they were shown in taped sessions two years apart. Those with early-stage mild cognitive impairment slid much faster on certain verbal skills than those who didn't develop thinking problems.

5. What is the most probable title of the text?

考试时的选项顺序

A) The Relationship between Speech and Mental Decline.

✓

B) The Relationship between Memory and Speech Problems.

C) The Relationship between Language and Signs.

D) The Relationship between Words and Thoughts.

原始的选项顺序

A) The Relationship between Language and Signs.

B) The Relationship between Words and Thoughts.

C) The Relationship between Speech and Mental Decline.

✓

D) The Relationship between Memory and Speech Problems.

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

When you eat is important for weight loss. Starving all day and eating a big meal at the end of the day is counterproductive. No matter how nutritious a meal is, if eaten too late in the day, one does not have the time to burn it off and use it for fuel for the day. It ends up being stored in a body gas tank (the fat cells) you can't readily access.

6. Which of the following statements is TRUE according to the text?

考试时的选项顺序

A) Staying away from big meals can burn off fat.

B) A nutritious meal leaves excess fat in the body.

C) Eating late at night leads to gaining weight. ✓

D) Going on a diet is good for weight loss.

原始的选项顺序

- A) Going on a diet is good for weight loss.
- B) Eating late at night leads to gaining weight. ✓
- C) A nutritious meal leaves excess fat in the body.
- D) Staying away from big meals can burn off fat.

Question 7 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

To assess the state of drinking water throughout the US, the Environmental Working Group (EWG) obtained data from state agencies and the Environmental Protection Agency for testing conducted from 2010 to 2015. A total of 48,172 utilities from all 50 states were included in the study.

The EWG analysis uncovered 267 contaminants out of the 500 tested drinking water samples. The chemicals included 93 that the EWG says are linked to an increased risk of cancer, 78 that have been tied to brain and nervous system damage, 63 associated with developmental harm to children and fetuses, and dozens of others that may be implicated in fertility or hormonal problems. The levels of the contaminants are not necessarily high enough to cause any of this damage, and many of these links are not proven as causative.

7. Which of the following might be talked about in the next paragraph?

考试时的选项顺序

- A) How certain diseases are related to the contaminants.
- B) How to get rid of the contaminants in the drinking water.
- C) Further analyses of the sources of the contaminants.
- D) The reasons to be worried about the contaminants. ✓

原始的选项顺序

- A) The reasons to be worried about the contaminants. ✓
- B) How to get rid of the contaminants in the drinking water.
- C) Further analyses of the sources of the contaminants.
- D) How certain diseases are related to the contaminants.

Question 8 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

If you came of age in the 1980s, chances are you still use the word “tape” when it comes to recording your favorite music or TV shows, as in, “I’m not going to be home tonight to watch *Knight Rider*. Could you tape it for me?” With the advent of digital media, there’s obviously no longer a need to record anything on magnetic tape, but still, old linguistic habits XXXX.

8. Which of the following phrases is the most suitable to replace XXXX?

考试时的选项顺序

- A) die B) change C) die D) change
hard ✓ off out over

原始的选项顺序

- A) die B) die C) change D) change
out hard ✓ off over

Question 9 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Some parts of the fossil fuel industry will no doubt try to sabotage the electric car revolution. In the United States, the industry is lobbying states to eliminate subsidies for the vehicles. And many analysts expect the industry to seek similar changes at the federal level from President Trump and Republican leaders in Congress, who have already made clear that they do not see climate change as a major threat. They should know, though, that the most they can do is slow down the process. The electric car has already left the garage.

9. What is the author’s point of view about electric cars?

考试时的选项顺序

- A) They will sabotage the fossil fuel industry.
B) They will become a trend in the future. ✓
C) They will pose a major threat to climate.
D) They will not be subsidized by the government.

原始的选项顺序

- A) They will not be subsidized by the government.
B) They will sabotage the fossil fuel industry.
C) They will pose a major threat to climate.
D) They will become a trend in the future. ✓

Question 10 (Suggested completion time: 5 minutes)

Directions: The line chart shows the proportion of fish stocks within their safe biological limits from 1974 to 2011 and fish landings from 1970 to 2013. Answer the question according to the information in the chart.

Proportion of fish stocks within their safe biological limits, 1974–2011 (percentage) and fish landings, 1970–2013 (millions of metric tons)

(Source: The Millennium Development Goals Report, 2015).

10. Choose the INCORRECT description about the chart.

考试时的选项顺序

- A) The period from 1990 to 2013 has witnessed the rise of the total marine catch brought ashore globally.
- B) The percentage of fish stocks that remain within safe biological limits has been falling over time.
- C) The chart demonstrates that the global fish catch has an impact on the productivity of fish stocks.
- D) Starting from 1985, fish stocks have been below the level at which they can produce maximum sustainable yields. ✓

原始的选项顺序

- A) The percentage of fish stocks that remain within safe biological limits has been falling over time.
- B) The period from 1990 to 2013 has witnessed the rise of the total marine catch brought ashore globally.
- C) Starting from 1985, fish stocks have been below the level at which they can produce maximum sustainable yields. ✓
- D) The chart demonstrates that the global fish catch has an impact on the productivity of fish stocks.

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 40 minutes)

Questions 11-12 (Suggested completion time: 10 minutes)

Directions: *Read the definitions of two types of logical fallacy. Answer the questions according to the definitions.*

Sweeping Generalization

In the *sweeping generalization* fallacy, the error lies in making a general statement without qualifying it so that it appears to include all cases. By making a sweeping statement and expecting it to be true in every specific instance, the result is stereotyping. The problem is that the sweeping statement may be true in many cases, but it is not necessarily true in every case. Thus the conclusion would be invalid for those exceptions.

Misleading Vividness

A *misleading vividness* is a fallacy in which anecdotal evidence (or a single vivid image, report, or experience) is offered as proof—in particular, when a small number of dramatic events are allowed to outweigh a significant amount of statistical evidence that supports an opposing view.

11. Which of the following provides a typical example of *sweeping generalization*?

考试时的选项顺序

A) The universe could not have been created from nothing, so it must have been created by an intelligent life force.

B) Protein is found in meat, poultry, fish, eggs and dairy products, so non-vegetarians get enough protein. ✓

C) There is intelligent life in outer space, for no one has been able to prove that there isn't. I know that every action we perform is predetermined because no one has proved that we have free will.

D) This is the way we have always acted or believed. This is what our ancestors did or believed. Therefore, it is the way we should act or believe.

原始的选项顺序

A) Protein is found in meat, poultry, fish, eggs and dairy products, so non-vegetarians get enough protein. ✓

B) This is the way we have always acted or believed. This is what our ancestors did or believed. Therefore, it is the way we should act or believe.

C) There is intelligent life in outer space, for no one has been

able to prove that there isn't. I know that every action we perform is predetermined because no one has proved that we have free will.

D) The universe could not have been created from nothing, so it must have been created by an intelligent life force.

12. Which of the following provides a typical example of *misleading vividness*?

考试时的选项顺序

A) If we don't reduce public spending, our economy will collapse.

B) Since it costs more, it must be better.

C) You should drive on the right side of the road because that is what the law says, and the law is the law.

D) Violent crime is up in our schools. Don't you remember hearing about the awful shooting in that school last month? ✓

原始的选项顺序

A) Since it costs more, it must be better.

B) If we don't reduce public spending, our economy will collapse.

C) You should drive on the right side of the road because that is what the law says, and the law is the law.

D) Violent crime is up in our schools. Don' t you remember hearing about the awful shooting in that school last month? ✓

Question 13 (Suggested completion time: 4 minutes)

Directions: *Read the text and answer the question according to the text.*

One morning the chairman of a company was leaving on business trip and found he had left some paperwork at his office. He ran into his office to get it and the night watchman stopped him and said, "Sir, don' t get on the plane. I had a dream last night that the plane would crash and everyone would die!" The man took his word and canceled his trip. Sure enough the plane crashed and everyone on it died. The next morning the man gave the watchman a \$1,000 reward for saving his life and then fired him.

13. Which is the most probable reason that the chairman fired the watchman?

考试时的选项顺序

A) The chairman blamed the watchman for the air crash.

B) The watchman was fired for sleeping on the job. ✓

- C) The watchman might be a symbol for bad luck.
- D) The chairman was scared of the watchman' s intention.

原始的选项顺序

- A) The watchman might be a symbol for bad luck.
- B) The watchman was fired for sleeping on the job. ✓
- C) The chairman blamed the watchman for the air crash.
- D) The chairman was scared of the watchman' s intention.

Question 14 (Suggested completion time: 4 minutes)

Directions: *Read the text and answer the question according to the text.*

14. Sylvia the check-out girl is trying to solve a word game. It reads,
“Loops is to spool as drawer is to _____” .

考试时的选项顺序

- A) reward ✓
- B) contents
- C) bureau

原始的选项顺序

- A) contents
- B) reward ✓
- C) bureau

Questions 15-17 (Suggested completion time: 6 minutes)

Directions: *Read the text about “petrichor” and answer the questions according to the text.*

Australia' s CSIRO (The Commonwealth Scientific and Industrial Research

Organisation) has come up with some pretty amazing inventions over the past 86 years of research, from “polymer banknotes” to “insect repellent” and the world-changing “Wi-Fi”. But we can also lay claim to something a little more esoteric—they actually invented a whole new word.

And no, they’re not talking about one of these new-fangled internet words like “YOLO”, “selfie” or “totes”.

The word is “petrichor”, and it’s used to describe the distinct scent of rain in the air. Or, to be more precise, it’s the name of an oil _____ 15 _____.

This heady smell of oncoming wet weather is something most Australians would be familiar with—in fact, some scientists now suggest that humans inherited an affection for the smell from ancestors who relied on rainy weather for their survival.

Origins

Even the word itself has ancient origins. It’s derived from the Greek “petra” (stone) and “ichor” which, in Greek mythology, is the ethereal blood of the gods.

But the story behind its scientific discovery is a lesser known tale. So, how is it that CSIRO came to find this heavenly blood in the stone?

“Nature of Argillaceous Odour” might be a mouthful, but this was the name of the paper published in the *Nature* journal of March 7, 1964, by CSIRO scientists Isabel Bear and Richard Thomas, that first described petrichor.

Thomas had for years been trying to identify the cause for what was a long-known and widespread phenomenon. As the paper opened: “That many natural dry clays and soils evolve a peculiar and characteristic odour when breathed on, or moistened with water, is recognised by all the earlier text books of mineralogy.”

The odour was particularly prevalent in arid regions and was widely recognised and associated with the first rains after a period of drought.

The paper went on to say: “There is some evidence that drought-stricken cattle respond in a restless matter to this ‘smell of rain’ ” .

The smell had actually been described already by a small perfumery industry operating out of India, which had successfully captured and absorbed the scent in sandalwood oil. They called it “matti ka attar” or “earth perfume” . But its source was still unknown to science.

15. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

A) that' s released from the earth into the air before rain begins

to fall ✓

B) that has been hydrogenated and is extracted from the soil

C) that may explain what makes rain on the Earth

D) that has been exposed to warm, dry conditions in the open

原始的选项顺序

A) that may explain what makes rain on the Earth

B) that has been hydrogenated and is extracted from the soil

C) that has been exposed to warm, dry conditions in the open

D) that' s released from the earth into the air before rain begins

to fall ✓

16. What is the text mainly about?

考试时的选项顺序

A) A new perfume which resembles the smell of rain.

B) The words that CSIRO has invented in recent years.

C) How CSIRO invented a new word about the smell of rain. ✓

D) The origin of a new word from the Greek mythology.

原始的选项顺序

A) A new perfume which resembles the smell of rain.

B) The words that CSIRO has invented in recent years.

C) The origin of a new word from the Greek mythology.

D) How CSIRO invented a new word about the smell of rain. ✓

17. What can we learn from the text?

考试时的选项顺序

A) The “earth perfume” is widely used in Australia today.

B) Our ancestors depended on rainy weather to live. ✓

C) “Petrichor” refers to the blood of gods in Greek tales.

D) CSIRO scientists have written papers about the new perfume.

原始的选项顺序

A) Our ancestors depended on rainy weather to live. ✓

B) “Petrichor” refers to the blood of gods in Greek tales.

C) The “earth perfume” is widely used in Australia today.

D) CSIRO scientists have written papers about the new perfume.

Questions 18-19 (Suggested completion time: 5 minutes)

Directions: *Read the text about smartphone. Answer the questions according to the text.*

No time to kill: How smartphone is pushing chewing gum out of fashion

Smartphone has changed not just the way people communicate but their whole lifestyle. For instance, just 10 years ago photographers were a small community, called shutter bugs, but now smartphone has made everyone a photographer. Smartphone has hit sales of cameras.

While smartphone pushing cameras out is a prominent trend, there are less visible changes that smartphone has brought in our life. One dramatic yet less visible change is fewer people chewing gum these days.

Smartphone is killing chewing gum. According to a market research firm *Euromonitor International*, global gum sales have declined 15 per cent since 2007—the year iPhone came out.

Why?

Smartphone does not leave enough time with people that they would need to while away with gum.

Chewing gum was a favourite way of passing time. Smartphone has filled every little window of free time we used to have before. Use of smartphone has crammed all the pockets of boredom or leisure one had between important jobs or while waiting for something.

According to a report, supermarket checkout lines—strategically stocked with magazines and candy—were for a long time a major point of sale for gum. Consumers waiting in line to pay would look around and make impulse buys.

Now, when people wait, they don't have to look around to find something to make themselves busy with or pass time. _____ 18 _____ Few people would reach for a pack of gum in boredom.

The chewing gum industry is fighting off the smartphone challenge with innovation. Companies keep coming out with variations on the plain-vanilla chewing gum of old times, such as sugar-free gums, gums

that also keep the teeth clean and mint gums that are used for deep mouth-freshening.

18. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

- A) Nothing needs to be noticed.
- B) The chewing gum ads catch all attention.
- C) They are smarter than before to be kept occupied.
- D) Smartphone is always there. ✓

原始的选项顺序

- A) Nothing needs to be noticed.
- B) Smartphone is always there. ✓
- C) The chewing gum ads catch all attention.
- D) They are smarter than before to be kept occupied.

19. What can we learn from the text?

考试时的选项顺序

- A) The chewing gum industry would win through better strategies.
- B) People are busier than before and don' t have time for leisure.
- C) The supermarket sales fell dramatically in recent years.

D) Smartphone has made the sales of cameras drop. ✓

原始的选项顺序

A) Smartphone has made the sales of cameras drop. ✓

B) The supermarket sales fell dramatically in recent years.

C) People are busier than before and don't have time for leisure.

D) The chewing gum industry would win through better strategies.

Questions 20-21 (Suggested completion time: 5 minutes)

Directions: *Read the abstract of a research paper. Decide whether the statements are True or False according to the abstract.*

Authors: Peijian (Paul) Sun, Lawrence Jun Zhang & Susan M. Gray

Published: *The Asia-Pacific Education Researcher* · March 2016

Abstract: Language learning strategies have drawn researchers' substantial attention since Rubin's (1975) and Stern's (1975) studies on "good language learners". Nevertheless, research pertaining to speaking strategies is inadequate, especially in relation to learning Chinese as second/foreign language (CSL/CFL). This study, therefore,

seeks to address this research gap with an initial attempt of developing an inventory for measuring CSL/CFL students' strategies in learning how to speak in L2 Chinese: The Speaking Strategy Inventory for Learners of Chinese (SSILC) as a second/foreign language. Given that this is the very first inventory of its kind, the purpose of our study is to validate it so that more teachers of CSL/CFL could be provided with a tool for assessing their L2 Chinese learners' use and development of speaking strategies. L2 Chinese learners will also be able to use it for monitoring their own progress. Two independent samples of 260 and 135 university L2 Chinese students responded to the SSILC. The data were then subjected to exploratory factor analyses (EFAs) and confirmatory factor analyses (CFAs), respectively. Results from both EFAs and CFAs provided support for a three-factor speaking strategy inventory with good psychometric properties. The three clusters of speaking strategies are *Expression Practice Strategies*, *Native-like and Involvement Strategies*, and *Assistance Strategies*. The correlations between the three clusters of speaking strategies and self-perceived speaking proficiency partially supported the predictive validity of the SSILC. Future research and pedagogical implications for classroom teachers are discussed.

20. Previous studies are inadequate to the strategies for learning Chinese as a second language, which is one of the reasons of the current research.

A) True ✓ B) False

答案: A

21. EFAs is the next step after CFAs to provide support for a three-factor speaking strategy inventory with good psychometric properties.

A) True B) False ✓

答案: B

Questions 22-23 (Suggested completion time: 6 minutes)

Directions: *Read the text about the tiny holes on airplane windows.*

Answer the questions according to the text.

Why Do Airplane Windows Have Tiny Holes?

It' s probably not what you think.

We' ve long espoused the benefits of booking the window seat, but spending enough time there, looking out of that more-or-less 9 x 12.5

inch quasi-rectangle, you'll begin to notice some things. How small the world looks from above. How the plane's wings glide through the clouds. Another thing? A tiny hole.

The hole isn't just there for aesthetic disruption. Instead, the hole—tiny as it may be—22. It all comes down to pressure: the higher the altitude, the lower the oxygen, which can leave people feeling ill and short of breath. (This will be a familiar experience, for example, for anyone who has recently climbed a mountain.) At a cruising altitude of 35,000 feet, the air pressure is so low that anyone would pass out if they were exposed to it, so a plane's cabin must be pressurized to be much greater than the outside air, reports *The Telegraph*. Good for passengers, yes, but not so great for the plane, which needs a way to release some of the strain this puts on the aircraft.

Look closely at your window, and you'll see that it's not just made up of one durable pane, but three. According to Mark Vanhoenacker, a British Airways pilot who writes for *Slate*, the innermost pane is mostly to protect the second and third panes, which are "designed to contain this difference in pressure between the cabin and the sky." The hole, then, allows pressure to be balanced out between the cabin and gap between panes. Another function of the airplane window hole? To release

moisture and minimize the frost or condensation blocking your view.

That' s good news for your Instagram.

22. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

- A) keeps passengers safe ✓
- B) is designed according to certain laws
- C) is for better air circulation
- D) keeps the window fog-free

原始的选项顺序

- A) keeps passengers safe ✓
- B) keeps the window fog-free
- C) is designed according to certain laws
- D) is for better air circulation

23. What can be inferred from the text?

考试时的选项顺序

- A) The window seat has been people' s preference when taking the airplane. ✓
- B) There are two panes in the airplane windows for multi-functions.

C) The tiny holes in the windows are more beneficial to the airplanes than to the passengers.

D) A plane' s cabin should be kept at the same pressure level as the outside air.

原始的选项顺序

A) There are two panes in the airplane windows for multi-functions.

B) The window seat has been people' s preference when taking the airplane. ✓

C) A plane' s cabin should be kept at the same pressure level as the outside air.

D) The tiny holes in the windows are more beneficial to the airplanes than to the passengers.

Directions: In Part III, you will read three passages on the same subject.

You are required to identify the writer' s position and evaluate the effectiveness of the writer' s arguments. (Time allowed: 30 minutes)

Questions 24-31 (Suggested completion time: 30 minutes)

Directions: Read three passages about the sharing economy. Answer the questions according to the passages.

Passage A

Bike-sharing startups in China sport a parade of colorful branding for their nifty-looking bikes—orange for Mobike and yellow for ofo, to name two market leaders among some 30 companies that have jumped into this sector. The race is on for dominance just as it has been with taxi-hailing services.

Mobike has drawn more than \$300 million from Temasek, Hillhouse Capital, Sequoia Capital and Tencent's Xuanwu Lab. ofo, its chief rival, has attracted \$450 million from Didi Chuxing and DST—not to mention a plug by Apple CEO Tim Cook, who recently visited and rode a bike at ofo.

You might say, bike sharing is nothing all that new or exciting. After all, bike-sharing services have popped up in New York City and London.

But the business model and technology for bike sharing in China is more advanced than in the West—one more sign of that skillful Chinese micro-innovating gene. In China, you can drop your rented bike wherever you want to instead of at an assigned docking station—thanks to GPS technology that locates and tracks the position for each bicycle.

In Beijing and Shanghai, bikes are being dropped randomly at street corners, subway stations, campuses, restaurants, shopping malls and you name it. These branded bikes are starting to crowd city sidewalks so much now that talk is that government regulations could be coming to control parking of the bikes only in authorized specific zones.

Just as with Uber and Didi, you can bet that this new startup craze will see price wars and battles to the finish to win—whether it's an acquisition or an IPO (initial public offering: a company's first stock offering to the public). Already, these bike-sharing entrants are trying out new business tactics to tackle some of the challenges of bike-sharing efficiency.

On a panel I moderated recently at Peking University, Mobike CTO (Chief Technology Officer) and co-founder Joe Xia said the company is having initial success with a recently introduced red packet promotion that rewards bikers for returning their bikes to a designated parking spot. Clever!

The bike-sharing services are starting to go global too—at least where flat landscapes and city density makes bicycles a popular form of transportation. Mobike is venturing outside China by entering the Singapore market. To be sure, Mobike does not have an open road—it will compete with Singapore's own O Bike, as other Asian markets begin to adapt this new startup trend.

Passage B

Most sharing economy websites advertise their green credentials, and many users care about their ecological impact. The ecological benefits of sharing are often seen as obvious: secondary markets reduce demand for new goods, so footprints go down. Staying in existing homes reduces the demand for new hotels just as tool-sharing reduces new tool purchases. However, despite the widespread belief that the sector helps to reduce carbon emissions, there are almost no comprehensive studies of its impact. At this point, they are long overdue.

An exception is a recent study of car-sharing. It found a measurable reduction in greenhouse gas emissions, but only because of substantial reductions from a small fraction of households. For the majority, car-sharing, by expanding access to cars, increased emissions.

The ordinary assumptions about ecological impacts are generally about the first, visible shifts made by a consumer—purchasing used products rather than new ones, or staying in a private home rather than a hotel. To assess overall ecological impacts, however, we have to consider ripple effects. What does the seller or the host do with the money earned? She may use the money to buy high-impact products. Does the appearance of a market for used goods lead people to buy more new things that they intend to sell later? If travel becomes less expensive, do people do more of it? All of these effects raise ecological and carbon footprints.

There is also the question of impacts at the level of the economy as a whole. The platforms are creating new markets that expand the volume of commerce and boost purchasing power. The larger, for-profit companies are claiming to generate substantial business and income for their providers. If so, they are likely to create economic activity that would not have existed otherwise—more travel, more private automobile rides—and not just shifting purchasing from one type of provider to another. My students and I have found that Airbnb users are taking more trips now and that the availability of cheap ride services is diverting some people from public transportation. That means the platforms result in higher carbon emissions, because their services use energy. The companies can't have it both ways—creating new economic activity and reducing carbon emissions—because the two are closely linked.

Passage C

The uniqueness of the sharing economy poses several new challenges for regulators in countries across the world. The inherent objective of regulating such sectors is to encourage competition that will eventually lead to innovation, lower costs, and better products and services.

Regulators are inherently reactive, and very slow to respond to changes in the sharing economy. ____28____

In the digital age, technological advancements bring increasing efficiency. However, existing regulatory organizing bodies lack coordination between the different levels of the government. The lack of a collaborative system results in confused mixes of policies that trickle down through official levels. One such example is Uber being branded as an illegal “bandit taxi-service” in the city of Ottawa. Municipal employees are not provided reimbursement if travelling by an Uber, even though their travel allowance covers licensed taxis. In the Canadian federal government, policy responses are not yet concrete even though they are aware that their own employees take Uber to get to work. Political parties have not identified an approach to regulating the sharing economy.

In India, the High Court of Delhi has asked the government of India to develop guidelines for regulating taxi cab aggregators. This is an important exercise which needs to be based on real world data and also needs a simple enforcement mechanism. The more stringent the regulatory guidelines, the higher the regulatory capacity must be to monitor and enforce these guidelines.

Regulation should only be changed when there is an immediate need, such as market failure. There is no such need for the sharing economy.

Commercial activities in the sharing economy blur lines between the personal and professional. For example, most Airbnb hosts are not professional hoteliers, and a large fraction of Lyft and Uber drivers are not professional drivers and are only active on the platform fewer than fifteen hours per week. Applying a regulatory regime to these businesses might create an entry barrier. Absence of regulations, on the other hand, can lead to more part-time supply and that forms part of a self-regulatory solution.

24. According to Passage A, what makes the bike sharing in China different from the West?

考试时的选项顺序

- A) The number of bikes is enormous.
- B) It is very cheap to rent a bike.
- C) The bikes are attractive in appearance.
- D) No assigned docking station is needed. ✓

原始的选项顺序

- A) No assigned docking station is needed. ✓
- B) The bikes are attractive in appearance.
- C) It is very cheap to rent a bike.
- D) The number of bikes is enormous.

25. What kind of attitude does the author have towards the red packet promotion introduced by Mobike in Passage A?

考试时的选项顺序

- A) Skeptical
- B) Ambivalent
- C) Critical
- D) Favorable ✓

原始的选项顺序

- A) Ambivalent
- B) Critical
- C) Skeptical
- D) Favorable ✓

26. It can be inferred from Passage B that car-sharing business may increase carbon emissions because _____.

考试时的选项顺序

- A) private cars will be used more ✓
- B) more cars will be purchased
- C) taxi drivers will work longer hours
- D) people will travel a lot more

原始的选项顺序

- A) people will travel a lot more
- B) private cars will be used more ✓
- C) taxi drivers will work longer hours
- D) more cars will be purchased

27. The author of Passage B holds the following views EXCEPT that _____.

考试时的选项顺序

- A) more comprehensive studies should have been done
- B) sharing economy has created more economic activities
- C) carbon emission will be increased by sharing economy
- D) most people overlook the impact of sharing economy ✓

原始的选项顺序

- A) sharing economy has created more economic

activities

- B) carbon emission will be increased by sharing economy
- C) most people overlook the impact of sharing economy ✓
- D) more comprehensive studies should have been done

28. Which of the following best fits in the numbered space in Passage C?

考试时的选项顺序

- A) They are reluctant to do so.
- B) They find it unnecessary.
- C) They play a catch-up role. ✓
- D) They need more data.

原始的选项顺序

- A) They play a catch-up role. ✓
- B) They are reluctant to do so.
- C) They find it unnecessary.
- D) They need more data.

29. According to Passage C, we can infer that the regulation the sharing economy needs should _____.

考试时的选项顺序

- | | |
|-------------------------------|-------------------------------|
| A) create more part-time jobs | B) encourage competition ✓ |
| C) establish entry barriers | D) quickly respond to changes |

原始的选项顺序

- | | |
|-------------------------------|-------------------------------|
| A) quickly respond to changes | B) establish entry barriers |
| C) encourage competition ✓ | D) create more part-time jobs |

30. Which of the following types of sharing economy is mentioned in all three passages?

考试时的选项顺序

- | | | | |
|------------------|------------------|------------------|-------------------|
| A) Tool sharing. | B) Home sharing. | C) Bike sharing. | D) Car sharing. ✓ |
|------------------|------------------|------------------|-------------------|

原始的选项顺序

- | | | | |
|---------|--------|---------|---------|
| A) Bike | B) Car | C) Tool | D) Home |
|---------|--------|---------|---------|

sharing. sharing. ✓ sharing. sharing.

31. Which of the following statements about sharing economy is TRUE according to the three passages?

考试时的选项顺序

- A) Authority regulations are badly needed for sharing economy.
- B) Sharing economy brings about challenges as well as chances. ✓
- C) China has become a leading country in sharing economy.
- D) Uber, Airbnb and Mobike have been successful worldwide.

原始的选项顺序

- A) Uber, Airbnb and Mobike have been successful worldwide.
- B) China has become a leading country in sharing economy.
- C) Authority regulations are badly needed for sharing economy.
- D) Sharing economy brings about challenges as well as chances. ✓

2018 初赛第一场

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: Read the following quotes and choose the correct author for each quote. Please note there are two extra options you do not need.

- A. Victor Hugo
- B. Ralph Waldo Emerson
- C. Friedrich Nietzsche
- D. Rabindranath Tagore
- E. Bertrand Russell

1. **C** It is my ambition to say in ten sentences what others say in a whole book.

答案: C

2. **E** There are two motives for reading a book; one, that you enjoy it; the other, that you can boast about it.

答案: E

3. **B** If we encounter a man of rare intellect, we should ask him what books he reads.

答案: B

Question 4 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

At business school, you' ll interact closely with talented individuals from all over the globe, which enhances the experience by exposing you to different business practices, cultures and points of view.

The connections you make are, for many, the single most valuable aspect of the MBA, so make sure you capitalize on the opportunities in and out of the classroom during your MBA studies. Your alumni network helps you stay connected to the university as well as to countless professional opportunities you can tap into throughout your career.

While the quality of the education at the most elite programs is guaranteed across the board, when you' re spending two years of your life and paying more than \$100,000, it' s the network of contacts you build that makes your MBA experience truly priceless.

4. Which of the following would be the best title for the text?

考试时的选项顺序

- A) How to Make Your MBA Study a Success
- B) Tuition for High-quality MBA Programs
- C) How to Build up Connections through MBA Programs
- D) Career Benefits from MBA Programs ✓

原始的选项顺序

- A) How to Make Your MBA Study a Success
- B) Career Benefits from MBA Programs ✓
- C) Tuition for High-quality MBA Programs
- D) How to Build up Connections through MBA Programs

Question 5 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

If you wait till you are old to discover that life is usually long enough to get plenty done if we make the right choices, it will be too late, Seneca thought. ① Having white hair and wrinkles doesn' t guarantee that an old person has spent much time doing anything worthwhile, even though some people mistakenly act as if it does. ② Someone who sets sail in a ship and is carried this way and that by stormy winds hasn' t been on a voyage. He' s just been tossed about a lot. ③ Being out of control, drifting through events without finding time for the experiences

that are most valuable and meaningful, is very different from truly living. ④

5. Which blank does the following sentence best fit in?

So it is with life.

考试时的选项顺序

A) ① B) ③ ✓ C) ④ D) ②

原始的选项顺序

A) ① B) ② C) ③ ✓ D) ④

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Kamenetz, lead digital education correspondent for National Public Radio, is the more soothing voice. She points out that not every child — or even every heavy screen user — will suffer ill effects. As with food allergies, “For lots of kids, a peanut is just a peanut.” She advocates an approach inspired by Michael Pollan’s well-known dictate on food: “Enjoy screens. Not too much. Mostly with others.” (Her most upsetting conclusion, echoed by Riley and the American Academy of Pediatrics, is that parents should watch alongside toddlers.)

6. What is Kamenetz’s attitude toward children’s screen time?

考试时的选项顺序

A) Except for little kids, screen time is not so worrisome. ✓

B) Excessive screen time leads to bad effects.

C) Even heavy screen users do not fall into troubles.

D) Too much screen time triggers food allergy.

原始的选项顺序

A) Excessive screen time leads to bad effects.

B) Too much screen time triggers food allergy.

C) Even heavy screen users do not fall into troubles.

D) Except for little kids, screen time is not so worrisome. ✓

Question 7 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

“Go now, before it’s too late.” They have been saying this about Cuba for years. But somehow, the Caribbean’s biggest island never seems to shed its charm — and those who know it best rarely believe it ever will.

Of course, more people than ever want to see the faded grandeur of Havana and the island’s enchanting coast and countryside — and who can blame them? But Cuba’s hotels aren’t always able to cope with demand, which is one of the reasons that this trip is so extraordinary. Avoid all the uncertainties of land touring in the most supremely

comfortable style possible: on board the world' s first Discovery Yacht, Scenic Eclipse.

7. What is the purpose of the text?

考试时的选项顺序

- A) To introduce a cruise line to Cuba. ✓
- B) To persuade tourists to go to the Caribbean.
- C) To make a complaint about Cuba' s hotels.
- D) To show the grandeur of Havana.

原始的选项顺序

- A) To show the grandeur of Havana.
- B) To introduce a cruise line to Cuba. ✓
- C) To persuade tourists to go to the Caribbean.
- D) To make a complaint about Cuba' s hotels.

Question 8 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

The latest study found people with a stronger grip could solve more logic problems in two minutes and remember more numbers from a list, as well as reacting more quickly to visual stimuli. Lead author Dr. Joseph Firth, an honorary research fellow at the University of Manchester, said:

“We can see there is a clear connection between muscular strength and brain health. But what we need now are more studies to test if we can actually make our brains healthier by doing things which make our muscles stronger — such as weight-training.”

8. What does Dr. Joseph Firth’s study tell us?

考试时的选项顺序

- A) Brain health can be improved by training muscles.
- B) Stronger handshake shows better brain health. ✓**
- C) Reaction has something to do with body health.

D) There is a connection between reaction and memory.

原始的选项顺序

A) Stronger handshake shows better brain health. ✓

B) Reaction has something to do with body health.

C) Brain health can be improved by training muscles.

D) There is a connection between reaction and memory.

Question 9 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Airbnb started in 2008 when co-founders Brian Chesky and Joe Gebbia launched a website to rent out two airbeds in their San Francisco apartment during a conference to make some extra cash. (Hence the website name, which stood for “airbed and breakfast”). The site’s popularity has taken even the co-founders by surprise.

“At first, we thought, surely you would never stay in a home because you wanted to, you would only stay there because it was cheaper,” Chesky told *the Atlantic* in 2013. “But that was such a wrong assumption. People love homes. That’s why they live in them. If we wanted to live in hotels, more homes would be designed like hotels.”

9. Why is Airbnb popular among customers?

考试时的选项顺序

- A) Customers enjoy staying in home-like places. ✓
- B) Consumers are attracted by hotel designs.
- C) It offers cheaper food and accommodation.
- D) It provides better service than hotels.

原始的选项顺序

- A) It provides better service than hotels.
- B) It offers cheaper food and accommodation.
- C) Customers enjoy staying in home-like places. ✓
- D) Consumers are attracted by hotel designs.

Question 10 (Suggested completion time: 5 minutes)

Directions: The figure shows people' s satisfaction with the standard of living, personal relationships and health among different age groups in Canada in 2016. Answer the question according to the information in the figure.

10. Which of the following is an INCORRECT description about the figure?

考试时的选项顺序

A) With respect to personal relationships, seniors have higher levels of satisfaction than all the other age groups: those aged 80 and over have the highest average satisfaction.

B) Satisfaction with the standard of living and personal relationships is relatively higher among the youngest and oldest age groups, revealing an U-shape in both satisfaction levels among all age groups. ✓

C) The data show that satisfaction with health in general decreases with age: the average satisfaction with health varies from 8.1 for the youngest age group to 7.1 for age groups of 50

to 59 and of 80 and over.

D) As to the satisfaction with personal relationships, the level is relatively high among those in the youngest age group, whose satisfaction level is comparably the same to those aged 60 to 69.

原始的选项顺序

A) With respect to personal relationships, seniors have higher levels of satisfaction than all the other age groups: those aged 80 and over have the highest average satisfaction.

B) The data show that satisfaction with health in general decreases with age: the average satisfaction with health varies from 8.1 for the youngest age group to 7.1 for age groups of 50 to 59 and of 80 and over.

C) Satisfaction with the standard of living and personal relationships is relatively higher among the youngest and oldest age groups, revealing an U-shape in both satisfaction levels among all age groups. ✓

D) As to the satisfaction with personal relationships, the level is relatively high among those in the youngest age group, whose satisfaction level is comparably the same to those aged 60 to 69.

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the

questions based on logical inference and reasoning. (Time allowed: 55 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: Read the following definition of a logical fallacy. Answer the question according to the definition.

The Fallacy of Composition

The Fallacy of Composition involves taking attributes of part of an object or class and applying them to the entire object or class. The argument being made is that because every part has some characteristic, then the whole must necessarily also have that characteristic.

11. Which of the following is NOT an example of *The Fallacy of Composition*?

考试时的选项顺序

- A) Each human cell is very lightweight, so a human being composed of cells is also very lightweight.
- B) Because all of the components of this car are entirely white, then the car itself must also be entirely white.
- C) Every song on the album lasts less than an hour. Therefore

the album lasts less than an hour.

D) Because professional sports players are paid outrageous salaries, every professional sports player must be rich. ✓

原始的选项顺序

A) Because professional sports players are paid outrageous salaries, every professional sports player must be rich. ✓

B) Because all of the components of this car are entirely white, then the car itself must also be entirely white.

C) Every song on the album lasts less than an hour. Therefore the album lasts less than an hour.

D) Each human cell is very lightweight, so a human being composed of cells is also very lightweight.

Question 12 (Suggested completion time: 4 minutes)

Directions: Look at the following picture and answer the question.

12. Which of the following logical fallacies does the picture illustrate?

考试时的选项顺序

- A) *Dicto Simpliciter*: a fallacy in which a general rule or observation is treated as universally true regardless of the circumstances or the individuals concerned.
- B) *Non Sequitur*: a fallacy in which a conclusion is not aligned with previous statements or evidence. ✓
- C) *Argumentum ad Populum*: a fallacy of attempting to win popular assent to a conclusion by arousing the feeling and enthusiasm of the multitude.

D) *Converse Accident*: a fallacy of considering certain exceptional cases and generalizing to a rule that fits them alone.

原始的选项顺序

A) *Non Sequitur*: a fallacy in which a conclusion is not aligned with previous statements or evidence. ✓

B) *Dicto Simpliciter*: a fallacy in which a general rule or observation is treated as universally true regardless of the circumstances or the individuals concerned.

C) *Argumentum ad Populum*: a fallacy of attempting to win popular assent to a conclusion by arousing the feeling and enthusiasm of the multitude.

D) *Converse Accident*: a fallacy of considering certain exceptional cases and generalizing to a rule that fits them alone.

Questions 13-14 Reasoning (Suggested completion time: 10 minutes)

Cookiecutter sharks feed on a variety of fishes and mammals by gouging round plugs of flesh out of larger animals. Although attacks on humans are documented, they are rare, and thus these sharks are rightly classified as only a minor threat to people. As many fishes that are not a threat to humans are not endangered, there should be no objection to the new ocean exploration and drilling project, which threatens a cookiecutter shark breeding ground.

13. Which of the following points out the most serious logical flaw in the argument above?

考试时的选项顺序

- A) The criteria by which to classify cookiecutter sharks as a minor threat to people are not satisfactory.
- B) No information is given to say whether cookiecutter sharks are endangered. ✓
- C) New ocean exploration and drilling could pose risks of oil spills and other pollutions.
- D) There are few studies on the relationship between the new ocean exploration and drilling project and extinction risk of cookiecutter sharks.

原始的选项顺序

- A) No information is given to say whether cookiecutter sharks are endangered. ✓
- B) New ocean exploration and drilling could pose risks of oil spills and other pollutions.
- C) The criteria by which to classify cookiecutter sharks as a minor threat to people are not satisfactory.
- D) There are few studies on the relationship between the new ocean exploration and drilling project and extinction risk of

cookiecutter sharks.

14.

Admittedly, the practice of allowing students to retake a class they previously failed and receive a new grade is controversial. But the mission of any school or university is to educate their students, and allowing students to retake courses supports this mission. Therefore, for the time being, our school should continue to allow students to retake previously failed courses and receive a new grade.

Which of the following, if true, would most strongly support the argument above?

考试时的选项顺序

A) Many scientists who have made great achievements had the experience of failing courses at university. ✓

B) Students of different IQ and education levels in the same class are a reality that must be considered.

C) Students who failed courses are not trouble-makers, and deserve due sympathy.

D) There has been an increase in the number of calls that everyone has the right to receive moral education and strengthen their moral characters.

原始的选项顺序

- A) Students who failed courses are not trouble-makers, and deserve due sympathy.
- B) Many scientists who have made great achievements had the experience of failing courses at university. ✓
- C) Students of different IQ and education levels in the same class are a reality that must be considered.
- D) There has been an increase in the number of calls that everyone has the right to receive moral education and strengthen their moral characters.

Questions 15-17 (Suggested completion time: 8 minutes)

Directions: Read the following news report and answer the questions.

An international team of scientists have engineered an enzyme that can “eat” one of the most commonly used plastics, potentially providing a new weapon in the fight against plastic pollution.

The researchers from the University of Portsmouth in the U.K. and the U.S. Department of Energy’s National Renewable Energy Laboratory (NREL) hope that the discovery will eventually enable the full recycling of plastic bottles — of which one million are sold around the world every

minute.

The enzyme can digest PET (polyethylene terephthalate), which is used in many products including clothing fibers and plastic bottles. The majority of these bottles, like most plastics, are not recycled, eventually making their way into the environment where they have the potential to remain for hundreds of years without degrading.

And even the bottles that do get recycled rarely get turned back into the original product.

"Many people don't realize that when they put their plastic bottle in a recycling bin, it's very rarely made into a plastic bottle," John McGeehan from the University of Portsmouth's School of Biological Sciences, told *Newsweek*. "It's normally downscaled and becomes something of less value."

"So, what we're hoping to do with this enzyme, is turn the plastic into its original components so that it can be properly reused in a circular economy. This would avoid the need to drill for more oil and it would decouple the whole oil to plastic scenario that we have," he said.

The scientists made their breakthrough with a little help from serendipity. They were initially examining a bacterium found in a Japanese recycling plant which produces an enzyme that allows it to eat plastic.

Wanting to understand how this enzyme evolved and how it worked, the researchers tweaked its molecular structure. This had the unintended consequence of making the enzyme's plastic eating abilities work significantly faster, to the point where it began breaking down the material within just a few days. Their results are published in the journal *Proceedings of the National Academy of Sciences* (PNAS).

"To find an organism that can break this stuff down is really exciting," McGeehan said.

While their work is still at a very early stage, the researchers hope that they can improve the enzyme further to speed up digestion and incorporate it into viable large-scale processes to be used in industry.

McGeehan concluded that, despite new breakthroughs like this, "We need to start taking more responsibility as a population to stop using so much plastic and to stop having this throwaway plastic lifestyle that we've become so accustomed to."

15-16. Decide whether the following statements are True or False according to the text.

15. Different from the majority of plastic bottles, a recycled bottle will be turned into its original components.

A) True B) False ✓

答案: B

16. According to McGeehan, we also need to take other measures to win the war against plastic pollution in addition to further improving the plastic-eating enzyme.

A) True ✓ B) False

答案: A

17. According to John McGeehan, what happens to a thrown plastic bottle?

A) The bottle most probably becomes permanent waste. ✓

B) Biological scientists can turn it into less valuable materials.

C) PET in the bottle can be degraded by the discovered enzyme.

D) Recyclable fibers in the bottle can be extracted and made into something new.

答案: A

Questions 18-20 (Suggested completion time: 7 minutes)

Directions: Read the text about a book. Answer the questions according to the text.

Have you ever tried donkey' s milk? Probably not. But according to Mark Kurlansky' s fact-rich *Milk!*, donkey' s milk is probably closest in consistency and composition to human breast milk. How cows came to predominate our consumption of milk is just one of the many thumbnail histories Kurlansky packs into his fascinating new book.

Only about 40 percent of humans can digest milk as adults. For the rest,

Kurlansky explains, after *weaning*, a gene shuts down the ability to process milk. “In truth, the aberrant condition is being able to drink milk,” he writes. But then there is cheese, which for most humans escapes genetic determinism. ① There is also butter, yogurt and “everyone’s favorite milk,” ice cream, all described vividly here.

Kurlansky divides his book into three parts. The first is a history of the domestication of milk and its byproducts. That narrative flows down many byways. Did you know that French butter makes better pastry than American butter because it contains more fat and less water? Part two is about health safety issues regarding milk — think pasteurization and refrigeration — as production moved from milkmaids to milk machines. ② And part three is a contemporary world tour of milk production and its unusual products.

Every chapter of *Milk!* entrances with I-did-not-know-that facts and observations. ③ His own childhood favorite? Creamed potato leek soup, or vichyssoise.

④ Early in the book, Kurlansky says that milk is “the most argued-over food in human history.” A skeptical reader will wonder, but

in the end, they will likely be convinced of this statement' s truth.

18. What does the word *weaning* in the second paragraph mean?

考试时的选项顺序

- A) Stopping feeding a baby on its mother' s milk. ✓
- B) Growing older and showing the traits of increased age.
- C) A change of an animal that makes it incapable to process milk.
- D) A child who is mature behaves in a sensible and reasonable way.

原始的选项顺序

- A) Stopping feeding a baby on its mother' s milk. ✓
- B) A change of an animal that makes it incapable to process milk.
- C) A child who is mature behaves in a sensible and reasonable way.
- D) Growing older and showing the traits of increased age.

19. Which blank does the following sentence best fit in?

The book also includes 126 milk-based recipes that Kurlansky thinks are the tastiest.

考试时的选项顺序

A) ③ ✓ B) ② C) ① D) ④

原始的选项顺序

A) ① B) ② C) ③ ✓ D) ④

20. Which of the following topics CANNOT be found in this book?

考试时的选项顺序

- A) Which ingredient is key to tastier desserts
- B) Why donkey' s milk is much less popular than cow' s
- C) What modern milk production line is like
- D) How adults digest milk and other dairy products ✓

原始的选项顺序

- A) Why donkey' s milk is much less popular than cow' s
- B) How adults digest milk and other dairy products ✓
- C) Which ingredient is key to tastier desserts
- D) What modern milk production line is like

Questions 21-23 (Suggested completion time: 7 minutes)

Directions: Read the text about a painting. Answer the questions according to the text.

The Story Behind Monet's *Women in the Garden*

Claude Monet (1840-1926) created *Women in the Garden* (*Femmes au jardin*) in 1866 and it is generally considered the first of his works to capture what would become his primary theme: the interplay of light and atmosphere. He used a large format canvas, traditionally reserved for historical themes, to instead create an intimate scene of four women in white standing in the shade of the trees beside a garden path.

While the painting isn't considered to be among his finest works, it did establish him as a leader in the emerging Impressionist movement.

Working *en Plein Air*

Women in the Garden literally began in the garden of a home Monet was renting in the Paris suburb of Ville d'Avray in the summer of 1866. While it would be completed in a studio the following year, the bulk of the work took place *en plein air*, or outdoors.

"I threw myself body and soul into the *plein air*," Monet said in an interview in 1900. "It was a dangerous innovation. Up to that time, no one had indulged in any, not even [Édouard] Manet, who only attempted it later, after me." In fact, Monet and his peers popularized the *plein air* concept, but it had been in use for many years prior to the 1860s, particularly after the invention of pre-made paint that could be stored in metal tubes for easy portability.

Monet used a large canvas, measuring 6.7 feet across by 8.4 feet high, for his composition.

[A] To maintain his perspective while working on such a large space, he later said he had devised a system using a deep ditch and a pulley

system that could raise or lower the canvas as needed. [B] At least one historian thinks that Monet simply used a ladder or stool to work on the upper area of the canvas and carried it in and out of the house overnight and on cloudy or rainy days.

The Women

The model for each of the four figures was Monet's mistress, Camille Doncieux. They had met in 1865 when she was working as a model in Paris, and she quickly became his muse. Earlier that year, she had modeled for his monumental *Luncheon in the Grass*, and when he was unable to complete that in time to enter in competition, she posed for the life-size portrait *Woman in a Green Dress*, which went on to win acclaim at the 1866 Paris Salon.

For *Women in the Garden*, Camille modeled the body, but Monet likely took the details of the clothing from magazines and worked to give each of the women different appearances. Still, some art historians see the painting as a love letter to Camille, capturing her in different poses and moods.

21. What can we know about the *plein air* concept?

考试时的选项顺序

- A) It is fully demonstrated through *Women in the Garden*.
- B) It is popularized by Monet with his peers. ✓
- C) It is painting in the suburb of Ville d-Avray in Paris.
- D) It is initiated by Monet.

原始的选项顺序

- A) It is initiated by Monet.
- B) It is popularized by Monet with his peers. ✓
- C) It is painting in the suburb of Ville d-Avray in Paris.
- D) It is fully demonstrated through *Women in the Garden*.

22. Which of the following roles do the two sentences marked **[A]** and **[B]** play?

考试时的选项顺序

- A) The first is the statement the author claims; the second is others' speculation. ✓
- B) The first provides background for the painting; the second is a prediction about the painting.
- C) The first is a statement of a conclusion; the second is the supporting detail.
- D) The first provides details to support a conclusion; the

second verifies the validity of the details.

原始的选项顺序

- A) The first is a statement of a conclusion; the second is the supporting detail.
- B) The first is the statement the author claims; the second is others' speculation. ✓
- C) The first provides background for the painting; the second is a prediction about the painting.
- D) The first provides details to support a conclusion; the second verifies the validity of the details.

23. Which of the following is INCORRECT about Camille?

考试时的选项顺序

- A) She started her career as a model in 1864. ✓
- B) The four figures in *Women in the Garden* are all modelled by Camille.
- C) She used to work as a model for Monet.
- D) She has appeared at least three times in Monet' s paintings.

原始的选项顺序

- A) The four figures in *Women in the Garden* are all modelled

by Camille.

B) She has appeared at least three times in Monet's paintings.

C) She started her career as a model in 1864. ✓

D) She used to work as a model for Monet.

Questions 24-27 (Suggested completion time: 7 minutes)

Directions: Read the text about instant coffee. Answer the questions according to the text.

The Truth about How Instant Coffee Is Actually Made

In this day of coffee elitism, the instant choice is not typically *heralded*. But that doesn't mean instant coffee doesn't have its fans – many of our parents, for example, willingly drink the stuff every single morning.

While instant coffee is a godsend in baking for its strong flavor, dry texture and ability to dissolve, most of us know that it tastes inferior to freshly ground beans. But how many of us know what it actually is? It's been around for over a hundred years, so it might be time we all finally found out.

First, the obvious: instant coffee is in fact made from real coffee. Whole

beans are roasted, ground and brewed before they start their journey to becoming instant. What makes coffee instant is when all the water is removed from the brewed product, leaving behind dehydrated crystals of coffee. To make it coffee again, you just add water.

There are two ways to make instant coffee: spray drying and freeze drying. Spray drying is achieved by spraying liquid coffee concentrate as a fine mist into very hot, dry air (we' re talking about 480 degrees F). When the coffee hits the ground, the water has been evaporated and it has been dried into small, round crystals.

Freeze drying coffee involves a few steps. First, the coffee is cooked down into an extract. The coffee extract is chilled at about 20 degrees F into a coffee slushie. The coffee slushie is then further chilled on a belt, drum or tray to -40 degrees F until it forms slabs of coffee ice. The coffee ice is broken into granules. They' re then sent to a drying vacuum, where the ice vaporizes and leaves behind instant coffee granules.

24. The word ***heralded*** in the first paragraph most probably means

_____.

A) delivered

B) approved

C) praised ✓

D) demanded

25-27. Decide whether the following statements are True or

False according to the text.

答案: C

25. Instant coffee is actually tiny crystals dried from real coffee.

A) True ✓ B) False

答案: A

26. Drying out is a fundamental procedure in both instant coffee making methods.

A) True ✓ B) False

答案: A

27. Spray drying is inferior to freeze drying, because exposure to heat can cause coffee beans to lose the original flavor.

A) True B) False ✓

答案: B

Questions 28-30 (Suggested completion time: 8 minutes)

Directions: Read the text about nicotine. Answer the questions according to the text.

Nicotine is the addictive chemical in tobacco smoke and e-cigarette vapors. And doctors say the teenage brain is no place for it to end up. Nicotine can reach the brain within seven seconds of puffing on a cigar, hookah (水烟袋), cigarette or electronic cigarette.

The area of the brain responsible for emotions and controlling our wild impulses is known as the *prefrontal cortex*. It's very vulnerable to nicotine's effects, research shows. This is especially true for young people. The reason: This part of the brain doesn't finish developing until about age 25.

Nicotine acts like a key to unlock special receptor molecules on the outside of cells in the brain, including those in the prefrontal cortex. Nicotine causes these cells to release signaling molecules, such as *dopamine*. These chemical signals travel across a gap between nerve cells (called a *synapse*). When they reach the neighboring nerve cell, they release their "message." And it gives users a feel-good high.

But after repeated exposure to nicotine, those brain cells can change. The effect of these changes is to reduce the body's ability to release its own, natural pleasure-giving chemicals.

Meanwhile, the brains of teens who smoke or vape may create more receptors to handle the flood of nicotine they have come to expect. As the number of receptors increases, teens will need more nicotine to get the same high. That makes nicotine users seek hit after hit. In teens, this can provoke side effects. For instance, it can make it hard for them to stay focused. It might also trigger bouts of depression or anxiety, research suggests.

Some of the negative effects of nicotine on the young brain will fade with time — if exposure ends. Others, however, may persist. For instance, brain scientists at VU University Amsterdam found that exposing adolescent rats to nicotine increased their impulsive behavior. It made them a bit more reckless than usual. It also made it harder for them to focus their attention — even later, as adults.

No one is sure that the same thing happens in humans, but that's the concern. Exposing the developing adolescent brain to nicotine "could lead to a high risk of lifelong addiction," says Garry Sigman. He heads

adolescent medicine at the Loyola University Chicago Stritch School of Medicine in Maywood, Illinois.

28. Which of the following is the best title for the text?

考试时的选项顺序

- A) Tobacco, Nicotine, and E-Cigarettes
- B) Nicotine Addiction: Symptoms and Treatments
- C) **Explainer: The Nico-Teen Brain ✓**
- D) The Vape Debate: What You Need to Know

原始的选项顺序

- A) Tobacco, Nicotine, and E-Cigarettes
- B) The Vape Debate: What You Need to Know
- C) Nicotine Addiction: Symptoms and Treatments
- D) **Explainer: The Nico-Teen Brain ✓**

29. Which of the following is NOT true about the prefrontal cortex?

考试时的选项顺序

- A) It has receptor molecules that could be unlocked by nicotine.
- B) It regulates emotional and behavioral functioning.

C) It controls cognition and personality forming. ✓

D) It is very vulnerable to nicotine' s effects especially for young people.

原始选项顺序

A) It controls cognition and personality forming. ✓

B) It regulates emotional and behavioral functioning.

C) It has receptor molecules that could be unlocked by nicotine.

D) It is very vulnerable to nicotine' s effects especially for young people.

30. Which of the following is correct according to the text?

考试时的选项顺序

A) Nicotine may cause human to act irrationally and may lead to difficulty in attention control. ✓

B) Nicotine has little effect on the prefrontal cortex of an adult mainly because this part of brain has fully developed.

C) Even after the age of 25, adults could still get into lifelong addiction of nicotine.

D) With the lapse of time, some negative effects of nicotine on

the brain of young people will disappear gradually.

原始的选项顺序

A) Nicotine has little effect on the prefrontal cortex of an adult

mainly because this part of brain has fully developed.

B) With the lapse of time, some negative effects of nicotine on

the brain of young people will disappear gradually.

C) Nicotine may cause human to act irrationally and may lead to difficulty in attention control. ✓

D) Even after the age of 25, adults could still get into lifelong

addiction of nicotine.

Directions: In Part III, you will read passages on the same subject. You will be required to identify the writer' s position and evaluate the effectiveness of the writer' s arguments. (Time allowed: 35 minutes)

Questions 31-40 (Suggested completion time: 35 minutes)

Directions: Read three passages about driverless cars. Answer the questions according to the passages.

Passage A

Approximately 1500 - Leonardo Da Vinci' s Self-Propelled Cart

Even though automobiles wouldn' t be invented for another three centuries, Leonardo da Vinci laid out the design for a cart that could move on its own. Using the tension from springs to propel the cart, steering could be set in advance to follow a predetermined path. This invention is considered by some to be the world' s first robot.

1866 - The Whitehead Torpedo

In the mid-1800s, Robert Whitehead developed a way for torpedoes to propel themselves underwater several hundred yards, maintaining depth and direction.

A game-changer for naval fleets at the time, the invention quickly spurred further development and by WWII torpedoes could home in on targets using sonar technology. This new technology would lead to advancements in aircraft and weapons — and eventually autonomous devices like self-driving cars.

1925 - The “American Wonder”

In 1925, Francis P. Houdina developed an automobile that could be controlled remotely by radio signals. He publicly demonstrated the driverless, radio-controlled car, called the “American Wonder” or

"Phantom Auto," on New York City's streets, travelling along Broadway and Fifth Avenue during a traffic jam.

1945 - Teetor Cruise Control

While not commercialized until 1958, cruise control was actually invented 13 years earlier by engineer Ralph Teetor. Teetor hated riding with his attorney, who would slow while talking and speed up while listening, so he developed an electromagnet contraction that would smooth out the ride, thus inventing cruise control.

1979 - The Stanford Cart

Worked on by a number of Stanford University researchers over the 1960s and the 1970s, the Stanford Cart began as a moon rover project. In 1966, the project was taken over by the Stanford Artificial Intelligence Lab (SAIL), which pioneered the video processing technology that would later be used to provide input to autonomous vehicles. In 1979, the cart successfully traversed a cluttered room without any human input.

1987 - Dynamic Vision

In 1987 German engineer Ernst Dickmanns outfitted a Mercedes-Benz van to detect objects on the road from a series of cameras outfitted on the vehicle. This "dynamic vision" technology processed visual input

while taking into account time delays, and provided commands to the car's steering, throttle and brake systems. This imaging is now used in cars equipped with driver-assist features such as lane recognition, adaptive cruise control and pre-collision braking, as well as in the earliest models of self-driving vehicles to identify and avoid potential road hazards.

1995 - General Atomics MQ-1 Predator

The MQ-1 Predator, developed by General Atomics for the U.S. Department of Defense in the 1990s, remains one of the most widely used pieces of military equipment in service today. Categorized as an unmanned aerial vehicle (UAV), the Predator is commonly referred to as a "drone" because it is piloted remotely using radio and satellite signals. Predator drones were first deployed in 1995 and have been used in military operations for more than 20 years. Technologies used in these drones have been adapted for cars, including radar that can see through smoke or clouds and thermal imaging cameras that enable travel at night.

2004 - DARPA Grand Challenge

First launched in 2004, the DARPA Grand Challenge was a series of prize competitions created to encourage development of autonomous vehicle

technologies. The first competition required vehicles to self-navigate 150 miles of desert roadway. While no car completed the route in the first year of the competition, subsequent challenges have seen dramatic leaps in capabilities. The Urban Challenge in 2007 required vehicles to obey all traffic laws as they detected and avoided other robots on the 60-mile urban course.

2009 - Google Self-Driving Car Project

In 2009, Google launched its self-driving car project. Using GPS, remote light-ranging technology and other sensory devices, Google's fleet can detect pedestrians, cyclists, vehicles, road work and more for up to 240 yards in any direction. The aim is to fully emulate the behavior of the ideal human driver. In 2015, the company started testing its fully self-driving cars on public roads.

2015 - Tesla Autopilot

Tesla Motors released its semi-autonomous "Autopilot" software in 2015, which includes hands-free control of highway and freeway driving, automatic lane changing, side-collision warnings and automatic parallel parking. What's more, it was delivered as a software update to Model S owners overnight.

2017 - Waymo Early Rider Program

In 2016, Google's autonomous car project became Waymo, a self-driving technology company. In 2017, Waymo invited residents of Phoenix, Arizona, to join in a public trial of self-driving vehicles and provide feedback on their experience, which will be used to shape the future of how self-driving cars work. While Waymo is staying tight-lipped about a potential release date, it's anticipated that self-driving cars of some sort will be commercially available by 2020.

Passage B

Q: How realistic is it that the general public will be using driverless cars in the near future?

A: The hype surrounding autonomous vehicles has been growing as just about every car manufacturer and many high-tech firms race to be the first to market.

The rewards — both financially and in saving human lives — are clear. Traffic accidents create billions of dollars of damage and over 40,000 traffic related fatalities every year.

Autonomous Car Levels

There are currently five defined levels of autonomous vehicles according to the National Highway Traffic Safety Administration:

- **Level 0** — No Automation; fully human controlled
- **Level 1** — Driver Assistance; adaptive cruise control, basic steering assistance
- **Level 2** — Partial Autonomy; simultaneous control of steering, acceleration and braking, but still requires active participation of human driver
- **Level 3** — Conditional Autonomy; the vehicle can drive itself in the proper conditions, but a driver must be available to take over at any moment
- **Level 4** — Highly Autonomous; very little need for human intervention, but generally in limited “geofenced” environments
- **Level 5** — Fully Autonomous; able to perform like a human driver in every scenario or environment

The first real “autonomous” cruise control was introduced in 1995 (Level 1), while most of today’s new cars incorporate technology that would be considered Level 2.

Most of the test vehicles that you may see on public streets are Level 3 prototypes, which is why there's always someone behind the wheel.

Google has actually been testing Level 4 vehicles in Phoenix since last October, where there is no one behind the steering wheel but it's limited as to where it can drive.

Transition Challenges

The technology continues to evolve but we're a long way from the utopian world where all vehicles are self-driving.

We have to develop the regulations, insurance models, liabilities and even moral guidelines for technology that never existed before.

Even if traffic fatalities are cut in half by autonomous vehicles, the moral outrage over a single death at the hands of a machine will exist.

Integration with human drivers will be another challenge, as these ultracautious automated vehicles and aggressive human drivers will have to figure out how to get along.

I experienced this firsthand this year at CES (Consumer Electronics

Show) as I rode in a Level 3 vehicle on the streets of Las Vegas. I equated the experience to having my grandmother driving me around as the vehicle waited to turn right at a crosswalk causing the human driver behind us to lay into his horn.

The vehicle also slowed down every time it perceived an adjacent car drifting toward our lane.

Passage C

Driverless vehicles are considered to be inevitable. One of the chief arguments that proponents use is that autonomous vehicles will be safer than those driven by humans because they will be programmed to not take chances.

The chief concern about driverless vehicles has been the economic fallout, in that 5 million Americans make their living by driving.

The first fatal crash involving a driverless car should at least slow the rush to replace humans behind the wheel. Tuesday (Mar. 19, 2018) in Phoenix, a self-driven Uber Volvo SUV struck and killed Elaine Herzberg, 49, of Mesa, Arizona, as she walked her bicycle along the street. An Uber

employee was behind the wheel but did not intervene.

At the time of the crash, the car was traveling 40 mph (miles per hour) in a posted 35 mph zone. Phoenix police say that the vehicle struck the victim as she emerged from shadows into bright sunlight.

Those conditions illustrate the complexity inherent replacing humans with computers. The variety of factors in driving is infinite, from weather to road conditions to the movements of other vehicles and pedestrians, to complex intersections with complex signaling and so on.

It is entirely possible that a human driver might have struck Herzberg under the same circumstances, but that just raises another question. A human driver is legally responsible for his actions; who is responsible when an autonomous vehicle kills someone?

After the crash, Uber temporarily suspended its autonomous vehicle operations in Phoenix, San Francisco, Toronto and Pittsburgh.

But this week, the pace of driverless vehicle deployment quickened with Gatwick Airport's (near London) announcement that it plans to use driverless electric buses to shuttle passengers from terminals to planes,

and driverless vehicles to move baggage.

The Phoenix fatality proves that autonomous vehicles are not infallible and that there should be no rush to put driverless cars, buses and big trucks on the highways.

31-33 Complete the following sentences based on Passage A by choosing the related names.

- A. Ernst Dickmanns
- B. Francis P. Houdina
- C. Leonardo da Vinci
- D. Ralph Teetor
- E. Robert Whitehead

31. A is a German pioneer of “dynamic vision” technology and of driverless cars which could detect and avoid objects on the road.

答案: A

32. E developed a way for torpedoes to self-propel, which greatly changed fleets.

答案: E

33. D invented speed control on a cruise so as to avoid the sudden slowing down and speeding up when riding with others.

答案: D

34. Which of the following statements is TRUE according to Passage A?

考试时的选项顺序

A) Waymo has claimed that their first self-driving car will be put on market in 2020.

B) Thermal imaging cameras and radar were first used for military purposes rather than cars. ✓

C) "Autopilot" was released in the same year when Google launched its first self-driving car.

D) The DARPA Grand Challenge was established to promote the development of self-driving cars.

原始的选项顺序

A) "Autopilot" was released in the same year when Google launched its first self-driving car.

B) The DARPA Grand Challenge was established to promote

the development of self-driving cars.

C) Waymo has claimed that their first self-driving car will be put on market in 2020.

D) Thermal imaging cameras and radar were first used for military purposes rather than cars. ✓

35. Which of the following is correct according to Passage A and Passage B?

考试时的选项顺序

A) The Tesla Autopilot Motors are Level 5 driverless cars.

B) The Waymo Early Rider Program will invent Level 5 autonomous cars.

C) The “Dynamic Vision” self-driving cars are approximately on Level 3.

D) The Teetor Cruise Control is approximately on Level 1. ✓

原始的选项顺序

A) The Teetor Cruise Control is approximately on Level 1. ✓

B) The “Dynamic Vision” self-driving cars are approximately on Level 3.

C) The Tesla Autopilot Motors are Level 5 driverless cars.

D) The Waymo Early Rider Program will invent Level 5

autonomous cars.

36. Which of the following is NOT mentioned in Passage B as the challenges that driverless cars would face?

考试时的选项顺序

A) Moral issues.

B) Lack of regulations and guidelines.

C) Integration with human drivers.

D) Unemployment. ✓

原始的选项顺序

A) Moral issues.

B) Unemployment. ✓

C) Integration with human drivers.

D) Lack of regulations and guidelines.

37. What does the author of Passage B feel about the driverless car when experiencing it at CES?

考试时的选项顺序

A) It was better than with a human driver.

B) It drove too cautiously. ✓

C) It looked fancy on road.

D) It ran as an old lady.

原始的选项顺序

A) It ran as an old lady.

B) It drove too cautiously. ✓

C) It looked fancy on road.

D) It was better than with a human driver.

38. What does the author of Passage C conclude from the first fatal crash involving a driverless car?

考试时的选项顺序

A) Driving a car is such a complicated task that by far only human can do. ✓

B) A driverless car is a dream that can never come true.

C) It is too dangerous to put a car under the full control of a computer.

D) Human drivers should not be responsible for autonomous car accidents.

原始的选项顺序

A) Driving a car is such a complicated task that by far only human can do. ✓

B) Human drivers should not be responsible for autonomous car accidents.

C) It is too dangerous to put a car under the full control of a computer.

D) A driverless car is a dream that can never come true.

39. Which of the following is the best title for Passage C?

考试时的选项顺序

A) The Tragedy Caused by Driverless Cars

B) Put Brakes to Driverless Cars ✓

C) The Challenges to Driverless Cars

D) Driverless Cars Are Already Here

原始的选项顺序

A) The Challenges to Driverless Cars

B) The Tragedy Caused by Driverless Cars

C) Put Brakes to Driverless Cars ✓

D) Driverless Cars Are Already Here

40. On which point may the authors of Passage B and Passage C agree with each other?

考试时的选项顺序

- A) No one or nothing could stop the advancements in driverless cars.
- B) Driverless cars can greatly reduce traffic accidents.
- C) Driverless cars should only be tested and used in a designated space.
- D) There is a long way to go before driverless cars replace human drivers. ✓

原始的选项顺序

- A) Driverless cars can greatly reduce traffic accidents.
- B) No one or nothing could stop the advancements in driverless cars.
- C) Driverless cars should only be tested and used in a designated space.
- D) There is a long way to go before driverless cars replace human drivers. ✓

Question 5 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

The expansion of universities is one marked feature of the social life in the present age. All countries have shared in this movement, but more especially America, which thereby occupies a position of honour. *It* is, however, possible to be overwhelmed even by the gifts of good fortune; and this growth of universities, in number of institutions, in size, and in internal complexity of organization, discloses some danger of destroying the very sources of their usefulness, in the absence of a widespread understanding of the primary functions which universities should perform in the service of a nation.

5. What does *It* most probably refer to?

考试时的选项顺序

- A) The expansion of universities. ✓
- B) America in this movement.
- C) The social life in the present age.

D) The position of honour.

原始的选项顺序

A) The position of honour.

B) America in this movement.

C) The social life in the present age.

D) The expansion of universities. ✓

Question 6 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Swirling ocean-born storm clouds are not enough to qualify as a hurricane. The critical issue is wind speed.

As a storm strengthens, its circulating winds will become more powerful.

As long as the winds' sustained speed does not exceed 61 kilometers (38 miles) per hour, this storm will be known as a *tropical depression*. If its winds continue to build, attaining 62 to 117 kilometers (39 to 73 miles) per hour, it will formally become a *tropical storm*. At this point, it will receive an official name—such as "Katrina" , "Nepartak" , "Roanu" or "Harvey" .

Finally, if conditions are right, the storm can intensify into a hurricane (or

typhoon or cyclone, depending on its location). These intense circulating storms are rated category 1 to 5 on the Saffir-Simpson Hurricane Wind Scale. That rating reflects the maximum sustained wind speed (as measured over a 2-minute period).

6. Which of the following would be the best title for the text?

考试时的选项顺序

- A) Intensity of Storms and Hurricanes
- B) Categories of Hurricanes
- C) From Storm to Hurricane ✓
- D) Factors in the Creation of Hurricane

原始的选项顺序

- A) From Storm to Hurricane ✓
- B) Categories of Hurricanes
- C) Factors in the Creation of Hurricane
- D) Intensity of Storms and Hurricanes

Question 7 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

You arrive at the pharmacy counter, new prescription in hand—or already sent electronically to the drug store. Like most Americans, you

have insurance that covers at least some of your drug costs. The pharmacy has your plan information. Now all that's left to determine is the amount of your drug copay—what you'll pay at the counter out of pocket to get your medication.

As it happens, the copay for this drug seems high. But you're insured, and as patient advocates point out, it's commonly (and understandably) assumed that a copay must be less than what you'd spend to just buy the drug outright in cash.

As it turns out, however, that's not always the case.

7. What may be the main idea of the following paragraphs of the text?

考试时的选项顺序

A) It's generally neither necessary nor helpful for Americans to buy health insurance.

B) It's sometimes cheaper to pay in cash for a prescription than to go through insurance. ✓

C) It's pretty well established that you should buy health insurance in America.

D) It's often worthwhile to pay your copay for a prescription if

you have insurance.

原始的选项顺序

A) It' s sometimes cheaper to pay in cash for a prescription
than to go through insurance. ✓

B) It' s often worthwhile to pay your copay for a prescription if
you have insurance.

C) It' s generally neither necessary nor helpful for Americans to
buy health insurance.

D) It' s pretty well established that you should buy health
insurance in America.

Question 8 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

The outer ear is shaped a bit like a horn. It collects sound and funnels it through a series of structures to the inner ear. Ossicles—the three tiniest bones in the body—transmit sounds to a fluid-filled snail-shaped structure. It' s called the cochlea. Inside are microscopic “hair” cells. They contain bundles of tiny hair-like strands that wave back and forth in response to sounds. Their movements send messages to the brain that will register the sound of various pitches.

These hair cells are very fragile. (1) So, as hair cells die off, people lose their ability to detect sounds. (2) Loud sounds can damage them—or kill them altogether. (3) Hair cells that respond to high-pitched sounds tend to die off first. (4) And they never grow back. So an early sign of noise-induced hearing loss can be an inability to hear high-pitched sounds.

8. In the second paragraph, the underlined sentences are given in a wrong order. What should be the correct order?

考试时的选项顺序

A) 3 2 1 4 B) 2 3 1 4 C) 3 4 1 2 D) 2 4 1 3 ✓

原始的选项顺序

A) 3 2 1 4 B) 3 4 1 2 C) 2 4 1 3 ✓ D) 2 3 1 4

Question 9 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

When people say they *are* “**philosophical**” *about what happens to them*, they are using the word as the Stoics would have done. The name “Stoic” came from “the Stoa” , which was a painted porch in Athens where these philosophers used to meet. One of the first was Zeno of Citium (334–262 BC). Early Greek Stoics had views on a wide range of

philosophical problems about reality, logic and ethics. But they were most famous for their views on mental control. Their basic idea was that we should only worry about things we can change. We shouldn' t get worked up about anything else. Like the Sceptics, they aimed for a calm state of mind. Even when facing tragic events, such as the death of a loved one, the Stoic should remain unmoved. Our *attitude* to what happens is within our control even though *what* happens often isn' t.

9. What does *are "philosophical" about what happens to them* mean?

考试时的选项顺序

- A) to be mentally prepared for what happens
- B) to keep calm in the face of disappointments ✓
- C) to show no concern about what happens
- D) to think deeply about disappointments

原始的选项顺序

- A) to keep calm in the face of disappointments ✓
- B) to think deeply about disappointments
- C) to show no concern about what happens
- D) to be mentally prepared for what happens

Question 10 (Suggested completion time: 5 minutes)

Directions: Answer the question according to the information in the figure.

Source: Ofcom Adult Media Literacy Tracker 2017

Which one of these things you use would you miss the most if it were taken away? (prompted responses, single coded)

Base: All adults aged 16+ (1846 in 2016, 1875 in 2017).

10. Which of the following is an INCORRECT description of the figure?

考试时的选项顺序

A) Although TV is still the most-missed among over-54s, it is

the second most-missed media device among adults aged

16-54. ✓

B) Adults aged 55-64 are twice as likely as the average to say they would miss a tablet the most in 2017 while those aged 75+ are least likely to miss a computer.

C) Adults are more likely than in 2016 to say they would miss their mobile phone the most; this is particularly the case for those aged 45-54.

D) Slightly more than a quarter of adults say they would miss a TV set the most and one in ten say they would miss a computer in 2017.

原始的选项顺序

A) Adults aged 55-64 are twice as likely as the average to say they would miss a tablet the most in 2017 while those aged 75+ are least likely to miss a computer.

B) Adults are more likely than in 2016 to say they would miss their mobile phone the most; this is particularly the case for those aged 45-54.

C) Slightly more than a quarter of adults say they would miss a TV set the most and one in ten say they would miss a computer in 2017.

D) Although TV is still the most-missed among over-54s, it is the second most-missed media device among adults aged 16-54. ✓

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 55 minutes)

Questions 11-12 (Suggested completion time: 6 minutes)

11.

Which two of the following statements are of the same logical fallacy?

- A. Let' s not take Bill on our picnic. Every time we take him out with us, it rains.
- B. This morning I shot an elephant in my pajamas. How he got in my pajamas I don' t know.
- C. All dogs are from the *canidae* family. Therefore, my Doberman is from the *canidae* family.
- D. The United States is the richest country in the world. Therefore, everyone in the United States must be rich and live well.
- E. Because each member of this baseball team is the best in the league for their position, then the team itself must also be the best in the league.
- F. With a laissez-faire capitalist economic system, each member of society must act in a way that will maximize his or her own economic

interests. Thus, society as a whole will achieve the maximum economic advantages.

E|F F|E

答案: E|F, F|E

Questions 13-14 Reasoning (Suggested completion time: 10 minutes)

The Urban Institute, a research organization based in Washington, has released an interesting report that suggests **that the proliferation of iPods helps account for the nationwide rise in violent crime in 2005 and 2006.**

The report suggests that “the rise in violent offending and the explosion in the sales of iPods and other portable media devices is more than coincidental,” and asks, rather provocatively, “Is There an iCrime Wave?”

The report notes that **nationally, violent crime fell every year from 1993 to 2004, before rising in 2005 and 2006, just as “America’ s streets filled with millions of people visibly wearing, and being distracted by, expensive electronic gear.”**

Of course, as any social scientist will tell you, correlation and causation are not the same thing.

13. In the argument above, two portions are in boldface. Which of the following roles do they play?

考试时的选项顺序

A) The first is a statement of the conclusion; the second is supposed to support the conclusion. ✓

B) The first provides data to support the conclusion; the second verifies the validity of those data.

C) The first provides context for a current state of affairs; the second is a prediction based on that state of affairs.

D) The first is a phenomenon; the second is another phenomenon.

原始的选项顺序

A) The first is a phenomenon; the second is another phenomenon.

B) The first is a statement of the conclusion; the second is supposed to support the conclusion. ✓

C) The first provides data to support the conclusion; the second verifies the validity of those data.

D) The first provides context for a current state of affairs; the second is a prediction based on that state of affairs.

14.

Some critics claim that scientific progress has increased the polarization of society and alienated large segments of the population. But these critics are wrong because even a cursory glance at the past shows that society is always somewhat polarized and some groups are inevitably alienated.

Which of the following is the most obvious weakness of the above argument?

考试时的选项顺序

- A) It fails to give any reason for the judgment it reaches. ✓
- B) It confuses the coincidence of two events with a causal relation.
- C) It introduces information that actually contradicts the conclusion.
- D) It presupposes the truth of what it sets out to prove.

原始的选项顺序

- A) It introduces information that actually contradicts the conclusion.
- B) It fails to give any reason for the judgment it reaches. ✓
- C) It presupposes the truth of what it sets out to prove.
- D) It confuses the coincidence of two events with a causal

relation.

Questions 15-18 (Suggested completion time: 9 minutes)

Directions: *Read the text about nerve cells. Answer the questions according to the text.*

When two nerve cells need to communicate, they can't just tap each other on the shoulder. These *neurons* pass information from one end of their "body" to the other as a tiny electrical signal. But one cell doesn't actually touch another, and the signals can't jump across the tiny spaces in between. To cross those tiny gaps, called *synapses*, they rely on chemical messengers. These chemicals are known as *neurotransmitters*. And their role in cell talk is called *neurotransmission*.

When an electrical signal reaches the end of a neuron, it triggers the release of tiny sacs that had been inside the cells. Called *vesicles*, the sacs hold chemical messengers such as *dopamine* or *serotonin*.

As it moves through a nerve cell, an electrical signal will stimulate these sacs. Then, the vesicles move to—and merge with—their cell's outer membrane. From there, they spill their chemicals into the synapse.

Those freed *neurotransmitters* then float across the gap and over to a

neighboring cell. That new cell has receptors pointing toward the synapse. These receptors contain pockets, where the neurotransmitter needs to fit.

A neurotransmitter docks into the proper receptor like a key into a lock. And as a messenger chemical moves in, the receptor's shape will change. This change can open a channel in the cell, allowing charged particles to enter or exit. The shape change can trigger other actions inside the cell as well.

If the chemical messenger binds to a certain type of receptor, electrical signals will flow down the length of its cell. This moves the signal along the neuron. But neurotransmitters also can bind to receptors that will block an electrical signal. That will stop a message, silencing it.

Signals for all of our sensations—including touch, sight and hearing—are relayed this way. So are the nerve signals that control movements, thoughts and emotions.

Each cell-to-cell relay in the brain takes less than a millionth of a second. And that relay will repeat for as far as a message needs to travel. But not all cells chat at the same speed. Some are relatively slow talkers. For

instance, the slowest nerve cells (those in the heart that help regulate its beating) travel at about one meter (3.3 feet) per second. The fastest—cells that sense your muscles' position as you walk, run, type or do backflips—race along at around 100 meters per second! Give someone a high five, and the brain—about a meter away—will get the message just one-hundredth of a second later.

15. What is the text mainly about?

A) How nerve cells pass messages from one cell to another via tiny chemicals. ✓

B) How chemical messengers travel across the space between two cells.

C) The different functions of electrical signals released by the nerve cells.

D) The different speeds at which nerve cells communicate with each other.

答案: A

16. According to the text, which of the following is an INCORRECT description?

A) Synapses are tiny spaces between cells and cannot be jumped across.

B) Vesicles exist in the cells and can react to an electrical signal

during the neurotransmission.

C) An electrical signal can get into and out of a cell and transmit messages between cells.

D) A neurotransmitter's shape resembles the key and can get into a new cell's pocket.

17-18. Decide whether the statements are True or False according to the text.

✓

答案: D

17. Prior to the arrival of the messenger chemical, the receptor will change its shape to allow charged particles enter or exit.

A) True B) False ✓

答案: B

18. Whether the electrical signal will be transmitted or stopped depends on the type of receptor the chemical messenger binds to.

A) True ✓ B) False

答案: A

Questions 19-21 (Suggested completion time: 8 minutes)

Directions: *Read the text about privacy collection. Answer the questions*

according to the text.

Is Apple the shining knight when it comes to privacy collection, as it wants us to believe?

A different business model than Facebook and Google gives it some ground to claim a tighter fortress around your data. But that's not the whole story, and some changes are coming.

In the wake of the disclosure that nearly 90 million Facebook users' information was passed on to political ad targeting firm Cambridge Analytica without their consent, tech companies are on the defensive. Consumers and lawmakers want to know how much their favorite apps have collected of their choices and movements and what they do with this personal information.

Apple has made a point of trying to differentiate its approach to consumers' information. On its website, it notes that it collects less data about us than the other big tech companies and then bumps up the security by ***scrambling*** it so it doesn't identify who it comes from. Additionally, it says it keeps most of the data on our devices, as opposed to Apple servers, and it's encrypted on those devices and only accessible

via your passcode.

And it says it will make it easier to track the information the company collects about us, and to download or delete it, later this year. Currently, getting the data back from Apple is cumbersome and slow.

The new tools are to comply with new privacy rules, called General Data Protection Regulation (GDPR), that go into effect in the European Union in late May, 2018. In a nutshell, the rules look to give the user more controls over how their data is used.

The major tech companies are all beefing up their privacy stance to deal with these new rules and consumer blowout over the Facebook data scandal.

19. What is the text mainly about?

考试时的选项顺序

- A) Apple servers are able to track consumers' choices.
- B) Apple's new privacy rules went into effect recently.
- C) Apple's data collection system is actually doubtful. ✓
- D) Apple provides safer protection against data theft.

原始的选项顺序

- A) Apple provides safer protection against data theft.
- B) Apple servers are able to track consumers' choices.
- C) Apple' s data collection system is actually doubtful. ✓
- D) Apple' s new privacy rules went into effect recently.

20. The word ***scrambling*** in paragraph 4 most probably means _____.

考试时的选项顺序

- A) manipulating effectively B) analyzing carefully
- C) achieving easily D) putting randomly ✓

原始的选项顺序

- A) putting randomly ✓ B) achieving easily
- C) analyzing carefully D) manipulating effectively

21. What put(s) the major tech companies on the defensive?

考试时的选项顺序

- A) The privacy information disclosure of Facebook users. ✓
- B) The enforcement of the General Data Protection Regulation.
- C) Their different approaches to consumers' information.
- D) Much different business models from each other.

原始的选项顺序

- A) Much different business models from each other.
- B) The privacy information disclosure of Facebook users. ✓
- C) The enforcement of the General Data Protection Regulation.
- D) Their different approaches to consumers' information.

Questions 22-24 (Suggested completion time: 7 minutes)

Directions: *Read the following terms of condition. Decide whether the following statements are True or False.*

I have read and agree to the Terms and Conditions of BikeToursDirect, LLC (doing business as BikeTours.com) including but not limited to:

There is a US\$30 per person non-refundable booking fee for all travelers age 18 or older, charged upon confirmation.

BikeTours.com does not operate any tours but represents tour companies as agent only.

This booking request is a binding agreement on my part, and making changes to or canceling after submitting this booking request may incur fees by the tour company.

I understand that to protect my purchase, I should enroll in a travel insurance plan. If I do not enroll, I understand that I am responsible for any cancellation penalties and out-of-pocket expenses incurred. I will also make my own provisions in the event of an emergency while I am traveling.

Bookings and payments are processed by BikeToursDirect LLC (DBA BikeTours.com), of Chattanooga, Tennessee. We are registered with the state of Florida as a Seller of Travel, Registration No. ST39841, and in the state of California, Registration CST #2120437-50.

22. You must read the above information before confirming your order on BikeTours.com.

A) True ✓ B) False

答案: A

23. People ordering the tour are required to buy travel insurance.

A) True B) False ✓

答案: B

24. BikeToursDirect LLC is also a travel agent.

A) True ✓ B) False

答案: A

Questions 25-27 (Suggested completion time: 8 minutes)

Directions: *Read the text about Nobel Prize. Answer the questions according to the text.*

Between 1901 and 2016, only 12 of the 211 total winners in physiology or medicine have been women. Only four women over that period have ever won the Nobel Prize in chemistry. Just two won it in physics. For minority scientists, the numbers are even worse. No black scientist has ever taken home a Nobel Prize.

_____25_____. "It' s not about the prizes but the reward system of science," Harriet Zuckerman, a sociologist at Columbia University, says.

"There' s been a tendency to not recognize the work of people who aren' t from the right countries or the right sex." Candidates also tend to come from a relatively few universities or research centers, she notes. Among them: the University of California at Berkeley and Harvard University, in Cambridge, Massachusetts.

_____26_____, Zuckerman says. Important scientific societies, such as the National Academy of Sciences in the United States and the Royal Society in the United Kingdom, now let in more women and people of color. These societies help scientists get recognized by their peers. And the more women and minorities that become recognized, the more likely they are to receive a Nobel Prize. Between 1901 and 2001, only 10 women received a Nobel Prize in science. Within the next 15 years, another eight won them. That hardly seems fair, Zuckerman notes, "but it' s better than it was."

_____27_____. Still, the allure of the prize remains strong. "I asked freshmen at the California Institute of Technology what the goal was for [their] careers in science," says Friedman. "Ninety percent said their goal was to win a Nobel Prize." But there are so few Nobel Prizes, most, if not all, of those students will be disappointed. "It' s like going to Las Vegas believing you' ll become a millionaire," says Friedman.

Not winning a Nobel Prize won' t make those students failures, however.

"Yes, the brilliant insight of a brilliant scientist is important," Friedman says. "But it' s only of importance when you have a community and networks of people working together."

25.

25-27. Complete the text with the following statements. There are TWO extra statements that you do not need.

- A. Gender inequality is still a major issue in academic science
- B. This lack of diversity is a problem
- C. Winning the Nobel prize will greatly luster the winner's name
- D. While Nobel Prize winners have done amazing work, there are many scientists who will never get the golden medal or the \$1,000,000
- E. But things are changing

B E D

答案: B, E, D

Questions 28-30 (Suggested completion time: 7 minutes)

Directions: *Read the following book review. Answer the questions according to the review.*

If you' ve ever told someone (or been told) that "everything happens for a reason," you need *The Coincidence Makers*. In his ambitious and genre-bending debut, Yoav Blum gamely tackles the quandary of fate versus free will, putting his own playful spin on one of humanity' s biggest philosophical conundrums.

In Blum' s re-envisioning of the universe, free will and fate coexist in a

delicate dance: We all have the power to make choices, but these choices are orchestrated by an elite team known as the Coincidence Makers. Guy, Emily and Eric are three such Coincidence Makers, and it's their job to keep everything on track by adjusting circumstances and making sure everyone sticks to their steps and 29 their part of the dance. As relatively low-level agents, the three are often tasked with seemingly random tasks like arranging for people to meet and fall in love, convincing someone to change careers or even getting a butterfly to flap one of its wings. However, all this changes when Guy receives the most difficult, dangerous and morally dubious assignment of his career, one that will forever change their understanding of cause and effect.

Already a bestseller in Blum's home country of Israel, this existential, mind-bending jigsaw puzzle of a novel is supremely satisfying when all the pieces 30 into place. Perfect for readers who enjoy a cerebral bent to their fiction, *The Coincidence Makers* is a unique and unforgettable story about what happens when you try to make life go according to your own script.

28. How does Yoav Blum paraphrase the sentence "everything happens for a reason" in his book?

A) Fate and free will exist together in a delicate way. ✓

- B) Your life would be unique and unforgettable when you make it go as to your own script.
- C) Sometimes it takes the wrong turn to get you to the right place.
- D) If a door closed, it' s because what was behind it wasn' t meant for you.

29-30. For each blank, choose the word that best fits in.

答案: A

29. _____

A) **executes**

B) looks

C) carries

✓

答案: A

30. _____

A) back

B) **fall** ✓

C) put

答案: B

Directions: In Part III, you will read passages on the same subject. You will be required to identify the writer' s position and

evaluate the effectiveness of the writer's arguments. (Time allowed: 35 minutes)

Questions 31-40 (Suggested completion time: 35 minutes)

Directions: *Read three passages about homework. Answer the questions according to the passages.*

Passage A

In August 2016, a message from a teacher in Texas in the United States calling off homework was widely shared on social media.

"After much research this summer, I am trying something new," the teacher wrote to parents.

"I ask that you spend your evenings doing things that are proven to correlate with student success. Eat dinner as a family, read together, play outside, and get your children to bed early."

But was she right? Is homework an unnecessary burden?

Professor Susan Hallam from the Institute of Education says there is "hard evidence" from research that homework really does improve

how well pupils achieve. "There is no question about that."

But she says this doesn't mean that endlessly increasing the amount of homework will keep delivering better results.

At some point, the benefits of more homework stop. But the difficult part is that this homework saturation point is different for each individual.

"Another complication", says Prof. Hallam, "is that the most able pupils probably need the least homework—but in practice, teachers give pupils in the top ability groups the most homework."

It would be more effective if the least able pupils were given the most homework.

Prof. Hallam also says the benefits of homework are more doubtful in primary school than in secondary.

But she says there is no evidence that homework can be actively counter-productive to learning.

A big study published by the Department for Education also found

homework made a positive difference.

After taking into account family background, the amount of time spent on homework was found to be a strong predictor of doing well in exams in secondary school.

“The strongest effects were noted for those who reported spending two to three hours doing homework on a typical school night,” said the study from researchers at the University of Oxford, Birkbeck and the Institute of Education.

Pupils who did that amount of homework were almost 10 times more likely to achieve five good GCSEs (General Certificate of Secondary Education, an academic qualification test generally taken by pupils in secondary education in England, Wales and Northern Ireland) than students who did not spend any time on homework.

Homework has also always been something of a political football.

In the US, it's claimed that the habit of piling on homework went back to the 1950s and Cold War fears that the US was losing the space race to the Soviet Union.

In an attempt to catch up with the cosmonauts, US schools hit the homework to rocket-boost young learners.

Even though homework seems to be such an entrenched part of the English school system, there are no official guidelines to impose it.

There used to be recommendations for an hour a week for five- to seven-year-olds, rising to 2.5 hours per night for pupils aged between 14 and 16.

But that was scrapped four years ago—leaving schools to make their own decisions.

If the late-night arguments over homework are too much, there is always the last-minute excuse.

Blaming dogs for eating homework has been an excuse in circulation since at least the 1920s.

But a college survey showed the current most popular excuse for homework being destroyed was milk spilled over it at breakfast.

And like tears over late-night homework, there' s no point crying over spilt milk.

Passage B

“Homework has been a hot topic for a number of years now because it affects so many people,” says Robert H. Tai, a professor at the University of Virginia’ s Curry School of Education who has researched the topic and conducted a 2012 study, “When Is Homework Worth the Time?” After studying transcripts and data for more than 18,000 sophomore students nationwide, he found no significant relationship between time spent on homework and grades, but did find a positive relationship between homework and performance on standardized tests. “Homework should act as a place where students practice the skills they’ ve learned in class,” Tai says. “It shouldn’ t be a situation where students spend many hours every night poring over something [new].”

The Case for Less Homework

The authors of *Reforming Homework: Practices, Learning and Policies* evaluated homework research and concluded that it does not

significantly impact achievement — and can even be ***detrimental***. One study from Penn State that analyzed data from the late 1990s found that, in countries with high homework demands, student performance on the international test of achievement known as Trends in Mathematics and Science Study was poorer than those with less rigorous after-school assignments. The authors, both professors at Australian universities, do not call for a homework ban, but they do recommend less homework, as well as homework assignments of a higher quality, rather than large amounts of drill and practice work.

Further, Tai and colleagues' study, "When Is Homework Worth the Time?" also found that sophomores who spent more time on after-school assignments did not fare any better or worse with grades, but did perform better on standardized tests. "Based on our research, it appears that the most effective use of homework may be to help students sharpen their skills with things that they already know how to do, rather than trying to use homework as an extension of class time," Tai says. Issues often arise when students and parents do not understand the aim of the homework assignments, Tai adds, and it is imperative for teachers to make the purpose clear.

A 2011 study in the *Journal of Advanced Academics* found that it was the

sense of self-efficacy students felt while completing homework assignments, and the availability of resources (such as a quiet place to work and access to a computer) that led to increased mathematics achievement on an international exam. And students who spent more time on homework performed worse on the exam, the researchers found.

“Although this was a surprising finding, a lack of understanding of a subject can lead to inefficient and disproportionate effort, as well as diminished motivation,” the study states. The researchers add, “This observation fits the notion that students who have low mathematics scores and spend more time on mathematics homework do it precisely because of low self-efficacy and fewer support resources.”

Passage C

For years I have never fully understood my parents’ celebrations of or concerns about my education. They have strong opinions about everything from the curricula used in my classes to how instruction is provided. My parents are both professors in the educational psychology and special education fields, so I have heard their views on education all my life.

One area that has prompted much discussion in our household

surrounds the use of homework, particularly since I entered high school. Based on my own experiences, listening to my parents in their classes, and my research, I have come to the conclusion that homework needs some serious modifications.

First, mastery can only be achieved by correct practice over time. My parents are advocates of explicit instruction; that is, teachers should show us what to do, give us opportunities to do it, and then give us a chance to show that we can do it on our own. Homework was designed to build on skills covered extensively in class. I should be able to complete an assignment with little to no confusion at home as long as it involves previously learned skills.

Many of the homework assignments I have received throughout my years of schooling have involved activities not previously practiced. When a teacher assigns homework incorporating information that was just recently taught or not taught at all, it puts a tremendous amount of stress on students. Worse yet, I think, it puts a great deal of stress on our parents. We rely on our parents to help us be successful. Our parents have to figure out how to do the assignment and then teach it to us. Many of the projects and activities are too difficult to be done without our parents' help. Students who have no help at home, therefore, are at

a total disadvantage and their grades might falter because of this lack of assistance.

Second, homework should not exceed two hours per night. If we assume that we know how to do the homework we are assigned, we should be able to complete it in a reasonable amount of time. But consider the schedules of many high school students: we often wake up early in the morning; some of us have long bus rides; and many of us have sports practices, jobs, or other extracurricular activities before or after school. We have to make time to eat dinner and complete our chores. Now add on three or more hours of homework a night and you have instant stress, not only for students but also for their families. I have known my peers to stay up until midnight trying to finish their homework on top of everything else they have to do in their busy lives. These students are not always procrastinators—they just simply cannot do it all.

Additionally, some teachers assign homework before a test day. All I would like to focus on before a test is studying. I find it hard to put in the necessary hours of studying when I have to complete extra assignments. Before a test day, the only work that should be assigned for a particular class is to study.

The research I read found benefits for homework. Students do better in school if they have homework assignments and actually complete them; they get better test scores too. However, teachers should think about how long assignments might take to complete and whether they involve previously learned skills, and assign them accordingly.

In summary, I enjoy school and appreciate the time my teachers take in providing feedback on homework assignments and in reviewing them in class. If teachers take the time to assign homework we can actually do within a reasonable amount of time, we will enjoy the experience much more, be less stressed, and have more time to spend with our families each evening.

31. The message from the teacher in Texas mentioned in Passage A shows that _____.

考试时的选项顺序

- A) there' s no significant relationship between homework and student success
- B) homework shouldn' t be a burden for either parents or children
- C) the idea of cancelling homework was widely supported in social media

D) spending time doing things together with children is

evidently beneficial ✓

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: Read the following quotes and choose the correct author for each quote. Please note there are two extra options you do not need.

- A. Napoleon Bonaparte
- B. John F. Kennedy
- C. Mahatma Gandhi
- D. Winston Churchill
- E. Abraham Lincoln

1. **B**Mankind must put an end to war, or war will put an end to mankind.

答案: B

2. **A** There are but two powers in the world, the sword and the mind. In the long run the sword is always beaten by the mind.

答案: A

3. **C** First they ignore you, then they laugh at you, then they fight you, then you win.

答案: C

Question 4 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

The headline act for the PowerWatch is unquestionably the ability to thrive solely on your body heat. It was refreshing to not have to worry about a draining battery bar.

However, the positives stop there. The design is ugly and cumbersome, while the only worthwhile fitness features are step counting and sleep tracking — both of which you can get from the most basic of trackers.

The biggest kicker of all though is the price. At \$199 it's ridiculously pricey for what it offers. To put things in perspective the upcoming Fitbit

Versa will retail for an almost-identical figure, yet features a heart-rate sensor, GPS, on-board music storage, NFC (Near-field communication) payments and smart notifications to boot. Side by side, the PowerWatch just looks embarrassing.

4. What does the author say about the PowerWatch?

考试时的选项顺序

- A) It outperforms other products in many aspects.
- B) Its unique advantage is the way it is powered. ✓
- C) Its features are well worth the money it costs.
- D) It has a poor design compared with other watches.

原始的选项顺序

- A) Its features are well worth the money it costs.
- B) It outperforms other products in many aspects.
- C) Its unique advantage is the way it is powered. ✓
- D) It has a poor design compared with other watches.

Question 5 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

What are the practical results of this modern cult of beauty? The

exercises and the massage, the health motors and the skin foods — to what have they led? Are women more beautiful than they were? Do they get something for the enormous expenditure of energy, time, and money demanded of them by the beauty-cult? These are questions which are difficult to answer. For the facts seem to contradict themselves. The campaign for more physical beauty seems to be both a tremendous success and a lamentable failure. It depends on how you look at the results.

5. Which word best describes the author's attitude towards the modern cult of beauty?

考试时的选项顺序

A) scrupulous B) scornful C) detached D) doubtful

原始的选项顺序

A) scornful
B) detached C) scrupulous D) doubtful

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Unless you are a recent arrival from another universe, you' ve no doubt heard that this one is expanding. It' s getting bigger all the time. What' s more, its growth rate is accelerating. Every day, the universe expands a little bit faster than it did the day before.

Those day-to-day differences are _____, though, for astronomers trying to measure the universe' s expansion rate. They want to know how fast it is expanding "today," meaning the current epoch of cosmic history. That rate is important for understanding how the universe works, knowing what its ultimate fate will be and even what it is made of. After all, the prime mission of the Hubble Space Telescope when it was launched in 1990 was to help determine that expansion rate (known, not coincidentally, as the Hubble constant, named for the astronomer Edwin Hubble).

6. Which word best fits in the blank?

考试时的选项顺序

A) negligible

B) ambiguous C) insufficient D) unreadable

✓

原始的选项顺序

A) negligible

B) unreadable C) insufficient D) ambiguous

✓

Question 7 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

_____①_____ With a few exceptions, the Nobel Prizes have honored good science, not pseudoscientific fads. _____②_____ "A lot of scientists who do [good] work...get passed over because there can only be a limited number of winners," notes Harriet Zuckerman, a sociologist at Columbia University.

_____③_____ Even scientists who participated in a discovery might not win a Nobel. The committees that initially set the prize rules decided that a maximum of three people in any category could win each year. Back then, many scientists worked alone or in small groups. But this means that if there was a fourth scientist in a group, they were out of luck. Now, scientists often work in large groups to make major discoveries. _____④_____ In a team of 100, which three would deserve to share that year' s Nobel Prize?

7. Which blank does the following sentence best fit in?

A bigger issue is that there are many more impressive scientific achievements than there are Nobel Prizes.

考试时的选项顺序

A) ① B) ④ C) ③ **D) ② ✓**

原始的选项顺序

A) ① **B) ② ✓** C) ③ D) ④

Question 8 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Most people know they can use their phones for selfies and vacation pictures. But smartphone cameras have become helpful memory aids. Maybe you are buying a house and you want to refer to certain architectural details later on. Maybe you need the minutes of a meeting, but you can't wait for the secretary to transcribe them. Or maybe you have to re-enter your Wi-Fi password, but the password is printed on a little sticker on the back of the router, and your desktop is in another room. Take a picture!

Just remember, when photographing important or sensitive information

(like your passport, passwords, and special documents), you store them safely. ***Memory aids are great, as long as they stay in the right hands.***

8. What does the last sentence mean?

考试时的选项顺序

- A) People should use the right hands to take photographs.
- B) Privacy must be protected when stored in phones. ✓
- C) Most people can make full use of smartphones.
- D) Smartphone cameras can serve as useful memory aids.

原始的选项顺序

- A) Most people can make full use of smartphones.
- B) Privacy must be protected when stored in phones. ✓
- C) Smartphone cameras can serve as useful memory aids.
- D) People should use the right hands to take photographs.

Question 9 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Detailing their findings in a new study published by the journal *Cell*, the researchers, led by the University of Bonn, found evidence that our body's defense system reacts the same way to high-calorie foods packed with fats as it does to bacterial infections. In other words, whenever we eat unhealthy and fatty fast foods, our immune system thinks that it must go into battle mode to fight off a disease. The study found that the behavior

of the immune system can remain quite active even after a switch to a healthier diet.

The researchers say long-term changes to the immune system may be involved in increasing the risk for arteriosclerosis, the hardening, and thickening of arteries, as well as diabetes and other diseases that have been linked to many Western diets.

9. Which of the following statements best summarizes the findings of the new study?

考试时的选项顺序

- A) High-calorie foods lead to bacterial infections.
- B) Fast foods can help fight off some diseases.
- C) Western diets are linked to many diseases.
- D) Junk food puts the immune system on fight. ✓

原始的选项顺序

- A) Junk food puts the immune system on fight. ✓
- B) High-calorie foods lead to bacterial infections.
- C) Western diets are linked to many diseases.
- D) Fast foods can help fight off some diseases.

Question 10 (Suggested completion time: 5 minutes)

Directions: The following figures show the pay gap between men and women in STEM (Science, Technology, Engineering and Math) in the UK, released by the *New Scientist*/SRG annual salary survey in 2017. Answer the question according to the information in the figures.

10. Which of the following about the gender pay gap in STEM in the UK is correct?

考试时的选项顺序

- A) The gender pay gap increases with age and working experience.
- B) From 2012 to 2017, the gender gap widens over time.
- C) Women are paid less from the moment they start working.

✓

- D) Male workers outnumber female workers in the STEM industry.

原始的选项顺序

- A) From 2012 to 2017, the gender gap widens over time.
- B) The gender pay gap increases with age and working experience.
- C) Male workers outnumber female workers in the STEM industry.
- D) Women are paid less from the moment they start working. ✓

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 55 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: Read the following definition of a logical fallacy. Answer the

question according to the definition.

Complex Question Fallacy

A question that has a presupposition built in, which implies something but protects the one asking the question from accusations of false claims. It is a form of misleading discourse, and it is a fallacy when the audience does not detect the assumed information implicit in the question and accepts it as a fact. It is not a fallacy if the implied information in the question is known to be an accepted fact.

11. Which of the following is NOT an example of *Complex Question Fallacy*?

考试时的选项顺序

- A) Did your misleading claims result in you getting promoted?
- B) How long can a healthy man survive without water in normal cases? ✓**
- C) What did you use to wipe your fingerprints from the gun?
- D) How many school shootings should we tolerate before we change the gun laws?

原始的选项顺序

- A) Did your misleading claims result in you getting promoted?

B) How many school shootings should we tolerate before we change the gun laws?

C) What did you use to wipe your fingerprints from the gun?

D) How long can a healthy man survive without water in normal cases? ✓

Question 12 (Suggested completion time: 4 minutes)

Directions: Read the following definition of a logical fallacy. Answer the question according to the definition.

Why does the law state that you have to be 21 years old to drink? Does it really make any difference if you are 20 years and 364 days old? That is absurd. Therefore, if a single day makes no difference, then a collection of 1095 single days won't make any difference. Therefore, changing the drinking age to 18 will not make any difference.

12. Which of the following is of the same logical fallacy as in the text?

考试时的选项顺序

A) It is said that we have a good understanding of our universe.

Therefore, we know exactly how it began and exactly when.

B) I really hope that I don't have to spend my eternity with my Aunt Edna, who really loved me. She drove me crazy with her constant gossiping.

C) We took some pictures of the native girls, but they weren't developed. But we're going back again in a couple of weeks.

D) A single grain of sand does not make a heap of sand. Also, a single grain of sand won't turn a non-heap into a heap.

Therefore, there are no heaps of sand. ✓

原始的选项顺序

A) We took some pictures of the native girls, but they weren't developed. But we're going back again in a couple of weeks.

B) It is said that we have a good understanding of our universe. Therefore, we know exactly how it began and exactly when.

C) I really hope that I don't have to spend my eternity with my Aunt Edna, who really loved me. She drove me crazy with her constant gossiping.

D) A single grain of sand does not make a heap of sand. Also, a single grain of sand won't turn a non-heap into a heap.

Therefore, there are no heaps of sand. ✓

Questions 13-14 Reasoning (Suggested completion time: 10 minutes)

13.

The sugar industry advertised its product with the claim that "Sugar is an essential component of the body, a key material in all sorts of metabolic

processes."

Which of the following, if true, would most undermine the claim of the sugar industry?

A) The average school-aged child should consume two-ounce sugar every day.

B) Sugar excess in children' s diet can aggravate the symptoms of asthma.

C) Blood sugar is a key material in all sorts of metabolic processes, while it isn' t ordinary table sugar. ✓

D) Artificial sweeteners can take the place of sugar, but cannot create chemicals crucial for metabolism.

答案: C

14.

S. J. Sam: Asian people in this country are systematically passed over in the tech field for non-Asians.

Cindy: Actually, according to most research, employers are biased in favor of Asian technical workers.

S. J. Sam: Unless you are Asian, keep your mouth shut. You can' t possibly know the struggles of the Asian community!

Which of the following, if true, would most undermine S. J. Sam' s claim?

考试时的选项顺序

- A) S. J. Sam holds very high expertise in the tech field.
- B) S. J. Sam is an Asian employee who works very hard.
- C) Cindy is an experienced electrical technician for the Pacific Bell Corporation.
- D) Cindy has done a lot of research on the employment of Asians. ✓

原始的选项顺序

- A) S. J. Sam is an Asian employee who works very hard.
- B) S. J. Sam holds very high expertise in the tech field.
- C) Cindy has done a lot of research on the employment of Asians. ✓
- D) Cindy is an experienced electrical technician for the Pacific Bell Corporation.

Questions 15-18 (Suggested completion time: 8 minutes)

Directions: Read the text about a scientist. Answer the questions according to the text.

Nettie Stevens was born in Vermont in 1861 and got her start in science at the relatively late age of 35, when she had saved up enough to enroll in a small startup university in California. It was Stanford, and she thrived

there, earning both a bachelor's and a master's degree by 1900.

After Stanford, Stevens pursued a PhD — a level of education very rare for women of her time — at Bryn Mawr in Pennsylvania. It was there that she turned her attention to solving the problem of sex determinism.

In the early 1900s, the idea that chromosomes contained hereditary information was still a brash new theory. The works of Gregor Mendel himself were only rediscovered in 1900 (Mendel had no audience for his ideas while he was alive), and the scientific community was trying to work out the mechanisms of how traits — including sex determination — were passed between generations.

Stevens wanted to know how (and if) sex was passed on through genetic inheritance. She was making observations with a microscope of the chromosomes in *Tenebrio molitor* — the mealworm beetle — when she discovered something that had eluded humanity for millennia.

Stevens observed that the female mealworm's cells had 20 large chromosomes. The male had 20 chromosomes as well, but the 20th was notably smaller than the other 19. "This seems to be a clear case of sex determination," Stevens wrote in a report summarizing her findings.

She concluded (correctly) that this difference could be traced back to differences in the mealworm sperm. The sperm had either the small version of the 20th chromosome or the large one. "The spermatozoa which contain the small chromosome [determine] the male sex," she wrote, "while those that contain 10 chromosomes of equal size determine the female sex."

(She didn't call these chromosomes X or Y. That naming convention would come later.)

Her sex chromosome discovery in 1905 "was the culmination of more than two thousand years of speculation and experiment on how an animal, plant, or human becomes male or female," historian Stephen Brush explains in *The History of Science Society*. "At the same time it provided an important confirmation for the recently revived Mendelian genetics that was to become a central part of modern biology."

15-17 Decide whether the following statements are True or False according to the text.

15. Nettie Stevens paid the tuition on her own when entering Stanford University.

A) True ✓ B) False

答案: A

16. Gregor Mendel's efforts to explore hereditary information were not recognized until 1900.

A) True ✓ B) False

答案: A

17. Owning a PhD in Stanford helps Nettie Stevens carry out more researches on sex determinism.

A) True B) False ✓

答案: B

18. Which of the following CANNOT be inferred according to Stevens' research?

A) The purpose of the research is to study how sex is inherently determined.

B) The only genetic difference between male and female mealworm is the size of the 20th chromosome.

C) The mealworm sperm that contained smaller chromosomes will determine the male sex. ✓

D) The research contributed greatly to the acknowledgement of Mendelian genetics.

答案: C

Questions 19-21 (Suggested completion time: 7 minutes)

Directions: Read the text about beer. Answer the questions according to the text.

For many world travelers, the process of learning a local language will extend only to three words: "Please," "Thank-you," and "Cheers!" If that's too many, you can probably forget the first two.

Without question, the best way to integrate into a new culture is to share a tippie with the locals, and the world's favorite alcoholic drink is beer. According to *Chartsbin.com* (a data visualization web tool), beer is the most drunk alcoholic beverage in 81 countries, including in the U.S., Canada, the United Kingdom and Australia.

The Czechs consume the most beer per capita of anyone (more than 30 gallons per person per year), with the average American drinking around 16.5 gallons each. And although you may think the advertising power of Anheuser-Busch InBev would make an American beer the most sold in the world, you would be wrong. China's Snow is by far the most popular brand globally, accounting for 5.5 percent of the world's total beer sales. Bud Light accounts for only 2.6 percent, and Budweiser 2.3 percent.

Newsweek's beer gallery takes a look at the best-selling beers in the most populous nations in the world (countries where alcohol is prohibited have been excluded). Remember, "best-selling" is rarely the same as "best," so don't expect beer connoisseurs to be heading out to their local craft brewery and seeking pints of any of these. However, if you ever find yourself in a bar in the Ivory Coast, the Philippines, Tanzania or Colombia, it might be useful to know what your neighbor is most likely drinking.

19. What is the text mainly about?

考试时的选项顺序

- A) Best-selling and best beers.
- B) The popularity of beer across the globe. ✓**
- C) Brands and market share of beer.
- D) Beers and cultural integration.

原始的选项顺序

- A) Brands and market share of beer.
- B) The popularity of beer across the globe. ✓**
- C) Beers and cultural integration.
- D) Best-selling and best beers.

20. According to the text, which of the following is INCORRECT about beer?

考试时的选项顺序

- A) China's Snow has the largest share in global beer sales.
- B) Anheuser-Busch InBev's marketing strategy is not as successful as expected.
- C) Beer is the most favorite alcoholic drink in many parts of the world.
- D) The newly learnt local expression for "beer" can be easily forgotten. ✓

原始的选项顺序

- A) Beer is the most favorite alcoholic drink in many parts of the world.
- B) Anheuser-Busch InBev's marketing strategy is not as successful as expected.
- C) The newly learnt local expression for "beer" can be easily forgotten. ✓
- D) China's Snow has the largest share in global beer sales.

21. What does the author indicate by the underlined sentence in the last paragraph?

考试时的选项顺序

- A) You will know which beer is the best by looking at what your neighbors in the bar choose to drink.
- B) You will know “best-selling” is rarely the same as “best” by looking at what your neighbors in the bar choose to drink.
- C) You will know beer is a necessity in people’ s daily life in these countries by looking at what your neighbors in the bar choose to drink.
- D) You will know which beer is the best-selling by looking at what your neighbors in the bar choose to drink. ✓

原始的选项顺序

- A) You will know which beer is the best by looking at what your neighbors in the bar choose to drink.
- B) You will know which beer is the best-selling by looking at what your neighbors in the bar choose to drink. ✓
- C) You will know “best-selling” is rarely the same as “best” by looking at what your neighbors in the bar choose to drink.
- D) You will know beer is a necessity in people’ s daily life in these countries by looking at what your neighbors in the bar

choose to drink.

Questions 22-23 (Suggested completion time: 7 minutes)

Directions: Read the following email. Answer the questions according to the email.

Greetings,

Thank you for your interest in New York University' s School of Professional Studies (NYU-SCPS). General information about NYU-SCPS financial aid options, tuition/fees, admissions events and the admissions process (including the deadlines, application requirements, admissions criteria and Frequently Asked Questions/FAQs) is available at:

<http://www.scps.nyu.edu/admissions/graduate.html>. The admissions process begins with our on-line application, which is accessible 24 hours a day, 7 days a week.

Please be aware of the deadlines and submit your application well in advance as you do not want to risk being closed out of the term in which you are interested. Once you submit your application we will send you periodic updates to inform you of the status of your application. You may also check your status by logging back into the online application system. Additionally, applications are reviewed once we have received

sufficient information to render a decision, not necessarily from the date of submission. If you have specific questions about your degree program that cannot be answered by reviewing our website, we encourage you to reach out to the Admissions Officer assigned to your program.

Because the NYU-SCPS Admissions Office practices “ ***rolling admissions***,” applications are reviewed throughout the year so you may apply at any time. However, if you are applying for a specific term, please adhere to the application submission dates. NYU-SCPS master’ s degree and graduate certificate programs are open to all qualified candidates who hold a bachelor’ s degree from a regionally accredited college or university. International candidates who hold a degree that is equivalent to a U.S. bachelor’ s degree are also eligible to apply. Students can only apply to one program within NYU.

All of our graduate program offerings are listed on our website:

<http://www.scps.nyu.edu/academics/degree-programs/graduate.html>

If there is a specific program you are interested in that is not listed in our offerings, it is most likely offered through another division at New York University. Kindly review other departments via www.nyu.edu to see which department offers the best program for your interest.

Please let me know if I can assist you with any further questions.

Sincerely,

Benjamin Dobbs

Admissions Officer

NYU School of Professional Studies

Office of Admission

22. What does “*rolling admissions*” in the third paragraph mean?

考试时的选项顺序

A) It means there's no deadline for your application. The sooner you apply, the sooner you'll hear back. ✓

B) It means if you submit your application late, it will be covered by others' .

C) It means that if you are on a waiting list, you can still apply for other programs.

D) It means that it offers periodic updates once your application is submitted.

原始的选项顺序

A) It means if you submit your application late, it will be covered by others' .

- B) It means that it offers periodic updates once your application is submitted.
- C) It means that if you are on a waiting list, you can still apply for other programs.
- D) It means there' s no deadline for your application. The sooner you apply, the sooner you' ll hear back. ✓

23. Which of the following statements is TRUE?

考试时的选项顺序

- A) The email receiver has recently applied for the master' s degree program of NYU-SCPS.
- B) Undergraduates can apply for the graduate certificate programs of NYU-SCPS.
- C) The Office of Admission starts reviewing applications once submission is closed.
- D) Eligible international candidates can apply for programs offered in other divisions at NYU. ✓

原始的选项顺序

B) The Office of Admission starts reviewing applications once submission is closed.

C) Eligible international candidates can apply for programs offered in other divisions at NYU. ✓

D) Undergraduates can apply for the graduate certificate programs of NYU-SCPS.

Questions 24-26 (Suggested completion time: 7 minutes)

Directions: Read the text about cancer. Answer the questions according to the text.

Cancer, with us since the dawn of cellular life, is a companion we may never be rid of, says Arizona State University evolutionary biologist Athena Aktipis. But a fresh look at the disease could bring new strategies for managing it, she told a Harvard audience on April 4, 2018.

Aktipis' work employs the nontraditional approach of applying models of how plants and animals relate to each other ecologically to systems in the human body. In her lecture at the Harvard Museum of Natural History, "Why Cancer Is Everywhere," she focused on the relation of cancer cells to healthy ones, saying that cancer cells can be thought of as "cheaters" within a system of working cells. The "everywhere" in the lecture's title was a reference to cancer's presence in plant as well as

animal life.

Aktipis began her presentation by showing a slide of a rare crested cactus that is found near her home in Arizona. “This picture is one of the reasons that I started looking at cancer from a(n) _____²⁴ perspective,” she said.

The cactus displays clustered cells that have a cancer-like appearance — an example of fasciation, or abnormal growth in plants. This led her to make two observations: Humans aren’ t alone in their struggle with cancer, and these plants were able to grow and survive despite the abnormal growths. These realities, she noted, have profound implications for human research.

Cancer is an inevitable byproduct of cell cooperation, Aktipis noted. “We have approximately 30 trillion cells in our bodies that cooperate with each other and coordinate their gene expression. This is far beyond any cooperation you could hope to achieve in a human society.”

As multicellular organisms evolve and the system grows larger, so does the possibility that “cheater” cells may appear to exploit the system. This is what cancer cells do: ***Proliferate*** without limit, avoid cell death,

monopolize resources, co-opt the labor of other cells, and destroy the surrounding environment. When cancer is present, the rules of intercellular cooperation break down.

24. Which word best fits in the blank in paragraph 3?

考试时的选项顺序

- A) interactive **B) evolutionary** C) preliminary D) objective
✓

原始的选项顺序

- A) interactive **B) evolutionary** C) objective D) preliminary
✓

25. What does the word *proliferate* in the last paragraph mean?

考试时的选项顺序

- A) control completely B) oppose
C) increase rapidly ✓ D) extinct

原始的选项顺序

- A) extinct B) oppose
C) increase rapidly ✓ D) control completely

26. Which of the following is correct according to the text?

考试时的选项顺序

A) To cure cancer is to find the “cheater” cells and eradicate them.

B) In human’ s evolution, cancer cells are unavoidable byproducts. ✓

C) Cactus can more easily survive their “cancer” than other plants.

D) Aktipis found new therapies to cure human’ s cancer.

原始的选项顺序

A) Aktipis found new therapies to cure human’ s cancer.

B) In human’ s evolution, cancer cells are unavoidable byproducts. ✓

C) Cactus can more easily survive their “cancer” than other plants.

D) To cure cancer is to find the “cheater” cells and eradicate them.

Questions 27-30 (Suggested completion time: 8 minutes)

Directions: Read the text about email newsletters. Answer the questions according to the text.

On any given day, most of our email inboxes are flooded with a barrage

of automated email newsletters that do little else besides giving us another task to do on our commutes to work — namely, marking them all as read without reading, or unsubscribing altogether.

But every now and then, we get a newsletter that's so good, not only do we read it, but we click it, share it, and recommend it to our friends.

What Makes an Effective Email Marketing Campaign?

Effective email marketing campaigns need to be cleverly written to attract attention in busy inboxes. Here are three things your next email campaign should have.

1. _____ 27

Marketing emails need to be personalized to the reader and filled with interesting graphics. Few people want to read emails that are addressed "Dear Sir/Madam" — as opposed to their first or last name — and even fewer people want to read an email that simply gives them a wall of text. Visuals help your recipients quickly understand what the point of the email is.

2. _____ 28

Effective email marketing campaigns are designed for all devices on which users can read their emails — desktop, tablet, and smartphone. Email campaigns that are designed for mobile devices are especially important — a quality known as “responsive design.” In fact, 67% of emails today are read on either a smartphone or tablet.

3. _____ 29

Above all, exceptional marketing emails must contain a meaningful call-to-action (CTA). After all, if brands are taking up subscribers’ time — and inbox space — with another email, every message must have a point to it. ***Internet users get multiple emails per day — why should they care about yours?***

27. 27-29 Select ONE subtitle for each blank from the options below.

- A. Personalization and Imagery
- B. Be Extraordinary in Emails
- C. Design for All
- D. An Appropriate Call-to-Action
- E. Respective Greetings
- F. Responsive Design

27.A

28.F

29.D

答案: A, F, D

30. Why does the author say *Internet users get multiple emails per day — why should they care about yours?*

考试时的选项顺序

A) To explain why Internet users get interested in a certain email.

B) To raise reader' s concern about endless junk emails.

C) To stress the importance of considering subscribers' feelings. ✓

D) To oppose the current email marketing strategies.

原始的选项顺序

A) To explain why Internet users get interested in a certain email.

B) To stress the importance of considering subscribers' feelings. ✓

C) To raise reader' s concern about endless junk emails.

D) To oppose the current email marketing strategies.

Directions: In Part III, you will read three passages on the same subject. You are required to identify the author' s position and

evaluate the effectiveness of the author's arguments. (Time allowed: 35 minutes)

Questions 31-40 (Suggested completion time: 35 minutes)

Directions: Read three passages about *keeping up with the Joneses*.

Answer the questions according to the passages.

Passage A

"Keeping up with the Joneses" was a common phrase in 20th century America that is still in use today. It refers to the practice of buying items to impress neighbors or increase social standing, rather than from a desire for the items themselves. This practice is also known as "conspicuous consumption." "Keeping up with the Joneses" originated as the title of a popular comic strip in the early 20th century. It quickly passed into popular usage as a way of describing American consumer culture.

In 1913, cartoonist Arthur "Pop" Mom and launched his comic strip *Keeping up with the Joneses* in the *New York Globe*. The strip chronicled the misadventures of Aloysius P. McGinnis, whose wife was obsessed with maintaining a social standing equal to that of their well-to-do neighbors, the Jones family. Ironically, the Joneses of the title were never actually seen by readers of the comic. The popular strip was syndicated nationally, inspiring an animated film, a stage musical, and several tie-in books. The title phrase had become part of the American lexicon by the time the comic ended in 1938.

The 20th century saw the rise of American consumer culture. Advertisers and manufacturers played on the love of novelty and affluence to sell everything from cars to kitchen appliances. By the 1950s, a key part of this marketing strategy was selling new items to consumers who already owned similar items. One method to achieve this was "planned obsolescence," designing items to be useless or outdated within a short time. Another method was promoting ***conspicuous consumption***, often referred to as "keeping up with the Joneses."

The strategy was simple: advertisements suggested that people who did not purchase the latest car or popular item risked being seen as

impoverished or socially backward by their peers. This “keeping up with the Joneses” approach was quite effective, even if those peers, like the Joneses of the comic strip, were never actually seen. The practice of purchasing the latest items to display social standing has persisted into the 21st century, with items like smartphones and media players. New generations of these high-tech devices are sometimes introduced to the market within months of the previous versions. The phrase and its variations still enjoy wide currency in everyday use and popular culture.

Passage B

One of the easiest ways to feel bad about oneself is to compare yourself unfavorably to others. We may be tempted to compare ourselves with those who have more accomplishments, seem more attractive, make more money, or boast more Facebook friends.

When you find yourself envious of what someone else has, and feel jealous, inferior or inadequate as the result, you’ re having a negative social comparison moment.

Habitual negative social comparisons can cause a person to experience greater stress, anxiety, depression, and make self-defeating choices.

Two interesting notes about negative social comparison:

1. Negative social comparison has elements of narcissism.

When we wish to look, be, or have like others, we're not really wishing for everything about that person, but only the idealized aspects of the individual. This idealized and grandiose (浮夸的) perception of another is narcissistic in nature. Chances are, not even those whom you compare yourself with can live up to your idealized images of them. This is why so often when people spend some length of time with their "heroes," "heroines," "role models," or "idols," they discover that those whom they look up to also have weaknesses, flaws, difficulties and problems just like everyone else.

2. It's relatively easy to change from idealizing to humanizing.

For example, you may wish that you had the perfect career and a lot of money like your manager Joe, or the good looks of your friend Kelly, or a wonderful romantic relationship like Samantha. Comparing yourself with them might cause you to feel somehow "lesser." But when you look at their lives more objectively, you know that Joe has health problems and family issues, Kelly is actually insecure about her looks, and it took Samantha a painful divorce and many hard lessons before she found a

compatible mate. Looking at them from a more balanced perspective, you realize there' s more than meets the eye, and that they' re human beings with their own share of challenges like you.

There are four conditions in life which might cause sufferings: birth, aging, illness, and death. No one, no matter how powerful, successful, wealthy, or fabulous they seem on the outside, can escape these truths. _____ 34 _____. What' s left, then, are values which truly make our brief existence on this earth worthwhile: self-acceptance, quality relationships, and a meaningful life' s purpose. For each of these, the answers and our ability to realize them come from WITHIN. No external accomplishments, privileges, entitlements or materialism alone can achieve them. No superficial status, ranks, stations, or possessions are required to realize them.

Passage C

I' ll read or hear about someone' s fantastic vacation or amazing restaurant meal or their cruise and I' ll feel jealous.

I want that experience, too.

I want to “keep up with the Joneses,” not in terms of stuff, but in terms of experiences. I want to see the world. I want to taste the foods. I want to attend the shows.

The thing is, it would be very easy, as a fairly financially responsible person, to fall into that trap. It’s a tricky trap to fall into, too, because you’re not even accumulating any stuff to point out to yourself all of the money you’re spending.

So, how do I solve this?

One strategy, of course, is to just further trim my social circle down to people who just don’t take on expensive experiences — or at least don’t share them. ***That’s a non-starter.*** There are people that I deeply value in my life who have the financial means to travel to Paris or Tokyo every year, and they do so. It’s on me to deal with it, not on them. I would do the same thing as them if I were in their financial state.

Here are several real strategies I use to handle that situation.

One, I think about experiences outside of the glare of social media and social relationships. I don’t consider what we’ll do for our family

vacation next year while staring at gorgeous pictures of Tuscany that a friend posted to Facebook. Instead, I think about it after a day or two spent with my family and with time to think about what we really enjoy and what we can sensibly afford.

This often points me toward trips like our family vacation this past summer, where we camped at Yellowstone using a free national parks pass. That trip absolutely nailed the things that my family loves, and it happened on a shoestring budget. When I think about delicious meals, I don't stare at pictures of amazing restaurants that friends are talking about. Instead, I look around my own kitchen and wonder what I can create myself for my family.

My decisions about the experiences I enjoy are ones that I make far away from sources that might tempt me and might drive up my "jealousy" factor.

Two, I think about why I'm jealous. The easy answer might be that I wish I could go to Paris on a long weekend, but the real answer is that I wish I could afford a trip to Paris without any long-term financial ramifications.

Thinking in that fashion, and realizing that it has less to do with the trip

itself and more to do with recognizing that I' m not yet where I want to be financially, pushes me to do better. It pushes me to spend less on unimportant things so that I can have the important things.

It pushes me to not sweat about that trip to Paris right now, but to make smart financial moves so that when we do eventually take a trip like that, the real financial impact is minimal. I don' t yet deserve that experience because I haven' t yet achieved the financial change necessary to make such an experience happen without financial stress. Until then, it' s on me.

Three, I reflect on the financial state of those enjoying the experience. Some of them are at retirement age and are enjoying the fruits of thirty-five years of financial planning and hard choices. Others are spending themselves into a deep hole of debt that' s going to add a lot of stress to their life. Still others can outright afford those experiences, but they' re lassoed (用套索套住) to a high-stress career to be able to afford it, which takes away from the joys of daily life.

On the whole, I' m pretty happy *forgoing* most of those "great experiences" in order to be able to enjoy lower stress and contentment in other areas of my life. I don' t have any debt whatsoever. I' m building toward a state of financial independence where I won' t have to work at

all, and if I push a little bit past that, I'll be able to afford such things without any long term financial risk — but I'm not there yet. I have a pretty low-stress life, all told, without incredible career pressure. I wouldn't trade those things away for an annual trip to Jakarta.

In the end, experiences can become all about "keeping up with the Joneses" as material items are, especially in the age of social media. The best tool that you have in your repertoire is to step back, breathe, and reflect on why you feel that way.

31. What is *conspicuous consumption* according to Passage A?

- A) It refers to the behavior of buying a lot of useless stuff.
- B) It is a kind of blind consumption in order to show off. ✓
- C) It refers to a popular American consumer culture.
- D) It can act as a way to determine one's social standing.

答案: B

32. What is Passage A mainly about?

考试时的选项顺序

- A) The variations of the phrase “keeping up with the Joneses” in today’ s society.
- B) The background information of the phrase “keeping up with the Joneses” .
- C) The usage of the phrase “keeping up with the Joneses” as a marketing strategy.
- D) The origin of the phrase “keeping up with the Joneses” and its application. ✓

原始的选项顺序

- A) The background information of the phrase “keeping up with the Joneses” .
- B) The usage of the phrase “keeping up with the Joneses” as a marketing strategy.
- C) The variations of the phrase “keeping up with the Joneses” in today’ s society.
- D) The origin of the phrase “keeping up with the Joneses” and its application. ✓

33. Which of the following is NOT negative social comparison according to Passage B?

考试时的选项顺序

- A) Fantasizing about owning an idealized and perfect life.
- B) Focusing on others' success and feeling inferior to them.
- C) Feeling envious of people who are quite wealthy.
- D) Finding out weaknesses and flaws of one's own idols. ✓

原始的选项顺序

- A) Feeling envious of people who are quite wealthy.
- B) Fantasizing about owning an idealized and perfect life.
- C) Finding out weaknesses and flaws of one's own idols. ✓
- D) Focusing on others' success and feeling inferior to them.

34. Which of the following best fits in the blank in Passage B?

考试时的选项顺序

- A) The purpose of life is to experience happiness out of sufferings
- B) These conditions effectively make all of us equal ✓
- C) These common experiences make human life complete
- D) The only way to avoid the pain is to stop comparing

原始的选项顺序

- A) These conditions effectively make all of us equal ✓

- B) The only way to avoid the pain is to stop comparing
- C) The purpose of life is to experience happiness out of sufferings
- D) These common experiences make human life complete

35. Which is the best title for Passage B?

考试时的选项顺序

- A) Do not Get Lost in Comparing Yourself to Others
- B) How to Avoid Negative Comparison with Others ✓
- C) Understandings about Negative Social Comparison
- D) How to Find a Meaningful Purpose in Your Life

原始的选项顺序

- A) Understandings about Negative Social Comparison
- B) How to Avoid Negative Comparison with Others ✓
- C) Do not Get Lost in Comparing Yourself to Others
- D) How to Find a Meaningful Purpose in Your Life

36. What does the sentence *That's a non-starter* in Passage C mean?

考试时的选项顺序

- A) The author will not give up friends only because they are better off. ✓
- B) The author will regard social comparing useless and impractical.
- C) The author will not blame the friends who travel abroad every year.
- D) The author will share his own fancy trips in a smaller social media circle.

原始的选项顺序

- A) The author will not give up friends only because they are better off. ✓
- B) The author will share his own fancy trips in a smaller social media circle.
- C) The author will regard social comparing useless and impractical.
- D) The author will not blame the friends who travel abroad every year.

37. The word **forgoing** in Passage C is closest in meaning to _____.

考试时的选项顺序

- A) persisting in considering
- B) losing the right to experience
- C) experiencing in advance
- D) giving up the enjoyment ✓

原始的选项顺序

- A) experiencing in advance
- B) giving up the enjoyment ✓
- C) losing the right to experience
- D) persisting in considering

38. Which of the following statements is TRUE according to Passage C?

考试时的选项顺序

- A) Discontent with the limited choices in career is the origin of social comparison.
- B) A low-stress life outweighs a trip abroad for the author. ✓
- C) Financial status interferes with the vacation plan of the author' s family.
- D) Trip to Paris is feasible if the author goes there on a long weekend.

原始的选项顺序

- A) Trip to Paris is feasible if the author goes there on a long

weekend.

B) Financial status interferes with the vacation plan of the author' s family.

C) A low-stress life outweighs a trip abroad for the author. ✓

D) Discontent with the limited choices in career is the origin of social comparison.

39. What message is contained in both Passage A and Passage C about “keeping up with the Joneses” ?

考试时的选项顺序

A) It takes on different forms. ✓

B) Its influence spreads over social media.

C) Its essence is comparison of financial status.

D) It may motivate people to work hard.

原始的选项顺序

A) Its essence is comparison of financial status.

B) Its influence spreads over social media.

C) It may motivate people to work hard.

D) It takes on different forms. ✓

40. What can be inferred from both Passage B and Passage C?

考试时的选项顺序

A) If you feel jealous about other' s life or experiences, you will get lost in your life.

B) It is better not to compare yourself with other successful people.

C) Everyone has challenges in life though their life or experiences may seem great. ✓

D) Even though you are inferior to some people, you should never lose heart.

原始的选项顺序

A) Even though you are inferior to some people, you should never lose heart.

B) If you feel jealous about other' s life or experiences, you will get lost in your life.

C) Everyone has challenges in life though their life or experiences may seem great. ✓

D) It is better not to compare yourself with other successful people.

2017 复赛 (1)

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: *Read the following quotes. Match the quotes with the people. Please note there are two extra options you do not need.*

- A. Ralph Waldo Emerson
- B. Oscar Wilde
- C. William Shakespeare
- D. Francis Bacon
- E. George Bernard Shaw

1. **C** What' s in a name? That which we call a rose by any other word would smell as sweet.

答案: C

2. **E** The reasonable man adapts himself to the world; the unreasonable one persists in trying to adapt the world to himself.

答案: E

3. **B** We are all in the gutter, but some of us are looking at the stars.

答案: B

Question 4 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

That glass of wine or pint of beer you enjoy with dinner every night might come with an added benefit—a lower risk of type 2 diabetes, a new Danish study contends.

The researchers found that men who had 14 drinks each week and women who had nine drinks a week appeared to have the lowest risk of type 2 diabetes, compared to nondrinkers or people who drank more heavily, said senior researcher Janne Tolstrup.

People received the most benefit if they spread those drinks out during the week, rather than downing them all in one or two binges, Tolstrup added.

“_____ seemed to play a role for the risk of diabetes,” Tolstrup said.

“Drinking frequency was important, as those who were drinking three to four times per week had lower risk as compared to those drinking only once per week—regardless of the total weekly amount.”

4. What may be the missing words?

考试时的选项顺序

- A) Drinking duration B) Drinking quantity
C) Drinking pattern ✓ D) Drinking culture

原始的选项顺序

- A) Drinking duration B) Drinking culture
C) Drinking pattern ✓ D) Drinking quantity

Question 5 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

A hundred years ago today a man died. He died immortal. He departed laden with years, laden with works, laden with the most illustrious and the most fearful of responsibilities, the responsibility of the human conscience informed and rectified. He went cursed and blessed, cursed by the past, blessed by the future; and these, gentlemen, are the two superb forms of glory. On his deathbed he had, on the one hand, the acclaim of contemporaries and of posterity; on the other, that triumph of hooting and of hate which the implacable past bestows upon those who have combated it. He was more than a man; he was an age. He had exercised a function and fulfilled a mission. He had been evidently chosen for the work which he had done, by the supreme will, which manifests itself as visibly in the laws of destiny as in the laws of nature.

5. The text is most probably taken from _____.

考试时的选项顺序

- A) a novel B) a diary
C) an autobiography D) an oration ✓

原始的选项顺序

- A) a novel B) a diary
C) an oration ✓ D) an autobiography

Question 6 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

City trees offer a host of benefits. These include helping soak up stormwater that might otherwise drain into rivers (carrying pollution with it). Trees also provide cooling shade. They even soak up carbon dioxide, a greenhouse gas. At the same time, these trees release oxygen into the air.

But oxygen is far from the only gas that trees and certain other green

plants release into the air. One of these chemicals is a hydrocarbon known as isoprene. It can react with combustion pollutants, such as nitrogen oxides. The result is the formation of ozone. A component of smog, ozone can irritate the lungs and aggravate airway diseases, such as asthma.

6. According to the text, what can city trees emit?

考试时的选项顺序

- A) Isoprene. ✓
- B) Carbon dioxide.
- C) Ozone.
- D) Nitrogen oxides.

原始的选项顺序

- A) Ozone.
- B) Isoprene. ✓
- C) Carbon dioxide.
- D) Nitrogen oxides.

Question 7 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Rampant road building has shattered the Earth' s land into 600,000 fragments, most of which are too tiny to support significant wildlife, a new study has revealed.

The researchers warn roadless areas are disappearing and that urgent action is needed to protect these last wildernesses, which help provide vital natural services to humanity such as clean water and air.

The impact of roads extends far beyond the roads themselves, the scientists said, by enabling forest destruction, pollution, the splintering of animal populations and the introduction of deadly pests. New roads

also pave the way to further exploitation by humans, such as poaching or mining, and new infrastructure.

7. What is the best title for this text?

考试时的选项顺序

- A) Tiny Fragments Shattered by Road Building
- B) The Stunning Effect of Roads on Nature ✓**
- C) The Pros and Cons of Road Building
- D) Current Conditions of Roadless Areas

原始的选项顺序

- A) The Stunning Effect of Roads on Nature ✓**

- C) Tiny Fragments Shattered by Road Building
- D) Current Conditions of Roadless Areas

Question 8 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Hillman' s portrait of Bill Richmond from 1812

Who was the first African American sports superstar? Ask any boxing fan and they might tell you it was Jack Johnson, a fierce fighter who terrorized opponents on his way to becoming the first black heavyweight champion in 1908. However, 100 years before “The Galveston Giant,” there was Bill Richmond: a former slave who used both his brains and brawn to revolutionize both the sport and public perception of African Americans in general. In 2017, as part of a larger archaeological investigation of a former London burial site known as St. James’ Garden, researchers began the hunt for Richmond’ s unmarked grave, in the hopes of shedding a light on this unlikeliest of sports stars.

8. What do we know about Bill Richmond from the text?

考试时的选项顺序

A) He was the first African American superstar.

- B) He was much more successful than Jack Johnson.
- C) He was an influential sportsman in the 19th century. ✓
- D) He was considered “the Galveston Giant” .

原始的选项顺序

- A) He was an influential sportsman in the 19th century. ✓
- B) He was much more successful than Jack Johnson.
- C) He was considered “the Galveston Giant” .
- D) He was the first African American superstar.

Question 9 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

“Dear Gregory,” I muttered, and crept nearer to him for warmth. He was talking still, and again about our mother, when I fell asleep. In an instant—or so it seemed—there were many voices about me—many faces hovering round me—the sweet luxury of warmth was stealing into every part of me. I was in my own little bed at home. I am thankful to say, my first word was “Gregory?”

A look passed from one to another—my father’s stern old face strove in vain to keep its sternness; his mouth quivered, his eyes filled slowly with unwonted tears.

"I would have given him half my land—I would have blessed him as my son, —oh God! I would have knelt at his feet, and asked him to forgive my hardness of heart."

I heard no more. A whirl came through my brain, catching me back to death.

9. What can be inferred from the text?

考试时的选项顺序

- A) "My father" was strict with his son.
- B) I was disappointed in "my father" .
- C) "I" have no feeling towards "my father" .
- D) Gregory left because of "my father" . ✓

原始的选项顺序

- A) Gregory left because of "my father" . ✓
- B) "My father" was strict with his son.
- C) "I" have no feeling towards "my father" .
- D) I was disappointed in "my father" .

Question 10 (Suggested completion time: 5 minutes)

Directions: *The following bar chart shows the median annual earnings of full-time year-round workers 25 to 34 years old, by educational attainment and race/ethnicity in 2014. Answer the question according to the information in the chart.*

†: Reporting standards not met (too few cases for a reliable estimate).

SOURCE: U.S. Department of Commerce, Census Bureau, Current Population Survey (CPS), "Annual Social and Economic Supplement," 2015.

10. Which of the following is an INCORRECT description of the chart?

考试时的选项顺序

- A) The median annual earnings of Black full-time workers aged 25–34 with a high school degree are lower than those with a bachelor's or higher degree.
- B) In general, higher levels of educational attainment are associated with higher median annual earnings for 25- to

34-year-old full-time workers in all racial/ethnic groups.

C) Among the full-time workers aged 25–34 with a high school diploma, the White show higher median annual earnings than their Black, Hispanic, and Asian peers.

D) Among those with a bachelor' s or higher degree, Asian full-time workers aged 25–34 are the only group whose median annual earnings are higher than those of the total. ✓

原始的选项顺序

A) Among the full-time workers aged 25–34 with a high school diploma, the White show higher median annual earnings than their Black, Hispanic, and Asian peers.

B) The median annual earnings of Black full-time workers aged 25–34 with a high school degree are lower than those with a bachelor' s or higher degree.

C) In general, higher levels of educational attainment are associated with higher median annual earnings for 25- to 34-year-old full-time workers in all racial/ethnic groups.

D) Among those with a bachelor' s or higher degree, Asian full-time workers aged 25–34 are the only group whose median annual earnings are higher than those of the total. ✓

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 40 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: *Read the definition of the following logical fallacy. Answer the question according to the definition.*

Availability Heuristic

As to *availability heuristic*, decision makers “assess the frequency of a class or the probability of an event by the ease with which instances or occurrences can be brought to mind.” Usually this heuristic works quite well; all things being equal, common events are easier to remember or imagine than are uncommon events. By relying on availability to estimate frequency and probability, decision makers are able to simplify what might otherwise be very difficult judgments.

11. Which of the following provides a typical example of *availability heuristic*?

考试时的选项顺序

A) Whatever your reasons are for buying that gift, they’ ve got

to be ridiculous. You said yourself that you got the idea for buying it from last night's fortune cookie. Cookies can't think!

B) That cannot be Senator Smith there in the videotape going into her apartment. If it were, he'd be a liar about not knowing her. He's not the kind of man who would lie. He's a member of my congregation.

C) What she says about Johannes Kepler's astronomy of the 1600s must be just so much garbage. Do you realize she's only fifteen years old?

D) I just saw a video of a woman dying by fire in a car crash because she was unable to unbuckle her seat belt as the flames increased in intensity. So, I am deciding today no longer to wear a seat belt when I drive. ✓

原始的选项顺序

A) I just saw a video of a woman dying by fire in a car crash because she was unable to unbuckle her seat belt as the flames increased in intensity. So, I am deciding today no longer to wear a seat belt when I drive. ✓

B) That cannot be Senator Smith there in the videotape going into her apartment. If it were, he'd be a liar about not knowing her. He's not the kind of man who would lie. He's a member of

my congregation.

Question 12 (Suggested completion time: 4 minutes)

Directions: *Look at the following picture and answer the question.*

12. Which of the following logical fallacies does the picture illustrate?

考试时的选项顺序

A) **Appeal to Hypocrisy:** This fallacy involves countering someone' s argument by pointing out that it conflicts with his or her own past actions or statements. Thus, by answering a charge with a charge, it diverts attention from the argument at hand to the person making it.

B) **Guilt by Association:** This is a fallacy in which a person is said to be guilty of error because of the group he or she associates with. The fallacy occurs when we unfairly try to change the issue to be about the speaker' s circumstances rather than about the speaker' s actual argument.

C) **Appeal to Bandwagon:** This argument uses the fact that many people (or even a majority) believe in something as evidence that it must be true. This type of argument has often impeded the widespread acceptance of a pioneering idea. ✓

D) **Ad Hominem:** An argument that attacks a person rather than the argument he or she is making, with the intention of diverting the discussion and discrediting their argument.

原始的选项顺序

D) **Ad Hominem:** An argument that attacks a person rather than the argument he or she is making, with the intention of diverting the discussion and discrediting their argument.

Question 13 (Suggested completion time: 3 minutes)

Directions: *Read the following text and answer the question according to the text.*

The enormous distances between stars are not spaces entirely devoid of matter. The interstellar spaces are filled with "dust" : very low density matter. This miniscule amount of matter, spread over almost infinite distances, acts like a curtain obscuring the stars that lie behind. If it were

not for this material we would see no dark patches in the sky at night:
the sky would be entirely covered with stars.

13. What roles do the two parts in bold play in the text?

考试时的选项顺序

A) The first is a fact that the author thinks is important in explaining a certain phenomenon. The second is a result that the author would expect if that fact were not true. ✓

B) The first is an established fact that the author wishes to explain. The second is a consequence of accepting this fact.

C) The first is a suggestion that the author wishes to dispute. The second is a hypothesis that the author wishes to explain.

D) The first is a speculation that the author wishes to justify. The second is a consequence that would result if that speculation is not true.

E) The first is the main point the author wishes to make. The second is a hypothetical result of accepting that point.

原始的选项顺序

C) The first is a fact that the author thinks is important in explaining a certain phenomenon. The second is a result that the author would expect if that fact were not true. ✓

D) The first is an established fact that the author wishes to explain. The second is a consequence of accepting this fact.

E) The first is a speculation that the author wishes to justify. The second is a consequence that would result if that speculation is not true.

Question 14 (Suggested completion time: 3 minutes)

Directions: *Read the text about a famous experiment in history. Answer the question according to the text.*

The Asch Conformity Experiment

The Asch Experiment is a famous example of the temptation to conform during group situations. It' s a series of experiments conducted by psychologist Solomon Asch in the 1950s. In each of the experiments, one subject is placed in a room full of actors. The person conducting the experiment held up an image with three numbered lines and asked each person in the room to identify the longest line. The actors purposely chose the incorrect line in order to determine whether the subject would

answer honestly or simply go along with the group answer.

The Experiment has been repeated many times over the years with students and non-students, old and young, and in groups of different sizes and different settings. The results are consistently the same with one-third to one-half of the participants making a judgment contrary to fact, yet in conformity with the group, demonstrating the strong power of social influences.

14. Which of the following could NOT be demonstrated by this scientific experiment?

考试时的选项顺序

A) Knowledge could be constructed and disseminated in the way that is shown in the Experiment.

B) The responses of the subjects revealed strong individual differences rather than conformity to group preferences. ✓

C) Very often even simple objective facts cannot withstand the distorting pressure of group influence.

D) The behavior and expectations of others can greatly influence us and shape how we think and act.

原始的选项顺序

D) The responses of the subjects revealed strong individual differences rather than conformity to group preferences. ✓

Question 15 (Suggested completion time: 3 minutes)

Directions: *Read the text about a course description. Answer the question according to the text.*

Course Description

The course provides a comprehensive introduction to key issues and findings in object recognition in experimental, neural, computational, and applied domains. It emphasizes the problem of representation, exploring the issue of how 3-D objects should be encoded so as to efficiently recognize them from 2-D images. The second half of the course focuses on an ecologically important instance of the general object recognition problem. It describes experimental studies of human

face recognition performance and recent attempts to mimic this ability in artificial computational systems.

15. What is the course name according to the description?

考试时的选项顺序

- A) Object and Face Recognition ✓
- B) Cognitive & Behavioral Genetics of Human
- C) Computational Neuroscience
- D) Artificial Intelligence & Computational Recognition

原始的选项顺序

- A) Computational Neuroscience
- B) Object and Face Recognition ✓

- D) Cognitive & Behavioral Genetics of Human

Questions 16-17 (Suggested completion time: 5 minutes)

Directions: *Read the text and answer the questions according to the text.*

On a late Wednesday afternoon in North Sydney, my entire office knocked off work early to play a game of barefoot bowls in the summer sun. This is a relaxed, Aussie version of traditional lawn bowls, so when it was the boss' round to buy drinks, he just called in a sub. While Dave was at the bar (not Mr. or Sir; just "Dave"), his game was openly mocked by 20-something colleagues with their suit trousers rolled up, a joke that only grew louder when he returned with a tray full of cold beers and joined in on the jest. We may have been at the second oldest bowls club in New South Wales, but there were no stiff white jackets. Just bare feet and beers. Everyone was called "mate" . Every second word was abbreviated.

This kind of scene is nothing out of the ordinary. Australians have long been known for having a relaxed and casual attitude to life—everywhere

from the Sydney bowls clubs to the barstools of Outback pubs to the surf beaches of Victoria.

According to Dr Tanya King, senior lecturer in anthropology from Victoria' s Deakin University, "it' s Australians' egalitarianism, sense of humour and informal language that are most commonly cited as examples of this attitude" .

16. According to the text, why is Dave NOT "Mr." or "Sir" but just "Dave" ?

考试时的选项顺序

- A) Because it is a proper way to name the waiter.
- B) Because it is a casual way to call the boss. ✓**
- C) Because the person is unqualified for the title.
- D) Because the person is willing to well behave.

Questions 18-19 (Suggested completion time: 6 minutes)

Directions: *Read the text and answer the questions according to the text.*

The tiny bump on the back of Dave Williams' hand is barely noticeable —most people would miss the rice-grain-sized lump between his thumb and forefinger at first. It is only when the 33-year-old opens his front door with a wave of his hand that it becomes clear something strange is going on.

Embedded under Williams' skin is a microchip implant—an electronic circuit inside a pill-shaped glass capsule—that can be used much like a contactless credit card.

Williams, a systems engineer at software firm Mozilla, is one of a growing number of so-called “biohackers” who are choosing to augment their bodies with technology. In Williams' case, he chose to implant a radio frequency identification (RFID) chip into his hand out of curiosity.

The procedure has essentially turned him into a walking contactless smart card. By registering the tag with a variety of devices, he can use it to trigger certain functions, such as transferring his contact details to a friend's mobile phone.

“I have the world's worst memory,” says Williams. The fact that he now has a gadget on him at all times that opens doors and unlocks his computer—one that he can't leave at home or forget—is a huge advantage. “It's also fun to give someone my number and email address by touching their phone to my hand.”

This new level of convenience is one of the biggest draws for those installing implantable RFID implants, and the number of people

experimenting with the devices is growing. One manufacturer of the chips, Dangerous Things, told CNBC last year that it had sold more than 10,000 of them, along with the kits needed to install them under the skin. But as they become more widespread, _____19_____.

This week, a vending machine company based in River Falls, Wisconsin, announced that it is offering to implant chips into its employees' hands. Three Square Market says a \$300 (£230) chip will allow workers to open doors, log in to computers and even purchase food in their canteen. Already 50 employees have signed up to have an implant.

They're not the only ones to do so. Cincinnati-based video surveillance firm CityWatcher embedded the gadgets under the skin of two employees in 2006, and technology incubator EpiCentre said it would be offering the chips to its members in Stockholm earlier this year.

BioHax International, which is supplying the chips to Three Square Market, says dozens of other firms around the world—including some multinationals—are looking to implement similar schemes in their workplaces.

The trend has sparked alarm over whether wireless implants could be

used to keep tabs on employees by tracking their movements, and civil liberties groups warn they could be used to intrude upon privacy in other ways. Many of those already working with the implants, however, are baffled by this concern.

18. Which of the following statements is TRUE according to the text?

考试时的选项顺序

A) Williams, as a biohacker, personally experiences the experiment with no commercial purposes. ✓

B) The bump on Dave Williams' hand is an implanted contactless credit card microchip.

C) CityWatcher and BioHax International are pioneers in this microchip technology.

D) Employees at Three Square Market have been implanted with chips regardless of their unwillingness.

原始的选项顺序

Questions 20-21 (Suggested completion time: 6 minutes)

Directions: Read the text about note-taking and answer the questions according to the text.

Many students bring laptops to class, thinking that typing their notes will make them better learners than the “old-fashioned” method of writing by hand.

They're wrong.

Taking notes is not about transcribing what is said during lecture. It's about processing the information in a way that helps you pull out what's important and make new connections. Mueller and Oppenheimer (2014) found that the problem with taking notes on a laptop is that we type TOO FAST. Because many of us type almost as fast as a lecturer presents, we write everything down. We shouldn't: it interferes with listening to the lecture, taking in the core message, and deeper processing.

And that's if we stay on task and don't drift onto YouTube during class. (Side note: My students consistently complain that they are distracted by the tech use of students around them. Pulling out your phone or, especially, checking a laptop screen distracts not just you, but students next to and behind you.) Most students who use tech in class report they're distracted by it. If you've ever sat at the back of a classroom and looked at the screens in front of you, you know it's true.

The Advantages of Writing by Hand

One advantage of taking notes by hand is that it slows you down, forcing you to listen more carefully and condense the information to get it down on paper.

Another is that it activates your brain in a different way than typing does. Frank Wilson wrote a fascinating book on hands, in which he argues that brain development is intimately linked to what we do with our hands. Playing with legos and blocks, doing arts and crafts, and spending time in Maker spaces causes us to develop better tools for integrating and processing three dimensional information and problem-solving tasks.

Cornell Notes

For those of you more committed to daily note-taking (or more organized) than me, the Cornell Note-Taking System does something similar on a daily basis. The definitive guide is on their learning center's webpage: [The Cornell Note-Taking System](#). It basically suggests you divide your paper into three sections:

1. A large section on the right 2/3 of the page where you take notes on the fly.
2. A column on the left third of the page for comments. Here you pull out key vocabulary, make connections, ask questions, and PROCESS. You can do this during or immediately after class.

3. The bottom inch or two of each page. Here is where you read your notes and pull out the big points.

You' ll notice the similarity between this (and many other note-taking systems) and my own disorganized process. PROCESSING IS KEY. Writing it down is only a way of helping your memory work more easily. You then need to consolidate and reconsolidate the memory in multiple forms to make it easier to retrieve.

20. Compared with typing on laptops, note-taking by hand _____.

考试时的选项顺序

- A) distracts students from lectures to the notes
- B) facilitates the process of information processing ✓**
- C) hinders students from comprehending lectures
- D) is one of the optimal choices for quick learners

Phylum	Arthropods
subphylum	Chelicerata
Chelicerata	2 parts: prosoma opisthoma { first pair of appendages are for feeding
examples	scorpions, spiders, mites, ticks
Prosoma & Opisthoma	sensory, feeding, and locomotor tagma
Chelicerae	- pincerlike or chelate - used for feeding - first pair of appendages
Pedipalps	- second pair of appendages - used for sensory purposes
	feeding locomotion reproduction

Phylum arthropods is made up of subphylum chelicerata. Subphylum chelicerata is characterized by two parts called prosoma and opisthoma. The prosoma and cephalothorax are sensory, feeding, and locomotor tagma. The chelicerae is the first appendage and refers to the pincerlike. The pedipalps are the 2nd pair of appendages, and they are used for sensory purposes: feeding, locomotion, and reproduction.

Questions 22-23 (Suggested completion time: 6 minutes)

Directions: *Read the text and answer the questions according to the text.*

How to Enforce Life Skills That Tech Might be Eroding

You started with the best intentions. Your kid needed a laptop for homework. Your tween needed a phone to text you after school. You

wanted a Fitbit to lose a few extra pounds. But now, you look around and devices are plugged into every nook and cranny in your home.

Everyone' s staring, tapping, tracking. While you' re grateful for things like Google Maps and Netflix that make your life easier and more fun, something feels off.

It' s the basics that are missing: courtesy, conversation, being bored, and appreciating simple pleasures.

But all hope is not lost. You may have to take another look at how your family is using tech and make adjustments based on your values. But you can do it. Here is one way tech has ***nibbled away at*** valuable life skills and experiences, and what you can do about it.

Home Assistants vs. Manners

If you are one of the millions of households in the United States with Alexa or Google Home, you may have noticed an unfortunate side effect of using the device: a lack of enforced courtesy. Kids (and adults) shout commands at the device: “Play Beyoncé!” or “What’s the weather?!” The devices do not require a “please” or “thank you,” and the more lifelike these devices become, the weirder it is to hear your child rudely demanding something from a humanlike voice.

What to do: Model the behavior you want to see. It might feel strange to say “please” to a machine, but if that’s what you expect from your kid, you should do it too. It might help explain to kids that even though you know Alexa doesn’t have feelings, using polite voices and words makes it nicer for the real people in the house who do have feelings. You can talk about how it can feel bad to be around someone who’s yelling or angry, even if they’re not yelling at you.

22. The phrase *nibble away at* in Paragraph 4 is closest in meaning to _____.

考试时的选项顺序

- | | | |

Directions: In Part III, you will read three passages on the same subject.

You are required to identify the writer's position and evaluate the effectiveness of the writer's arguments. (Time allowed: 30 minutes)

Questions 24-31 (Suggested completion time: 30 minutes)

Directions: Read three passages about empathy. Answer the questions according to the passages.

Passage A

Being able to feel empathy in any situation is a skill. Empathy is usually taken as a piece of compassion-building. Here is a four-level hierarchy about the differences between apathy, sympathy, empathy and compassion.

Apathy = I don't care. You are unimportant to me.

Sympathy = I see you and I feel sorry about your plight. (This can feel like one-up/one-down. The person I "feel sympathy for" may feel pitied—which doesn't feel good. But this is a step up from apathy. I might donate money or express concern from sympathy.)

Empathy = I feel what you feel. This is a peer-to-peer experience. (When you are sad, I feel the sadness in my body/mind/heart. This has a genuine caring texture to the person who is suffering. But you might feel like you are riding the roller coaster of emotions. You and I might feel unsafe and distance ourselves if feeling another's pain becomes too much.)

Compassion = I feel what you feel and it doesn't overwhelm me. (I modulate my emotional state with my wisdom. I see a larger picture. I act skillfully to relieve suffering where I can, or to sit with people who just need accompaniment in their pain or their joy.)

We may begin with apathy for someone or something. Then we may learn how to have sympathy for the suffering of others. Empathy moves us to feel with, to suffer with or rejoice with others. From empathy we can build to the next step—compassion. Compassion is distinguished by its universality and by the lack of panic or fear in it.

Empathy at a global level is overwhelming. Compassion is not overwhelming because it is partnered with wisdom. Compassion *sees a larger picture*.

In spiritual intelligence, there is no path to compassion that doesn't take us through empathy first. Empathy, defined as "sensing others' feelings and perspectives, and taking an active interest in their concerns", is a core emotional intelligence (EQ) skill and definitely plays a significant role in developing many of the social skills.

Passage B

We tend to think of the capacity to feel empathy as a good thing. If we're not able to put ourselves in someone else's shoes to feel their pain, then aren't we lacking a fundamental piece of what makes us human?

Paul Bloom, developmental psychologist and author of *Against Empathy: The Case for Rational Compassion* disagrees. "I argue that empathy is biased," says Paul. "It's innumerate; it's irrational; it leads us to all sorts of moral mistakes; it's a catalyst for violence and cruelty. We're much better off combining rationality, a sense of the right thing to do, cost and benefits and so on, with compassion—kindness towards others. Basically, if you feel other people's pain, it motivates you to want to help them. And in the short term, with just one person around, that's great. But when you start using this as a way to direct policy and criminal justice and when to go to war, it has horrible consequences."

Part of the problem is not so much that empathy drives us to help people, but it dictates who we want to help. We're more compelled to feel the pain of people who are close to us in some way—our friends, family, people who look like us, and people who belong to the same ethnicity. But people who are out of sight on the other side of the world, or are seen as enemies, or in some way frighten or disgust us don't evoke empathy. "Empathy directs help in a fundamentally biased way," says Paul.

And then there's the fact that empathy will direct us to focus on helping one person chosen by our own biases at the expense of focusing on bigger problems that potentially affect entire populations. "It's because of empathy we care more about a little girl stuck in a well than we do about the problem of climate change," Paul says.

This speaks to perhaps the biggest reason to eschew empathy: it's not very efficient. Consider the medical staff in a hospital emergency room and how too much empathy would be a hindrance to their job performance. Lives would be lost if doctors and nurses couldn't be cool-headed enough to separate themselves from the pain their

patients experience in order to do what it takes to alleviate that pain. And this is why even the most experienced surgeons in the world wouldn't generally be allowed to operate on their own child, spouse, or best friend.

Passage C

One death is a tragedy. One million is a statistic.

You've probably heard this saying before. It is thought to capture an unfortunate truth about empathy: While a single crying child or injured puppy tugs at our heartstrings, large numbers of suffering people, as in epidemics or earthquakes, do not inspire a comparable reaction.

Studies have repeatedly confirmed this. It's a troubling finding because, as recent research has demonstrated, many of us believe that if more lives are at stake, we will—and should—feel more empathy and do more to help.

Not only does empathy seem to fail when it is needed most, but it also appears to play favourites. Recent studies have shown that our empathy is dampened or constrained when it comes to people of different races, nationalities or creeds. These results suggest that empathy is a limited resource, like a fossil fuel, which we cannot extend indefinitely or to everyone.

What, then, is the relationship between empathy and morality?

Traditionally, empathy has been seen as a force for moral good, motivating virtuous deeds. Yet a growing chorus of critics, inspired by findings like those above, depicts empathy as a source of moral failure. In the word of one psychologist, empathy is a “parochial, narrow-minded” emotion—one that “will have to yield to reason if humanity is to survive”.

We disagree.

While we concede that the exercise of empathy is, in practice, often far too limited in scope, we dispute the idea that this shortcoming is inherent, a permanent flaw in the emotion itself. Inspired by a competing body of recent research, we believe that empathy is a choice that we make whether to extend ourselves to others. The “limits” to our empathy are merely apparent, and can change, sometimes drastically, depending on what we want to feel.

Two decades ago, psychologist Daniel Batson and colleagues conducted a study that showed that if people expected their empathy to cost them significant amounts of money or time, they would avoid situations that they believed would trigger it. More recently, Daryl Cameron, an assistant professor, along with psychologist Keith Payne, conducted an experiment to see if similar motivational factors could explain why we seem more empathetic to single victims than to large numbers of them.

Participants in this study read about either one or eight child refugees from the Darfur region of Sudan. Half of the participants were led to expect that they would be asked to make a donation to the refugee or refugees, whereas the other half were not. When there was no financial cost involved in feeling empathy, people felt more empathy for the eight children than for the one child, reversing the usual bias. If insensitivity to mass suffering stemmed from an intrinsic limit to empathy, such financial factors shouldn't have made a difference.

Even those suffering from so-called empathy deficit disorders appear to be capable of empathy when they want to feel it. Research found that when dividing money between themselves and others, people with psychopathic tendencies were more charitable when they believed that the others were part of their in-group. These people are able to feel empathy; it's just that they don't typically want to.

Arguments against empathy rely on an outdated view of emotion as a capricious beast that needs to yield to sober reason. Yes, there are many situations in which empathy appears to be limited in its scope, but this is not a deficiency in the emotion itself. Empathy is only as limited as we choose it to be.

24. The phrase *sees a larger picture* in Passage A most probably means _____.

- A) integrates useful information thoroughly
- B) overlooks unimportant details intentionally
- C) understands a situation comprehensively ✓
- D) deals with complicated problems easily

答案: C

25. Which of the following is TRUE about “empathy” according to Passage A?

- A) It is important for developing social skills. ✓
- B) It will finally turn into compassion.
- C) It brings negative influence on emotions.
- D) It begins from the feeling of sympathy.

答案: A

26. According to Passage B, which of the following is TRUE about Paul Bloom's attitude towards empathy?

- A) Ironical. B) Impartial. C) Critical. D) Neutral.

✓

答案: C

27. According to Passage B, why are surgeons generally not allowed to operate on people who are close to them?

- A) Because empathy is generally irrational and may trigger violence and cruelty.
- B) Because empathy cannot effectively motivate people to make the right choice.
- C) Because empathy drives surgeons to help those who are chosen by their biases.

D) Because empathy has negative influence on the job performance of surgeons. ✓

答案: D

28. Which of the following is the best title for Passage C?

- A) New Studies on Empathy
- B) Empathy Is a Choice ✓
- C) How to Be Empathetic
- D) One Death vs. One Million

答案: B

29. What does the experiment mentioned in Passage C demonstrate?

- A) Large numbers of suffering people need more financial support than a single victim does.
- B) People seem more empathetic to one child refugee than to eight refugees in poverty.
- C) One's sense of mass suffering depends on whether donation of money is required or not.
- D) Financial factor is one of the motivational factors influencing people's feeling of empathy.

Decide whether the following statements are True or False according to the three passages. ✓

答案: D

30. All the three passages agree that empathy is an important and fundamental feeling of people although one may be painful when feeling it.

- A) True
- B) False ✓

答案: B

31. None of the three passages is in support of the idea that empathy is a wiser choice to deal with other people's suffering.

- A) True ✓
- B) False

答案: A

Directions: In Part IV, you will read a passage and then write a short essay based on the ideas it contains. You should write with clarity and logic.
(Time allowed: 40 minutes)

32.

Question 32 (Suggested completion time: 40 minutes)

Directions: *Read an excerpt from *The Story of Mankind* by Hendrik Willem van Loon about Napoleon. Write a short essay according to the excerpt.*

Napoleon was what is called a fast worker. His career does not cover more than twenty years. In that short span of time he fought more wars and gained more victories and marched more miles and conquered more square kilometers and killed more people and brought about more reforms and generally upset Europe to a greater extent than anybody had ever managed to do.

He was a little fellow and during the first years of his life his health was not very good. He never impressed anybody by his good looks and he remained to the end of his days very clumsy whenever he was obliged to appear at a social function. He did not enjoy a single advantage of breeding or birth or riches. For the greater part of his youth he was desperately poor and often he had to go without a meal or was obliged to make a few extra pennies in curious ways.

He gave little promise as a literary genius. When he competed for a prize offered by the Academy of Lyons, his essay was found to be next to the last and he was number 15 out of 16 candidates. But he overcame all these difficulties through his absolute and unshakable belief in his own destiny, and in his own glorious future. Ambition was the main-spring of his life. The thought of self, the worship of that capital letter “N” with which he signed all his letters, and which recurred forever in the ornaments of his hastily constructed palaces, the absolute will to make the name Napoleon the most important thing in the world next to the name of God, these desires carried Napoleon to a pinnacle of fame which no other man has ever reached.

When he was a half-pay lieutenant, young Bonaparte was very fond of the “Lives of Famous Men” which Plutarch, the Roman historian, had written. But he never tried to live up to the high standard of character set by these heroes of the older days. Napoleon seems to have been devoid of all those considerate and thoughtful sentiments which make men different from the animals. It will be very difficult to decide with any degree of accuracy whether he ever loved anyone besides himself. He kept a civil tongue to his mother, but Letizia had the air and manners of a great lady and after the fashion of Italian mothers, she knew how to rule her brood of children

and command their respect. For a few years he was fond of Josephine, his pretty Creole wife, who was the daughter of a French officer of Martinique and the widow of the Vicomte de Beauharnais. But the Emperor divorced her when she failed to give him a son and heir and married the daughter of the Austrian Emperor, because it seemed good policy.

Write a short essay of about 300 words based on your understanding of the excerpt. Remember to write in your OWN words. Your essay should respond to the following questions:

- 1) What is the general attitude of the excerpt towards Napoleon?
- 2) What kind of person was Napoleon according to the excerpt? What exactly was it that brought him to glory?
- 3) Do you agree with the excerpt on the subject of Napoleon? Please explain your reasons.

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: *Read the following quotes. Match the quotes with the people. Please note there are two extra options you do not need.*

- A. William Shakespeare
- B. Ernest Hemingway
- C. Jean-Jacque Rousseau
- D. Napoleon Bonaparte
- E. Friedrich Nietzsche

1. **C** Man is born free, and everywhere he is in chains. Here' s one who thinks he is the master of others, yet he is more enslaved than they are.

答案: C

2. **E** If you would go up high, then use your own legs! Do not let yourselves carried aloft; do not seat yourselves on other people' s backs and heads.

答案: E

3. B If people bring so much courage to this world the world has to kill them to break them, so of course it kills them. The world breaks every one and afterward many are strong at the broken places.

答案: B

Question 4 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

When Kate T. Parker began photographing her two daughters for her “Strong Is the New Pretty” photo series, it was to show her girls the beauty in their own strength. Since the series went viral in 2015, Parker’s work has expanded to show the tenacious spirit found within not only the girls in her own home, but girls across the country. Parker’s photos can be found in her new book *Strong Is the New Pretty*—a collection of photos and stories about powerful young girls Parker encountered throughout the U.S. “My main goal was _____.” Parker said. “There are almost 200 girls in this book... they represent a vast number of human stories, ranging from small moments of achievement to persistent struggles against adversity.”

4. Which of the following statements might fit in the blank in the text?

考试时的选项顺序

- A) recording the growing processes of so many girls
- B) telling girls to be independent in their life
- C) expanding the definition of what 'strong' means ✓
- D) publicizing my book on girls' strength

Question 5 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Bigorexia is often referred to as the opposite of anorexia. Those living with it believe they are not muscular enough, and many go to extreme lengths to bulk up further. But in their pursuit of the "perfect body" some have gone too far, with devastating results.

Known officially as "muscle dysmorphia", the condition is thought to affect thousands of people, mainly men, across the UK.

BBC Newsbeat joins BBC Asian Network on a journey to meet some of the people who just can't stop pumping iron, the gym owner who says it's rife, the grieving mother who believes she lost her son to Bigorexia and the medical expert who warns that this condition is being ignored.

5. According to the text, which of the following is NOT a sign of Bigorexia?

考试时的选项顺序

- A) A psychiatric problem with one's body condition.
- B) The thought of oneself as being too fat. ✓
- C) Body-image disorder towards muscularity.
- D) Working out compulsively and constantly.

Question 6 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Some people are born into families that encourage education; others are

from families that are against it. Some are born into flourishing economies; others, into war and destitution. I want you to be successful, and I want you to become wealthy. But realize that not all success is due to hard work and not all poverty is due to laziness. Keep this in mind when judging people, including yourself.

6. What is this text mainly about?

考试时的选项顺序

- A) Rational thinking ✓ B) Diversity of culture
C) Wealth polarization D) Criterion of success

原始的选项顺序

- A) Criterion of success B) Wealth polarization
C) Diversity of culture D) Rational thinking ✓

Question 7 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

The Mediterranean diet—rich in fruits, vegetables, fish, olive oil, nuts and whole grains—has long been hailed as a heart-healthy eating plan. But new research suggests its health benefits may be _____ to the rich and well-educated.

For the study, a team of Italian scientists reviewed diets, incomes and education levels of nearly 19,000 men and women.

The investigators found the Mediterranean diet was associated with about a 60 percent lower risk of heart disease and stroke among those with higher incomes and more education. The same was not true for those with fewer resources—even though they followed a similar eating plan.

7. Which of the following word best fits in the blank in the text?

考试时的选项顺序

- A) related B) limited ✓
C) familiar D) comprehensible

原始的选项顺序

- A) familiar B) limited ✓
C) comprehensible D) related

Question 8 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

The immune system is the body's natural defense against germs. When a germ invades, the immune system sends special cells to fight it off.

Sometimes, though, the immune system is not naturally strong enough to prevent a disease from seriously harming someone or even killing them. But there' s a way to give the immune system a boost. It' s known as a vaccine.

Vaccines are substances that prepare the immune system to fight a disease-causing germ or other pathogens by imitating an infection. They trick the immune system into making a "memory" of that germ without ever having to fight the real germ in the first place. Now, when the immune system encounters the real pathogen—whether it' s a virus, bacterium or other microbes—it is ready to attack it. As a result, the vaccinated person doesn' t get sick.

8. Where is the text most probably taken from?

考试时的选项顺序

- A) A guideline for clinical practice.
- B) A popular scientific article. ✓
- C) A public speech manuscript.
- D) A blueprint for vaccine design.

原始的选项顺序

- A) A blueprint for vaccine design.

- B) A public speech manuscript.
- C) A guideline for clinical practice.
- D) A popular scientific article. ✓

Question 9 (Suggested completion time: 2 minutes)

Directions: *In each of the following options there are two advertisements separated by "/" with the same promoted product in the brackets. Read the following advertisements and answer the question.*

9. Which of the following is a mismatch between the advertisements and the product?

考试时的选项顺序

- A) Melt in your mouth, not in your hand. / A smooth, silky taste with a hint of milk. (Chocolates)
- B) Time is what you make of it. / Witness history, grasp the future. (Watches)
- C) Obey your thirst. / Behind that healthy smile, there' s a Crest kid. (Drinks) ✓
- D) Poetry in motion, dancing close to me. / Engineered to move the human spirit. (Cars)

原始的选项顺序

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 40 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: *Read the definition of the following logical fallacy. Answer the question according to the definition.*

Red Herring

The fallacy of *red herring*, less colorfully named *irrelevant thesis*, occurs when one tries to distract one's audience by invoking a consideration that is irrelevant to the topic under discussion. (This fallacy probably gets its name from the fact that a rotten herring, or a cured herring, which is reddish, will throw pursuing hounds off the right track.)

11. Which of the following is NOT an example of the *red herring* fallacy?

考试时的选项顺序

A) Not until astronauts sailed through space around the moon and could see its back side did we have adequate reason to believe that the moon even had a back side. ✓

B) I am pretty sure that evolution is not a very good explanation for human life. Anyway, I am pretty offended that anyone would suggest that I came from a monkey.

C) The crime in this city has increased lately. However, let's consider that the weather has changed as well. Things change over time. Sometimes they are linked, sometimes they are not.

D) Unfortunately, we have to lay off 5% of the workforce. It's important to note that the product we create is exceptionally flawless and we thank our manufacturing department for that.

原始的选项顺序

flawless and we thank our manufacturing department for that.

D) I am pretty sure that evolution is not a very good explanation for human life. Anyway, I am pretty offended that anyone would suggest that I came from a monkey.

Question 12 (Suggested completion time: 4 minutes)

Directions: *Look at the following picture and answer the question.*

They're paper clips! You can't make something beautiful out of paper clips!

12. Which of the following logical fallacies does the picture illustrate?

考试时的选项顺序

A) **Ad Hominem**: It is a fallacy in which a claim or argument is rejected on the basis of some irrelevant facts about the author of or the person presenting the claim or argument. Translated from Latin to English, "Ad Hominem" means "against the man" or "against the person."

B) **Genetic**: It is used if a critic attempts to discredit or support a claim or an argument because of its origin (genesis) when such an appeal to origins is irrelevant.

C) **The fallacy of Composition**: It is committed when a conclusion is drawn about a whole based on the features of its constituents when, in fact, no justification is provided for the inference. ✓

D) **Amphiboly**: It is an error due to taking a grammatically ambiguous phrase in two different ways during the reasoning.

原始的选项顺序

A) **Amphiboly**: It is an error due to taking a grammatically

Question 13 (Suggested completion time: 3 minutes)

Physicists have built devices to make me move quickly. My last eight letters can be commonly found in newspaper, magazines, and journals. What am I?

13. I am Particles.

答案: Particles

Question 14 (Suggested completion time: 3 minutes)

Directions: *Read the following text and answer the question according to the text.*

Many people report that exposure to certain foods and drinks such as cheese, chocolate, and red wine, is associated with the onset of migraine headaches. Other people report that exposure to certain smells (especially strong perfumes) seems to trigger a migraine headache, and some note that exposure to bright and flickering lights can be followed by a migraine. It would seem that a person with a tendency to get migraines should try to find out which of these situations is associated with the onset of the headache and then avoid this stimulus.

14. All of the following, if true, would make the above recommendation impractical EXCEPT:

考试时的选项顺序

A) The presence of a known trigger doesn't always cause a migraine. ✓

B) In a high proportion of cases the patients report multiple triggers for their headaches.

C) The time delay between the trigger and the onset of the headache can make it exceptionally difficult to identify the

trigger.

D) Most of the known triggers are common and almost unavoidable features of modern life.

原始的选项顺序

D) Most of the known triggers are common and almost unavoidable features of modern life.

Question 15 (Suggested completion time: 4 minutes)

Directions: *Read the text and answer the question according to the text.*

Rumor Has It

A German shepherd named "Rumor" was awarded "Best in Show" at the 141st annual *Westminster Kennel Club Dog Show* in New York City. When the announcement was made, the crowd at Madison Square Garden erupted into applause. But no one was as elated as Tom Ryan, Rumor's handler and co-owner.

Rumor is 5 years old and is named after the hit Adele song "Rumor Has It". She was a favorite at last year's Westminster competition, but was bested by a German shorthaired pointer named CJ.

Nearly 3,000 dogs competed this year at Westminster. Winners are

determined through a process of elimination. Rumor beat six other dogs for the prize: A boxer named "Devlin" , a Norwegian elkhound named "Duffy" , a miniature poodle named "Aftin" , a Norwich terrier named "Tanner" , a powder puff of a Pekingnese named "Chuckie" , and Adrian, an Irish setter. Adrian was selected the Best-in-Show runner-up.

15 They were originally bred as sheepherders, in Germany. Today, the dogs often work alongside police officers and firefighters as search-and-rescue dogs. They are also popular as service dogs for the blind or hearing impaired.

Rumor is the second German shepherd to be named top dog at Westminster. The last time one won the nation' s premier dog competition was in 1987.

"The German shepherd standard talks about quality and nobility," Westminster judge Thomas Bradley III said. "When you recognize it, it hits you at home, and that' s what it really is. Rumor is just magnificent."

15. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

A) There is an interesting saying about how German shepherds

got the name.

B) German shepherds are well-known for their intelligence and loyalty. ✓

C) Rumor has been considered as one of the best German shepherds since then.

D) In the past, German shepherds were not usually taken to the competition.

原始选项顺序

A) Rumor has been considered as one of the best German shepherds since then.

B) In the past, German shepherds were not usually taken to the competition.

C) German shepherds are well-known for their intelligence and loyalty. ✓

D) There is an interesting saying about how German shepherds got the name.

Questions 16-17 (Suggested completion time: 5 minutes)

Directions: *Read the text about procrastination and answer the questions according to the text.*

Close your eyes. Imagine yourself finishing that tedious months-long

project you' ve been dreading.

Think about the papers you' re preparing on your desk, the documents you need to print, the conversations you' ll need to have to finish the project and even what you' ll wear on the presentation day or how it will feel to finally ace the project—the more vivid the picture is in your mind, the better.

The exercise seems simple, but some recent research suggests that visualising yourself in the future could be a novel way to beat procrastination.

The theory goes like this: most of us aren' t particularly good at picturing how our immediate actions will affect us in the long term. But if we' re constantly picturing ourselves at a later point in life, and how our daily decisions affect us in the future, it can help us make better immediate decisions because it' s easier to imagine the long-term consequences.

Saving for the future

Part of the idea comes from research by Hal Hershfield, psychologist and associate professor of marketing at UCLA' s Anderson School of

Management, who studies how our perception of time can alter decision-making.

In a series of four experiments, people were asked to interact with their “future selves” —digitally altered portraits which showed them in old age—through a virtual reality program. Hershfield found that those who interacted with their future selves were then more likely to allocate money towards a hypothetical retirement savings account.

Hershfield says we often behave in ways that can be detrimental in the long term: “It’ s very similar to eating unhealthy today and suffering the consequences over time.”

But “when we help people visualise and more deeply consider their future selves it increases the tendency to act in ways that are more ***future-oriented***.”

This idea can be applied to time management.

16. Which of the following is TRUE according to the text?

考试时的选项顺序

A) The act of visual imagery is to a large extent practical.

B) Digital devices were used for Hershfield' s four experiments.

✓

C) Procrastination is detrimental to one' s physical and mental health.

D) Most people do not really know how to interact with their future selves.

原始的选项顺序

A) Digital devices were used for Hershfield' s four experiments.

✓

B) Most people do not really know how to interact with their future selves.

C) Procrastination is detrimental to one' s physical and mental health.

D) The act of visual imagery is to a large extent practical.

17. Decide whether the following description is a good elaboration of the term ***future-oriented*** in the text:

“It may feel inconsequential to put off a project for another day and scroll through Facebook for the afternoon. But by picturing yourself dealing with the extra stress caused by this small decision once the

deadline arrives a month down the track, it can help you get back to work.”

- A) Yes. ✓ B) No. C) Hard to tell.

答案: A

Question 18 (Suggested completion time: 5 minutes)

Directions: *Read the text about mosquitoes. Decide whether the statement is True or False according to the text.*

Mosquitoes choose their prey—you perhaps—based on a bunch of factors. But there’ s good news: Some things that might make you attractive to them can actually be changed. Scientific studies have found evidence supporting several factors that encourage mosquitoes to seek you out.

These studies often involve different kinds of mosquitoes, however, so the things that attract them to you may vary depending on which species are nearby. And many of these studies are small, so keep in mind that these are preliminary hypotheses, not ironclad conclusions.

Mosquitoes are known to transmit deadly diseases like Zika, malaria, yellow fever, and West Nile virus. So even though the things that attract

the bugs aren' t fully understood, it' s wise to try to reduce your allure as much as you can.

18. Mosquitoes are more likely to be attracted by certain chemicals such as carbon dioxide and lactic acid; some people are genetically more attractive to mosquitoes, but it can be changed.

A) True ✓ B) False

答案: A

Questions 19-21 (Suggested completion time: 6 minutes)

Directions: *Read the text about the Universe' s dark matter and answer the questions according to the text.*

New Map of Universe' s Dark Matter

Researchers have released the most accurate map ever produced of the dark matter in our Universe.

The team surveyed more than 26 million galaxies in the largest study of

its kind.

The map will help scientists understand what dark matter is made from and learn more about another mysterious phenomenon called “dark energy” .

The results have been released by the international Dark Energy Consortium.

According to Professor Ofer Lahav of University College London, and chair of the Advisory Board of the Consortium, the map would provide new insights into how the Universe operates.

“Dark energy and dark matter represent probably one of the biggest mysteries in the world of science. And this has generated a lot of interest across the whole of science because it is a major shakeup. And actually we still don’ t know what it is.” he said.

Scientists have suspected that there is more material in the Universe than we can observe for more than 80 years.

The movement of stars and galaxies indicates that the Universe is also

made up of invisible particles called “dark matter” .

In 1998, two teams of astronomers discovered that the expansion of the Universe was accelerating, rather than slowing down, as the theory at the time suggested. Physicists speculated that the acceleration was caused by something they named “dark energy” .

Since then, observations have indicated that dark energy and dark matter together account for 96% of the Universe. The challenge has been to find ways of studying these invisible phenomena in detail.

“We cannot just say we don’ t know what it is, we have to make an effort to see what it is.” according to Professor Lahav.

The Dark Energy Survey is the most ambitious effort to date. It began in 2004 and involves 400 scientists from 26 institutions in seven countries.

The survey involves taking pictures of 26 million galaxies across a large expanse of the sky using the Blanco telescope in Chile. To do this, the research team had to build one of the most sensitive cameras ever built. The 570-megapixel camera is capable of detecting light from galaxies that are eight billion light years away.

By studying the way in which the light was distorted by the intervening dark matter, researchers were able to calculate its distribution. And by studying the way in which the distribution changes over time they can calculate the way in which dark energy acts on it.

The team was also able to infer the amounts of dark energy and dark matter from the density and locations of galaxies.

The results show support for previous studies that indicate the Universe is made up of 4% ordinary matter, 26% dark matter and 70% dark energy.

The hope is that a detailed study of the map will give clues about what dark matter and dark energy might be and so lead to a more complete theory of physics.

The data released today draws from just one year of observations. The researchers plan to collect data for four more years over an even larger area of the sky. Professor Lahav says that there is much more to come.

He explained: "Once we have the full survey, 300 million galaxies and a thousand supernovae, we may be providing input for a new Einstein to

tell us what does it all mean—why is the Universe made the way it is?"

Complete the following sentences with the choices A-F. Please note there are three extra options you do not need.

19. The dark matter **B**.

20. The dark energy **E**.

21. The universe **C**.

- A. was studied with the most sensitive camera in Chile
- B. was calculated of its distribution by studying how it twisted the light
- C. was found changing opposite to the experts' former predictions
- D. was already explained with a novel theory of physics
- E. was considered to be the major component of galaxies
- F. was made up of particles visible to naked eyes

答案: B, E, C

Questions 22-23 (Suggested completion time: 6 minutes)

Directions: *Read the text and answer the questions according to the information in the text.*

Disruptive technologies such as artificial intelligence and big data are changing the world of work. Retail jobs are disappearing in the U.S. while the online sellers supplanting them fill their warehouses with robots instead of human workers. In China, manufacturing businesses that fled wealthy countries to find low-wage workers are now replacing those humans with machines. And on farms around the

world, automated systems are beginning to take on backbreaking tasks like weeding lettuce. Studies have found that new technologies threaten around 40% of existing U.S. jobs, and two-thirds of jobs in the developing world.

There is one kind of job though, that is both indispensable and difficult—perhaps impossible—to automate: the kind that requires emotional skills. Artificially intelligent software is being built that can recognise emotions in people's faces and voices, but it is a long way from simulating genuine empathy, and philosophers have been arguing for centuries that a machine with real feelings is impossible. Computers are nowhere near being able to compete with humans on the ability to really understand and connect with another human being.

If these jobs can't be automated, and will continue to be necessary into the future, workers with emotional skills will be highly in demand in the coming decades. But, right now, the jobs that depend most on these skills are often badly compensated: a Business Insider poll put childcare workers and high school teachers in a list of the top ten most underpaid professions.

Emotional skills include all the abilities that let us recognise and respond

appropriately to emotional states in ourselves and others. They're a ubiquitous, yet largely invisible, part of a huge and perhaps surprising array of jobs. It's the supermarket cashier pleasantly asking how you're doing. It's a supervisor correcting a subordinate's mistake while making sure he still feels valued and capable. It's a salesman watching a potential customer's face to see if she's sceptical about his pitch.

22. Which of the following can we infer from the text?

考试时的选项顺序

- A) Empathy is an emotion which artificial intelligence can imitate.
- B) Jobs needing emotional skills are not currently fairly treated.**
- ✓
- C) Jobs are underpaid because workers lack high-tech skills.
- D) Robots outperform humans in numerous fields of life.

原始的选项顺序

Directions: In Part III, you will read three passages on the same subject.

You are required to identify the writer's position and evaluate the effectiveness of the writer's arguments. (Time allowed: 30 minutes)

Questions 24-31 (Suggested completion time: 30 minutes)

Directions: Read three passages about cashless society. Answer the questions according to the passages.

Passage A

Nowhere is the cashless trend more obvious than in the eastern Chinese city of Hangzhou, which is home to Alibaba, the world's largest online shopping platform.

Its mobile payment app, Alipay, and Tencent's WeChat Pay, which belong to the country's leading social messaging platform, together hold a commanding 90 percent of the market, leaving Apple Pay struggling to make inroads.

I recently spent a day in Hangzhou to see how easy it was to go cashless, and I found it somewhat ahead of other cities, including Beijing. I rode buses and subways, which all accept Alipay. I visited a major Buddhist temple, where visitors can make donations, buffing up their karma with a swipe of their phone.

I even listened to the plaintive tunes of a woman performing music on the street for change—or for a scan of a QR code, placed beside the change box.

Over a plate of noodles, a restaurateur named Ma Zhiguo told me that about half his customers pay for their meals with cellphones, and he uses his to pay most of the time too.

"I don't have to worry about getting counterfeit money, or having to make change," he explained. "When I go out, I don't have to worry about losing my money or getting robbed."

All this is a rapid and somewhat surprising development in a country where, a couple of decades ago, it wasn't even clear that credit cards were going to catch on.

Chinese Academy of Social Sciences research fellow Cheng Lian argues that this was a cultural problem.

“Traditionally, Chinese people didn’t want credit cards,” he says, “because they didn’t want to owe anyone money.”

The workaround Chinese mobile payment platforms came up with is to link people’s phones to debit cards, so they don’t owe anyone money.

The platforms also came up with a technical fix: by using the cellular networks smartphones use, they bypassed the often-unreliable data networks used by credit card payment terminals.

Passage B

Banks, and the Government, are desperate for us to go cashless. It’s much easier and cheaper for them if we do all of our spending and earning neatly, on the Internet, without any of the fuss, bother and expense that cash produces. Bank branches and ATMs are costly and difficult to run. You have to employ security and staff and pay business rates and rent. Wouldn’t it be easier if everything was cleanly done online so there was a nice easy trail to follow? Apparently consumers are coming around too.

As a millennial I’m afraid I am right in the middle of this. My phone holds more financial information than I care to think about. I bank by app and pay by Apple Pay. I can’t remember the last time I went into a bank branch and I can go weeks without using a cashpoint. It’s all very convenient.

But there are downsides too. I have done away with my Oyster card—a form of electronic ticket used on public transport in Greater London—meaning not only TFL (Transport for London) but my card provider know exactly where I am on the Tube network. And I can’t be the only one who is more than a little concerned about the level of information Apple now holds about me—including my bank details. Yes, security is apparently tight. But scams are worryingly common, and banks are often all too quick to lay blame at the door of the consumer.

Moreover, while I am more than happy to manage my money by app, I am conscious that it’s not so easy for those who did not grow up in an Internet age. Plenty of people simply find it easier, less stressful and more convenient to pay and earn in cash. Often they are the less well-off and older people: those for whom app-based banking is a complication, not a shortcut. It’s easier to budget when you have a physical bundle,

and easier to avoid the exhortations of businesses to spend more than you can afford.

There's also the fact that going cashless, which is simple in London, becomes harder if you live somewhere with poor phone reception. Anyone who has waited patiently for a *recalcitrant* card machine to accept their debit card so they can pay for a coffee will know that the technology is nowhere near the stage of being reliable for all transactions.

Passage C

How much cash do you have in your pocket right now? I've got \$7, all singles. Fifteen years ago, this would have been a major problem. Sure there were debit cards and credit cards, but let's face it, not every store took debit and credit cards. Now you can walk into a Dunkin Donuts and charge a \$2 coffee. The world has changed, and even street vendors take cards. Why even carry cash?

Visa (V) and Mastercard (MA) are two great ways to play the continued transition to a cashless society. Why not American Express (AXP)? Keep in mind that Visa and Mastercard are payment processors. A bank issues credit cards, holds the debt and charges a rate of interest. Visa and Mastercard simply handle the transaction at the point of sale and collect fees on each transaction. On the other hand, American Express issues cards, sets the rates and holds the debt. AXP isn't a terrible choice for exposure to payments, but Visa and Mastercard are the clean way to play increasing payments transaction volumes without having to worry about default rates and the like.

Research shows that card payment volumes continue to grow strongly. In September 2016, Euromonitor International reported that consumer card payments had surpassed cash payments for the first time. The report showed \$23.1 trillion was spent globally via card payments. The article went on to claim that in the 2016-2021 period, card payments would show a compounded annual growth rate (CAGR) of 6.6 percent and mobile payments would see a 23 percent CAGR. It predicted cash would only grow at a 1.3 percent CAGR over the same period.

Meanwhile, fewer and fewer people are using cash. A recent survey conducted by Ipsos, a global market research and a consulting firm, for the ING bank website eZonomics found that 34 percent of respondents in Europe and 38 percent of respondents in the U.S. said they would be willing to go completely cash free. Meanwhile, 21 percent in Europe and 34 percent in the U.S. said they rarely use cash now. The story also noted that more than half of Europeans were using cash less often over the past 12 months.

Shares of Visa and Mastercard have seen robust gains over the past five years, with Visa up nearly 208 percent and Mastercard up nearly 170 percent as this trend to a cashless society picks up steam.

24. According to Passage A, which of the following is NOT true?

- A) Hangzhou, where the headquarters of Alibaba locates, is leading the trend in going cashless in China.
- B) Alipay, WeChat Pay and Apple Pay, the three most popular mobile payment apps, have taken up the market and been equivalently favored by the consumers. ✓
- C) It is very convenient to travel around Hangzhou a whole day without any cash, and mobile payment could cover public transportation, restaurants, and even tips for street performances.
- D) Mobile payment could help solve some of the problems engendered by credit card and cash payments.

答案: B

25. What has led to the decline of credit card use in China, according to Cheng Lian in Passage A?

- A) Technical defects.
- B) Unreliable networks.
- C) Chinese customs. ✓
- D) Insufficient payment terminals.

答案: C

26. What does the word *recalcitrant* in Paragraph 5 of Passage B refer to?

- A) broken B) naughty C) recessed D) disobedient ✓

答案: D

27. According to Passage B, who will firmly support the cashless revolution?

- A) Banks and government. ✓
- B) The young people.
- C) Consumers in London.
- D) The poor and the old.

答案: A

28. According to Passage B, which of the following may isolate the elders from a cashless society?

- A) The leaking of personal information.
- B) The high price of smart phones.
- C) The app-based banking service. ✓
- D) The poor network connection.

答案: C

29. What can be learned from Passage C?

- A) The amount of cash that was spent in the U. S. in 2016 is less than that in Europe.
- B) The society will be cashless only when everyone has a debit card or a credit card.
- C) Europe will develop into a cashless society sooner than the United States.
- D) Both Visa and Mastercard have made profits in the transition to a cashless society.

30-31. Decide whether the statements are True or False.

✓

答案: D

30. According to Passage C, Visa, Mastercard and American Express, which have become the leading way of payment, promote the development of the cashless society in Europe and the U.S.

- A) True
- B) False ✓

答案: B

31. The authors of the three passages all have experienced the life with little or almost no cash.

- A) True ✓
- B) False

答案: A

Directions: In Part IV, you will read a passage and then write a short essay based on the ideas it contains. You should write with clarity and logic.
(Time allowed: 40 minutes)

32.

Question 32 (Suggested completion time: 40 minutes)

Directions: *Read an excerpt from *How the Mind Works* by Steven Pinker. Write a short essay according to the excerpt.*

What shape are a beagle's ears? How many windows are in your living room? What's darker, a Christmas tree or a frozen pea? What's larger, a guinea pig or a gerbil? Does a lobster have a mouth? When a person stands up straight, is her navel above her wrist? If the letter *D* is turned on its back and put on top of a *J*, what does the combination remind you of?

Most people say that they answer these questions using a "mental image." They visualize the shape, which feels like conjuring up a picture available for inspection in the mind's eye. The feeling is quite unlike the experience of answering abstract questions, such as "What is your mother's maiden name?" or "What is more important, civil liberties or a lower rate of crime?"

Mental imagery is the engine that drives our thinking about objects in space. To load a car with suitcases or rearrange the furniture, we imagine the different spatial arrangements before we try them. The anthropologist Napoleon Chagnon described an ingenious use of mental imagery by the Yanomamo Indians of the Amazon rainforest. They had blown smoke down the opening of an armadillo (犛狴) hole to asphyxiate the animal, and then had to figure out where to dig to extract it from its tunnel, which could run underground for hundreds of feet. One of the Yanomamo men hit on the idea of threading a long vine with a knot at the end down the hole as far as it would go. The other men kept their ears to the ground listening for the knot bumping the sides of the burrow so they could get a sense of the direction in which the burrow ran. The first man broke off the vine, pulled it out, laid it along the ground, and began to dig where the end of the vine lay. A few feet down they struck armadillo. Without an ability to visualize the tunnel and the vine and armadillo inside it, the men would not have connected a sequence of threading, listening, yanking, breaking, measuring, and digging actions to an expectation of finding an animal corpse. In a joke we used to tell as children, two carpenters are hammering nails into the side of a house, and one asks the other why he is examining each nail as he takes it out of the box and throwing half of them away. "They're defective," replies the second carpenter, holding one up. "The pointy end is facing the wrong way." "You fool!" shouts the first carpenter. "Those

are for the other side of the house!”

Write a short essay of about 300 words based on your understanding of the excerpt. Remember to write in your **OWN** words. Your essay should respond to the following questions:

- 1) What is the point that Steven Pinker tries to illustrate here?
- 2) How is the example about armadillo related to the point? What is the humour about the carpenters?
- 3) Can you give a different example to illustrate the point of the excerpt?

答案:

2017 复赛 (3)

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: *Read the following quotes. Match the quotes with the people. Please note there are two extra options you do not need.*

- A. William Shakespeare
- B. Virginia Woolf
- C. Friedrich Nietzsche
- D. James Joyce
- E. David Hume

1. C The surest way to corrupt a youth is to instruct him to hold in higher esteem those who think alike than those who think differently.

答案: C

2. A

All the world' s a stage,

And all the men and women merely players;

They have their exits and their entrances;
And one man in his time plays many parts,
His acts being seven ages.

答案: A

3. D I' ve put in so many enigmas and puzzles that it will keep the professors busy for centuries arguing over what I meant, and that' s the only way of insuring one' s immortality.

答案: D

Question 4 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

"Samsa' s change has been interpreted in many symbolic ways. One simple interpretation is that it is autobiographical, since Samsa was an insomniac, and felt that he was a burden to his family. Others claim that his change represented more universal concepts, such as feelings of alienation and dehumanization, since he could no longer be close to anyone because he was a grotesque insect."

4. Which of the following works does the book review address?

考试时的选项顺序

A) *Crime and Punishment*

B) *The Metamorphosis* ✓

C) *One Hundred Years of Solitude*

D) *Animal Farm*

原始的选项顺序

A) *Animal Farm*

B) *One Hundred Years of Solitude*

C) *Crime and Punishment*

D) *The Metamorphosis* ✓

Question 5 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

If America's universities are indeed poor value for money, why might that be? The main reason is that the market for higher education, like that for health care, does not work well. The government rewards universities for research, so that is what professors concentrate on. Students are looking for a degree from an institution that will impress employers; employers are interested primarily in the selectivity of the institution a candidate has attended. Since the value of a degree from a selective institution depends on its scarcity, good universities have little incentive to produce more graduates. And, in the absence of a clear

measure of educational output, price becomes a proxy for quality. By charging more, good universities gain both revenue and prestige.

5. The major driving force behind the American higher education is _____.

考试时的选项顺序

A) elitism B) idealism C) commercialism D) pragmatism
✓

原始的选项顺序

A) idealism B) pragmatism C) commercialism D) elitism
✓

Question 6 (Suggested completion time: 2 minutes)

Directions: *Read the sentences and answer the question according to the text.*

1. People with chronic insomnia may benefit from some form of treatment to help them get back to healthy sleep patterns.

2. Changes in the environment, unhealthy sleep habits, shift work, other clinical disorders, and certain medications could lead to a long-term pattern of insufficient sleep.

3. Chronic insomnia is disrupted sleep that occurs at least three nights per week and lasts at least three months. Chronic insomnia disorders can have many causes.

4. Chronic insomnia can be comorbid, meaning it is linked to another medical or psychiatric issue, although sometimes it's difficult to understand this cause and effect relationship.

6. What is the proper sequence of the sentences to form a logical paragraph?

考试时的选项顺序

- A) 4-3-2-1 B) 2-1-3-4 C) 3-2-1-4 D) 1-4-2-3
- ✓

原始的选项顺序

- A) 1-4-2-3 B) 2-1-3-4 C) 3-2-1-4 D) 4-3-2-1
- ✓

Question 7 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

In the rich world, even though nearly half of young adults are graduates

and numbers are continuing to rise, the graduate premium (the wage difference between those with and those without degrees) has XXXX for it to be worth going to university. Part of the explanation may be credentialism in some rich countries. The more people have degrees, the more employers will insist on recruiting graduates. In many countries jobs such as teaching and nursing, which did not require a degree 30 years ago, are now reserved for graduates. When just a small elite went to university, plenty of decent jobs were available to those with only secondary schooling. That is no longer true.

7. Which of the following is the most probable choice for XXXX?

考试时的选项顺序

- A) remained basically stable B) remained high enough ✓
C) remained unpredictable D) remained rather low

原始的选项顺序

- A) remained high enough ✓ B) remained basically stable
C) remained unpredictable D) remained rather low

Question 8 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Smartphones matter partly because of their ubiquity. They have become

the fastest-selling gadgets in history, outstripping the growth of the simple mobile phones that preceded them. They outsell personal computers four to one. Today about half the adult population owns a smartphone; by 2020, 80% will. Smartphones have also penetrated every aspect of daily life. The average American is buried in one for over two hours every day. Asked which media they would miss most, British teenagers pick mobile devices over TV sets, PCs and games consoles. Nearly 80% of smartphone-owners check messages, news or other services within 15 minutes of getting up.

The bedroom is just the beginning. Smartphones are more than a convenient route online, rather as cars are more than engines on wheels and clocks are not merely a means to count the hours. Much as the car and the clock did in their time, so today the smartphone is poised to enrich lives, reshape entire industries and transform societies.

8. To conclude, smartphones are _____, addictive and transformative.

考试时的选项顺序

A) **pervasive**

B) beneficial C) penetrating D) detrimental

✓

原始的选项顺序

- A) beneficial B) penetrating C) detrimental D) pervasive
✓

Question 9 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Happy birthday, Tommy Hilfiger! The world-renowned designer turns 66 on March 24, 2017. Since coming onto the scene in the mid-1980s, the Tommy Hilfiger brand has been worn by virtually every major celebrity at their peak—from Aaliyah to Beyoncé to Gigi Hadid. It all began when Snoop Dogg performed on “Saturday Night Live” in a Hilfiger striped shirt. What followed, even the designer himself couldn’t have predicted. NSync posed in matching Tommy Hilfiger windbreakers, first daughter Ivanka Trump starred in a Tommy Jeans ad campaign, and even Michael Jackson showed his pride for team Hilfiger. Let’s take a walk down memory lane to see which other celebs loved their Tommy.

9. Where is the text probably taken from?

考试时的选项顺序

- A) A propaganda poster. B) A promotional coupon.
C) A fashion magazine. ✓ D) A birthday card.

原始的选项顺序

- A) A birthday card. B) A propaganda poster.

Question 10 (Suggested completion time: 5 minutes)

Directions: *The following charts show the digital transformation in action. Answer the question according to the charts.*

a. Digital technologies are spreading rapidly in developing countries

Sources: World Development Indicators (World Bank, various years); WDR 2016 team

Note: In Chart a, for some years data for electricity are interpolated from available data.

10. Which of the following is an INCORRECT description about the charts?

考试时的选项顺序

A) According to Chart b, increasing internet access has led to an explosion in the production and consumption of information around the world.

B) According to Chart a, more households in developing countries own a mobile phone than have access to electricity or

improved sanitation.

C) Mobile phones, reaching more than four-fifths of the population currently, provide the main access to digital technologies in developing countries.

D) The internet and related technologies have developed at approximately the same pace as previous technological innovations in developing countries. ✓

原始的选项顺序

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 40 minutes)

Questions 11-12 (Suggested completion time: 8 minutes)

Directions: *Read the definitions of two types of logical fallacy. Answer the questions according to the definitions.*

Tu Quoque

Known by its Latin name, *tu quoque* means “you too,” and this fallacy involves countering someone’s argument by pointing out that it conflicts with his or her own past actions or statements. Thus, by answering a charge with a charge, it diverts attention from the argument at hand to the person making it.

No True Scotsman

The argument comes up after someone has made a general claim about a group of things, and then been presented with evidence challenging that claim. Rather than revising their position, or contesting the evidence, they dodge the challenge by arbitrarily redefining the criteria for membership in that group.

11. Which of the following provides a typical example of the *tu quoque* fallacy?

考试时的选项顺序

A)

Mother: You should stop smoking. It's harmful to your health.

Daughter: Why should I listen to you? You started smoking when you were 16!

✓

B)

Police officer: Alice, we found 1.21G of illegal goat porn on your laptop, what do you have to say for yourself?

Alice: But officer, I haven't seen them.

C)

Wilma: You cheated on your income tax. Don't you realize that's wrong?

Walter: Hey, wait a minute. It's none of your business.

D)

Alice: Canada's health care policies are more effective than those of the United States.

Bob: But you never obey those policies, don't you?

Question 13 (Suggested completion time: 4 minutes)

Directions: *Read the text and answer the question according to the text.*

In a research designed to investigate the possibility of animals developing friendship with other, unrelated, members of their species, a group of 29 chimpanzees were reared together for 15 years. At the end of that time the chimps were presented with two options for obtaining food: press a lever and feed themselves, or press another identical lever and feed themselves, and at the same time deliver food to the chimp

next door. (The chimps were able to see each other). **The researchers found that the chimps were no more likely to choose the lever that fed a neighbor.** The researchers concluded that the chimps had no concept of friendship. However, one critic has suggested that the animals were in an artificial environment from which little can be concluded, and that, at the least, **the test ought to have involved the animals being able to touch.**

13. What role do the parts in bold play in the argument above?

考试时的选项顺序

A) The first is part of the evidence that the critic disputes. The second is a suggestion that the researchers do not accept.

B) The first is an observation that supports the critic's conclusion. The second is the critic's conclusion.

C) The first is a position that the critic opposes. The second is a position that the critic supports.

D) The first is an observation that supports the researchers' position. The second is an observation that opposes the researchers' position.

E) The first is a finding on which the researchers base their conclusion. The second is a suggestion that might cast doubt on

that finding. ✓

原始的选项顺序

Directions: *Read the text and answer the question according to the text.*

Detective James Gordon needs to access a secret door that can be accessed only by a code. The code is about 7 characters and consists of numbers and alphabets. There is a picture just above the door as shown below with the text "You force heaven to be empty" . Can you help

detective James Gordon to break the code?

14. The answer: U47 _____ B _____ T. (One letter or number in one blank.

Put them together in the following blank, for example: AB)

2M

答案: 2M

Questions 15-16 (Suggested completion time: 6 minutes)

Directions: *Read the text about genetic drift. Answer the questions according to the text.*

Genetic drift is defined as the changing of the number of available alleles (等位基因) in a population by chance events. Also called allelic drift, this phenomenon is usually due to a very small gene pool or population size.

Unlike natural selection, it is a random, chance event that causes genetic drift and it depends solely on statistical chance instead of desirable traits being passed down to offspring.

Unless the population size increases through more immigration, the number of available alleles gets smaller with every generation.

Genetic drift happens by chance and can make an allele disappear completely from a gene pool, _____15_____. The random sampling style of genetic drift shrinks the gene pool and therefore alters the frequency the alleles are found in the population. Some alleles are completely lost within a generation due to genetic drift.

This random change in the gene pool can affect the speed of evolution of a species. Instead of taking several generations to see a change in allele frequency, genetic drift can cause the same effect within a single generation or two. The smaller the population size, the greater the chance of genetic drift occurring. Larger populations tend to function through natural selection much more than genetic drift due to the sheer number of alleles that are available for natural selection to work on as compared to smaller populations.

The Hardy-Weinberg equation cannot be used on small populations where genetic drift is the main contributor to diversity of alleles.

15. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

- A) and it occurs when a larger population shrinks largely in size in a short amount of time
- B) which is a small population formed from a larger population
- C) even if it is a desirable trait that should be passed down to offspring ✓
- D) where individuals of the population have higher risks of inheritable diseases

原始的选项顺序

- A) where individuals of the population have higher risks of inheritable diseases
- B) which is a small population formed from a larger population
- C) and it occurs when a larger population shrinks largely in size in a short amount of time
- D) even if it is a desirable trait that should be passed down to offspring ✓

16. Which group will be most strongly affected by genetic drift according to the text?

考试时的选项顺序

- A) A population of 3000 males and 6000 females.
- B) A population of 5000 males and 5000 females.
- C) A population of 1000 males and 1000 females. ✓
- D) A population of 2000 males and 500 females.

原始的选项顺序

- A) A population of 5000 males and 5000 females.
- B) A population of 3000 males and 6000 females.
- C) A population of 1000 males and 1000 females. ✓
- D) A population of 2000 males and 500 females.

Questions 17-19 (Suggested completion time: 5 minutes)

Directions: *Read the text about umbrellas. Answer the questions according to the text.*

A corner-store umbrella might save cash in the short term, but you'll pay later when it fails catastrophically during a downpour. So invest in a canopy tough enough to deserve a lifetime warranty. High-tensile-strength materials, frames engineered to withstand gales, and fabric that won't get sopping wet add up to rain blockers that you can replace for free—instead of angrily stuff in a trash can.

1. Totes Titan Mini

Just over half a pound and under 7 inches long when closed, the Titan Mini hides neatly in the bottom of your everyday carry or in a jacket pocket. The 41-inch canopy keeps you—and itself—dry thanks to a *hydrophobic* coating that repels rain. That means less drippage once you step back inside or shove it into your bag.

2. Davek Solo

Carbon ligaments in the Solo's frame keep it flexible, so _____18_____. Its 43-inch canopy has a tight weave (190 thread count, to be precise) to stop leaks and snags, and it folds down to a tidy 11.75-inch package. A button on the handle triggers opening and closing, and it works as a repair switch when things go inside out.

3. Gustbuster Pro Series Golf

It's not impossible to flip or break the Gustbuster umbrella, but your grip will almost certainly fail before its frame does. Teardrop-shaped vents in the underlayer allow wind to whoosh out the top, withstanding gusts up to 55 miles per hour. In such harsh conditions, you'll be glad the massive

5-foot canopy has enough room for a friend to help you cling on to the handle.

17. The word **hydrophobic** is closest in meaning to _____.

考试时的选项顺序

- A) removable B) shockproof C) technological D) showerproof
✓

原始的选项顺序

18. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

- A) while it might invert when gusts hit, it won' t snap ✓
B) it' s perfect for keeping a single person' s head and torso dry
C) supported by wooden or metal ribs it' s a folding canopy
D) with the size of only a water bottle it fits into a backpack' s pocket

原始的选项顺序

A) with the size of only a water bottle it fits into a backpack's pocket

B) while it might invert when gusts hit, it won't snap ✓

C) supported by wooden or metal ribs it's a folding canopy

D) it's perfect for keeping a single person's head and torso dry

19. Which of the following can be inferred from the text?

考试时的选项顺序

A) If we want an umbrella that weighs less than a pound, Davek Solo is a good choice.

B) All three kinds of umbrellas are economically wise choices for both short and long terms.

C) If we want an umbrella made of nicer fabric, Totes Titan Mini is a good choice.

D) If we need the maximum coverage, Gustbuster Pro Series Golf is our choice. ✓

原始的选项顺序

A) If we want an umbrella made of nicer fabric, Totes Titan Mini is a good choice.

B) If we need the maximum coverage, Gustbuster Pro Series Golf is our choice. ✓

C) If we want an umbrella that weighs less than a pound, Davek

Solo is a good choice.

D) All three kinds of umbrellas are economically wise choices

for both short and long terms.

Questions 20-21 (Suggested completion time: 5 minutes)

Directions: *Read the text about ancient deal-makers. Decide whether the statements are True or False according to the text.*

Long before anyone licked the gum on an envelope, people used seals to ensure that their letters weren't opened until they reached their recipients. If the seal was broken before it reached its destination, it indicated that someone had opened it.

Now an archaeological dig in Israel's City of David National Park, in the area of the walls of Jerusalem, has unearthed a collection of small clay seals that prove that the practice of using seals to ensure the privacy of a message goes back more than 2,700 years.

Some of the seals display pictures—each one apparently representing a clerk who wrote the letter or indicating the general contents of the message. Others bear the names of the clerks themselves, in Hebrew script.

Though the fire that consumed Jerusalem at its destruction destroyed the letters, it actually preserved the pottery-like seals.

The seals “bear witness to the developed administration of the city in the First Temple period,” according to Ortal Chalaf and Dr. Joe Uziel, directors of the excavation for the Israel Antiquities Authority.

“In later stages of the period—from the time of King Hezekiah (around 700 BC) and up to the destruction of Jerusalem in 586 BC—the seals bear the names of clerks in early Hebrew script. Through these findings, we learn not only about the developed administrative systems in the city, but also about the residents and those who served in the civil service.”

One seal, bearing the name “Achiav ben Menachem,” has drawn particular interest, because the names “Menachem” and “Achiav” are known in the context of the Kingdom of Israel. Menachem was an Israeli king, and though the name “Achiav” does not appear in the Bible, it resembles “Achav” —Ahab—the king of Israel in the tales of the prophet Elijah. The name also appears in the Book of Jeremiah.

“These names are part of the evidence that after the exile of the Tribes

of Israel, refugees arrived in Jerusalem from the northern kingdom and found their way into senior positions in Jerusalem's administration," Chalaf and Uziel said.

20. The seals bearing names or pictures appeared around 2,700 years ago in Jerusalem.

A) True ✓ B) False

答案: A

21. The seals found in the archaeological site can be a trace of the migration of residents in Israel.

A) True ✓ B) False

答案: A

Questions 22-23 (Suggested completion time: 8 minutes)

Directions: *Read the text about Chaco Culture. Answer the questions according to the text.*

The “Chaco Culture,” as modern-day archaeologists call it, flourished between roughly the 9th and 13th centuries A.D. and was centered at Chaco Canyon in what is now New Mexico.

The people of the Chaco Culture built immense structures that at times encompassed more than 500 rooms. They also participated in long-distance trade that brought cacao, macaws (a type of parrot), turquoise and copper to Chaco Canyon.

_____,²²_____, researchers have to rely on the artifacts and structures they left behind, as well as oral accounts that have been passed on through generations, to reconstruct what their lives were like.

Archaeologists generally agree that Chaco Canyon was the center of Chaco Culture. Today the canyon is a national park and a UNESCO World Heritage Site. The National Park Service estimates that there are about 4,000 archaeological sites in the park, including more than a dozen immense structures that archaeologists sometimes call "Great Houses." Archaeological research has revealed many discoveries, including a system of roads that connected many Chaco Culture sites, and evidence of astronomical alignments that indicate that some Chaco Culture structures were oriented toward the solstice sun and lunar standstills.

"There has been more archaeological research conducted in Chaco and on the subject of Chaco than on any other prehistoric district in North America," says a National Park Service statement posted on Chaco Culture National Historical Park's website.

"Today, twenty Puebloan groups in New Mexico, as well as the Hopi in Arizona, claim Chaco as their ancestral homeland and are tied to this place through oral traditions and clan lineages. A number of Navajo

clans are also affiliated with Chacoan sites through their traditional stories," the National Park Service statement says.

Despite the fact that there has been an immense amount of archaeological research carried out at Chaco Canyon, and at other Chaco Culture sites in the American Southwest, modern-day archaeologists disagree over what the people of the Chaco Culture were like.

Some archaeologists think that the people of the Chaco Culture were not politically united, while some think they controlled an empire centered on Chaco Canyon. "What was Chaco? Opinions vary widely, perhaps wildly. Interpretations range from a valley of peaceful farming villages to the monumental capital of an empire," wrote Stephen Lekson, a professor at the University of Colorado Boulder, in an article published in the book *The Architecture of Chaco Canyon, New Mexico* (University of Utah Press, 2007).

Lekson noted that there are different interpretations among archaeologists as to what the Great Houses were. Some archaeologists believe that they were villages inhabited by thousands of people, while others think that they were elite residences that housed a small number

of residents.

22. Which of the following best fits in the numbered space in the text?

考试时的选项顺序

- A) While archaeologists are not certain what caused this dramatic population bump
- B) When thinking about archaeological sites, we tend to think of them as dead silent
- C) Since Chaco' s national monument status may not protect it from development pressures
- D) The people of the Chaco Culture did not use a writing system and as such ✓

原始的选项顺序

- A) The people of the Chaco Culture did not use a writing system and as such ✓
- B) While archaeologists are not certain what caused this dramatic population bump
- C) When thinking about archaeological sites, we tend to think of them as dead silent
- D) Since Chaco' s national monument status may not protect it

from development pressures

23. Which of the following statements can we know from the text?

考试时的选项顺序

- A) Most descendants of ancient Chaco people live in New Mexico now.
- B) “Great Houses” were built from approximately the 9th to 13th century A.D.
- C) The people of the Chaco culture were good at foreign trade.
- D) Archaeologists hold different ideas about how the people of the Chaco Culture lived. ✓

原始的选项顺序

Directions: In Part III, you will read passages on the same subject. You will be required to identify the writer’s position and evaluate the effectiveness of the writer’s arguments. (Time allowed: 30 minutes)

Questions 24-31 (Suggested completion time: 30 minutes)

Directions: Read three passages about selfie. Answer the questions according to the passages.

Passage A

Remember selfies? They became a global cultural obsession in 2012, when *Time* magazine made “selfie” one of its top 10 buzzwords of the year. For a while, it seemed the selfie was the pop art of the future. Everyone, from teenagers to prime ministers, was taking them, everywhere. The invention of the selfie stick turned the taking of selfies into an even stranger performance.

Then, by the end of 2015, selfies slunk back into the subcultural margins. People still took them, but with an embarrassed shrug. There was no longer anything cool about inanely grinning into your own camera. Selfie sticks were banned in many places, and sneered at everywhere. *Time* magazine declared the trend over with its RIP (Rest In Peace) Selfie cover.

Will we really *be writing obituaries for the selfie*? I hope so. There are real signs that fashion is turning against this gleefully superficial perversion of portraiture.

Prince Harry called time on the selfie craze in April 2015. When a teenager asked him to pose for one with her in Australia he replied: “No, I hate selfies ... I know you’re young, but selfies are bad. Just take a normal photograph.”

Good for Harry—it’s time more people spoke out against this great silliness of our time. The royal repudiation of the selfie followed hot on the heels of a powerful attack on the selfie age by the great historian Simon Schama. Launching what sounds like a fascinating project about the British portrait, Schama ridiculed the idea that the “quick dumbness” of selfies has anything in common with the true art of portraiture. “What we love about selfies and phones is that it’s of the moment,” he said, “_____28_____.”

I agree. It is depressing that we’ve turned self-portraiture, the most intense, worrying and neurotic of arts, into a big collective joke. Anyone who can look at their face without anxiety is not looking at their face. The self portrait for Van Gogh and Picasso was a thing of fear and dread: we’ve taken that dread and airbrushed it out of existence. Selfies deny and erase a fundamental human self-consciousness. We are in danger of losing our sense of awkwardness, embarrassment, of being an individual. The selfie is actually an attack on the moral

self.

The widespread delusion that selfies have anything in common with real portraits—that when Rembrandt painted his own image he was somehow daubing a “selfie”—is a tragic attempt to reduce the most profound human experiences to total banality.

I applaud Schama and Harry for their denunciations of this idiotic travesty of the human image. And I suspect they have chosen their moments well. Selfie-takers—partly because of the absurd selfie stick—are starting to stand out from the crowd. Obsessive selfie enthusiasm will soon be seen as the trainspotting of the techno age. Let’s stigmatize it further. Take selfies if you dare—the world is laughing at you.

Passage B

It is a show that includes painstakingly executed self-portraits by Rembrandt, Van Gogh, and Frida Kahlo, as well as rather more spontaneous selfie portraits by Kim Kardashian, Tom Cruise and a macaque monkey from the Indonesian island of Sulawesi.

The images are being displayed together in London’s Saatchi gallery, and while the curators are not assigning them any aesthetic equivalence, they do argue that there is a direct line from one to the other. The gallery is staging what it believes is the first exhibition exploring the history of the selfie, from the 16th century to the present day.

The exhibition argues that what we think of as a selfie—taking our own picture with our own camera—is not entirely new. Photographs in the show include Stanley Kubrick looking intently into a mirror as he takes a photograph of himself, and George Harrison taking a picture of himself in front of the Taj Mahal in 1966.

The very first selfie is named as one from December 1920 of five moustachioed men in hats and suits on a New York rooftop cheerfully holding aloft a briefcase-sized camera at arm’s length. Little could they imagine a world when more than a million selfies are taken every day, often in alarming circumstances—diving with sharks, being chased by bulls, or during an illegal climb up an outrageously tall building.

Examples of all those are on display at the Saatchi, as well as celebrity photo bombs and memorable selfies such as the one taken by Barack Obama with David Cameron and the Danish prime minister Helle Thorning-Schmidt.

Also in the show are works by young British photographers—all given a smartphone by the show’s sponsor Huawei to take new works—and the shortlisted contenders for a competition in which 14,000 selfies were entered.

Nigel Hurst, the gallery chief executive, hopes the show will be seen as fun as well as exploring more serious themes. “Art galleries can still be pretty intimidating places, and our role is really simple—it is to bring contemporary art and how visual imagery is now being made to as wide an audience as possible. Something like a selfie is a very good entry point.”

He admits that some people hate selfies, seeing them as inane, but argues that they should embrace them. “I’m going to make a confession. Until the day before yesterday, I’d never taken a selfie. It is a generational thing. My kids give me a hard time about it ... but you run with something, then it runs with you.

“The selfie is by far the most expansionist form of visual self-expression, whether you like it or not ... _____29_____.”

Passage C

Here are some basic etiquette tips for selfies:

1. Get permission. If you want to take a photo of yourself, with no one else in the picture, by all means, go ahead. However, if someone else is in it, make sure the other

person is okay with it. Let her know what you plan to do with it and stick to your plan. Don't post anywhere different without her permission.

2. Safety comes first. Never take a selfie in a situation that can put your life or health in danger. For example, you may think you look really cool driving along the highway with the window open, your hair blowing in the breeze. If you pull out your camera to shoot a selfie, you're putting not only your own life in danger, you're risking anyone else who just happens to be on the road.

3. Don't succumb to bad taste for humor's sake. If you are in a situation that you think is funny, stop and consider how it will appear to others. Never take a selfie in a public restroom where someone else may be in an embarrassing position or situation.

4. Be respectful. Be mindful of where you are. For example, if you are at a holocaust museum, taking a selfie in front of an exhibit shows a lack of respect for those whose lives were lost in this horrific era. People's emotions are still raw over what happened, and they are likely to be that way for centuries. There are places where selfies are never appropriate, including a funeral, ICU or critical care unit in a hospital, and a disaster site where people died.

5. Show kindness. When you see someone who is less fortunate than you, don't stop and pose for a selfie. Instead, do something nice like give a blanket to a homeless man, offer to get something off a top shelf for a handicapped person, or hold a door for a young mom struggling with toddlers and packages.

6. Don't overdo selfies in social media. If you want to snap photos of yourself waking up, eating your morning cereal, working out at the gym, walking into your cubicle, having lunch with friends, leaving work at the end of the day, and having drinks with friends, go right ahead. Just don't think everyone wants to see every single aspect of your day. Choose one good one (preferably one that is interesting to someone other than you and your mama) and post it. If you do more, people may see you as narcissistic.

24. Without changing the meaning, the phrase be writing obituaries for the selfie in Passage A can be replaced by _____.

考试时的选项顺序

- A) be composing articles against the selfie
- B) be making statements about the selfie abuse
- C) be issuing guidelines for taking the selfie

D) be pronouncing the end of the selfie age ✓

原始的选项顺序

- A) be making statements about the selfie abuse
- B) be composing articles against the selfie
- C) be issuing guidelines for taking the selfie
- D) be pronouncing the end of the selfie age ✓

25. According to Passage A, what is the author's opinion on taking selfies?

考试时的选项顺序

- A) Taking selfies with a stick is dangerous.
- B) It is a waste of time to take selfies.
- C) Selfies by artists are real portraits.
- D) Selfie-taking should not be encouraged. ✓

原始的选项顺序

- A) Taking selfies with a stick is dangerous.
- B) Selfie-taking should not be encouraged. ✓
- C) Selfies by artists are real portraits.
- D) It is a waste of time to take selfies.

26. Which of the following statements is NOT true in describing the works displayed in the exhibition in London's Saatchi gallery?

考试时的选项顺序

- A) One can find the first selfie of the world in the exhibition.
- B) The works by young British photographers are created with smartphones.
- C) The self-portraits by some world-famous artists are displayed.
- D) The selfies displayed are made by either celebrities or artists. ✓

原始的选项顺序

- A) One can find the first selfie of the world in the exhibition.
- B) The self-portraits by some world-famous artists are displayed.
- C) The selfies displayed are made by either celebrities or artists. ✓
- D) The works by young British photographers are created with smartphones.

27. According to Nigel Hurst, the gallery chief executive, the aim of the exhibition is _____.

考试时的选项顺序

- A) to explore and record the history of selfie
- B) to attract the public to the gallery
- C) to bring visual imagery to a wider audience ✓
- D) to advocate the selfie as a modern art form

原始的选项顺序

- A) to advocate the selfie as a modern art form

C) Tip4, Tip5, and Tip2. ✓ D) Tip2, Tip1, and Tip5.

答案: C

Directions: In Part IV, you will read a passage and then write a short essay based on the ideas it contains. You should write with clarity and logic.
(Time allowed: 40 minutes)

32.

Question 32 (Suggested completion time: 40 minutes)

Directions: Read a passage from *Taking Sides*. Write a short essay according to the passage.

There are two ways to examine rapid urbanization. One approach is to examine the adverse impacts of the urbanized area on the environment. Second, one can study the ability of society to provide services to the urban population. The best place to begin a discussion of urbanization's effects is found in "An Urbanizing World" (Martin P. Brouckhoff, *Population Bulletin*, Population Reference Bureau, 2000). According to Brouckhoff, increasing urbanization in the poor countries can be seen "as a welcome or as an alarming trend." He suggests that cities have been the "engines of economic development and the centers of industry and commerce." The diffusion of ideas is best found in cities around the world. And Brouckhoff observes the governmental cost savings of delivering goods and services to those in more densely populated environments.

The basic question of urbanization's goodness or badness relates to its impact on the poverty level of its inhabitants because poverty is at the heart of the ability of its owners to address ills caused by the social phenomenon, in this case, urbanization. The evidence is becoming clearer that poverty "is becoming more urban" (Gordon McGranahan and Edgar Pieterse, "Getting Urbanization Right: A defining Development Challenge for the 21st Century"). These authors suggest that if present trends continue, about half of global citizens living on less than one dollar per day will be urban dwellers. The number of people living in urban slums—housing with serious deficiencies in water supplies and sanitary facilities and crowded conditions—is increasing.

Urban poverty, of course, has a direct impact in turn on urban health. Although rural health tends to be worse than urban health, the poverty, environmental degradation, and population demands of urbanization pose significant health risks. Melinda Moore and colleagues ("Global Urbanization and Impact on Health") suggest a range of health hazards and risks: "substandard housing, crowding, air pollution, insufficient or contaminated drinking water, inadequate sanitation and solid waste disposal services, vector-borne diseases, industrial waste, increased motor vehicle traffic, stress associated with poverty and unemployment, among others."

There is a more recent concern emerging among researchers about urbanization's impact—this time on biodiversity. One study concludes, for example, that urban sprawl in the United States endangers more species than any other human behavior (Michael L. McKinney, "Urbanization, Biodiversity, and Conservation," *Bioscience*, 2002). A 2008 study by the Nature Conservancy and Harvard University concluded that failure to improve urban planning would lead to losing "some animals, plants and natural resources for good." The highest concentrations of endemic species are found in natural areas affected by urban growth. Eight percent of vertebrate species have been marked as endangered because of the impact of urban growth.

Write a short essay of about 300 words based on your understanding of the passage. Remember to write in your OWN words. Your essay should respond to the following questions:

- 1) What do you think is the main issue that the author explores? Please describe the aspects from which the author illustrates the main issue.
- 2) To what extent do you agree or disagree with the author on this issue and why?

答案:

2018 复赛 (1)

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: Read the following descriptions and choose the correct author for each description. Please note there are two extra options you do not need.

- A. John Henry Newman
- B. Jared Diamond
- C. Jerry Brotton
- D. Ku Hung-ming
- E. Richard Paul

1. B

He is a professor of geography at the University of California and the Pulitzer Prize-winning author of the widely acclaimed *Guns, Germs, and Steel*. He formerly also pursued a separate career of laboratory research in membrane physiology and biophysics at UCLA Medical School.

答案: B

2. A

In 1817 he was admitted to Trinity College, Oxford. Then he led the Oxford Movement in the Church of England and later became a cardinal-deacon in the Roman Catholic Church. He was an important and controversial figure in the religious history of England in the 19th century.

答案: A

3. D

He was fluent in English, French, German and some other languages. In 1877, he graduated from the University of Edinburgh with a Master's degree. His works had far-reaching effects on both West and East.

答案: D

Question 4 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

When Harvard scientists analyzed more than two decades of data on more than 77,000 people, they found that those with AB blood had a 23 percent increased risk for heart disease compared to people with type O blood. Those with type B blood had an 11 percent higher risk and those with type A blood had 5 percent greater risk. Researchers aren't sure why, but posit that type A blood is associated with LDL (low-density

lipoprotein) cholesterol and that type O blood, which is associated with reduced risk, may contain a chemical that boosts blood flow and prevents clots.

However, researchers are quick to point out that lifestyle factors like weight, smoking, and diet, which, unlike blood type, are modifiable, have a much greater impact on heart disease.

4. What does the writer mainly discuss in the text?

考试时的选项顺序

- A) The relation between blood type and the risk of heart disease. ✓
- B) The factors contributing to heart disease.
- C) The methods to predict heart disease.
- D) The reason why blood type has an impact on heart disease.

原始的选项顺序

- A) The relation between blood type and the risk of heart disease. ✓
- B) The reason why blood type has an impact on heart disease.
- C) The factors contributing to heart disease.

D) The methods to predict heart disease.

Question 5 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

The vessel is named after the Norwegian pilot and polar explorer Helmer Hanssen, who took part in three of Roald Amundsen's polar expeditions. On the second of these he was among the first people to reach the South Pole.

Among the array of scientific tools on board, his modern namesake will be a small flock of robotic underwater gliders which will continue the survey long after the scientists have returned to port.

These seaglid­ers have been developed at the Sams Marine Robotics Facility and do not have conventional *propulsion*.

They use a "buoyancy engine" which changes their density and shifts the centre of gravity to send them diving and rising through the top layer of the ocean.

5. What is the most probable meaning of *propulsion*?

考试时的选项顺序

- A) the function of staying afloat
- B) the function of changing direction
- C) the power of moving something ✓
- D) the power of decreasing weight

原始的选项顺序

- A) the function of staying afloat
- B) the function of changing direction
- C) the power of decreasing weight
- D) the power of moving something ✓

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Writing was a reputable and harmless occupation. The family peace was not broken by the scratching of a pen. No demand was made upon the family purse. For ten and six pence one can buy paper enough to write all the plays of Shakespeare – if one has a mind that way. Pianos and models, Paris, Vienna and Berlin, masters and mistresses, are not needed by a writer. The cheapness of writing paper is, of course, the reason why women have succeeded as writers before they have succeeded in the

other professions.

6. The tone of the text can be described as _____ when the author mentions women' s success as writers.

考试时的选项顺序

A) playful

B) complimentary C) optimistic D) sympathetic

✓

原始的选项顺序

✓

Question 7 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Copyrighted Material

DARWIN'S FOSSILS

THE COLLECTION
THAT SHAPED
THE THEORY OF
EVOLUTION

ADRIAN
LISTER

Copyrighted Material

Charles Darwin famously derived his theory of evolution from observations he made of species and their geographic distributions during his five-year voyage around the world on the *H.M.S. Beagle*. But in the introduction of *On the Origin of Species*, the naturalist also cites another influence: the thousands of fossils that he collected on that trip. *Darwin's Fossils* is paleobiologist Adrian Lister's account of that little-appreciated foundation of evolutionary theory.

While sailors on board the *Beagle* charted the coastal waters of South America (the actual purpose of the expedition), Darwin explored the shore and rambled inland on excursions that sometimes lasted weeks. The fossils he unearthed — some relatively fresh, others millions of years old — have tremendous significance in the history of science, Lister contends.

7. What can be inferred from the text?

考试时的选项顺序

- A) Darwin and the sailors on board the *Beagle* had multiple purposes for the voyage. ✓
- B) Darwin's theory is based on his observations during his voyage on board.

C) Darwin thought the thousands of fossils played a significant role in his theory of evolution.

D) Adrian Lister does not really appreciate *On the Origin of Species*.

原始的选项顺序

C) Darwin and the sailors on board the *Beagle* had multiple purposes for the voyage. ✓

D) Darwin thought the thousands of fossils played a significant role in his theory of evolution.

Question 8 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

"Traces of DNA are left behind by every species everywhere," says Ryan Kelly. He is an ecologist at the University of Washington in Seattle. He also works at the Center for Ocean Solutions at Stanford University in Palo Alto, California. Scratch an itch, he says, and you shed skin cells containing your DNA. Pets and other animals leave behind bits of dead

skin known as *dander*. Reptiles shed skin as they grow. There' s even DNA in poop.

"Just like forensic scientists do at a crime scene every day, we are detecting that trail of DNA that' s left behind," explains David Lodge. He' s a biologist at the University of Notre Dame in South Bend, Indiana. And he hunts for signs an animal has been around by scouting for bits of the DNA it had shed. Scientists refer to this genetic litter as e-DNA. Here, the "e" stands for "environmental."

8. Which of the following is the best title for this text?

考试时的选项顺序

A) Invisible	B) DNA in	C) Animals'	D) DNA
DNA	Skin	DNA	Hunters ✓

原始的选项顺序

DNA	Hunters ✓	DNA	Skin

Question 9 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Some grand philanthropic donations are visible and public-facing, but they distract from a broader pattern in charitable giving: As a group, the wealthy do donate more money overall, but as a proportion of earnings, many of them give less than those with far less wealth. The Philanthropy Roundtable, an organization of philanthropic groups, has found that while households with annual earnings of less than \$50,000 were less likely to donate any money to charity than those earning more than that, if they did donate, they gave a greater percentage of their income than those wealthier than them. A survey by *The Chronicle of Philanthropy* released in 2014 reached a similar finding: Those earning \$200,000 or more per year reduced their giving during the Great Recession and its aftermath by 4.6 percent, while those bringing home less than \$100,000 upped their donations by very nearly as much — 4.5 percent, to be specific.

9. Which of the following is correct according to the text?

考试时的选项顺序

- A) Many wealthy people give away much of their fortune to charity organizations.
- B) Wealthy people donated much less money than those with far less wealth during the Great Recession.

C) Wealthy people choose different ways in charitable giving from those who earn much less.

D) Many wealthy people are reluctant to donate more money to charity organizations. ✓

原始的选项顺序

C) Wealthy people choose different ways in charitable giving from those who earn much less.

D) Wealthy people donated much less money than those with far less wealth during the Great Recession.

Question 10 (Suggested completion time: 5 minutes)

Directions: Answer the question according to the information in the charts.

Average hours per day spent in selected household activities

Activity	Average hours, total	Average hours, men	Average hours, women
Total, all household activities	1.81	1.41	2.19
Food preparation and cleanup	0.60	0.36	0.83
Interior cleaning	0.35	0.16	0.53
Laundry	0.16	0.06	0.25
Household management	0.13	0.12	0.14
Lawn and garden care	0.18	0.25	0.11
Interior maintenance, repair, and decoration	0.06	0.08	0.04
Exterior maintenance, repair, and decoration	0.06	0.09	0.02

Note: Data refer to persons 15 years and over.

Percent of the population engaging in selected household activities, averages per day by sex, 2017 annual averages

Source: Bureau of Labor Statistics, United States Department of Labor.

10. Which of the following provides an INCORRECT description of the charts?

考试时的选项顺序

- A) On average, men spend 0.16 hours less per day in interior cleaning compared with women (0.53 hours). ✓
- B) Men are more likely to engage in such household activities as lawn and garden care than women.
- C) A little less than 50 percent of men do food preparation or cleanup, compared with nearly 70 percent of women.
- D) The average hours spent by men on maintenance, repair, and decoration more than doubled compared with that of women.

原始的选项顺序

- A) Men are more likely to engage in such household activities as lawn and garden care than women.
- B) A little less than 50 percent of men do food preparation or cleanup, compared with nearly 70 percent of women.

- D) The average hours spent by men on maintenance, repair, and decoration more than doubled compared with that of women.

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the

questions based on logical inference and reasoning. (Time allowed: 55 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: Read the following definition of a logical fallacy. Answer the question according to the definition.

Stolen Concept Fallacy

The “stolen concept” fallacy, first identified by Ayn Rand, is the fallacy of using a concept while denying the validity of its genetic roots, *i.e.*, of an earlier concept(s) on which it logically depends.

11. Which of the following provides a typical example of *Stolen Concept Fallacy*?

考试时的选项顺序

A) AIDS first emerged as an epidemic back in the very same era when Disco music was becoming popular — that’ s too much of a coincidence: It proves that Disco caused AIDS!

B) Nothing is certain; there are only probabilities. ✓

C) One day robots will enslave us all. It’ s true. My computer science teacher says so.

D) Since the students have no questions concerning the topics

discussed in class, the students are ready for a test.

原始的选项顺序

A) One day robots will enslave us all. It' s true. My computer science teacher says so.

B) Nothing is certain; there are only probabilities. ✓

C) Since the students have no questions concerning the topics discussed in class, the students are ready for a test.

D) AIDS first emerged as an epidemic back in the very same era when Disco music was becoming popular — that' s too much of a coincidence: It proves that Disco caused AIDS!

Question 12 (Suggested completion time: 4 minutes)

Directions: Read the following example of a logical fallacy. Answer the question according to the example.

Stacking the Deck Fallacy

People sometimes make decisions by folding a piece of paper in half, and listing reasons in favor on one side, and reasons against on the other; then they decide intuitively which side has stronger (not necessarily more) reasons. This method forces us to look at both sides of an issue before we decide. In the incorrect form, we just look at half the picture; this is called "stacking the deck."

12. Which of the following is NOT of the same logical fallacy as in the text?

考试时的选项顺序

A) How many school shootings should we tolerate before we change the gun laws? ✓

B) Superstition is a belief or practice resulting from ignorance, fear of the unknown, trust in magic or chance, or a false conception of causation — unless it is astrology.

C) Students who break the rules should be suspended from school. I broke a rule, but I shouldn't be suspended because I would be in a lot of trouble with my parents.

D) Yes, I do think that all drunk drivers should go to prison, but your honor, he is my son! He is a good boy who just made a mistake!

原始的选项顺序

A) How many school shootings should we tolerate before we change the gun laws? ✓

B) Yes, I do think that all drunk drivers should go to prison, but your honor, he is my son! He is a good boy who just made a mistake!

C) Superstition is a belief or practice resulting from ignorance, fear of the unknown, trust in magic or chance, or a false conception of causation — unless it is astrology.

D) Students who break the rules should be suspended from school. I broke a rule, but I shouldn't be suspended because I would be in a lot of trouble with my parents.

Questions 13-14 Reasoning (Suggested completion time: 10 minutes)

13.

"Some people claim that the values that this country was built on are now being ignored by modern-day corporations. But this is incorrect. Corporations are purely profit-driven enterprises, beholden only to their shareholders, and as such they can only assess objects based on their value."

Which of the following best describes the above argument?

考试时的选项顺序

A) Depending on the ambiguous use of a key term. ✓

B) Confusing the coincidence of two events with a causal relation between the two.

C) Relying on subjective rather than objective evidence.

D) Assuming without warrant that a situation allows only two

possibilities.

原始的选项顺序

- A) Relying on subjective rather than objective evidence.
 - B) Depending on the ambiguous use of a key term. ✓
 - C) Assuming without warrant that a situation allows only two possibilities.
 - D) Confusing the coincidence of two events with a causal relation between the two.
-

14.

"Richardson recently claimed that we must do something in response to the university's current economic crisis. I have repeatedly proposed that we lay off a percentage of all workers and simultaneously reduce all budgets to last year's levels. If we are to follow Richardson's advice, and actually do something, we must implement my program of action immediately."

Which of the following best summarizes the flaw in the reasoning above?

考试时的选项顺序

- A) It fails to exclude an alternative proposal for the current economic crisis.
- B) It uses "something" in different senses, which undermines

the integrity of the argument. ✓

- C) It appeals to an authority in an attempt to persuade the reader to implement the author' s program of action.
- D) It responds to a distorted version of an opposing position.

原始的选项顺序

- A) It appeals to an authority in an attempt to persuade the reader to implement the author' s program of action.
- B) It uses "something" in different senses, which undermines the integrity of the argument. ✓
- C) It fails to exclude an alternative proposal for the current economic crisis.
- D) It responds to a distorted version of an opposing position.

Questions 15-16 (Suggested completion time: 6 minutes)

Directions: Read the text about Princess Eugenie. Answer the questions according to the text.

Princess Eugenie was rejected from university but then given a place when they realised who she was, claims lecturer Dr. Martin Farr, a senior history lecturer, who made the allegations at a convention. He said many students became republicans as she received "special treatment" . The princess studied English literature, history of art and politics and

graduated with a 2:1.

Princess Eugenie was initially rejected by Newcastle University and then given a place because of who she was, it was claimed.

Her application was allegedly dismissed as “not good enough” by an admissions officer who hadn’t realised the applicant was a member of the royal family.

When the “horrified” university authorities realised what had happened they offered the Duke and Duchess of York’s daughter a place on an alternative degree course.

The allegations were made by Dr. Martin Farr, a senior history lecturer at Newcastle University, in a speech to the anti-monarchist campaign group Republic’s annual convention in the city.

Eugenie ended up doing a combined BA honours degree in English literature, history of art and politics at Newcastle and graduated at the end of her three-year course in 2012 with a 2:1. The comments by Dr. Farr imply that she was given special treatment to get her into the university for public relations purposes.

Speaking to an audience in favour of abolishing the monarchy, Dr. Farr said his information had come from a colleague who he didn't name.

He said the royal VIP was rejected for a degree in English literature before being found a place on the apparently less competitive combined degree when her identity came to light.

15. Which statement about Princess Eugenie fits the text above?

考试时的选项顺序

- A) She got her Master's degree in English literature.
- B) She was favored by her classmates in Newcastle University.
- C) She performed badly in academic study.
- D) She has graduated from Newcastle University. ✓

原始的选项顺序

- A) She performed badly in academic study.
 - B) She has graduated from Newcastle University. ✓
 - C) She got her Master's degree in English literature.
 - D) She was favored by her classmates in Newcastle University.
-

16. According to the text, why did Dr. Farr make the claim?

考试时的选项顺序

- A) He thought royal members should get special treatment.
- B) He believed Eugenie doesn' t match her grades.
- C) He advocated abolishing the monarchy. ✓
- D) He encountered prejudice in Newcastle University.

原始的选项顺序

- A) He advocated abolishing the monarchy. ✓
- B) He encountered prejudice in Newcastle University.
- C) He believed Eugenie doesn' t match her grades.
- D) He thought royal members should get special treatment.

Questions 17-20 (Suggested completion time: 8 minutes)

Directions: Read the text about the Great Barrier Reef. Answer the questions according to the text.

You can spend a lifetime exploring the Great Barrier Reef and still not see all of this colorful coral realm — it' s nearly the size of Montana. Sprawling off the east coast of Queensland, Australia, the Great Barrier Reef is not a single reef but a group of more than 2,800 distinct entities. It stretches over 1,250 miles (2,000 kilometers) north to south and covers some 135,000 square miles (350,000 square kilometers) in total.

The reef system is the largest structure on Earth built by living organisms, tiny hard corals that are no bigger than a fingernail. When corals die in countless numbers their limestone-secreted skeletons build upon one another to form the bedrock of the reef. The magnificent structures we see today were produced by a slow process played out over millions of

years. Reefs grow only about half an inch (1.3 centimeters) a year.

Some 2,000 different fish species have been identified on the Great Barrier Reef, and new ones are found each year. Scientists estimate that the reef is home to 4,000 mollusk species and over 250 different shrimp species. Even the corals that construct the reef itself are diverse — numbering some 400 species.

This colorful aquatic ecosystem is home to a staggering diversity of plant and lower animal life but is also frequented by larger species like dugongs, sea turtles, sharks, and dolphins.

In order to protect these biological treasures, the Great Barrier Reef Marine Park was designated a World Heritage site in 1981. Some two million tourists visit the Great Barrier Reef each year, driving an eco-economy that generates billions of dollars annually. But in recent years, the reef has suffered unprecedented coral bleaching.

Most day trips to the reef leave on boats from coastal centers like Cairns or Port Douglas. Most of the reef is dozens of miles offshore and must be reached by boat journeys of one to several hours.

The Great Barrier Reef lies in tropical waters where temperatures are warm enough to offer enjoyable swimming and diving year round — though averages can vary 10°F (5.5°C) from winter to summer. Peak tourism time on the reef is April through November, but even in winter ocean water temperatures typically top 72 ° F (22 ° C). Daytime temperatures during the summer months (December to March) can be quite hot — particularly in the northern regions of the reef.

High-speed catamarans take day-trip visitors to the reef, often docking at special base camp platforms equipped for snorkeling, diving, or exploration via glass-sided semi-submersibles. Other boat tours, including sailboats, provide a more leisurely experience. Private charters are available for snorkeling, diving, whale watching, or fishing adventures — including overnight live-aboard vessels for journeys to more remote locations. Aircraft and helicopter flights offer a bird's-eye view of the massive reef system, much of which lies close to the surface in clear, warm waters.

17. What can be the best title for the text?

考试时的选项顺序

A) Dive into the Vibrant Waters of the Great Barrier Reef ✓

- B) Urgent Measures Needed to Protect the Great Barrier Reef
- C) The Great Barrier Reef, the Heaven on Earth
- D) The Reef System at the Great Barrier Reef

原始的选项顺序

- A) The Reef System at the Great Barrier Reef
 - B) The Great Barrier Reef, the Heaven on Earth
 - C) Dive into the Vibrant Waters of the Great Barrier Reef ✓
 - D) Urgent Measures Needed to Protect the Great Barrier Reef
-

18. All of the following provide true descriptions about the Great Barrier Reef EXCEPT _____.

考试时的选项顺序

- A) It lies on the east coast of Queensland, Australia and is not a single reef.
- B) The enormous number of tourists is the very reason for coral bleaching. ✓
- C) It' s the largest coral reef in the world.
- D) Its ecosystem is full of plants and lower animals.

原始的选项顺序

- A) It' s the largest coral reef in the world.

- B) Its ecosystem is full of plants and lower animals.
 - C) It lies on the east coast of Queensland, Australia and is not a single reef.
 - D) The enormous number of tourists is the very reason for coral bleaching. ✓
-

19. Which of the following is true about corals?

考试时的选项顺序

- A) There are about 400 coral species in the Great Barrier Reef. ✓
- B) Their living temperature is at least 72°F (22°C) in winter.
- C) They are very tiny, no bigger than 1.3 cm.
- D) Their living skeletons build the reef.

原始的选项顺序

- A) Their living skeletons build the reef.
 - B) They are very tiny, no bigger than 1.3 cm.
 - C) Their living temperature is at least 72°F (22°C) in winter.
 - D) There are about 400 coral species in the Great Barrier Reef. ✓
-

20. Which of the following is true about travelling to the Great Barrier Reef?

考试时的选项顺序

- A) Its peak tourism time is from November to April.
- B) It is a World Heritage site, so No Fishing there.
- C) It only accepts day-trips, no overnight trips.
- D) It is a suitable place for swimming and diving. ✓

原始的选项顺序

- A) It only accepts day-trips, no overnight trips.
- B) It is a suitable place for swimming and diving. ✓
- C) It is a World Heritage site, so No Fishing there.
- D) Its peak tourism time is from November to April.

Questions 21-23 (Suggested completion time: 8 minutes)

Directions: Read the text about an accidental poisoning. Answer the questions according to the text.

A tropical fish enthusiast accidentally poisoned himself and his family while cleaning a fish tank after coral released deadly fumes as he scraped off the grime.

Chris Matthews, 27, was hospitalised along with his girlfriend, mum, dad,

sister and her boyfriend, and four firefighters after they breathed in toxic fumes.

Experienced fish owner Chris was cleaning out a tank and moving the contents to another container when the accident happened in Steventon, Oxfordshire. In the process he took out a rock covered in coral and scraped it clean. Inadvertently he released deadly substance palytoxin into the atmosphere, and then closed the door and went to sleep.

The following day the entire family suffered flu-like symptoms, and even their two dogs became ill. Chris suffered breathlessness, coughing and fever which he said was "as bad as pneumonia". Over the course of the day, his mother, sister and her boyfriend all came down with varying levels of illness. Chris realised that it was likely the family had been poisoned and dialed 999. When his father, Ian, returned home from work, he was also taken to hospital.

Chris said: "It was worse than flu, we couldn't concentrate on anything. We couldn't regulate our temperature, we were struggling to breathe and coughing. We woke up the next morning feeling groggy but initially put it down to flu. It was when we noticed our two dogs had similar symptoms that we knew something wasn't right."

He added: "If we had spent another night in that bedroom our lives would have been in danger. Certainly our dogs would have been in a very bad way according to the vet. That is what is so worrying, what if there had been a young child or someone elderly in the house?"

A massive emergency services response was launched to the family's home and the road was closed and a police cordon was erected. Firefighters who were first on the scene were also taken to the John Radcliffe Hospital in Oxford. They were released after a few hours along with three family members. The others were kept in overnight so blood tests could be carried out. The house was ***ventilated*** overnight while chemical officers from Oxfordshire Fire and Rescue worked alongside Public Health England to remove the rest of the coral.

Chris said: "I knew about palytoxin, which can kill you if ingested, and that coral can cause things like rashes if you don't handle it carefully but I had no idea taking the pulsing xenia out of the water could make the toxin airborne. The information is not readily available online in a way people can easily understand and more needs to be done when people are buying these corals. I want to use this experience to educate people about the risks and the measures people need to take." He added: "I'

ve seen the coral described as ‘exotic’ but it is actually one of the most common around. It’s a pest coral called pulsing xenia that you grow in areas where you can’t get anything else to thrive. It’s not expensive and a lot of people have it.”

Chris has kept tropical fish for 12 years and said the experience would not put him off. He said: “We’ve put more safety precautions in place, making sure we properly ventilate the room, but I love having fish and it’s something that both sides of my family have always done. I’ll be a lot more cautious in the future though.”

21. What is the CORRECT order of the events in the text? BFDCAE

(Please answer with capitalized letters without punctuation marks, for example: ABCDEF)

- A. Chris and his family were sent to the hospital.
- B. Chris wiped away the dirt from the coral as he was cleaning a fish tank.
- C. Chris found the two pet dogs had similar symptoms.
- D. The whole family were poisoned by the toxic fumes.
- E. The four firefighters were taken to the hospital.
- F. The coral released deadly fumes.

答案: BFDCAE

22. What does the word **ventilated** mean?

考试时的选项顺序

A) aired ✓ B) rinsed C) disinfected D) sealed

原始的选项顺序

A) aired ✓ B) sealed C) rinsed D) disinfected

23. Which of the following, if true, best proves that Chris is an experienced fish owner?

考试时的选项顺序

A) Chris has kept the pulsing xenia for 12 years.

B) Chris has kept tropical fish for 12 years. ✓

C) Chris studied the coral before.

D) Chris knew about palytoxin before.

原始的选项顺序

A) Chris has kept the pulsing xenia for 12 years.

B) Chris has kept tropical fish for 12 years. ✓

C) Chris knew about palytoxin before.

D) Chris studied the coral before.

Questions 24-27 (Suggested completion time: 7 minutes)

Directions: Read the text about package delivery. Answer the questions

according to the text.

If your package is long overdue or you think it may be lost in the mail, you should contact your local post office and request that a parcel tracer action be initiated to locate it. U.S. Customs and Border Protection (CBP) is unable to track packages into or out of our facilities unless you have received a notice of detention issued by CBP, otherwise we will not be able to locate your package even if it is being held by CBP.

Please note, the International Sorting Center (ISC) is a U.S. Postal Service Processing Facility and not a CBP one. If the post office has a tracking number that indicates the package went into CBP, but no record of it exiting the facility, you might ask USPS ' s customer service representatives to work directly with the CBP facility to see if it is still there — although the absence of a record is not proof that the package is still in the CBP area.

CBP enforces a wide range of laws, including health, safety, and intellectual property rights, so other U.S. agencies also may need to inspect packages. This is particularly common for goods subject to Food and Drug Administration (FDA) regulations, such as medicine, medical devices, and food items.

If CBP has detained your package for some reason (for example, lack of a proper invoice, bill of sale, or other documentation, a possible trademark violation, or if the package requires a formal entry) the CBP International Mail Branch holding it will notify you of the reason for detention (in writing) and how you can get it released.

When you have fulfilled the requirements necessary to effect release, CBP will clear the package, note how much duty is owed, and return it to the U.S. Postal Service (USPS) for delivery. Usually, you will receive notification in a matter of days, but it can take as long as 30-45 days.

Questions about the USPS Customs Declaration Forms 2976 and 2976A should be directed to the United States Postal Service 1800-ASK-USPS/1800-275-8777.

24. Who will most probably read this text?

- A) People who buy international parcels.
- B) People whose package items are restricted.
- C) People who don't know how to pay customs duties.
- D) People whose package is lost or missing in the mail.

25-27 Decide whether the following statements are True or

False according to the text. ✓

答案: D

25. If your package is overdue, you can request CBP to track it and then ask for package release.

A) True B) False ✓

答案: B

26. If the tracking number indicates your package still remains in CBP, you can ask the staff in CBP to check its current status.

A) True B) False ✓

答案: B

27. If your package is overdue, it may be detained by CBP or other agencies.

A) True ✓ B) False

答案: A

Questions 28-30 (Suggested completion time: 8 minutes)

Directions: Read the text about opioids. Answer the questions according

to the text.

U.S. deaths from opioid overdoses are mounting with breathtaking speed. These powerful drugs — including heroin, morphine and fentanyl — can relieve pain and evoke intense feelings of pleasure. But the same drugs, whether prescribed by a doctor or bought on the street, can quickly turn deadly by simultaneously messing with crucial systems in the body.

Among the many rapid effects that opioids have on the body, one is particularly lethal: Breathing is restricted. “Opioids kill people by slowing the rate of breathing and the depth of breathing,” says medical toxicologist and emergency physician Andrew Stolbach of Johns Hopkins University School of Medicine. Breathing delivers fresh oxygen to the body’s cells and eliminates carbon dioxide. Opioids can interfere with that life-sustaining process in multiple, dangerous ways.

Here’s how opioids kill.

In the brain stem, regions called *the medulla* and *the pons* control the depth and rate of breathing. Both are loaded with opioid receptors — proteins that sit on the surface of cells and grab onto opioids. Upon

activating, the receptors change the behavior of cells in ways that can slow or even stop breathing.

Opioid receptors have also been found in areas of the brain that regulate voluntary breathing — when you feel the need to take in a deep swallow of air, you do it. So, opioids might depress breathing by working directly on areas of the brain outside the brain stem.

The brain stem and certain other parts of the brain are particularly rich in the receptors that attach to opioids. When the connection is made between opioids and these receptors, the cell reacts. The effects vary depending on the cell's location. Opioid receptors are found in tissues, organs and muscles throughout the body.

Sensing small increases in CO₂, the carotid body, a small cluster of cells in the neck, spurs big increases in breathing to remove excess CO₂ and keep a person out of trouble. But opioids dampen these sensors and silence the body's CO₂ warning system. Emergency signals to increase breathing go unsent.

One of the telltale signs of opioid overdose is frothy fluid around the nose and mouth and fluid in the lungs, called *pulmonary edema*. It's not

clear how opioids trigger this, but filled with fluid, the lungs can't oxygenate blood very well, and a person may slip further into respiratory trouble. A fast-acting injection of the opioid fentanyl can cause the diaphragm (隔膜) and other muscles in the chest to seize up, leading to what's called "wooden chest syndrome."

28. Which of the following statements about opioid receptors is NOT true?

- A) Opioid receptors are widely distributed in the body.
- B) Opioid receptors affect breathing once activated.
- C) Opioid receptors can regulate voluntary breathing. ✓
- D) Opioid receptors' distribution in the body is uneven.

答案: C

29. Which of the following is an important symptom of opioid overdose?

- A) Fluid in the lungs. ✓
- B) Intense pains.
- C) Fast breathing.
- D) Deep breathing.

Decide whether the following statement is True or False

according to the text.

答案: A

30. Though opioid receptors can be found in many parts of the body, they lead to similar consequences.

A) True B) False ✓

答案: B

Directions: In Part III, you will read passages on the same subject. You will be required to identify the writer’ s position and evaluate the effectiveness of the writer’ s arguments. (Time allowed: 35 minutes)

Questions 31-40 (Suggested completion time: 35 minutes)

Directions: Read three passages about fake news. Answer the questions according to the passages.

Passage A

In the 16th and 17th centuries, printers would crank out pamphlets, or newsbooks, offering detailed accounts of monstrous beasts or unusual occurrences. A newsbook published in Catalonia in 1654 reports the discovery of a monster with “goat’ s legs, a human body, seven arms

and seven heads;" an English pamphlet from 1611 tells of a Dutch woman who lived for 14 years without eating or drinking. So what if they weren' t true? Printers argued, as Internet giants do today, that they were merely providing a means of distribution, and were not responsible for ensuring accuracy.

31 They contained a bundle of different stories, not just one, and appeared regularly under a consistent title. They therefore had reputations to maintain. *The Sun*, founded in 1833, was the first modern newspaper, funded primarily by advertisers rather than subscriptions, so it initially pursued readership at all costs. At first it prospered from the "Moon hoax (a series of six articles published in 1835 describing fantastic animals on the Moon)," even collecting its reports in a bestselling pamphlet. But it was soon exposed by rival papers. Editors also realised that an infinite supply of genuine human drama could be found by sending reporters to the courts and police stations to write true-crime stories — a far more sustainable model. As the 19th century progressed, impartiality and objectivity were increasingly venerated at the most prestigious newspapers.

32 Facebook shows an endless stream of items from all over the web. Click an interesting headline and you may end up on a

fake-news site, set up by a political propagandist or a teenager in Macedonia to attract traffic and generate advertising revenue. Peddlers of fake stories have no reputation to maintain and no incentive to stay honest; they are only interested in the clicks. The impetus behind these was commercial rather than political.

_____ 33 _____ This flowering of fabricated stories corrodes trust in the media in general, and makes it easier for unscrupulous politicians to peddle half-truths. Media organisations and technology companies are struggling to determine how best to respond. Perhaps more overt fact-checking or improved media literacy will help. But what is clear is that a mechanism that held fake news in check for nearly two centuries — the bundle of stories from an organisation with a reputation to protect — no longer works. We will need to invent new ones.

Passage B

It is said that a lie will travel around the world while the truth is pulling on its boots, and now scientists have proven that it is true.

The adage, variously attributed to Mark Twain and 19th century London preacher Charles Haddon Spurgeons, was coined way before the advent

of social networks and 24 hour rolling news.

But a new study by MIT found that false stories spread far more rapidly on Twitter than genuine news, and also reach a much wider audience, a result which researchers describe as “very scary.”

An analysis of stories between 2006 and 2017 found that false news is 70 percent more likely to be retweeted over *bona fide* articles. It also takes true stories about six times longer to reach 1,500 people as it does for untrue reports.

Deb Roy, who served as Twitter’ s chief media scientist from 2013 to 2017 and is now an associate professor of media arts and sciences at MIT, said his team was “somewhere between surprised and stunned” by the findings.

“These findings shed new light on fundamental aspects of our online communication ecosystem,” she said and advised people to “think before you retweet.”

The researchers began the study after MIT’ s Dr. Soroush Vosoughi noticed a slew of false information on Twitter following the Boston

Marathon bombings in 2013.

Some tweets claimed an eight-year-old girl, who had been running in memory of victims of the Sandy Hook shooting, was killed even though children are not allowed into the race.

Another story said a woman was blown up shortly before her boyfriend was due to propose.

"I realized that a good chunk of what I was reading on social media was rumors," said Dr. Vosoughi. "It was false news."

To find out if false news was disseminated more quickly the team used Twitter's archive to track around 126,000 cascades (or network trees) of real and fake news stories involving politics, urban legends, business, terrorism, science, entertainment and natural disasters.

Fake new stories included a claim that boxer Floyd Mayweather wore a Muslim headscarf to a Donald Trump rally and that a Trump's dead cousin used his obituary to urge people to vote against the president.

True stories included Michelle Obama's claim that the White House was

built by slaves and Hilary Clinton' s assertion that top hedge fund managers make more money than all kindergarten teachers combined.

The stories reached three million people and were retweeted about 4.5 million times.

Professor Sinan Aral, of MIT' s Sloan School of Management added: "We found that falsehood defuses significantly farther, faster, deeper, and more broadly than the truth, in all categories of information, and in many cases by an order of magnitude."

Passage C

1. Appalled by the misinformation that characterized both the U.S. elections and U.K. Brexit campaign, a group of behavioral scientists at The Ohio State University and the University of Pennsylvania, including me, wanted to create a tool to fight misinformation. The pledge, launched in December 2016, is a project of a nonprofit I co-founded called "Intentional Insights" .

2. The pledge aims to promote honesty by asking people to commit to 12 behaviors that research shows correlate with an orientation toward truthfulness. For example, the pledge asks takers to fact-check information before sharing it, cite sources, ask friends and foes alike to retract info shown to be false, and discourage others from using unreliable news sources.

3. About 10 months after launching the pledge, my colleagues and I wanted to evaluate whether in fact it has been effective at changing behavior and reducing the spread of unverified news. So we conducted two studies comparing pledge-takers' sharing on Facebook. To add a little outside perspective, we included a researcher from the University of Stuttgart who did not take part in creating the pledge.

4. While self-reporting is a well-accepted methodology that emulates the approach of studies such as honor codes (a set of rules or ethical principles governing a specific community), it's subject to the potential bias of subjects reporting desirable changes — such as more truthful behaviors — regardless of whether these changes are present.

5. In one study, we asked participants to fill out a survey evaluating how well their sharing of information on their own and others' profile pages

aligned with the 12 behaviors outlined in the pledge a month before and after they signed it. The survey revealed large and statistically significant changes in behavior, including more thorough fact-checking, a growing reluctance to share emotionally charged posts, and a new tendency to push back against friends who shared information.

6. So far, about 6,700 people and organizations have taken the pledge, including American social psychologist Jonathan Haidt, Australian moral philosopher Peter Singer, Media Bias/Fact Check and U.S. lawmakers Beto O' Rourke, Matt Cartwright and Marcia Fudge.

7. So in a second study we got permission from participants to observe their actual Facebook sharing. We examined the first 10 news-relevant posts one month after they took the pledge and graded the quality of the information shared, including the links, to determine how closely their posts matched the behaviors of the pledge. We then looked at the first 10 news-relevant posts 11 months before they took the pledge and rated those. We again found large, statistically significant changes in pledge-takers' adherence to the 12 behaviors, such as fewer posts containing misinformation and including more sources.

8. The reason the pledge works, I believe, is because it replaces the fuzzy

concept of “truth,” which people can interpret differently, with clearly observable behaviors, such as fact-checking before sharing, differentiating one’s opinions from the facts and citing sources.

9. The pledge we developed is only one part of a larger effort to fight misinformation. Ultimately, this shows that simple tools exist and can be used by Facebook and other social media companies to battle the onslaught of misinformation people face online, without resorting to censorship.

31-33 Choose one sentence for each blank in Passage A. Please note there is one extra option.

- A. The history of made-up stories explains why they have re-merged in the Internet era.
- B. Thanks to Internet distribution, fake news is again a profitable business.
- C. But newspapers were different.
- D. But in recent years search engines and social media have blown apart newspapers’ bundles of stories.

31. C

答案: C

32. D

答案: D

33. B

答案: B

34. According to Passage A, what is the motivation in the shift of story resource for *The Sun*?

考试时的选项顺序

A) Readership. **B) Reputation.** C) Competition. D) Profits.
√

原始的选项顺序

A) Reputation. B) Profits. C) Readership. D) Competition.
√

35. The word ***bona fide*** in the fourth paragraph of Passage B can be replaced by _____.

考试时的选项顺序

A) novel B) decent **C) genuine** D) unique
√

原始的选项顺序

A) genuine

B) unique C) decent D) novel

✓

36. Which of the following is TRUE about the MIT' s research in Passage

B?

考试时的选项顺序

A) Its participants retweeted the fake stories over 4.5 million times.

B) It finds that what we read online are either false or half-true.

C) It proves that people love reading and spreading fictions.

D) Its result is beyond the expectation of the researchers. ✓

原始的选项顺序

A) Its participants retweeted the fake stories over 4.5 million times.

B) Its result is beyond the expectation of the researchers. ✓

C) It proves that people love reading and spreading fictions.

D) It finds that what we read online are either false or half-true.

37. Paragraphs 3-7 in Passage C are given in the wrong order. Which should be the correct order?

考试时的选项顺序

- A) 3-6-4-5-7 B) 3-6-7-4-5 C) 6-3-5-7-4 D) 6-3-5-4-7
√

原始的选项顺序

√

38. According to Passage C, why can the pledge work on the prevention of fake news on the Internet?

考试时的选项顺序

- A) Because it imposes severe punishment on those who break it.
- B) Because it formulates the concept of "truth" for the Internet era.
- C) Because it definitely distinguishes fake news from true ones.
- D) Because it provides specified instructions for people to carry out. √

原始的选项顺序

- A) Because it imposes severe punishment on those who break it.

B) Because it definitely distinguishes fake news from true ones.

C) Because it provides specified instructions for people to carry out. ✓

D) Because it formulates the concept of “truth” for the Internet era.

39. Choose the best title for each passage. Please note there are two extra options. **CEB**

(Please answer with capitalized letters without punctuation marks in the order of the passages, for example: ABC)

A. Fake News Is Nothing New

B. War on Fake News Could Be Won

C. The True History of Fake News

D. Down with Fake News

E. Rapid Spreading: Fake News over Genuine Articles

答案: CEB

40. Which of the following is mentioned in all three passages?

考试时的选项顺序

A) The strategies to stop fake news.

B) The online diffusion of fake news. ✓

C) The sources of fake news.

D) The reasons of fake news.

原始的选项顺序

A) The reasons of fake news.

B) The sources of fake news.

C) The strategies to stop fake news.

D) The online diffusion of fake news. ✓

Directions: In Part IV, you will read two passages and then write a short essay according to them. You should write with clarity and logic. (Time allowed: 40 minutes)

41.

Question 41 (Suggested completion time: 40 minutes)

Directions: Read two excerpts from *Guns, Germs and Steel* by Jared Diamond. Write a short essay according to the two excerpts.

Excerpt 1

... People of Eurasian origin, especially those still living in Europe and eastern Asia, plus those transplanted to North America, dominate the modern world in wealth and power. ... Why did wealth and power become distributed as they now are, rather than in some other way? For instance, why weren't Native Americans, Africans, and Aboriginal Australians the ones who decimated, subjugated, or exterminated Europeans and Asians?

Excerpt 2

Was it just a random stroke of good luck that a glorious revolution and wealth dropped into Britain's lap? Would Zambia now be rich, and Britain poor, if a glorious revolution had broken out in Zambia rather than in Britain?

Of course not. To stress the Glorious Revolution as the cause of Britain's modern wealth is to fall into the trap of focusing on proximate causes and ignoring ultimate causes as if a marital therapist counseling an angry husband and wife were to focus only on the lurid details of how the wife slapped her husband. Zambia couldn't have experienced a glorious revolution in 1688, because of obvious ultimate causes resulting in its not having any king to overthrow, nor any parliament to increase in power. That was because agriculture arrived in Britain around 5,500 years ago, but in Zambia only around 2,000 years ago. Most of modern Britain's area became politically unified under the Roman Empire by around A.D. 80; modern Zambia's area didn't become unified under the British Empire until the 1890s. Britain had its own kings by about A.D. 600, and a parliament around A.D. 1300; Zambia never developed either by itself. Britain enjoys high agricultural productivity because of its fertile glaciated soils and its temperate location; Zambia suffers from low agricultural productivity because of its infertile soils and tropical location. Compared to other European countries sharing those British geographic and historical advantages, Britain has enjoyed the huge additional advantages of being an island, much less exposed to

military invasion than continental European countries (and hence without need of a standing army for protection) — and of having an Atlantic location ideal colonizing other continents. In contrast, Zambia is landlocked and never had any overwater trade or colonies. Britain was the first country in the world to eliminate the chronic risk of famine, thanks to factors such as its agricultural productivity, its acquisition of New World crops, and its political unity.

All of those favorable ultimate causes of geography and history form the background to Britain's rise to wealth, in which the Glorious Revolution was nothing more than a significant late stage and proximate cause. That illustrates how a glance at a map goes a long way toward helping us understand the big influence of geography on history, and the ultimate causes of national wealth and poverty in the modern world.

41. Write a short essay of about 300 words based on your understanding of the two excerpts. Remember to write in your OWN words. Your essay should respond to the following questions:

- 1) What is the question that the excerpts explore? What is the answer provided by the author?
- 2) How does the example of Britain and Zambia illustrate the main point(s) of the author? Please explain.
- 3) What is YOUR answer to the question the author explored?

答案:

2018 复赛（2）

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: Read the following excerpts and choose the correct book title for each excerpt. Please note there are two extra options.

- A. *How to Read a Book*
- B. *The Guide to Critical Thinking*
- C. *The Idea of a University*
- D. *Guns, Germs and Steel*
- E. *The Renaissance: A Very Short Introduction*

1. E

Even if it is difficult to grasp the motivation for the range of emotions expressed in paintings like Holbein's, it is still possible to identify with these emotions as recognizably "modern". In other words, when we look at paintings like *The Ambassadors*, we are seeing the emergence of modern identity and individuality.

答案: E

2. C

Certainly a liberal education does manifest itself in a courtesy, propriety, and polish of word and action, which is beautiful in itself, and acceptable to others; but it does much more. It brings the mind into form, — for the mind is like the body.

答案: C

3. D

Those historical inequalities have cast long shadows on the modern world, because the literate societies with metal tools have conquered or exterminated the other societies. While those differences constitute the most basic fact of world history, the reasons for them remain uncertain and controversial.

答案: D

Question 4 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

The face of China is changing, thanks in part to the massive business of selfie-enhancing smartphone apps. These ultra-popular programs allow users to edit their appearance by enlarging the eyes, reducing the size of the face, smoothing the skin and highlighting desirable facial features.

Meitu, a Chinese company that owns a lineup of these beautifying apps, claims to have 454 million active users each month, and at last count processed more than 68 billion images a year.

4. What is the best title for the text?

考试时的选项顺序

- A) Meitu Becomes the Major Player in China' s Selfie Industry
- B) China' s Beauty Industry Is Booming in Recent Years
- C) Selfie-Enhancing Apps Allow Users to Beautify Their Faces
- D) Appearance-Altering Apps Are Gaining Popularity in China

✓

原始的选项顺序

- A) China' s Beauty Industry Is Booming in Recent Years
- B) Selfie-Enhancing Apps Allow Users to Beautify Their Faces
- C) Meitu Becomes the Major Player in China' s Selfie Industry
- D) Appearance-Altering Apps Are Gaining Popularity in China

✓

Question 5 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

As members of what has been dubbed “Generation Z,” a cohort that spans those born roughly between the years 1998 and 2010, today’s teens and tweens have had unparalleled access to technology. Many have had smartphones since elementary, if not middle school. They’ve grown up with the Internet, laptops, and social media.

It’s tempting to think that these devices, with their endless ability to stimulate, offer salvation from the type of mind-numbing boredom that is so core to the teen experience. But humans adapt to the conditions that surround them, and technical advances are no different. What seemed novel to one generation feels passé to the next. To many teens, _____.

5. Which of the following best fits in the blank?

考试时的选项顺序

- A) they have found something on their phones truly entertaining
- B) phone boredom may stop them from daydreaming
- C) smartphones and the Internet have already lost their appeal
✓
- D) tech companies help keep them active and attentive

原始的选项顺序

- A) smartphones and the Internet have already lost their appeal
✓
- B) they have found something on their phones truly entertaining
- C) tech companies help keep them active and attentive
- D) phone boredom may stop them from daydreaming

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

We love the Lone Star State, and that' s just one of the reasons why Oncor is so committed to the environment. Our commitment stretches deep into the service territory, such as: investing in transmission lines; helping bring clean, renewable wind power from the Panhandle to Texas'

urban hot spots and engaging environmental experts in land studies to ensure our lines avoid the habitats of endangered species. Additionally, the energy efficiency group at Oncor manages dozens of residential and commercial programs, so our customers can realize energy savings within their homes, businesses and schools.

When reading stories from the Environment category on *The Wire*, readers will find a wide array of environmental topics suited to their interests. This category houses a suite of consumer-friendly angles laced with scientific news pegs, from renewable energy trends to wildlife preservation efforts.

6. Of the following descriptions about Oncor, which one is true?

考试时的选项顺序

A) Oncor is an electricity delivery company with a good sense of social responsibility. ✓

B) Oncor is a company whose main business is to engage in environmental protection.

C) Oncor is a real estate firm developing many residential and commercial programs.

D) Oncor is an institution developing renewable energy and energy efficiency technology.

原始的选项顺序

A) Oncor is a company whose main business is to engage in environmental protection.

B) Oncor is an electricity delivery company with a good sense of social responsibility. ✓

C) Oncor is an institution developing renewable energy and energy efficiency technology.

D) Oncor is a real estate firm developing many residential and commercial programs.

Question 7 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Drinking will shorten your life, according to a study that suggests every glass of wine or pint of beer over the daily recommended limit will cut half an hour from the expected lifespan of a 40-year-old.

Those who think a glass of red wine every evening will help keep the heart healthy will be dismayed. The paper published in *The Lancet* medical journal says five standard 175ml glasses of wine or five

pints a week is the upper safe limit — about 100g of alcohol, or 12.5 units in total. More than that raises the risk of stroke, fatal aneurysm (a ruptured artery in the chest), heart failure and death.

The risks for a 40-year-old of drinking over the recommended daily limit were comparable to smoking, said one leading scientist. “Above two units a day, the death rates steadily climb,” said David Spiegelhalter, Winton Professor for the public understanding of risk at the University of Cambridge.

7. What can be learned from the text?

考试时的选项顺序

A) That daily consumption of red wine is beneficial to health is a misconception. ✓

B) A glass of wine a day will shorten one's lifespan by half an hour.

C) A daily intake of two units of red wine will increase one's death rate.

D) Unlike smoking, drinking below the recommended daily limit is not harmful.

原始的选项顺序

- A) A daily intake of two units of red wine will increase one' s death rate.
- B) A glass of wine a day will shorten one' s lifespan by half an hour.
- C) Unlike smoking, drinking below the recommended daily limit is not harmful.
- D) That daily consumption of red wine is beneficial to health is a misconception. ✓

Question 8 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

The movies may make start-ups look like a grand adventure bankrolled by "angel investors" that make everyone into billionaires but the reality is far different, says Nneka Brown-Massey, founder and CEO of Innovative Supplies Worldwide, Inc. Starting your own business can be agonizing work with long hours and no pay for a long time. "I wish my employees understood better how running a small business works. ***As a small business owner I wear 17 different hats***, which means I don' t have, say, a payroll team. It' s just me, writing your checks."

8. What does the sentence *As a small business owner I wear 17 different hats* mean?

考试时的选项顺序

- A) I have to face a lot of challenges when doing business.
- B) I need different teams to keep business running.
- C) I deal with various kinds of people every day.
- D) I undertake different jobs in my company. ✓

原始的选项顺序

- A) I have to face a lot of challenges when doing business.
- B) I deal with various kinds of people every day.
- C) I undertake different jobs in my company. ✓
- D) I need different teams to keep business running.

Question 9 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Lactose is a sugar molecule. It's found in milk and other dairy products, such as cheese and yogurt. For the human body to digest lactose, the sugar molecule must be broken down into smaller molecules. Lactose is broken down by an enzyme — a molecule that speeds up chemical reactions — called *lactase*. Nearly everyone is born with the ability to produce this enzyme. It's what allows mammals to drink milk from their

mothers. However, people can stop producing the enzyme as they grow up. About 65 percent of adults can't digest lactose well — or at all — after childhood. This includes many people of East Asian, West African, Greek and Italian descent. Without lactase, a person who eats dairy products with lactose can experience stomach pain, gas and bloating.

9. Which of the following is NOT true according to the text?

考试时的选项顺序

- A) A majority of humans usually lose the ability to absorb lactose as they reach adulthood.
- B) The human body can only digest smaller-sized lactose.
- C) Most populations of the human species have a tendency for developing lactose deficiency. ✓
- D) Lactase is capable of splitting lactose into smaller molecules.

原始的选项顺序

- A) The human body can only digest smaller-sized lactose.
- B) Lactase is capable of splitting lactose into smaller molecules.
- C) A majority of humans usually lose the ability to absorb lactose as they reach adulthood.

D) Most populations of the human species have a tendency for developing lactose deficiency. ✓

Question 10 (Suggested completion time: 5 minutes)

Directions: The figure shows the percentage of bachelor's degree holders aged 25 to 34 working in occupations closely related to their fields of study, by STEM (science, technology, engineering and mathematics) and selected BHASE (business, humanities, health, arts, social science and education) and gender, Canada, 2016. Answer the question according to the information in the figure.

1. These occupations are from the broad groups of the National Occupational Classification (NOC) 2016.
Source: Statistics Canada, Census of Population, 2016.

10. Which of the following is an INCORRECT description of the figure?

考试时的选项顺序

A) Female bachelor holders with degrees in nursing and education and teaching are more likely than male graduates to find work closely related to their studies.

B) Female graduates in mathematics are less likely to bring their education-related skills to the labor market than male graduates in science technology. ✓

C) Among young people with a STEM degree, men are almost twice as likely as women to be working in science and technology occupations.

D) Young graduates in engineering are the most likely among their peers in STEM fields to bring their education-related skills to the labor market.

原始的选项顺序

A) Among young people with a STEM degree, men are almost twice as likely as women to be working in science and technology occupations.

B) Female graduates in mathematics are less likely to bring their education-related skills to the labor market than male graduates in science technology. ✓

C) Female bachelor holders with degrees in nursing and education and teaching are more likely than male graduates to

find work closely related to their studies.

D) Young graduates in engineering are the most likely among their peers in STEM fields to bring their education-related skills to the labor market.

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 55 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: Read the following definition of a logical fallacy. Answer the question according to the definition.

Nirvana Fallacy

It is a fallacy that compares a realistic solution with an idealized one, discounting or even dismissing the realistic solution as a result of comparing to a “perfect world” or impossible standard. It ignores the fact that improvements are often good enough reason.

11. Which of the following provides a typical example of *Nirvana Fallacy*?

考试时的选项顺序

A) These anti-drunk driving ad campaigns are not going to

work. People are still going to drink and drive anyway. ✓

B) If we allow the students to choose the theme of the dance,

next they will want to choose who the new principal will be!

C) A lawyer argues that his client should not be held

responsible for theft because he is poor.

D) I can't even imagine eating just a peanut-butter sandwich

without jelly.

原始的选项顺序

A) I can't even imagine eating just a peanut-butter sandwich

without jelly.

B) A lawyer argues that his client should not be held

responsible for theft because he is poor.

C) These anti-drunk driving ad campaigns are not going to

work. People are still going to drink and drive anyway. ✓

D) If we allow the students to choose the theme of the dance,

next they will want to choose who the new principal will be!

Question 12 (Suggested completion time: 4 minutes)

Directions: Read the following example of a logical fallacy. Answer the question according to the example.

Suppose you know that Linda is 31 years old, single, outspoken, and very bright. She majored in philosophy. As a student, she was deeply concerned with issues of discrimination and social justice. Then you are asked to choose which is more likely: (A) Linda is a bank teller or (B) Linda is a bank teller and activist in the feminist movement. You choose (B).

12. Which fallacy could best be explained by the above example?

考试时的选项顺序

A) *Conjunction Fallacy*. Mistakenly supposing that event X is less likely than the conjunction of events X and Y. ✓

B) *Biased Generalizing*. Using an unrepresentative sample and overestimating the strength of an argument based on that sample.

C) *Etymological Fallacy*. Assuming that the present-day meaning of a word should be/is similar to the historical meaning.

D) *Name-calling Fallacy*. Using emotionally loaded terms to influence an audience.

原始的选项顺序

A) *Conjunction Fallacy*. Mistakenly supposing that event X is less likely than the conjunction of events X and Y. ✓

B) *Etymological Fallacy*. Assuming that the present-day meaning of a word should be/is similar to the historical meaning.

C) *Biased Generalizing*. Using an unrepresentative sample and overestimating the strength of an argument based on that sample.

D) *Name-calling Fallacy*. Using emotionally loaded terms to influence an audience.

Questions 13-14 Reasoning (Suggested completion time: 10 minutes)

13.

"Just as a heavy rainfall can be cleansing, the best way to maintain a healthy relationship is to store up all your petty grievances and then unload them all at one time on your partner."

Which of the following indicates the flaw in the argument above?

考试时的选项顺序

A) It treats two kinds of events that differ in critical respects as if they do not differ. ✓

B) It draws a broad conclusion from a small sample of instances.

C) It attempts to persuade by making an emotional appeal.

D) It bases a conclusion on claims that are inconsistent with each other.

原始的选项顺序

A) It attempts to persuade by making an emotional appeal.

B) It draws a broad conclusion from a small sample of instances.

C) It bases a conclusion on claims that are inconsistent with each other.

D) It treats two kinds of events that differ in critical respects as if they do not differ. ✓

14.

Hog farming is known to produce dangerous toxic runoff, which enters the surrounding ecosystem and contaminates the environment. Despite this, however, hog farming practices should not be more closely regulated because research has shown there is no better method for dispersing effluent from hog farms.

Which of the following most seriously weakens the argument above?

考试时的选项顺序

A) The toxic runoff dispersed from hog farms will be beneficial to the environment if treated properly.

B) Just because there is not a better method of dispersing effluent does not mean there should not be more regulation. ✓

C) There is no excuse for hog farms to discharge dangerous toxic runoff directly without appropriate recycle and treatment.

D) It is the regulator's duty to monitor or regulate hog farming practices and to examine whether or not it harms the ecosystem.

原始的选项顺序

A) The toxic runoff dispersed from hog farms will be beneficial to the environment if treated properly.

B) Just because there is not a better method of dispersing effluent does not mean there should not be more regulation. ✓

C) It is the regulator's duty to monitor or regulate hog farming practices and to examine whether or not it harms the ecosystem.

D) There is no excuse for hog farms to discharge dangerous toxic runoff directly without appropriate recycle and treatment.

Questions 15-19 (Suggested completion time: 9 minutes)

Directions: Read the text about an athlete. Answer the questions

according to the text.

Heart of Mettle Seeks More Than Medals

This time it wasn't about the medals. For Daniel Cnossen, it was about recapturing what drove his passion for the Navy SEALs: discipline, intensity, training, focus, commitment, and teamwork. And it was about adding another challenge to the adventure he's lived since losing both his legs above the knee to an improvised explosive device in Afghanistan.

That devastating experience, in 2009, only fueled Cnossen's competitive drive. Over the past eight years, Cnossen, currently a candidate for a master's in theology at Harvard Divinity School (HDS), has hit the track, the pool, the weights, the paddle board, and above all the ski trails, keeping himself physically and mentally sharp and reconnecting with the outdoors.

And while his go-to mantra has become "the effort is the success," Cnossen's work in the woods, in the gym, on the Charles River, and at HDS, where his classmates and professors have helped him focus on "what matters," proved a winning combination at the Paralympics in Pyeongchang, South Korea.

As a member of the US Nordic skiing team, Cnossen captured one gold medal, one bronze, and four silver, securing a spot on the podium in every event he entered: the sprint, 7.5, the 15k sitting cross-country races, and the 7.5, 12.5k, and 15k sitting biathlons.

On a recent afternoon, just back from the closing ceremonies, Cnossen reflected on challenges on and off the ski track. According to the farm boy from Topeka, Kansas, Harvard has played a pivotal role in overcoming them.

"I think the educational program at HDS is making me a better person," said the retired lieutenant commander, whose time at the Kennedy School, where he earned a master's in public administration in 2016, introduced him to scholars of different perspectives who shared his interest in politics and humanitarian work. One was Ali Asani, a professor who became an important mentor and helped guide Cnossen to the Divinity School.

Cnossen considers his coursework in religion, ethics, and politics "applied philosophy, because it exists in the world in the form of belief systems that do affect how people act and see things."

His HDS curriculum, which includes texts by “wonderful philosophers and ethicists,” has led Cnossen to more “refined questions about existence and purpose and meaning,” and to a refined definition of success.

“What is success? We as a society attribute it to medals. I don’t think that’s the right form of success for me at the personal level. It’s more about, ‘Do I love this? Does my body still tell me it wants to do this? Does my happiness increase because I am doing this?’ ” The answer to all those questions, he said, is “Yes.”

Four years ago, as a full-time athlete living in Colorado, Cnossen felt pressure to bring back a medal from his first Paralympics. This time around, his classroom experience altered his perspective on competition.

“I did draw upon the classes that I have taken at the Divinity School to help me get in this mental space that I felt like would be ideal for performance, and I think it really worked.”

15-17 Decide whether the following statements are True or False according to the text.

15. Daniel Cnossen used to serve in the army.

A) True ✓ B) False

答案: A

16. After attaining his master' s degree in Harvard, Daniel decided to take sports as career.

A) True B) False ✓

答案: B

17. Continuous sports training and support from his education contributed to Daniel' s success at the Paralympics in Pyeongchang.

A) True ✓ B) False

答案: A

18. What can we know about Cnossen?

- A) He studied applied philosophy in Harvard.
- B) He became the leader of the U.S. Nordic skiing team.
- C) He got four gold medals and one bronze at the Paralympics in Pyeongchang.
- D) He got acquainted with renowned scholars from politics and

humanitarian research fields. ✓

答案: D

19. What helped Cnossen find emotional balance as a professional athlete?

A) His meditation during his study and career.

B) His study in the Harvard Divinity School. ✓

C) His interest in applied philosophy.

D) His training as a skiing athlete.

答案: B

Questions 20-21 (Suggested completion time: 7 minutes)

Directions: Read the text about plastic pollution. Answer the questions according to the text.

Besides sight and smell, there are other senses animals use to find food. Many marine animals hunt by echolocation, notably toothed whales and dolphins. Echolocation is known to be incredibly sensitive, and yet dozens of sperm whales and other toothed whales have been found dead with stomachs full of plastic bags, car parts and other human detritus. Matthew Savoca, a member of the NOAA Southwest Fisheries Science Center in Monterey, California, says it's likely their echolocation

misidentifies these objects as food.

“There’ s this misconception that these animals are dumb and just eat plastic because it is around them, but that is not true,” says Savoca. The tragedy is that all these animals are highly accomplished hunters and foragers, possessing senses honed by millennia of evolution to target what is often a very narrow range of prey items. “Plastics have really only been around for a tiny fraction of that time,” says Qamar Schuyler at The University of Queensland, Australia. In that time, they have somehow found themselves into the category marked “food.”

Because plastic has something for everyone. It doesn’ t just look like food, it smells, feels and even sounds like food. Our rubbish comes in such a range of shapes, sizes and colours that it appeals to a similarly diverse array of animals, and this is the problem. Schuyler recalls someone asking, “Why don’ t we make all the plastics blue?” , seeing as experiments suggest this colour is less popular among turtles. But other studies have shown that for other species the opposite is true.

So if there is no “one size fits all” solution, no aspect of plastic that we can easily change to prevent animals from eating it, then what can we take from our foray into the minds of plastic-eaters? Savoca hopes that

tragic stories like Attenborough's albatross (信天翁) will help to turn the consumer tide against disposable plastics and encourage people to empathise with these animals. Ultimately this will help to cut off the supply of junk food pouring into the oceans.

20. Why do some marine animals eat plastic bags?

考试时的选项顺序

- A) They like to eat what is contained in plastic bags.
- B) They follow their evolutionary instinct to chase things near them.
- C) They are starved into eating plastic bags.
- D) Their echolocation misidentifies plastic bags as food. ✓

原始的选项顺序

- A) They are starved into eating plastic bags.
 - B) They like to eat what is contained in plastic bags.
 - C) Their echolocation misidentifies plastic bags as food. ✓
 - D) They follow their evolutionary instinct to chase things near them.
-

21. According to the text, how can we prevent marine animals from eating plastic?

考试时的选项顺序

- A) By prohibiting people from pouring plastic into the sea. ✓
- B) By evoking people' s sympathy for these animals.
- C) By changing plastic into something nasty to these animals.
- D) By limiting people' s consumption of plastic bags.

原始的选项顺序

- A) By limiting people' s consumption of plastic bags.
- B) By evoking people' s sympathy for these animals.
- C) By prohibiting people from pouring plastic into the sea. ✓
- D) By changing plastic into something nasty to these animals.

Questions 22-23 (Suggested completion time: 6 minutes)

Directions: Read the text about cultural difference. Answer the questions according to the text.

Deeply ingrained cultural differences in everyday behavior between natives of northern and southern China bubble up while sipping coffee in Starbucks and other cafés.

How close people sit and whether they dodge or move chairs blocking

aisles reveals whether their cultural roots go back to rice farming in southern China or wheat farming in northern China, researchers report on April 25 in *Science Advances*.

As many as 9,000 years of neighboring families working together to cultivate rice paddies in southern China has encouraged a lasting focus on others over self, even among that region's city folk today, say psychologist Thomas Talhelm and colleagues. Social interdependence remains a cultural value of the region, the investigators note.

That dynamic plays out in coffee shops. Middle-class city dwellers in southern China who have never farmed rice often sit with others and show deference by walking around chairs blocking aisles, Talhelm's group says. In northern cities, people more often sit alone and move offending chairs out of the way. A long history of more individualistic wheat and millet farming in the north has promoted a focus on self over others, the scientists propose.

"Different agricultural legacies have given northern and southern China distinctive cultures of social behavior, even among people who have left farming behind," says Talhelm, of the University of Chicago's Booth School of Business.

A lingering sense of interdependence among residents of the southern parts of China, including Hong Kong, challenges the idea that urban expansion inevitably results in an individualistic, Westernized outlook, he adds.

22. Which of the following can be inferred from the text?

考试时的选项顺序

- A) Urbanization is criticized for its consequence of an individualistic thinking style.
- B) People in an others-oriented culture often try to change an unfavorable situation. ✓
- C) The southern culture is comparatively more advanced than the northern culture.
- D) However trivial social behavior might be, it embodies the core elements of culture.

原始的选项顺序

- A) The southern culture is comparatively more advanced than the northern culture.
- B) People in an others-oriented culture often try to change an

unfavorable situation. ✓

C) However trivial social behavior might be, it embodies the core elements of culture.

D) Urbanization is criticized for its consequence of an individualistic thinking style.

23. What shaped the different social behaviors in Chinese northern and southern natives?

考试时的选项顺序

A) Different agricultural legacies. ✓

B) Different social values.

C) Deeply-rooted consciousness of public space.

D) Continuing urban expansion.

原始的选项顺序

A) Deeply-rooted consciousness of public space.

B) Different agricultural legacies. ✓

C) Continuing urban expansion.

D) Different social values.

Questions 24-28 (Suggested completion time: 8 minutes)

Directions: Read the text about friendship. Answer the questions

according to the text.

“What are friends for?” This isn’ t a rhetorical question. Friendship is one of life’ s most important features, and one too often taken for granted.

The human desire for companionship may feel boundless, but research suggests that our social capital is 24 — we can handle only so many relationships at one time. **[A]** Social scientists have used a number of ingenious approaches to gauge the size of people’ s social networks; these have returned estimates ranging from about 250 to about 5,500 people. **[B]** Looking more specifically at friendship, a study using the exchange of Christmas cards as a proxy for closeness put the average person’ s friend group at about 121 people.

[C] However vast our networks may be, our inner circle tends to be much smaller. The average American trusts only 10 to 20 people. Moreover, that number may be 25: From 1985 to 2004, the average number of confidants that people reported having decreased from three to two.

[D] This is both sad and consequential, because people who have strong social relationships tend to live longer than those who don't.

So what should you do if your social life is lacking? Here, too, the research is 26. To begin with, don't dismiss the humble acquaintance. Even interacting with people with whom one has weak social ties has a meaningful influence on well-being. Beyond that, building deeper friendships may be largely a matter of putting in time. A recent study out of the University of Kansas found that it takes about 50 hours of socializing to go from acquaintance to casual friend, an additional 40 hours to become a "real" friend, and a total of 200 hours to become a close friend.

If that sounds like too much effort, reviving dormant social ties can be especially rewarding. Reconnected friends can quickly recapture much of the trust they previously built, while offering each other a dash of novelty drawn from whatever they've been up to in the meantime. And if all else

fails, you could start randomly confiding in people you don't know that well in hopes of letting the tail wag the relational dog. Self-disclosure makes us more likable, and as a bonus, we are more inclined to like those to whom we have bared our soul.

The academic literature is clear: Longing for closeness and connection is pervasive. Which suggests that most of us are stumbling through the world pining for companionship that could be easily provided by the lonesome stumblers all around us. So set aside this article, turn to someone nearby, and try to make a friend. You both could probably use one.

24. 24-26 Choose ONE word that best fits into each blank in the text.

- A. finite B. objective C. disappointing
D. instructive E. conservative F. shrinking

A

F

D

答案: A, F, D

27. Where does the following sentence best fit in?

An undergraduate thesis from MIT focusing exclusively on Franklin D. Roosevelt, a friendly guy with an especially social job, suggested that he might have had as many as 22,500 acquaintances.

- A) [A] B) [B] ✓ C) [C] D) [D]

答案: B

28. Which of the following is INCORRECT according to the text?

- A) Reconnecting with previous friends requires much less effort.
- B) Boundless feeling is a key factor to maintaining a high-quality friendship. ✓
- C) Our instinctive longing for companionship is proved by academic studies.
- D) Building friendships with those who have weak social connection is beneficial.

答案: B

Questions 29-30 (Suggested completion time: 7 minutes)

Directions: Read the text about language. Answer the questions according to the text.

Spontaneous oral communication is a fundamental part of our social life. But what is happening in the human brain during it? The neuroscience of language has developed steadily over past decades thanks to experimental studies. However, little is still known about how the brain supports spoken language under everyday, non-experimental, spontaneous conditions. The question whether brain regions responsible for articulation are also activated during perception of language has divided scholars in two camps. Some have observed such activation during experimental studies and concluded that it reflects a mechanism that is necessary for the perception of language. Others have not found this activation in their experiments and deduced that it must be rare or possibly does not really exist.

Nevertheless, both camps had the following concerns: brain activity in regions relevant to articulation could be affected by the design of the experiment — in the end, experimental conditions differ massively from those of spontaneous language. So, it was necessary to conduct a study using natural conversations.

Using an extraordinary design, the researchers from Freiburg have succeeded in studying neuronal activity during such conversations. This was done using brain activity recorded for diagnosis during everyday

conversations of neurological patients, which the patients then donated for research. The scientists have shown that brain regions relevant to articulation reliably display activity during perception of spontaneous spoken language. The fact that these regions were not activated when the test subjects heard non-speech noise suggests that this activity may be specific to speech.

29. What makes the two camps of researchers draw different conclusions?

- A) Different test subjects.
- B) Different questions in focus.
- C) Different conditioned stimuli.
- D) Different experimental designs. ✓

答案: D

30. What can be learned about the study by the researchers from Freiburg?

- A) Its finding supported the viewpoint held by one of the two camps.
- B) The data used were the spontaneous speech of neurological

patients. ✓

- C) It was the first time for researchers to use neurological patients as subjects.
- D) The activation in question might only have been triggered by everyday conversations.

答案: B

Directions: In Part III, you will read passages on the same subject. You will be required to identify the writer' s position and evaluate the effectiveness of the writer' s arguments. (Time allowed: 35 minutes)

Questions 31-40 (Suggested completion time: 35 minutes)

Directions: Read three passages about self-employment. Answer the questions according to the passages.

Passage A

They don' t need a corner office or a gold watch. They need their freedom, a new study of American workers says.

Millions of workers are happily leaving corporations and becoming self-employed, according to FreshBooks ' second annual

Self-Employment Report.

And, the report added, this revolution in how Americans work will only grow over the next few years.

“Climbing the corporate ladder is no longer the American dream. Over the last few years a significant mindset shift has taken place and with it has emerged a workforce which values flexibility over stability,” the report said.

FreshBooks offers accounting and invoicing software services designed for self-employed professionals, thousands of whom it surveyed — along with thousands of workers who have traditional jobs.

The report defines self-employed professionals as those whose primary income is from independent client-based work.

Those nontraditional workers — who will approach 33 percent of the workforce in coming years — want more control over how and why they work, the report said. Most won’t return to an organization, it said, adding that the self-employment movement will 32 over the next two years.

Some 27 million Americans will leave full-time jobs from now through 2020, bringing the total number of self-employed to 42 million, FreshBooks officials said.

That compares with 126 million Americans working full-time jobs in 2017, according to the Bureau of Labor Statistics.

So what is up with this move to have your own gig?

“We hear from customers and workers in general that they like the freedom to choose their own clients and choose the work they are doing,” said Carly Moulton, a co-author of the report. She added that “97 percent of them said they don’t want to return to traditional work.”

A few years ago, added Dave Cosgrave, another study co-author, most people expected to work for a corporation for a long time.

“Now so many people are looking into the future and seeing a strong possibility of self-employment.” He added that many young people today don’t ever expect to work for others.

The report confirms the findings of another study in 2016 that found “a significant rise in the incidence of alternative work arrangements in the US economy from 2005 to 2015.”

Nontraditional workers in America rose “from 10.1 percent in February 2005 to 15.8 percent in late 2015,” according to the study, “The Rise and Nature in Alternative Work Arrangements in the United States, 1995-2015” by Lawrence F. Katz and Alan B. Krueger.

Katz and Krueger, two academics, said independents are becoming more important.

“A striking implication of these estimates is that all of the net employment growth in the U.S. economy from 2005-2015 appears to have occurred in alternative worker arrangements,” they wrote.

Passage B

Chris Guillebeau is a writer, entrepreneur, and traveler. His book, *The \$100 Startup: Reinvent the Way You Make a Living, Do What You Love, and Create a New Future*, was a *New York Times* bestseller in 2012. During a lifetime of self-employment and ventures ranging from online

publishing to volunteer work in West Africa, he has visited nearly every country on earth before the age of 35. Host of the World Domination Summit, an international gathering of creative people, Chris is focused on encouraging individual quests while also “giving back.” His main website, ChrisGuillebeau.com, is visited by more than 300,000 people a month.

I interviewed Chris about his book, asking about how he believes people can start a business on a small budget, how young people can turn their passion into profit, and more.

Q: _____ 35 (1) _____? _____ 35 (2) _____?

A: I traveled across the U.S. and around the world, and kept meeting unconventional entrepreneurs — people who had started a business almost unexpectedly, usually without a lot of planning and almost always without a lot of money. Most of them did so for \$1,000 or less, and half of them did so for \$100 or less. My goal was to tell their stories in a way that readers could use in their own quest for freedom.

It’s now possible to reach people (customers, clients, subscribers, etc.) based on shared ideals and values. Microbusinesses of one sort or

another have been around since the beginning of commerce, but the ease of connecting with people is a new phenomenon. Also, a large percentage of the population is being comfortable with making purchases online. These things create a perfect storm of economic convergence. It's never been easier.

Q: 35 (3) ?

A: I'm not interested in telling anyone what they should or shouldn't do. What I'd say, however, is that more and more people are opting out of the system. More young people are going it alone and finding much more success by taking matters into their own hands. If you can do so while keeping risk low (i.e. not spending much money), why not try?

Q: 35 (4) ?

A: The key is to connect the work they love with something that other people also love. Not everything you love can be turned into a successful business. I used to play video games, and no matter how good I was at Halo, no one came along to give me a check. However, I later learned that there were "other" things I loved — international travel, creative self-employment, writing — that I could in fact monetize.

That's why it's so important to focus on the question of "usefulness" .

How will your idea serve others?

Q: 35 (5)?

A: Most people spent "some" amount of money, even if it was just the cost of a \$50 business license or a \$10 domain name. But far more important than money was the investment of sweat equity — taking the time to make something meaningful. Brett Kelly wrote *Evernote Essentials*, a guide to the free Evernote software. His initial goal was that it would make \$10,000 over the course of a year. One year later, it had made more than \$100,000. Initial startup costs were essentially zero.

Passage C

Thinking about quitting your job to become your own boss?

There are countless reasons why you shouldn't — and just as many reasons why you should. Here's one to add to your pro list: Self-employed people are happier.

Researchers at the Universities of Sheffield and Exeter made this conclusion after reviewing data from 5,000 workers in the U.K., U.S., Australia, and New Zealand. The workers spanned many sectors and managerial levels. Across the board, those who were self-employed were happier at work — even despite longer hours and the inherent uncertainty that comes from working for yourself. Self-employment provided freedom and control, which significantly boosted their happiness and work satisfaction.

The researchers published their results in the journal *Work, Employment and Society*. Here's why they say self-employed workers are happier.

Control of your environment

Want to make someone hate coming to work? Force them to sit someplace where it's impossible for them to get anything done that hinders their productivity. I'm looking at you, open floor plans. The modern office is rarely designed to meet the needs of introverts and extroverts alike.

It's no surprise that remote workers outperform office workers. They don't have to deal with the din of their co-workers' chitchat. Similarly,

self-employed workers have more autonomy over their work environment. They can work from their quiet home office, a humming coffee shop or from a co-working space. Maybe every day is a little different. Regardless, they get to decide. And being able to create the right workspace for your own productivity is key to happiness.

Being engaged in your work

A very small percentage of employees are engaged in their work. By some estimates, the number of disengaged workers in the U.S. is as high as 68 percent.

In the study, workers in organizations with non-managerial roles had the lowest levels of job satisfaction and engagement. Workers at higher levels were more engaged. The self-employed workers were the most engaged of all.

“Measuring how engaged people are in their work is therefore a really useful way to gauge their well-being,” explained study co-author Ilke Inceoglu in a press release. She’s a professor of organizational behavior and HR management at University of Exeter Business School.

Being engaged also led to longer hours. But the researchers said the workers didn't seem to mind. "They can find meeting high standards really fulfilling," study co-author and psychologist Peter Warr said.

Freedom to innovate

Last, self-employed workers have more opportunities to innovate, leading to greater workplace happiness.

When employed by someone else, you might feel restricted by the limits of your job. Your work may be repetitive or redundant. You might interact with the same small circle of people every day, limiting your exposure to new ideas or ways of thinking.

This is less frequently the case for people who act as their own boss. According to Warr, "They have the freedom to innovate, express their own views, have influence beyond their own role, and compete with other companies and people."

31. What is Freshbooks most likely to be in Passage A?

考试时的选项顺序

A) A company that provides service to self-employers. ✓

- B) A news center that reports on self-employment in the U.S.
- C) A group that promotes the self-employment movement.
- D) An organization engaged in self-employment study.

原始的选项顺序

A) A company that provides service to self-employers. ✓

- B) An organization engaged in self-employment study.
- C) A news center that reports on self-employment in the U.S.
- D) A group that promotes the self-employment movement.

32. Which of the following words best fits in the blank in Paragraph 7 of Passage A?

考试时的选项顺序

A) explode

B) fluctuate C) decline D) cease

✓

原始的选项顺序

A) cease B) decline C) explode D) fluctuate

✓

33. What can be learned from Kate and Krueger' s report in Passage A?

考试时的选项顺序

- A) The meaning of the American dream has been changed.
- B) Most Americans have quitted traditional work.
- C) The rise in self-employment has led to the employment growth in the U.S. ✓
- D) Many young people prefer employing themselves to being employed.

原始的选项顺序

- A) Most Americans have quitted traditional work.
- B) The meaning of the American dream has been changed.
- C) Many young people prefer employing themselves to being employed.
- D) The rise in self-employment has led to the employment growth in the U.S. ✓

34. Which statement is TRUE about Chris Guillebeau in Passage B?

考试时的选项顺序

- A) He attended the World Domination Summit as a special guest.
- B) He has travelled around the world before his 35th birthday. ✓

C) He used to work for others before starting his own career.

D) He is the author of a best-selling fiction and an online publisher.

原始的选项顺序

A) He is the author of a best-selling fiction and an online publisher.

B) He attended the World Domination Summit as a special guest.

C) He has travelled around the world before his 35th birthday.

✓

D) He used to work for others before starting his own career.

35. Match the following questions to the answers in Passage B. **EBDCA**

(Please answer with capitalized letters without punctuation marks in the order of the paragraphs, for example: ABCDE)

A. Can you share a story from your book of someone who created a successful business with \$0 invested?

B. Why is it possible now to start a company for almost no money?

C. Young people choose meaningful work over higher salaries. How can they find work they love and turn it into money?

D. Should college students start businesses over getting internships and

jobs? Why or why not?

E. Why did you call your new book "The \$100 startup" ?

答案: EBDCA

36. What is Chris Guillebeau' s attitude towards the college students starting businesses in Passage B?

考试时的选项顺序

A) **applausive**

B) opposing C) doubtful D) ambiguous

✓

原始的选项顺序

D) **applausive**

A) ambiguous B) doubtful C) opposing

✓

37. What did the researchers at the Universities of Sheffield and Exeter find in Passage C?

考试时的选项顺序

A) **Self-employers are more satisfied with their work.** ✓

B) Self-employers are less creative and competitive.

C) Self-employers enjoy more financial freedom.

D) Self-employers hate to work longer than others.

原始的选项顺序

- A) Self-employers hate to work longer than others.
 - B) Self-employers are less creative and competitive.
 - C) Self-employers are more satisfied with their work. ✓
 - D) Self-employers enjoy more financial freedom.
-

38. What is wrong with the modern office according to Passage C?

考试时的选项顺序

- A) The openness decreases the working efficiency. ✓
- B) The limited space depresses most workers.
- C) The office design hardly allows personal communication.
- D) The unchangeable setting makes work tedious.

原始的选项顺序

- A) The office design hardly allows personal communication.
 - B) The openness decreases the working efficiency. ✓
 - C) The unchangeable setting makes work tedious.
 - D) The limited space depresses most workers.
-

39. Choose a word that appears in all three passages to complete the following sentence. **freedom**

The quest for _____ is the impulse for self-employment and

self-employment provides _____ and makes self-employed people happier.

答案: freedom

40. Match the thesis statements with the three passages. Please note there is ONE extra option. **DAB**

(Please answer with capitalized letters without punctuation marks in the order of the passages, for example: ABC)

- A. How to start a business with only \$100 in the bank.
- B. Self-employed people are much happier.
- C. Self-employment would be the major trend of work.
- D. Self-employment is a rising trend in the U.S. workforce.

答案: DAB

Directions: In Part IV, you will read two passages and then write a short essay according to them. You should write with clarity and logic. (Time allowed: 40 minutes)

41.

Question 41 (Suggested completion time: 40 minutes)

Directions: Write a short essay according to the two passages.

Passage A

... The nature of the case and the history of philosophy combine to recommend to us this division of intellectual labour between Academies and Universities. To discover and to teach are distinct functions; they are also distinct gifts, and are not commonly found united in the same person. He, too, who spends his day in dispensing his existing knowledge to all comers is unlikely to have either leisure or energy to acquire new. The common sense of mankind has associated the search after truth with seclusion and quiet. The greatest thinkers have been too intent on their subject to admit of interruption; they have been men of absent minds and idiosyncratic habits, and have, more or less, shunned the lecture room and the public school. Pythagoras, the light of Magna Graecia, lived for a time in a cave. Thales, the light of Ionia, lived unmarried and in private, and refused the invitations of princes. Plato withdrew from Athens to the groves of Academus. Aristotle gave twenty years to a studious discipleship under him. Friar Bacon lived in his tower upon the Isis. Newton indulged in an intense severity of meditation which almost shook his reason. The great discoveries in chemistry and electricity were not made in Universities. Observatories are more frequently out of Universities than in them, and even when within their bounds need have no moral connexion with them. Porson had no classes; Elmsley lived good part of his life in the country. I do not say that there are not great examples the other way, perhaps Socrates, certainly Lord Bacon; still I think it must be allowed on the whole that, while teaching involves external engagements, the natural home for experiment and speculation is retirement.

Source: *The Idea of a University*, John Henry Newman

Passage B

Research is the process of creating new knowledge. Making progress in creating knowledge requires a significant amount of background knowledge, before one can reach the “frontier” of a topic, where the interesting questions are. Herb Simon (Herbert A. Simon, American political scientist and economist) once attested that it

takes about ten years of experience to get to the point of great accomplishment in any one area, simply because it takes a significant amount of time to accumulate knowledge in an area. This necessarily implies that we can't become great researchers in a subject area merely by taking a class (or even a few classes); we must embed ourselves in that topic area. I find that teaching a subject is perhaps one of the most efficient ways to become embedded in a subject matter, since the process of explaining concepts to students leaves no room for "cutting corners" in my own understanding.

41. Write a short essay of about 300 words based on your understanding of the two passages. Remember to write in your OWN words. Your essay should respond to the following questions:

- 1) What is Newman's general attitude towards the relationship between academic research and higher education?
- 2) What are the purposes of mentioning such famous people as Pythagoras, Thales, Aristotle, Newton, Socrates and Lord Bacon?
- 3) Does the author of Passage B agree with Newman on the relationship between research and education? Please explain.
- 4) What is your opinion on the topic?

答案:

2018 复赛 (3)

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: Read the following excerpts and match the book name with each excerpt. Please note there are two extra options.

A. The Social Contract

B. The Republic

C. To the Lighthouse

D. The Call of the Wild

E. The Moon and Sixpence

1. B

If we were seeking for a piece of gold, you would not imagine that we were “knocking under to one another,” and so losing our chance of finding it. And why, when we are seeking for justice, a thing more precious than many pieces of gold, do you say that we are weakly yielding to one another and not doing our utmost to get at the truth?

答案: B

2. C

What is the meaning of life? That was all — a simple question; one that tended to close in on one with years. The great revelation had never come. The great revelation perhaps never did come. Instead there were little daily miracles, illuminations, matches struck unexpectedly in the dark.

答案: C

3. E

Each one of us is alone in the world. He is shut in a tower of brass, and can communicate with his fellows only by signs, and the signs have no common value, so that their sense is vague and uncertain.

答案: E

Question 4 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Accuracy in timekeeping is measured by how precisely the length of each “tick” matches the length of every other “tick”. The atomic clock’s

form of timekeeping is so accurate that our current definition of what a “second” is comes from the best atomic clocks currently around — cesium atomic clocks. Scientists measure clock accuracy by their level of systematic uncertainty, which is a type of error rate.

The Germans’ single-ion clock kicks the atomic clock’s timekeeping butt on that score. Its systematic uncertainty is 3×10^{-18} . That’s 100 times better than a cesium atomic clock, an accuracy that scientists have been trying to attain since physicist Hans Dehmelt said it was possible back in 1981.

4. What can we know from the text?

考试时的选项顺序

- A) The cesium atomic clock has an error rate of 3×10^{-18} .
- B) The single-ion clock is currently the most accurate in timekeeping. ✓
- C) Best atomic clocks boost perfect systematic certainty.
- D) The length of each clock tick defines what a “second” is.

原始的选项顺序

- A) The cesium atomic clock has an error rate of 3×10^{-18} .

- B) Best atomic clocks boost perfect systematic certainty.
- C) The length of each clock tick defines what a “second” is.
- D) The single-ion clock is currently the most accurate in timekeeping. ✓

Question 5 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Everyone has unwelcome thoughts from time to time. But such intrusions can signal serious psychiatric conditions — from “flashbacks” in post-traumatic stress disorder to obsessive negative thinking in

depression to hallucinations in schizophrenia. “These are some of the most debilitating symptoms,” says neuroscientist Michael Anderson at the University of Cambridge.

New research led by Anderson and neuroscientist Taylor Schmitz, now at McGill University, suggests these symptoms may all stem from a faulty brain mechanism responsible for blocking thoughts. Researchers studying this faculty usually focus on the prefrontal cortex, a control center that directs the activity of other brain regions. But Anderson and his colleagues noticed that conditions featuring intrusive thoughts — such as schizophrenia — often involve increased activity in the hippocampus, an important memory region. The severity of symptoms such as hallucinations also increases with this elevated activity.

5. What can we learn from Anderson’ s research?

考试时的选项顺序

- A) Some mental disorders have debilitating symptoms.
- B) Prefrontal cortex is mainly responsible for psychiatric diseases.
- C) Intrusive thoughts are dangerous but can be controlled.

D) Unwanted thoughts involve elevated activity in the
hippocampus. ✓

原始的选项顺序

- A) Intrusive thoughts are dangerous but can be controlled.

hippocampus. ✓

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Being an expert in one thing doesn't mean having to become an expert in everything, and loving science doesn't have to mean lots of time spent alone. As kids, kitchen experiments and basement engineering projects can mean time with friends instead of time away from them. As adults, a career in STEM (Science, Technology, Engineering, and Mathematics) can mean getting to work with all kinds of different experts to see what you can do as a team.

While a single bad grade or a confusing experience with chemistry can

easily convince a kid that they aren't cut out for science, imagining STEM careers as lonely futures can convince kids that they wouldn't have wanted to do it anyway. But entering the world of STEM is far from isolating; it means becoming part of a broad network of people with shared interests and experiences.

6. What does the writer say about a career in STEM?

考试时的选项顺序

- A) It is far from being boring and isolating. ✓
- B) It doesn't need people to become an expert.
- C) It doesn't require good grades and talent.
- D) It means spending a lot of time alone.

原始的选项顺序

- A) It means spending a lot of time alone.
- B) It is far from being boring and isolating. ✓
- C) It doesn't require good grades and talent.
- D) It doesn't need people to become an expert.

Question 7 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Researchers believe Mars once had a liquid core, as evidenced by the magnetism this generated and which is still retained in many of the planet's rocks. Whether any of that ancient fluid persists is something InSight (a mission to Mars launched by the American space agency NASA) will test by using radio equipment to observe how Mars shifts on its axis of rotation.

"If you take a raw egg and a cooked egg and you spin them, they wobble differently because of the distribution of liquid in the interior," explained InSight's deputy project scientist, Dr. Suzanne Smrekar.

"So by tracking our spacecraft very precisely, we're able to see how Mars wobbles and that really tells us a lot of information about the core of Mars."

7. How will researchers test whether there is a liquid core on Mars?

考试时的选项顺序

- A) By observing how Mars rotates. ✓
- B) By modeling its rotating orbit.
- C) By spinning different eggs on the planet.

D) By detecting its magnetism.

原始的选项顺序

A) By spinning different eggs on the planet.

B) By modeling its rotating orbit.

C) By detecting its magnetism.

D) By observing how Mars rotates. ✓

Question 8 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

It' s easy to feel enticed by an airline or a hotel loyalty program. After all, who wouldn' t want a free flight, a room upgrade or other lucrative benefits? The catch — as any program loyalist can attest to — is that maximizing travel rewards can be challenging. While it' s often easy to join a program, attaining meaningful perks and rewards may come with a string of caveats. ***So how can you tell if a program is worth your time and effort?***

To create the sixth annual rankings, *U.S. News* editors evaluated each loyalty program based on key attributes that everyday travelers value, such as the size and diversity of each airline or hotel network and how quickly you can accumulate enough miles or points to earn a free flight

or hotel stay. Our rankings also take into account the number of ways you can use rewards and the added benefits you receive as a member.

8. Why does the author pose the question at the end of the first paragraph?

考试时的选项顺序

- A) To challenge the reader into thinking about the possible answer.
- B) To serve as a reader guidance device and to signal the following subject. ✓**
- C) To arouse the reader' s interest and to summarize the main purpose.
- D) To include the reader in the discussion with the writer.

原始的选项顺序

- B) To challenge the reader into thinking about the possible answer.
- C) To arouse the reader' s interest and to summarize the main purpose.
- D) To serve as a reader guidance device and to signal the**

following subject. ✓

Question 9 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

“Does being waitlisted count as half an acceptance?”

“Literally got waitlisted everywhere.”

“Being waitlisted from your top choice is the worst feeling.”

Those are just some of the thoughts that high school seniors have tweeted. They’ ve opened their mail — or, more likely, an online portal — to finally hear decisions from colleges. But many didn’ t get one. The number of students placed on college waiting lists has climbed in recent years, leaving students hoping for the best — even when they might not have any reason to hope at all.

9. What does the writer imply about being waitlisted by colleges?

考试时的选项顺序

A) It is hard for colleges to make the decision.

- B) It offers the best hope of admission.
- C) It is equivalent to a conditioned acceptance.
- D) It does not necessarily lead to admission. ✓

原始的选项顺序

- A) It offers the best hope of admission.
- B) It does not necessarily lead to admission. ✓
- C) It is hard for colleges to make the decision.
- D) It is equivalent to a conditioned acceptance.

Question 10 (Suggested completion time: 5 minutes)

Directions: The figure shows power generation from renewable energies in UK from 2015 to 2018, categorized by quarters and types of energy. Answer the question according to the information in the figure.

Source : UK government report *Energy Trends*.

Note: TWh: terawatt hour; 1 TWh = 10^9 kilowatt hour

10. Which of the following is an INCORRECT description about the figure?

考试时的选项顺序

A) Generally, electricity power generated by tidal energy

remained the lowest from 2015 to 2018.

B) In 2017, the amount of power generated by bioenergy

keeps decreasing, but starts to increase from the beginning of 2018.

C) In 2016, onshore wind takes the place of bioenergy, becoming the main power source generated by renewable energies. ✓

D) Among all types of renewable energies, bioenergy occupies

the largest portion in 2015, while the two smallest in portion are tidal energy and hydro energy.

原始的选项顺序

A) Among all types of renewable energies, bioenergy occupies

the largest portion in 2015, while the two smallest in portion are

tidal energy and hydro energy.

B) In 2016, onshore wind takes the place of bioenergy, becoming the main power source generated by renewable energies. ✓

C) In 2017, the amount of power generated by bioenergy keeps decreasing, but starts to increase from the beginning of 2018.

D) Generally, electricity power generated by tidal energy remained the lowest from 2015 to 2018.

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 55 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: Read the following definition of a logical fallacy. Answer the question according to the definition.

Post-Designation

It refers to drawing a conclusion from correlations observed in a given sample, but only after the sample has already been drawn, and without declaring in advance what correlations the experimenter was expecting to find.

11. Which of the following provides a typical example of *Post-Designation*?

考试时的选项顺序

A) In looking at the records of my students, I have found that 9 out of 10 are an only child of their family. Therefore, society is moving towards one-child families. ✓

B) A parent says that the teacher doesn't know how to teach because she graduated from a community college.

C) Everybody has a brain. Therefore, there is a single brain we all share.

D) You claim to know David but you must be lying. You admitted you didn't know the hooded man over there in the corner, but the hooded man is David.

原始的选项顺序

A) Everybody has a brain. Therefore, there is a single brain we all share.

B) You claim to know David but you must be lying. You admitted you didn't know the hooded man over there in the corner, but the hooded man is David.

C) A parent says that the teacher doesn't know how to teach because she graduated from a community college.

D) In looking at the records of my students, I have found that 9 out of 10 are an only child of their family. Therefore, society is moving towards one-child families. ✓

Question 12 (Suggested completion time: 4 minutes)

Directions: Read the following definition of a logical fallacy. Answer the question according to the example.

Lying with Statistics

Also known as Statistical Fallacy, it refers to an entire class of fallacies that result in presenting statistical data in a very biased way, and interpreting statistics without questioning the methods behind collecting and presenting the data.

12. Which of the following provides a typical example of *Lying with Statistics*?

考试时的选项顺序

A) Of course we should buy IBM' s computers whenever we need new computers. Up till now we' ve bought tens of thousands IBMs.

B) Did you see that bar graph in *USA Today*? It showed a HUGE

spike in the moral decline of our country! ✓

C) Since they have asked dozens of questions concerning the topics discussed in class, the students are ready for a test.

D) What she says about Johannes Kepler' s astronomy of the 1600s must be just so much garbage. Do you realize she' s only fifteen years old?

原始的选项顺序

A) What she says about Johannes Kepler' s astronomy of the 1600s must be just so much garbage. Do you realize she' s only fifteen years old?

Questions 13-14 Reasoning (Suggested completion time: 10 minutes)

13.

Wine is made by crushing grapes and eventually separating the juice from the grape skins. However, the separated juice contains impurities and many wineries do not filter the juice. These wineries claim the unfiltered juice ultimately produces a more flavorful and intense wine. Since these wine makers are experts, we should trust their judgment and not shy away from unfiltered wine.

Which of the following, if true, most strongly supports the conclusion above?

考试时的选项顺序

- A) Some drinkers believe that cloudy wine is suspect — badly kept or the dog-end of the barrel that is going to make you sick.
- B) The development of wine-making craft helps keep the grape' s original flavor and nutrition.
- C) Not only is unfiltered wine natural and environmentally friendly, it is also vegan-friendly and some claim that it has health benefits, too. ✓
- D) Wine consumers drink with their eyes and, for many wine enthusiasts, opaque wine just doesn' t look right.

原始的选项顺序

- A) The development of wine-making craft helps keep the grape' s original flavor and nutrition.

- B) Wine consumers drink with their eyes and, for many wine enthusiasts, opaque wine just doesn't look right.
- C) Some drinkers believe that cloudy wine is suspect — badly kept or the dog-end of the barrel that is going to make you sick.
- D) Not only is unfiltered wine natural and environmentally friendly, it is also vegan-friendly and some claim that it has health benefits, too. ✓
-

14.

The rapid diminishment of the ecosystem of the Amazon threatens the entire planet. Consequently, we must take immediate steps to convince the Brazilian government that planned development projects need to be curtailed for the simple reason that these development projects will greatly accelerate the loss of currently protected land.

Which of the following, if true, most seriously weakens the argument above?

考试时的选项顺序

- A) Wetlands help prevent soil erosion and can both remove greenhouse gases from the Earth's atmosphere and store them.
- B) Brazil's meat industry, as is the case with much of the world's beef sector, is highly inefficient: The average head of cattle needs one hectare.

C) So far there is much evidence of the lately built dam that contributes to the bio-balance. ✓

D) Planned development projects may endanger the biological diversity of the ecosystem and increase the risk of flooding.

原始的选项顺序

A) So far there is much evidence of the lately built dam that contributes to the bio-balance. ✓

B) Wetlands help prevent soil erosion and can both remove greenhouse gases from the Earth's atmosphere and store them.

C) Planned development projects may endanger the biological diversity of the ecosystem and increase the risk of flooding.

D) Brazil's meat industry, as is the case with much of the world's beef sector, is highly inefficient: The average head of cattle needs one hectare.

Questions 15-17 (Suggested completion time: 7 minutes)

Directions: Read the text about math education. Answer the questions according to the text.

In recent years, the common wisdom has been that girls are dominating when it comes to academic achievement. In reading in particular, girls have consistently outperformed boys. Some studies have also found that

in a typical U.S. school district, girls have all but caught up in math — a subject in which they had historically underperformed and from which they' d been discouraged thanks to persistent stereotypes about their academic interests. Take away the burden of challenging stereotypes and discriminatory beliefs and practices, the thinking goes, and girls will do just as well as boys in the STEM fields.

But now, a new study by a team of researchers led by the Stanford education professor Sean Reardon finds that girls' dominance in school isn' t the case across demographics. Yes, the study confirms: Overall, in the average U.S. school district, girls and boys are performing about the same in math. But the study finds that in communities in which most families are affluent and white, and in which adult men far outearn women in income, girls continue to lag behind their male peers in math achievement. In some of these districts, boys on average outperformed girls in math by two-fifths of a grade level.

Described as the most comprehensive analysis of its kind to date, and drawing from roughly 260 million standardized-test scores from close to 10,000 U.S. school districts, the study looked at data from seven school years, starting in the fall of 2008. Overall the analysis found that, while girls maintain their edge in reading regardless of their geographic

location, they either tend to significantly outperform or significantly lag behind boys in math.

“We set out saying that some districts are going to have more stereotypical gender achievement gaps — larger math gaps favoring boys, larger reading gaps favoring girls — and others that are maybe less stereotypical,” said Erin Fahle, who co-authored the study and earns her Ph.D. in education policy from Stanford in June, 2018. “Instead what we found was that districts tend to advantage boys or advantage girls.”

At the other end of the affluence spectrum, a near-opposite phenomenon is playing out: In poor communities of color, namely those where families are predominantly black or Latino, girls on average outperformed boys in math by one-fifth of a grade level, in addition to significantly outperforming them in reading. The new study lends credence to claims that boys in low-income black or Hispanic districts deserve some of the closest attention as policymakers, educators, and parents strive to eliminate gender disparities. “We focus so much on female children’s opportunities in STEM, which is really important and has a large potential economic consequence,” Fahle said. “But we also have to realize that boys’ opportunities are constrained by gender, too.”

15. Which of the following is NOT a stereotype of girls?

考试时的选项顺序

- A) Girls have greater academic achievements than boys.
- B) Girls lag behind boys in math achievement.
- C) Girls have not as much interest in math as boys. ✓
- D) Girls are more proficient in reading than boys.

原始的选项顺序

- A) Girls are more proficient in reading than boys.
- B) Girls have greater academic achievements than boys.
- C) Girls lag behind boys in math achievement.
- D) Girls have not as much interest in math as boys. ✓

16. What can we learn about the new study by Stanford?

考试时的选项顺序

- A) Boys in rich white families tend to underperform girls in math.
- B) Girls' advantage over boys in math varies from place to place.
- C) Girls still take a lead over boys in reading across the country.

✓

D) It' s the longest continual study of this kind ever conducted.

原始的选项顺序

A) Girls' advantage over boys in math varies from place to place.

B) It' s the longest continual study of this kind ever conducted.

C) Boys in rich white families tend to underperform girls in math.

D) Girls still take a lead over boys in reading across the country.

✓

17. What can be inferred from the findings of the new study by Stanford?

考试时的选项顺序

A) Gender disparities have received too much unnecessary attention.

B) It' s really important to get rid of all forms of race and gender disparities.

C) The potential economic result of girls' opportunities deserves consideration.

D) Boys and girls should be given equal attention in academic opportunities. ✓

原始的选项顺序

A) Boys and girls should be given equal attention in academic opportunities. ✓

B) The potential economic result of girls' opportunities deserves consideration.

C) It's really important to get rid of all forms of race and gender disparities.

D) Gender disparities have received too much unnecessary attention.

Questions 18-20 (Suggested completion time: 7 minutes)

Directions: Read the text about the English accent. Answer the questions according to the text.

People often talk about the English language as if it is a thing to keep pretty — a petticoat that might be sullied by the spread of glottal stops, text-speak or slang. The latest to weigh in is the writer and critic Jonathan Meades, in a column mourning the decline of Received Pronunciation (RP). Meades argues that the accent — also known as the Queen's English or BBC English — should be regarded as “a sort of glue, a force for uniting the country” and “celebrated as a tool of social mobility” .

The term RP has murky origins, but it is regarded as the accent of those

with power, influence, money and a fine education — and was adopted as a standard by the BBC in 1922. Today, it is used by 2% of the population.

The idea that an accent should facilitate or hinder a person's success is, of course, distasteful, but entirely true: the powerful elite will recoil from those who sound different from them; those who sound different feel out of place and unwelcome.

My own accent is slightly confusing. People are frequently surprised to learn that I come from Lancashire and went to my local comprehensive — save for the flat vowels of, say, “bath” and “laugh”, I don't have much northernness. Often, people assume that I deliberately modified my accent when I went to Oxford, joined *The Guardian* or started presenting for the BBC, but these people were never party to my school years, where I was teased mercilessly for sounding “posh” and like a “snob”.

The truth is a little plainer: my mum was the esteemed winner of the elocution prize at her school in Wigan in the 1960s and when my brother and I were growing up she continually corrected our speech, spurred, I imagine, by the fear that unless we spoke “properly” we wouldn't go

anywhere.

The world has changed since then, and it's a world I like better. The voices we hear on the radio and TV and in positions of power are slowly shifting and this gladdens me. I would be lying if I said that the RP tinges of my accent have not helped me move through the world, but also I know that my shades of Lancastrian have helped, too — at times, each has given me something to push against; at others, it is my support.

Perhaps these days we are seeing not so much a decline in RP as a growing accent fluidity. True social mobility should allow us to move in all directions; to know and welcome all people, to speak and listen to everyone. Surely that, Mr. Meades, should be our glue; our force for uniting the country?

18. Why was the author laughed at in her school years?

考试时的选项顺序

A) The author couldn't pronounce the word "posh" accurately.

B) The author had a pronounced Lancashire accent.

C) The author spoke with a Received Pronunciation accent. ✓

D) The author modified her accent on purpose.

原始的选项顺序

A) The author modified her accent on purpose.

B) The author had a pronounced Lancashire accent.

C) The author spoke with a Received Pronunciation accent. ✓

D) The author couldn't pronounce the word "posh" accurately.

19. What is the author's attitude towards the fate that RP may be dying out?

考试时的选项顺序

A) Sentimental. B) Long-expected. ✓

C) Indifferent. D) Nostalgic.

原始的选项顺序

A) Indifferent. B) Nostalgic.

C) Sentimental. D) Long-expected. ✓

20. Which of the following is NOT true according to the text?

考试时的选项顺序

A) The author agrees with Mr. Meades' remark on the

function of Received Pronunciation. ✓

B) Received Pronunciation is now only used by a tiny fraction of the population.

C) The author's mother has played an important role in helping her speak with an RP accent.

D) The author's RP accent has assumed both positive and negative functions in her life.

原始选项顺序

D) Received Pronunciation is now only used by a tiny fraction of the population.

Questions 21-23 (Suggested completion time: 7 minutes)

Directions: Read the text about smartphone sensors. Answer the questions according to the text.

Consider everything your smartphone has done for you today. Counted your steps? Deposited a check? Transcribed notes? Navigated you somewhere new?

Smartphones make for such versatile pocket assistants because they' re equipped with a suite of sensors, including some we may never think — or even know — about, sensing, for example, light, humidity, pressure and temperature.

Because smartphones have become essential companions, those sensors probably stayed close by throughout your day: the car cup holder, your desk, the dinner table and nightstand. If you're like the vast majority of smartphone users, the phone's screen may have been black, but the device was probably on the whole time.

"Sensors are finding their ways into every corner of our lives," says Maryam Mehrnezhad, a computer scientist at Newcastle University in England. That's a good thing when phones are using their observational dexterity to do our bidding. But the plethora of highly personal information that smartphones are privy to also makes them powerful potential spies.

Online app store Google Play has already discovered apps abusing sensor access. Google recently **booted** 20 apps from Android phones and its app store because the apps could — without the user's knowledge — record with the microphone, monitor a phone's location, take photos, and then extract the data. Stolen photos and sound bites (a brief recorded statement broadcast especially on a television news program) pose obvious privacy invasions. But even seemingly innocuous sensor data can potentially broadcast sensitive information. A smartphone's movement may reveal what users are typing or disclose

their whereabouts. Even barometer readings that subtly shift with increased altitude could give away which floor of a building you're standing on, suggests Ahmed Al-Haiqi, a security researcher at the National Energy University in Kajang, Malaysia.

These sneaky intrusions may not be happening in real life yet, but concerned researchers in academia and industry are working to head off eventual invasions. Some scientists have designed invasive apps and tested them on volunteers to shine a light on what smartphones can reveal about their owners. Other researchers are building new smartphone security systems to help protect users from myriad real and hypothetical privacy invasions, from stolen PIN codes to stalking.

21. Which statement is NOT true according to the text?

考试时的选项顺序

- A) It is sensors that make smartphones our versatile assistants.
- B) Sensors are serving every aspect of our daily life.
- C) Sensors stop working only when smartphones are not in use. ✓
- D) There are many unknown sensors in our smartphones.

原始的选项顺序

A) It is sensors that make smartphones our versatile assistants.

B) Sensors stop working only when smartphones are not in use. ✓

C) There are many unknown sensors in our smartphones.

D) Sensors are serving every aspect of our daily life.

22. The word **booted** in Paragraph 5 is closest in meaning to _____.

考试时的选项顺序

A) ingested B) installed C) removed D) recalled
✓

原始的选项顺序

A) installed B) recalled C) removed D) ingested
✓

23. Why did some scientists design and test invasive apps?

考试时的选项顺序

A) They aimed to develop new security systems for smartphones.

B) They strove to learn how to distinguish invasive apps from others.

C) They wanted to stop privacy from being leaked through smartphones. ✓

D) They attempted to protect the whereabouts of smartphone users.

原始的选项顺序

A) They wanted to stop privacy from being leaked through smartphones. ✓

B) They attempted to protect the whereabouts of smartphone users.

C) They strove to learn how to distinguish invasive apps from others.

D) They aimed to develop new security systems for smartphones.

Questions 24-27 (Suggested completion time: 9 minutes)

Directions: Read the text and answer the questions according to the text.

Your skin is your largest organ and a crucial part of several bodily functions. Not only is it the flexible, self-healing barrier that supports the immune system, but it's also part of the integumentary system, the network of dead epidermal cells – hair, fingernails and toenails – that helps slough off cellular waste material. Sweat glands in the skin also

play active roles in the excretory system, or the organs and glands that flush out toxins and excess minerals from the body.

Dead skin cells are a form of bodily waste that facilitates the growth of new epidermal cells. Every minute, you lose 30,000 to 40,000 dead skin cells, all of which are replaced immediately by fresh skin tissue. The body does an excellent job of sloughing off skin cells through normal activity, but regular bathing is definitely a plus.

You don' t need to exfoliate, or remove dead skin cells with special cleansers or washcloths, to get rid of dead skin waste, but beauty experts believe you should for a healthier complexion. However, dermatologists (皮肤病专家) warn against overexfoliation, which can leave skin raw, red and vulnerable to bacteria.

Sweating is another way that skin helps remove waste from the body, but it' s not as effective as sauna lovers might think. The chief role of sweat is thermoregulation, cooling us off when exercise or high temperatures cause our internal mercury to rise. The negligible detoxifying benefits of sweat are simply a side effect of this cooling process.

Most of us come with two types of sweat glands: eccrine glands and

apocrine glands. Eccrine glands cover the majority of your body and are responsible for the cooling effect of sweating. Eccrine sweat is almost entirely water with a little salt and potassium, but it also contains trace amounts of ammonia, uric acid and urea – all waste byproducts of the body's metabolism of nitrogen.

Since sweat is associated with body odor, you might think that that foul stench has something to do with the toxins and bodily waste flushed out by sweating. But that's not the case. The liver and kidneys – with help from the rest of the urinary system and digestive system – do 99 percent of the heavy lifting when it comes to ridding the body of waste, toxic or otherwise. Only tiny amounts of toxins and waste products, like the ammonia and urea mentioned above, are found in sweat.

Sweat itself has no odor. The smelly effect is the fault of apocrine glands located in the groin, armpits and other hairy body parts. These glands produce sweat that's rich with fatty proteins. Apocrine sweat is still odorless, but bacteria colonies in these warm, moist areas metabolize the proteins, creating that famously foul smell.

24-26 Decide whether the following statements are True or False according to the text.

24. Dermatologists disagree with beauty experts concerning how to remove dead skin cells with special cleansers or washcloths.

- A) True. B) False. ✓

答案: B

25. Sauna lovers make use of sweating to remove body wastes.

- A) True. B) False. ✓

答案: B

26. The smelly odor of sweat is not caused by toxins and waste products in sweat but by fatty proteins.

- A) True. ✓ B) False.

答案: A

27. What is the best title for the text?

- A) Do You Really Know Your Skin? ✓
- B) How Does Your Skin Eliminate Waste?
- C) Things Dermatologists Didn't Tell You
- D) The Secrets and Misconceptions of Sweating

答案: A

Questions 28-30 (Suggested completion time: 7 minutes)

Directions: Read the following news and answer the questions according to the news.

The number of calls to fire crews to help lift obese people from their homes has more than doubled in five years, figures revealed on July 15, 2018. In 2017 firefighters were called out 909 times to help move morbidly obese patients, compared to 426 times in 2012.

Between 2012 and 2017, the latest figures available show there were 3,873 callouts made to help the immobile and overweight in Britain. One patient who had to be moved weighed 60 stones (about 381 kilograms), according to West Midlands fire chiefs. Campaigners say the figures are draining already overstretched fire services and are further proof that the Government urgently needs to get a grip on the spiraling obesity crisis.

Dispatching a fire engine is thought to cost in the region of £400, meaning such callouts may have cost more than £1.4 million since 2012.

Tam Fry, chairman of the National Obesity Forum, a charity which raises awareness in Britain, said: "The rise comes as no surprise. It's not only a drain but the fire service is there to put out fires and each time they are

called to an emergency rescue of an obese person they are away from doing their proper job. It will be truly awful if some overweight person is responsible for diverting a fire crew from their day job. The rescues have been building up steadily for the last 15 years and will continue to do so until we have a proper obesity strategy delivered by the Government. The fall, if any, _____28_____ for another 10 years because of the huge number of people who are being increasingly affected by morbid obesity.”

The figures, which were released following Freedom of Information requests, might be even higher because only 42 of the 52 fire services in Britain responded.

One obesity victim, John Morris, was twice ***hoisted*** from his home by firefighters for medical treatment following a fall. The 25st. cafe boss was lifted 50ft out of his home in Aberystwyth, west Wales. Paramedics said John, then 69, was too big to be carried down the stairs. They were forced to call in a fire brigade high ladder to get him out and to a hospital. John’ s route to the waiting ambulance swung him out over a pub where regulars gathered outside to watch.

28. Which of the following most logically fills in the blank?

考试时的选项顺序

- A) assumes massive proportions
- B) will solve the problem
- C) brings a favorable turn
- D) will probably not take place ✓

原始的选项顺序

- D) UK' s pressure in fighting against obesity mounting

Directions: In Part III, you will read passages on the same subject. You will be required to identify the writer's position and evaluate the effectiveness of the writer's arguments. (Time allowed: 35 minutes)

Questions 31-40 (Suggested completion time: 35 minutes)

Directions: Read three passages about gender equality. Answer the questions according to the passages.

Passage A

Equal does not mean identical

One might object that there are meaningful differences between males and females, and these in turn are the source of gender inequality. Some believe that "equality" is

the wrong word to use, because males and females can't be equal if they are different.

But when feminists refer to gender equality, we are not arguing that males and females are identical or indistinguishable on all behaviours, preferences and abilities. Nor does it mean all gender differences must be eliminated, or that we must have equal gender representation in every field.

For instance, there are many more male firefighters than female firefighters. Part of this is likely due to gender differences in work preferences. But it is also partly due to the physical strength tests used in recruiting firefighters. These include being able to lift a 72kg mannequin and drag it for 45 metres. Many fit men can achieve this feat, but substantially fewer fit women can.

Even in the absence of gender discrimination, we might always have fewer female firefighters simply because of such physical requirements. But as long as these requirements are reasonable for the job and no woman is excluded because she is a woman, then gender discrimination is not a problem. Gender equality doesn't mean we must have a 50:50 balance of men and women in every profession purely for the sake of equal representation.

Equality or equity?

Gender equality also does not mean that males and females must always be treated the same. Given the existence of biological sex differences, it is reasonable for males and females to have different legal rights in some instances. For example, only females can ever require maternity leave specifically for pregnancy and birth.

In cases such as these, what is required is not 32 treatment, but 32 treatment. Equity means recognising that differences in ability mean that fairness often requires treating people differently so that they can achieve the same outcome. At times 32 is necessary to achieve gender 32, but there are many instances where this is not the case.

Most of the time, women and girls are at no inherent disadvantage due to a lack of ability that warrants differential treatment. Gender equality can often be achieved just by holding everyone to the same standard. The problem is the irrational gender bias that women and girls are routinely subjected to.

The purpose of affirmative action policies to increase female representation is to counteract systemic discrimination against women. Affirmative action creates gender

equity by overcoming the barriers women face simply because of their gender. If we can eliminate this gender-based discrimination, no such action will be necessary.

Achieving gender equality

So if gender equality does not mean that males and females must be identical or always require the same treatment in order to achieve fairness, what does it mean?

Gender equality is seeing males and females as being of equal status and value. It is judging a person based on their merit, and not viewing them as inferior or superior purely based on their gender.

Passage B

If women don't like how much they're being paid by their employers, they should simply quit their jobs and work for themselves.

After all, if you're your own boss then you set the pay; if you don't like it, simply pay yourself more. Because that's exactly how self-employment works.

Sadly this simple solution to the gender pay gap runs into a problem when we look at the evidence. Research from the ONS (National Office of Statistics in the UK) shows that in 2016 full-time, self-employed men earned an average of £363 per week, while their female counterparts earned a third less at £243. And for a second there we thought we had the whole problem fixed.

The reality is that women in self-employment run into exactly the same problems that those working for someone else's business do. For a start we know that a large number of self-employed women are in sectors which are traditionally lower paid.

Clerical, caring and cleaning are less profitable professions dominated by self-employed women. This tendency to value female work less has been at the route of the employed gender pay gap debate; is it that women choose to work in sectors that are just naturally worth less, or is it that we value the work done by women less than the work done by men? We could debate this for days.

There is also the belief that women tend to ask for less than men, so therefore they are simply paid less. I'm always slightly skeptical of this idea and particularly when it comes to self-employment. As someone who has been freelancing for two years I can confirm that the first thing you learn is that if you don't earn, you don't eat, so you better get used to asking for money pretty fast.

I do however believe there is a difference in how we all treat men and women when they ask for money. A 2016 academic study showed that in employment both men and women would treat a female asking for a pay rise differently from a male. Although they might get the raise, the company would tend to hold it against them and see them as difficult or demanding.

This instinctive reaction teaches women that they can ask for money but it's going to be a difficult experience and they're going to be resented for it. Is it then any wonder that women become reluctant to ask?

For me, however, the greatest reason for the pay gap in self-employment is the motivation behind striking out on your own. For men, the most common reason is because they want to be their own boss, for women it's because they want a better work-life balance.

Passage C

What explains the tendency for nations that have traditionally less gender equality to have more women in science and technology than their gender-progressive counterparts do?

According to a new paper published in *Psychological Science* by the psychologists Gijsbert Stoet, at Leeds Beckett University, and David Geary, at the University of Missouri, it could have to do with the fact that women in countries with higher gender inequality are simply seeking the clearest possible path to financial freedom. And often, that path leads through STEM (science, technology, engineering, and math) professions.

The issue doesn't appear to be girls' aptitude for STEM professions. In looking at test scores across 67 countries and regions, Stoet and Geary found that girls performed about as well or better than boys did on science in most countries, and in almost all countries, girls would have been capable of college-level science and math classes if they had enrolled in them.

But when it comes to their *relative* strengths, in almost all the countries — all except Romania and Lebanon — boys' best subject was science, and girls' was reading. (That is, even if an average girl was as good as an average boy at science, she was still likely to be even better at reading.) Across all countries, 24 percent of girls had science as their best subject, 25 percent of girls' strength was math, and 51 percent

excelled in reading. For boys, the percentages were 38 for science, 42 for math, and 20 for reading. And the more gender-equal the country, as measured by the World Economic Forum's Global Gender Gap Index, the larger this gap between boys and girls in having science as their best subject. (The most gender-equal countries are the typical snowy utopias you hear about, like Sweden, Finland, and Iceland. Turkey and the United Arab Emirates rank among the least equal, according to the Global Gender Gap Index.)

The gap in reading “is related at least in part to girls’ advantages in basic language abilities and a generally greater interest in reading; they read more and thus practice more,” Geary told me.

What’s more, the countries that minted the most female college graduates in fields like science, engineering, or math were also some of the least gender-equal countries. They posit that this is because the countries that empower women also empower them, indirectly, to pick whatever career they’d enjoy most and be best at.

“Countries with the highest gender equality tend to be welfare states,” they write, “with a high level of social security.” Meanwhile, less gender-equal countries tend to also have less social support for people who, for example, find themselves unemployed. Thus, the authors suggest, girls in those countries might be more inclined to choose STEM professions, since they offer a more certain financial future than, say, painting or writing.

31. In Passage A, what does the author intend to argue for by citing the example of firefighters?

- A) The differences between males and females cannot be ignored.
- B) Women should not be denied the job because of gender.
- C) Females are generally too weak to meet the job requirements.
- D) Gender differences are not the reason for gender inequality. ✓

答案：D

32. Choose the proper words to fill in the blanks in Passage A.

- A) equal...equitable...equality...equity

- B) equal...equitable...equity...equality ✓
- C) equitable...equal...equality...equity
- D) equitable...equal...equity...equality

答案: B

33. According to Passage A, what shall we do to achieve gender equality?

- A) Eliminate the differences between men and women.
- B) Offer the same treatment to men and women.
- C) Avoid judging a person with gender biases. ✓
- D) Set the same requirements for both genders.

答案: C

34. What can we conclude from the research conducted by the ONS in Passage B?

- A) Self-employment does not narrow the gender pay gap. ✓
- B) Men are generally paid more than women doing the same work.
- C) Working for oneself doesn't generate more income than for others.
- D) Women can overcome being lower-paid with self-employment.

答案: A

35. According to Passage B, what is the main reason that self-employed women earn less than men?

- A) It is that they are incapable to work as long as men.
- B) It is that they are reluctant to ask for more payment.
- C) It is that they have different understandings of values. ✓
- D) It is that they tend to choose those less profitable careers.

36-37 Decide whether the following statements are True or False according to Passage C.

答案: C

36. Stoet and Geary have found in their study that there is no remarkable gender difference on the study capability of science.

A) True. ✓ B) False.

答案: A

37. Financial security in the future rather than interest motivates girls to choose STEM in less gender-equal countries.

A) True. ✓

B) False.

38-40. Read the following summaries. Decide which passage each summary corresponds to.

答案: A

38. Equal rights are not enough. Inequality exists in our minds, in our biases and prejudices, and that remains to be fixed.

A) Passage A ✓

B) Passage B

C) Passage C

D) None of the passages

答案: A

39. The gender wage gap gets a lot of attention, and for good reasons. At the current snail's pace by which it's closing worldwide, the World Economic Forum says it will take about 200 years to close the pay gap. But there are other financial imbalances holding many women back and keeping them from economic independence.

A) Passage A

B) Passage B

C) Passage C

D) None of the passages
✓

答案: D

40. Self-employed women are doing the same juggling act their employed peers are doing, and they're being punished for it in the same way. The gender pay gap doesn't disappear because you work for yourself.

A) Passage A

B) Passage B ✓

C) Passage C

D) None of the passages

答案: B

Directions: In Part IV, you will read two passages and then write a short essay according to them. You should write with clarity and logic. (Time allowed: 40 minutes)

41.

Question 41 (Suggested completion time: 40 minutes)

Directions: Read the following two excerpts. Excerpt A is from *The Renaissance: A Very Short Introduction* by Jerry Brotton. Excerpt B is from *Humanism and the Culture of Renaissance Europe* by Charles G. Nauert. Write a short essay according to the two excerpts.

Excerpt A

Humanism's success lay in its claim to offer two things to its followers. First, it fostered a belief that the mastery of the classics made you a better, more "humane" person, able to reflect on the moral and ethical problems that the individual faced in relation to his/her social world. Secondly, it convinced students and employers that the study of classical texts provided the practical skills necessary for a future career as an ambassador, lawyer, priest, or secretary within the layers of bureaucratic administration that began to emerge throughout 15th-century Europe. Humanist training in translation, letter-writing, and public speaking was viewed as a highly marketable education for those who wanted to enter the ranks of the social elite.

This sounds a long way from the romantic, idealized picture of humanists rescuing the great books of classical culture and absorbing their wisdom in creating a civilized society. It is. Renaissance humanism had a pragmatic aim to supply a framework for professional advancement, in particular to prepare men for government. A modern humanities education is constructed on the same model (the term is itself drawn from the Latin *studia humanitatis*). It promises the same benefits, and arguably retains the same flaws. It relies on the assumption that a non-vocational study of the liberal arts makes you a more civilized person, and gives you the linguistic and rhetorical skills required to succeed in the workplace. However, there are abiding tensions built into this assumption, tensions that can be traced back to Renaissance humanism.

Excerpt B

What is hard for modern people to grasp but seemed obvious to Italians of the Renaissance is that education in humanistic subjects appeared practical while education in logic and natural science, the dominant subjects in the medieval liberal-arts curriculum, seemed to breed idle debate about purely speculative issues

that were useless for real life. What was useful was not primarily knowledge of facts about nature (even if the facts were true) but the making of wise moral choices. This moral goal and the related need for skill in persuading others through aptly shaped speech and writing already found clear expression in Petrarch (a scholar, poet of Renaissance Italy and the founder of Humanism). Rhetorical skill and character development became and remained the advantages claimed for humanistic education, even though recent scholarship suggests that actual classroom practice gave far more attention to questions of Latin style than to close analysis of the moral issues raised by the treatises and orations of Cicero (Roman statesman, orator, lawyer and philosopher) and other classical moralists whose books were studied in the schools.

41. Write a short essay of about 300 words based on your understanding of the two excerpts. Remember to write in your OWN words. Your essay should respond to the following questions:

- 1) What benefits did Renaissance humanism promise to offer (people) according to Excerpt A?
- 2) What do Excerpt A and Excerpt B agree on the goal of humanistic education?
- 3) What is your opinion on the role of humanistic education in modern society?

答案:

2017 决赛

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: *Read the following descriptions. Match the descriptions with the people. Please note there are four extra options you do not need.*

- A. Mark Twain
- B. Jack London
- C. Thomas Hardy
- D. Charles Dickens
- E. William Butler Yeats
- F. William Wordsworth
- G. Ernest Hemingway

1.

D He was generally considered the greatest English novelist of the Victorian era. A moralist, satirist, and social reformer, he crafted complex plots and striking characters that capture the panorama of English

society. The range, compassion, and intelligence of his apprehension of his society and its shortcomings enriched his novels and made him both one of the great forces in 19th-century literature and an influential spokesman of the conscience of his age.

答案: D

2.

F He was born in 1770 and was one of the most influential of England's Romantic poets. As a young man, he developed a love of nature, a theme reflected in many of his poems. While studying at Cambridge University, he spent a summer holiday on a walking tour in Switzerland and France, and became an enthusiast for the ideals of the French Revolution. He began to write poems when he was at school, but none were published until 1793.

答案: F

3.

A He is regarded as a premier writer of late 19th century America. A humorist, journalist, lecturer, and novelist, he acquired international fame for his travel narratives and for his adventure stories of boyhood. A gifted raconteur, distinctive humorist, and irascible moralist, he transcended the apparent limitations of his origins to

become a popular public figure and one of America's best and most beloved writers.

答案: A

Question 4 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Squeeze half a lemon into a bowl and add in a few drops of water. Dip a cotton swab into the mixture, and then use it like a pencil to write a message on a piece of paper. Let the liquid dry ... and disappear. Hold the paper next to (but not touching) a light. Do you notice anything reappearing?

4. Where is the text most probably taken from?

考试时的选项顺序

- A) A science textbook. ✓ B) A cooking magazine.
C) A game manual. D) A puzzle book.

原始的选项顺序

- A) A cooking magazine. B) A game manual.
C) A science textbook. ✓ D) A puzzle book.

Question 5 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Lavender' s fragrance comes from the essential oils held in the flowers. Newly opened lavender flowers have the best fragrance, so pick the stalks in July. To preserve the flowers, tie bundles with twine and hang somewhere dry and out of strong sunlight to protect the color of the petals.

5. What is the main purpose of this text?

考试时的选项顺序

- A) To describe how to harvest lavender plants.
- B) To explain why lavender' s fragrance could last a long time.
- C) To indicate the best way to preserve lavender.
- D) To demonstrate how to get the best fragrance of lavender.**

✓

原始的选项顺序

- A) To describe how to harvest lavender plants.
- B) To indicate the best way to preserve lavender.
- C) To explain why lavender' s fragrance could last a long time.

D) To demonstrate how to get the best fragrance of lavender.

✓

Question 6 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

It' s best to set up your PC somewhere that has a Wi-Fi network or other connection to the Internet. Your PC will use that connection to complete certain setup steps. If the network requires a password, have the password ready.

6. What is the most probable type of the text?

考试时的选项顺序

- A) A maintenance advice. B) An installing instruction.
- C) An Internet application. D) A security certificate.

✓

原始的选项顺序

- A) A security certificate. B) A maintenance advice.
- C) An installing instruction. D) An Internet application.

✓

Question 7 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

When you are convinced that your cause is right, have the courage to take a stand. If you see a problem or an injustice, recognize that no one will fix it but you. As you go forward today, use your minds and hands and your hearts to build something bigger than yourselves. Always remember there is no idea bigger than this. As Dr. Martin Luther King said, "All life is **XXXX**. We are all bound together into a single garment of destiny." If you keep that idea at the forefront of all that you do, if you choose to live your lives at that intersection between technology and the people it serves, if you strive to create the best, give the best, do the best for everyone, not just for some, then today all of humanity has good cause for hope.

7. Which of the following words could most probably be the **XXXX** in the text?

考试时的选项顺序

- | | |
|----------------------|-------------------|
| A) indistinguishable | B) integrative |
| C) independent | D) interrelated ✓ |

原始的选项顺序

- A) indistinguishable B) independent
C) interrelated ✓ D) integrative

Question 8 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

I want you to know that we greatly appreciate your dedicated service during these past few years and harbor no ill feelings at all about Home Supplies. Our business was recently purchased by a larger contracting firm and we will be getting our supplies through that firm' s vendors. I attempted to keep the relationship with Home Supplies, but it was not possible.

8. What is the writer' s purpose?

考试时的选项顺序

- A) To state that the writer' s company has terminated the business with Home Supplies. ✓
B) To express the sincere appreciation for Home Supplies' service.
C) To show the efforts in maintaining the friendship with Home Supplies.

D) To explain that the company went bankrupt and was sold to a larger company.

原始的选项顺序

A) To express the sincere appreciation for Home Supplies' service.

B) To show the efforts in maintaining the friendship with Home Supplies.

C) To explain that the company went bankrupt and was sold to a larger company.

D) To state that the writer' s company has terminated the business with Home Supplies. ✓

Question 9 (Suggested completion time: 2 minutes)

Directions: *Read the text and answer the question according to the text.*

Permanent happiness is fleeting no matter what your bank account looks like, but research shows that money does, in fact, give you short-term bursts of joy—if you spend wisely. Experiences such as concerts or holidays have been shown to bring greater happiness than purchasing stuff. People who spend money on others are also measurably happier than those who treat themselves. So _____.

9. Which of the following best fits in the blank in the text?

考试时的选项顺序

- A) try to remember: money cannot buy everything
- B) be happy to learn how to manage your money wisely
- C) keep reminding yourself what is real happiness in life
- D) do yourself a favor: buy happiness for someone else ✓

原始的选项顺序

- A) keep reminding yourself what is real happiness in life
- B) be happy to learn how to manage your money wisely
- C) do yourself a favor: buy happiness for someone else ✓
- D) try to remember: money cannot buy everything

Question 10 (Suggested completion time: 5 minutes)

Directions: *The following charts provide an overview of the trends and some key driving forces that have influenced energy consumption in the UK since 1970. Answer the question according to the charts.*

Chart 1 Final energy consumption by sector

Chart 2 The change in energy consumption from 2015 to 2016 split by fuel and sector

Notes: Quantities in the charts are generally quoted in thousand tonnes of oil equivalent (ktoe).

10. Which of the following CANNOT be inferred from the charts?

考试时的选项顺序

- A) Compared with other sectors, the service sector consumed the least amount of energy during the last 40 years.
- B) Gas consumption was the main cause for the increase in energy consumption in the domestic sector from 2015 to 2016.
- C) From 1970 to 2016, energy consumption in the transport sector continued to grow mainly due to increasing consumption of petroleum. ✓
- D) From 1970 to the mid-1980s, the industrial sector accounted for the largest share of energy consumption.

原始的选项顺序

Directions: In Part II, you will read short texts on different subjects. Read the instructions carefully and answer the questions based on logical inference and reasoning. (Time allowed: 40 minutes)

Question 11 (Suggested completion time: 4 minutes)

Directions: *Read the text and answer the question according to the text.*

As a teenager, I would ask my parents to let me take the car so I could go to the local hangout (which, sadly, was McDonald's for teens in Oscoda, MI). They would want to know why I wanted to use the car, and I would patiently explain the situation. When told that I could not, in fact, borrow the car, the cry so often heard, "But Mom! Everyone's doing it!"

Therefore it must be the right thing to do... right?

Not necessarily. Moms across America will fire back, "If everyone jumped off a bridge, would you?"

Point taken.

11. Which of the following is NOT of the same logical fallacy as the underlined part in the text?

考试时的选项顺序

A) Driving home, you see a big traffic jam in front. You notice a few cars shooting over to the next lane. Would you follow them?

B) Feeling envy is only natural. Therefore, there' s nothing wrong with feeling envy. ✓

C)

Bill: "I like classical music and I think it is of higher quality than most modern music."

Jill: "That stuff is for old people."

Dave: "Yeah, who would listen to that crap?"

Bill: "Well, I don' t really like it that much."

D) Everyone is selfish; everyone is doing what he believes will make himself happier. Why should you feel guilty for seeking your own happiness when that' s what everyone else is doing, too?

原始的选项顺序

Questions 12-13 (Suggested completion time: 6 minutes)

Directions: *Below is an excerpt from an article on Time Magazine's website which is linked to two logical fallacies. Read the excerpt and answer the questions according to the excerpt.*

Tech in the classroom not only leads to worse educational outcomes for kids, which I will explain shortly, it can also clinically hurt them. I've worked with over a thousand teenagers in the past 15 years and have observed that students who have been raised on a high-tech diet not only appear to struggle more with attention and focus, but also seem to suffer from an adolescent malaise that appears to be a direct byproduct

of their digital immersion. Indeed, over two hundred peer-reviewed studies point to screen time correlating to increased ADHD (Attention Deficit Hyperactivity Disorder), screen addiction, increased aggression, depression, anxiety and even psychosis.

But let ' s look more closely at that claim. ADHD rates have indeed exploded by 50 percent over the past 10 years with the CDC (Centers for Disease Control) indicating that rates continue to rise by five percent per year. Yet many researchers and neuroscientists believe that the ADHD epidemic is a direct result of children being hyper-stimulated. Using hyper-stimulating digital content to "engage" otherwise distracted students exacerbates the problem that it endeavors to solve. It creates a vicious and addictive ADHD cycle: The more a child is stimulated, the more that child needs to keep getting stimulated in order to hold their attention.

12.

12-13. Which TWO logical fallacies are employed in the text?

Paragraph 1:**A**

Paragraph 2:**D**

A. **False cause:** You presumed that a real or perceived relationship between things means that one is the cause of the other. Many people confuse correlation (things happening together or in sequence) for causation (that one thing actually causes the other to happen). Sometimes correlation is coincidental, or it may be attributable to a common cause.

B. **Straw man:** You misrepresented someone's argument to make it easier to attack. By exaggerating, misrepresenting, or just completely fabricating someone's argument, it's much easier to present your own position as being reasonable, but this kind of dishonesty serves to undermine honest rational debate.

C. **Anecdotal:** You used a personal experience or an isolated example instead of a sound argument or compelling evidence. It's often much easier for people to believe someone's testimony as opposed to understanding complex data and variation across a continuum. Quantitative scientific measures are almost always more accurate than personal perceptions and experiences, but our inclination is to believe that which is tangible to us, and/or the word of someone we trust over a more "abstract" statistical reality.

D. **Composition/division:** You assumed that one part of something has to be applied to all, or other, parts of it; or that the whole must apply to its parts. Often when something is true for the part it does also apply to

the whole, or vice versa, but the crucial difference is whether there exists good evidence to show that this is the case. Because we observe consistencies in things, our thinking can become biased so that we presume consistency to exist where it does not.

答案: A, D

Question 14 Challenge Your Brain (Suggested completion time: 4 minutes)

Directions: *Read the following text and answer the question according to the text.*

Albert and Bernard just became friends with Cheryl, and they want to know when her birthday is. Cheryl gives them a list of 10 possible dates.

May 15, 16, 19

June 17, 18

July 14, 16

August 14, 15, 17

Cheryl then tells Albert and Bernard separately the month and the day of her birthday respectively.

Albert: I don't know when Cheryl's birthday is, but I know that Bernard

does not know too.

Bernard: At first I don' t know when Cheryl' s birthday is, but I know now.

Albert: Then I also know when Cheryl' s birthday is.

14. So when is Cheryl' s birthday? **July 16th|July 16**

答案: July 16th|July 16

Question 15 (Suggested completion time: 4 minutes)

Directions: *Read the introduction to a scientific invention. Answer the question according to the introduction.*

John von Neumann may have finally met his match. Nearly 70 years ago, the Hungarian-born polymath sketched out the basic design of modern computers, with separate processing, memory, and control units. But this year, computer engineers at IBM and other companies rolled out a promising alternative: the first large-scale “neuromorphic” chips, designed to process information in ways more akin to living brains.

Chips based on von Neumann' s architecture excel at carrying out sequences of logical operations, such as those that underlie spreadsheets and word processors. But they struggle with tasks that integrate vast amounts of data, such as vision.

Our brains take a very different approach. Individual neurons communicate with thousands of their neighbors through chemical signals, enabling the brain to process lots of information in parallel. Different brain regions also specialize for greater efficiency.

The brain's network of 100 billion cells linked by 100 trillion synapses still dwarfs anything neuromorphic chips can muster. But IBM's new TrueNorth chip includes 5.4 billion transistors and 256 million "synapses," and the company is working to tile multiple TrueNorths together to build more complex networks. In the future, brain-like processors could transform fields such as machine vision and environmental monitoring, integrating real-time data from sensors from around the globe.

15. According to the text, which of the following is NOT one of the characteristics of the "neuromorphic" chips?

考试时的选项顺序

- A) Distinctive visual faculty can be anticipated in these chips.
- B) The brain's network is the prototype for these chips.
- C) The chips can effectively accomplish logical operations. ✓

D) Transistors, in a way, determine the ability of the chips' data-processing.

原始的选项顺序

A) The brain' s network is the prototype for these chips.

B) The chips can effectively accomplish logical operations. ✓

C) Distinctive visual faculty can be anticipated in these chips.

D) Transistors, in a way, determine the ability of the chips' data-processing.

Question 16 (Suggested completion time: 4 minutes)

Directions: *Read the text about chatbots. Answer the question according to the text.*

Tech gurus at a top British university are working on automated bots which will gently nudge you into choosing a salad rather than a donut. These chatbots are designed to steer people in the right direction, sending messages to remind people to avoid fatty food. A chatbot is a computer program designed to talk with humans. They are already in use on Facebook Messenger, allowing users to do everything from ordering a pizza to checking the news by having a simulated "conversation" with the bots.

16. Which of the chats implies the following statement?

“Chatbots will work as a kind of ‘diary’ to collect the confessions of greedy people and record their diet choices.”

考试时的选项顺序

A)

The chatbot interface shows the following messages:

- User: Help I've had such a long day at work and I didn't have lunch.
- Chatbot: You must be tired and hungry. Tiredness is one of your biggest challenges to healthy eating.
- User: Thanks but I really want those chips
- Chatbot: Remember last Tuesday you also came home in a similar situation. But you made the effort to prepare a healthy stew and felt happy and satisfied.

B)

The chatbot interface shows the following messages:

- Chatbot: Hello, tell me about your eating moment
- User: I was at work. All of my co-workers were ordering my favorite pasta dish from my favorite restaurant. We were having a stressful night at work and I had not eaten since breakfast that morning so I also felt like I was starving.
- Chatbot: What did you end up doing?
- User: I drank water and ordered grilled chicken. I just sampled a bit from co-worker's dishes.
- Chatbot: How did you feel?
- User: I was really proud of myself

✓

C)

原始的选项顺序

A)

✓

B)

Help I've had such a long day at work and I didn't have lunch.

You must be tired and hungry. Tiredness is one of your biggest challenges to healthy eating.

Thanks but I really want those chips

Remember last Tuesday you also came home in a similar situation. But you made the effort to prepare a healthy stew and felt happy and satisfied.

C)

Help I'm studying for exams and I really want the leftover cake from last night

Remember yesterday you felt stressed studying but managed to have fruit instead?

Yes but today I really find it hard to resist.

OK let's try some motivational imagery. Do you remember how you said you'd feel if you stuck to your healthy eating plan?

Yes I would feel awake and full of energy

Take this feeling and imagine being in your favourite location

Yes by the sea

Think of the sounds...the smells...the air...

Questions 17-18 (Suggested completion time: 6 minutes)

Directions: *Read the text about dougong. Decide whether the statements are True, False or Not Given according to the text.*

Architects have long turned to the past for inspiration. In this age of glass and steel, however, they're more likely to be looking for aesthetic influence than technical know-how.

But an ancient Chinese construction technique called *dougong* is a notable exception.

Consisting of a series of interlocking brackets, this building innovation may be more than 2,500 years old. From Beijing's Forbidden City to Sichuan Province's Bao'en Temple, it has helped many of China's oldest

buildings withstand earthquakes and natural disasters.

And now some of Asia' s architects are looking to revive the ancient technique.

Built to last

Many structures built during the Tang and Song dynasties featured "curtain walls" which were, by definition, non-load-bearing. As a result, the unsupported wooden beams that shouldered the weight were prone to cracking and splitting.

Designers needed a technique which would more evenly distribute the burden across their structures. Their solution was *dougong*.

Translating as "cap (and) block," *dougong* is a system of wooden brackets that can support the overhanging roofs commonly found in Chinese architecture. The underlying physics are simple: The interlocking brackets transfer weight to vertical columns, lessening the strain on the horizontal beams. Nails or fasteners are not required.

This support system meant that even buildings made from latticework

and mud could bear the weight of a heavy temple roof. It also meant that wooden frames became much more flexible while still maintaining their structural integrity—even in structures of substantial height.

As well as giving the illusion that buildings are “floating” in their frames, this flexibility offers protection against the forces of nature.

The famous Wooden Pagoda in Shanxi Province’s Yingxian County is one of countless buildings believed to have benefited from this architectural innovation. Built in 1056, the pagoda straddles the Datong Basin’s seismic belt. Yet it has withstood countless earthquakes, even when newer nearby buildings have collapsed.

Historian Klaus Zwerger traces the origins of *dougong* in his book *Wood and Wood Joints: Building Traditions of Europe, Japan, and China*.

“The Chinese building system is based on ratios and proportions,” he wrote. “It draws on thousands of years of observations, on which dimensional proportions were structurally suitable and practical, coupled with a growing understanding of which proportions were aesthetically pleasing.”

Over time, *dougong* has become as much about decoration as engineering, according to Nancy Steinhardt, professor of East Asian art at the University of Pennsylvania.

“Decorative rather than functional components first appear in the 13th to 14th centuries,” she said in an email interview. “As bracket sets became decorative, they also became smaller in comparison to the height of the pillars which interlock with them.”

“As one of the most recognizable symbols of Chinese architecture, the use of *dougong* always references not just Chinese architecture, but China (itself).”

17. *Dougong* has its unique aesthetic and technical value; therefore, it replaced “curtain walls” in ancient Chinese buildings.

A) True **B) False ✓** C) Not Given

答案: B

18. The Wooden Pagoda has survived many earthquakes thanks to the interlocking brackets transferring the natural force to vertical columns, lessening the strain on the horizontal beams.

A) True ✓ B) False C) Not Given

答案: A

Questions 19-20 (Suggested completion time: 6 minutes)

Directions: *Read the text about a movie. Answer the questions according to the text.*

The success of *Wonder Woman* provided a golden ray of hope that Warner Bros. and DC had finally mastered this whole comic-book-movie thing. *Justice League*, by contrast, reflects the haste with which the parties rushed to create their cinematic universe and catch up with Marvel, leaping several intermediate steps in a single bound.

In one respect, this lavish superhero team-up is better than expected, yielding a few fun and clever moments, if one chooses to compare it to the bloated *Batman v. Superman: Dawn of Justice* and *Suicide Squad*.

On the other hand, it's at best workmanlike, and nowhere near as polished and satisfying as *Wonder Woman*, which had the advantage of being a straightforward original story, stripped of conspicuous concerns about stringing together pieces to move action figures.

Warner Bros. made a choice years ago by essentially handing the keys to its superhero kingdom to director Zack Snyder, who put his stamp on *Man of Steel*, *Batman v. Superman* and now this.

Snyder is clearly a gifted visual stylist, someone who can bring what look like comic-book panels to three-dimensional life. It's his characters that tend to be a little flat and somewhat humorless, a criticism that *Justice League* labors to address, with mixed results.

Although some of the groundwork was laid in *Batman v. Superman*, this latest movie still has to transact a great deal of business, setting up the _____ team members, uniting them under the grumpy stewardship

of Batman and fending off an extraterrestrial threat.

19. Which of the following statements is indicated in the text?

考试时的选项顺序

- A) *Justice League* is less watchable than previous superhero movies by Warner Bros.
- B) Audiences are fascinated by the straightforward storyline in *Justice League*.
- C) *Wonder Woman* is a longtime decision by Warner Bros. to catch up with Marvel.
- D) Director Zack Snyder is both praised and criticized for his movie creations. ✓

考试时的选项顺序

- A) divergent **B) individual** C) potential D) illusory
✓

原始的选项顺序

- A) illusory **B) individual** C) potential D) divergent
✓

Questions 21-23 (Suggested completion time: 6 minutes)

Directions: *Read the text and answer the questions according to the text.*

As new parents and anyone who' s ever gone rummaging through their

old childhood libraries quickly realises, much of the best literature for kids is crazy. It all makes divine sense when you're four or five or 10, but return as an adult to *Alice's Adventures in Wonderland* or *The Cat in the Hat*, and what's striking is that so much sublime whimsy and exuberant creativity could have been conjured up by our fellow grownups.

Then again, there's a theory that children's authors—the best of them, at any rate—never really grow up. Lewis Carroll famously—notoriously from today's perspective—preferred playing games with children to adult conversation. Kenneth Grahame amassed a vast collection of toys—in his 20s. And Dodie Smith, a fascinating writer best known today for her children's novel *The Hundred and One Dalmatians*, used to say she never felt quite grown up. (At under five feet tall and with a high-pitched, perpetually girlish voice, she perhaps had more excuses than most.)

There's no arguing that the behaviour of certain of these writers makes their whippersnapper protagonists look good as gold. Take night club entertainer and *Eloise* author, Kay Thompson. She was, by all accounts, a difficult woman to work with. Hilary Knight, *Eloise's* illustrator, finally threw in the towel after Thompson seized his hand in an attempt to direct his pencil. A fondness for flouncing off saw Thompson quit everything from a role in *The Pink Panther* (she hated her costume) to a

gig concocting a fragrance for Tiffany's (she had "the mind of a grasshopper" , one of the company's executives despaired).

The way publicists spun it, Eloise sprang spontaneously to life when, late for a rehearsal of her act with the Williams Brothers, the ordinarily punctual Thompson apologised in a child's voice. " Who are you, little girl?" someone asked, to which Thompson replied, "I am Eloise. I am 6." It became a rehearsal game, then a one-woman show at the Plaza in Manhattan, and finally, in 1955, a book. But according to biographer Sam Irvin, Eloise had been with Thompson since childhood, an imaginary friend whose voice she'd channeled all her life. When a made-for-TV film first started shooting, Thompson would hide under a table on set and voice Eloise's part herself, making the child actor cover her mouth with a book.

21. According to Paragraph 1, what attitude is described towards literature for kids?

A) Ambivalent

B) Conventional C) Sentimental D) Critical

✓

答案: A

22. 22-23. Match each description with the correct name given in the table.

D Imitations of children can be observed in adult life.

B Traces of childlike interests remain even in adult life.

A. Lewis Carroll

B. Kenneth Grahame

C. Dodie Smith

D. Kay Thompson

E. Hilary Knight

答案: D, B

Directions: In Part III, you will read three passages on the same subject. You are required to identify the writer' s position and evaluate the effectiveness of the writer' s arguments. (Time allowed: 30 minutes)

Questions 24-31 (Suggested completion time: 30 minutes)

Directions: *Read three passages about "reading". Answer the questions according to the passages.*

Passage A

The Chinese government has publicized a draft ordinance promoting "reading for all" , to solicit public opinion, a move to create better

reading habits among the population.

Realizing the importance of reading in national strength, China has gradually raised “reading for all” as a national strategy.

The call for a love of reading among all the population appeared in an array of important government and Communist Party of China (CPC) documents, including the report at the 18th CPC national congress and the government work reports delivered at the annual parliamentary session over the past four years.

There are still problems, however, which need to be resolved with the legislation, such as a lower reading rate compared with the world’s major countries, inadequate and inequitable public resources, and mixed quality of reading materials.

A national survey by the Chinese Academy of Press and Publication showed that Chinese read 3.26 e-books and 4.58 paper books on average in 2015, compared with an average of 16 books in Europe and the United States.

Many major developed countries have already resorted to legislation to

boost reading.

The United States introduced the Reading Excellence Act in 1998 and the No Child Left Behind Act in 2002. The Republic of Korea and Japan have also introduced laws to promote reading.

The draft ordinance, released by the Legislative Affairs Office of China's State Council, states that governments at or above county level should incorporate reading programs into their economic and social development plan, as well as their annual budget.

It encourages schools and academies to open their libraries to the public, and calls on brick-and-mortar bookstores to reserve reading space and organized reading for customers.

In addition, poor, remote and border regions, as well as those inhabited mainly by ethnic minority groups are expected to get special support under the draft.

With more funds, more libraries are now available, and the law should breathe life into the nation's reading habits.

Passage B

Better pay attention, reader. This whole story may be a blur.

For the first time, researchers have demonstrated the ill effects of mindless reading—a phenomenon in which people take in sentence after sentence without really paying attention.

Ever read the same paragraph three times? Or get to the end of a page and realize you don't know what you just read?

That's mindless reading. It is the literary equivalent of driving to a destination without remembering how you got there—something so common many people don't even notice it.

In a new study of college students, researchers from the University of Pittsburgh and the University of British Columbia established a way to study mindless reading in a lab.

Their findings showed that daydreaming has its costs.

The readers who zoned out most tended to do the worst on tests of

reading comprehension—a significant, if not surprising, result.

The study also suggested that zoning out caused the poor test results, as opposed to other possible factors, such as the complexity of the text or the task.

The researchers hope their work inspires more research into why zoning out happens, and what can be done to stop it.

For now, they want the problem to be taken seriously.

“When you talk about this work at conferences, it does lend itself to a lot of jokes,” acknowledges University of Pittsburgh professor Erik Reichle, co-leader of the study.

“It’s so *ubiquitous*. Everybody does it,” he said. “I think that’s one of the main reasons it’s been overlooked. And there’s been a view that it is tough to study experimentally. Hopefully, now, there will be more interest in the topic.”

The federal government is showing some.

Reichle and fellow psychology professor Jonathan Schooler did the study on a \$691,000 grant from the Institute of Education Sciences, an arm of the Education Department. It is one of 178 federally backed projects aimed at giving schools a scientific basis for sound policies.

Over three experiments, students used computers to read the first five chapters of Leo Tolstoy's *War and Peace*. (Reichle wanted some boring reading—better for zoning out.)

Reichle said the dry text itself did not skew the results toward mindless wandering. After all, the students were on alert, unlike the typical reader.

Participants were told to monitor and report instances of zoning out as they read text on a computer. Half of them got computer reminders, too:

"Were you zoning out?"

Despite all that, many still reported zoning out at a regular pace.

"That's the amazing thing," Reichle said. "It shows how often this can happen even under conditions that are designed to keep it from happening."

The students said as their eyes scanned the words, their minds often were elsewhere.

They were hungry, or thirsty, or tired. They were thinking about plans, worries or memories. Some drifted into fantasies. Others stuck with the book, but their minds wandered into tangents about the plot.

Passage C

Illiteracy in the modern world is like trying to navigate the high seas with neither knowledge of the stars, a map or a compass—possible, but needlessly difficult. But new research suggests that learning to read does more than make life easier: it literally changes how the brain works by increasing connectivity between its regions.

“We’ re trying to understand the basic principle of how the brain works,” says Falk Huettig, a researcher in the department of psychology of language at the Max Planck Institute for Psycholinguistics. “One good way to figure out how the brain works is to look at cultural inventions, things like reading that is fairly recent in the history of humans.”

Huettig also notes that if we understand how reading is acquired and

how the brain changes as we learn, we can also figure out what brain differences might cause conditions such as dyslexia, for example.

Reading is especially interesting because it's complex. It requires pattern recognition, and decoding symbols to create a meaning. Take, for example, the word "blue". To read it, you have to recognize each letter, what they mean when placed in this order, and relate that coded message to the color that exists in the real world—in milliseconds.

To understand how reading affects the brain, Huettig and a team of researchers took two groups of illiterate Hindi-speaking Indian adults in their thirties and matched them for gender, handedness (right handed vs. left), income, number of literate family members, and intelligence. Adults were used instead of children because kids' brains are incredibly flexible—it's why they learn languages so much more easily than adults can—and they're constantly learning new things, which makes it harder to pinpoint which brain changes might relate to each new skill.

Both groups had their brains scanned in an fMRI machine, to get a base level understanding of how their brains worked. Afterwards, one group undertook six months of literacy instruction in the Devanagari script, a writing system used for several languages including Hindi. The other

group received no such instruction. After six months, the researchers scanned their subjects again.

As we learn to read, neuroplasticity conquers a network that is deeply rooted in the brain. This reorganization makes us increasingly efficient at visually navigating through letter strings, or a group of letters that appear in a word (for example, the “str” in string, straight, and strike).

By tracking blood flow to different regions of the brain, the researchers discovered that the group who had received literacy changes exhibited noticeable differences in their brains. Parts of the cerebral cortex, the outer layer of the cerebrum that plays a role in memory, attention,

thought and, yes, language, changed, though that was not wholly surprising. Previous studies had shown that parts of the cortex change when we learn to read.

What was surprising, however, was that there was also increased functional connectivity between deeper regions of the brain including the occipital lobe (which plays a role in visual processing).

“It hasn’ t been shown before that even these very deep structures in the brain that are evolutionarily old still change fundamentally, and adapt to this new skill, and start to communicate effectively with parts of the cortex like the visual cortex,” says Huettig.

Huettig’ s study also suggests that some previous research on dyslexia might be wrong. Some studies pointed to abnormalities in the deep structures of the brains of people with dyslexia as a cause of the reading disorder. But in Huettig’ s research, the first round of brain scans showed some of those abnormalities—that is, the illiterate adults had brains that looked a lot like those of dyslexics—but in the group that learned to read, those abnormalities went away.

“What our study suggests is that these changes in the deep structures

of the brain have much more to do with learning to read,” says Huetting.

“These differences between people who can read well and people who cannot read well are not the cause of dyslexia.”

24.

According to Passage A, why has the Chinese government legislated a reading campaign?

考试时的选项顺序

- A) Because a better reading habit can be created this way.
- B) Because the government wants people to read more. ✓**
- C) Because most developed countries did so.
- D) Because reading has become a national strategy.

原始的选项顺序

- A) Because most developed countries did so.
 - B) Because the government wants people to read more. ✓**
 - C) Because reading has become a national strategy.
 - D) Because a better reading habit can be created this way.
-

25.

Which of the following measures is NOT included in the draft ordinance in Passage A?

考试时的选项顺序

- A) To build more public libraries and bookstores. ✓
- B) To have the reading program as part of the governmental works.
- C) To provide fiscal support to the reading programs.
- D) To give special support to some special regions.

原始的选项顺序

- A) To build more public libraries and bookstores. ✓
 - B) To give special support to some special regions.
 - C) To provide fiscal support to the reading programs.
 - D) To have the reading program as part of the governmental works.
-

26.

What question has the study in Passage B attempted to answer?

考试时的选项顺序

- A) Who are most likely to zone out while reading?

- B) How can we prevent ourselves from daydreaming?
- C) What are the possible results of mindless reading? ✓
- D) What causes mindless reading?

原始的选项顺序

- A) What causes mindless reading?
- B) How can we prevent ourselves from daydreaming?
- C) What are the possible results of mindless reading? ✓
- D) Who are most likely to zone out while reading?
-

27.

The word **ubiquitous** in Passage B is closest in meaning to _____.

考试时的选项顺序

- A) common ✓
- B) interesting C) unique D) amazing

原始的选项顺序

- A) amazing
- B) common ✓
- C) interesting D) unique
-

28.

The purpose of the research on reading by Falk Huettig in Passage C is _____.

- A) to comprehend the mechanism of the brain. ✓
- B) to figure out the cause of cerebral illness.
- C) to illustrate the changes of brain caused by reading.
- D) to find out the impact of cultural inventions on the brain.

答案: A

29.

Which is the best title for Passage C?

考试时的选项顺序

- A) Learning to Read as an Adult Might Change the Way Your Brain Works ✓
- B) How Does the Brain Work When Reading
- C) New Findings on the Causes of Dyslexia
- D) Literacy or Illiteracy Has a Lot to Do with the Deep Regions of One's Brain

原始的选项顺序

- A) New Findings on the Causes of Dyslexia
- B) How Does the Brain Work When Reading
- C) Literacy or Illiteracy Has a Lot to Do with the Deep Regions of One's Brain

D) Learning to Read as an Adult Might Change the Way Your

Brain Works ✓

30.

Who has been involved in both Passage A and Passage B?

考试时的选项顺序

A) Governments ✓

B) Education departments

C) Schools

D) Legislative departments

原始的选项顺序

A) Schools

B) Governments ✓

C) Legislative departments

D) Education departments

31.

What can be learned about the experiments in Passage B and Passage C?

考试时的选项顺序

A) Both aimed at providing a scientific basis for policy making.

B) Both reported some unexpected findings. ✓

C) Both were supported by the government.

D) Both had young men as subjects.

原始的选项顺序

A) Both aimed at providing a scientific basis for policy making.

B) Both were supported by the government.

C) Both reported some unexpected findings. ✓

D) Both had young men as subjects.

Directions: In Part IV, you will read a passage and then write a short essay based on the ideas it contains. You should write with clarity and logic.
(Time allowed: 40 minutes)

32.

Question 32 (Suggested completion time: 40 minutes)

Directions: Read the passage about overconfidence from *Thinking, Fast and Slow* by Daniel Kahneman, winner of the Nobel Prize. Write a short essay according to the passage.

Can overconfident optimism be overcome by training? I am not optimistic. There have been numerous attempts to train people to state confidence intervals that reflect the imprecision of their judgments, with only a few reports of modest success. An often cited example is that geologists at Royal Dutch Shell became less overconfident in their assessments of possible drilling sites after training with multiple past cases for which the outcome was known. In other situations, overconfidence was mitigated when judges were encouraged to consider competing hypotheses. However, overconfidence is a direct consequence of features of System 1 (Referring to the human mind, System 1 operates automatically and quickly, with little or no effort and no sense of voluntary control) that can be tamed—but not vanquished. The main obstacle is that subjective confidence is determined by the coherence of the story one has constructed, not by the quality and amount of the information that supports it.

Organizations may be better able to tame optimism and individuals than individuals are. The best idea for doing so was contributed by Gary Klein, my “adversarial collaborator” who generally defends intuitive decision making against claims of bias and is typically hostile to algorithms. He labels his proposal the *premortem*. The procedure is simple: when the organization has almost come to an important decision but has not formally committed itself, Klein proposes gathering for a brief session a group of individuals who are knowledgeable about the decision. The premise of the session is a short speech: “Imagine that we are a year into the future. We implemented the plan as it now exists. The outcome was a disaster. Please take 5 to 10 minutes to write a brief history of that disaster.”

Gary Klein’s idea of the *premortem* usually evokes immediate enthusiasm. After I described it casually at a session in Davos, someone (the CEO of a major international corporation) behind me muttered, “It was worth coming to Davos just for this!” The *premortem* has two main advantages: it overcomes the groupthink that affects many teams once a decision appears to have been made, and it unleashes the imagination of knowledgeable individuals in a much-needed direction.

As a team converges on a decision—and especially when the leader tips her hand—public doubts about the wisdom of the planned move are gradually suppressed and eventually come to be treated as evidence of flawed loyalty to the team and its leaders. The suppression of doubt contributes to overconfidence in a group where only supporters of the decision have a voice. The main virtue of the *premortem* is that it legitimizes doubts. Furthermore, it encourages even supporters of the decision to search for possible threats that they had not considered earlier. The *premortem* is not a panacea and does not provide complete protection against nasty surprises, but it goes some way toward reducing the damage of plans that are subject to the biases of WYSIATI (What you see is all there is) and uncritical optimism.

32. Write a short essay of about 300 words based on your understanding of the passage. Remember to write in your OWN words. Your essay should respond to the following questions:

- 1) With regard to judgment, what is the author's general attitude towards overconfident optimism?
- 2) In what situations did the author find from numerous attempts that overconfidence was mitigated?
- 3) In what way can the proposal of the *premortem* help minimize the bad consequences of optimism?
- 4) Do you think overconfidence is a bad thing? Please explain.

答案:

2018 决赛

Directions: In Part I, you will read short texts of various kinds. Read the instructions carefully and answer the questions. (Time allowed: 20 minutes)

Questions 1-3 (Suggested completion time: 3 minutes)

Directions: Read the following book reviews and choose the corresponding authors of the books. Please note there are TWO extra options.

- A. John Henry Newman
- B. Ku Hung-Ming
- C. Jared Diamond
- D. Stephen E. Lucas
- E. Jerry Brotton

1. C

The book is innovative, daring, well researched, and well documented. The prose is excellent and the reading is actually fun. The author produced an encompassing and broad text, but it never lacks substance. The reader always feels that important things are being asked, discussed and answered. He comes out with a solid answer to the question about

the diversity of human experience on the planet. The question is both old and contemporary, and even in the current wave of globalization, in which distances are shortened and information travels quickly, nothing indicates that it will go away.

答案: C

2. A

Since its publication almost 150 years ago, the book has had an extraordinary influence on the shaping and goals of higher education. The issues that the author raised—the place of religion and moral values in the university setting, the competing claims of liberal and professional education, the character of the academic community, the cultural role of literature, the relation of religion and science—have provoked discussion from the author’ s time to our own.

答案: A

3. E

The book sees the period of the Renaissance as a time of unprecedented intellectual excitement cultural experimentation and interaction on a global scale. However, there was a darker side of religious discord, slavery, and massive inequality of wealth and status. The Renaissance stands as one of the defining periods in world history. Between 1400 and

1600, European perceptions of society, culture, politics, and even humanity changed in ways that affect not only Europe but the entire world. Through the book the readers learn about the key issues that defined the period, in its art, architecture, literature and advancements in the fields of science, trade, and travel.

答案: E

Question 4 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Satellite technology to provide Wi-Fi on board planes has matured to a point where more and more airlines are looking to use it, triggering a “gold rush” among suppliers.

That brings opportunities for a vast array of companies, from satellite firms such as Viasat and Inmarsat, to connectivity providers such as Gogo, Global Eagle, and Panasonic Avionics and software and hardware companies such as Lufthansa Systems and Lufthansa Technik.

“It’s like a gold rush feeling at the moment,” Jan-Peter Gaense, head of passenger experience products & solutions at Lufthansa Systems, said at the Aircraft Interiors trade fair in Hamburg.

But as competition for a slice of the business intensifies, Gaense foresees a wave of mergers very soon, predicting that out of around 17 connectivity companies around today, only a handful would remain in the future.

4. What is the future of the inflight Wi-Fi business?

考试时的选项顺序

- A) It will be a gold rush.
- B) It will need more suppliers.
- C) It will be dominated by a few major companies. ✓
- D) It will become less competitive.

原始的选项顺序

- A) It will be a gold rush.
- B) It will need more suppliers.
- C) It will become less competitive.

D) It will be dominated by a few major companies. ✓

Question 5 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

With dramatic peaks and pristine lakes, Yellowstone National Park is an outdoor enthusiast's paradise. Multicolored pools swirl around hot springs; verdant forests weave past expansive meadows; and volatile geysers launch streams of steaming water toward the sky. With so much unspoiled natural beauty, it's no wonder everyone suspected John Colter (a scout for explorers Lewis and Clark) was embellishing when he first described Yellowstone's geothermal curiosities in 1807. Nowadays, there's no doubt that the park is indeed extraordinary. While you traverse its 3,000-plus square miles of mountains, canyons, geysers and waterfalls, be prepared to share the trails with permanent residents like buffalos, elks and sometimes even grizzlies.

5. Why did people doubt John Colter's description of Yellowstone in 1807?

考试时的选项顺序

A) People didn't believe the existence of such marvelous natural beauty. ✓

- B) The extraordinary beauty of Yellowstone was rarely reported at that time.
- C) John Colter was famous for his exaggerated style of writing.
- D) His description was inconsistent with the experience of the permanent residents.

原始的选项顺序

- A) John Colter was famous for his exaggerated style of writing.
- B) People didn't believe the existence of such marvelous natural beauty. ✓
- C) The extraordinary beauty of Yellowstone was rarely reported at that time.
- D) His description was inconsistent with the experience of the permanent residents.

Question 6 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

In the early 20th Century, Arctic explorer Vilhjalmur Stefansson spent five years eating just meat and fish. This meant that his diet consisted of around 80% fat and 20% protein. He remained healthy through out.

Twenty years later, he took part in a year-long experiment at the New

York City' s Bellevue Hospital in 1928. Stefansson wanted to disprove those who argued that humans cannot survive if they only eat meat. Unfortunately, he experienced digestive disturbances when eating only lean meat without any fat. His symptoms disappeared after he raised his fat intake.

In fact, after returning to New York City and to a typical US diet with more normal levels of protein, he reportedly found his health deteriorating and returned to a low-carb, high-fat, and high-protein diet until his death aged 83.

6. What can we learn from this text?

考试时的选项顺序

- A) Stefansson became ill because of his high intake in protein and fat.
- B) The typical US diet is not good for one' s health.
- C) It is beneficial to one' s health to consume less meat.

D) High protein intake with fat does not affect people' s health.

✓

原始的选项顺序

- A) The typical US diet is not good for one' s health.
- B) It is beneficial to one' s health to consume less meat.
- C) High protein intake with fat does not affect people' s health.

✓

- D) Stefansson became ill because of his high intake in protein and fat.

Question 7 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

The demonizing of teenagers for their behaviour has been happening since the time of Socrates. But Professor Sarah-Jayne Blakemore, author of *Inventing Ourselves: The Secret Life of the Teenage Brain*, argues that the adolescent brain should be nurtured and celebrated for its vulnerability and extreme creativity as it undergoes extensive development.

Adolescent sensation-seeking behaviour in humans increases between the age of 10 and the late teens, peaking at 19 and falling off in the twenties, and it' s thought there may be an evolutionary purpose to showing off: a need to become independent and establish yourself in the social hierarchy.

And it's certainly not unique to humans—similar behaviour has been observed in species including rats, mice and monkeys.

7. What can we know about the adolescent sensation-seeking behaviour?

考试时的选项顺序

- A) It has been researched in different ways.
- B) Humans and some other species all have this behaviour.
- C) It can be explained in terms of human development. ✓
- D) Scientists have been attempting to find an answer to it.

原始的选项顺序

- A) It has been researched in different ways.
- B) It can be explained in terms of human development. ✓
- C) Scientists have been attempting to find an answer to it.
- D) Humans and some other species all have this behaviour.

Question 8 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Education is so integral to modern life that we take it for granted. Young people have to leap through interminable academic hoops to secure

their place in the adult world. My thesis, in a single sentence: Civilized societies revolve around education now, but there is a better—indeed, more civilized—way. If everyone had a college degree, the result would not be great jobs for all, but runaway credential inflation. Trying to spread success with education spreads education but not success.

8. Which of the following best describes the author's intention of the closing sentence?

考试时的选项顺序

- A) People now attach more importance to education instead of only valuing material things.
- B) What we should value most is not success but the real education, the civilization of people.
- C) Education, though always targeted, is not receiving due attention among common people.
- D) Education is commonly valued now but it is virtually irrelevant to real job situations. ✓

原始的选项顺序

- A) Education is commonly valued now but it is virtually irrelevant to real job situations. ✓

- B) Education, though always targeted, is not receiving due attention among common people.
- C) People now attach more importance to education instead of only valuing material things.
- D) What we should value most is not success but the real education, the civilization of people.

Question 9 (Suggested completion time: 2 minutes)

Directions: Read the text and answer the question according to the text.

Why does the great and universal fame of classical authors continue? The answer is that the fame of classical authors is entirely independent of the majority. Do you suppose that if the fame of Shakespeare depended on the man in the street it would survive a fortnight? The fame of classical authors is originally made, and it is maintained, by a passionate few. Even when a first-class author has enjoyed immense success during his lifetime, the majority have never appreciated him so sincerely as they have appreciated second-rate men. He has always been reinforced by the ardor of the passionate few...

And it is by the passionate few that the renown of genius is kept alive from one generation to another. These few are always at work. They are always rediscovering genius. Their curiosity and enthusiasm are

exhaustless, so that there is little chance of genius being ignored.

9. Which of the following would be the best title for the text?

- A) Why A Classic Is A Classic ✓
- B) The Passing-on of Classical Works
- C) The Form of Classical Authors
- D) Minority Rather than Majority

答案: A

Question 10 (Suggested completion time: 5 minutes)

Directions: The figure shows merchandise trade growth by regions of the world in 2017. Answer the question according to the figure.

Merchandise trade growth by region,¹ 2017

(Annual percentage change)

10. Which of the following is an INCORRECT description of the figure?

考试时的选项顺序

- A) Compared with North America, the merchandise trade volume and value in South and Central America and the Caribbean increased by a larger amount. ✓
- B) The merchandise trade value increase reached 13 percent in Africa, about 2 percent higher than the overall increase of the world.
- C) There is an over-10-percent discrepancy between

merchandise trade value and volume growth rate in the Middle East region.

D) In 2017, the merchandise trade volume in Asia increased by 8.1 percent, larger than any other region in the world.

原始的选项顺序

A) In 2017, the merchandise trade volume in Asia increased by 8.1 percent, larger than any other region in the world.

B) Compared with North America, the merchandise trade volume and value in South and Central America and the Caribbean increased by a larger amount. ✓

C) The merchandise trade value increase reached 13 percent in Africa, about 2 percent higher than the overall increase of the world.

Questions 12-14 Reasoning (Suggested completion time: 12 minutes)

12.

It looks like the waiter forgot to charge us for the bottle of champagne. Let' s just leave—after all, if he had overcharged us, I doubt he would chase after us to give us the money back that we had overpaid.

Which of the following is the reason for the conclusion?

考试时的选项顺序

- A) The waiter forgot to charge for the bottle of champagne.
- B) The waiter would never give back the money that we overpaid.
- C) We made an assumption that the waiter would overcharge us.
- D) We justified our wrongdoing by assuming the waiter' s wrongdoing. ✓

原始的选项顺序

- A) The waiter forgot to charge for the bottle of champagne.
- B) We made an assumption that the waiter would overcharge

us.

C) The waiter would never give back the money that we overpaid.

D) We justified our wrongdoing by assuming the waiter' s wrongdoing. ✓

13.

"We know that the defendant was in the vicinity of the robbery when the robbery occurred. Therefore, the defendant is guilty of the robbery."

Which of the following best describes the flaw in the argument above?

考试时的选项顺序

A) The argument suggests evidence of a position and proves that a different position is true. ✓

B) The argument bases a conclusion on two pieces of contradictory evidence.

C) The argument presupposes what it is attempting to demonstrate.

D) The argument directs the attack against the defendant rather than the defendant' s evidence.

原始的选项顺序

A) The argument directs the attack against the defendant rather than the defendant's evidence.

B) The argument suggests evidence of a position and proves that a different position is true. ✓

C) The argument bases a conclusion on two pieces of contradictory evidence.

D) The argument presupposes what it is attempting to demonstrate.

14.

During the last hunting season, twice as many people were hit by cars while walking on public sidewalks as were hurt in hunting accidents in the woods. Therefore, during the last hunting season, people were safer in the woods than walking on public sidewalks.

Which of the following, if true, casts the most serious doubt on the conclusion drawn above?

考试时的选项顺序

A) During the last hunting season, there were more than twice as many people walking on public sidewalks as were walking in the woods. ✓

B) When it is not hunting season, more people get hurt in the

woods than on public sidewalks.

C) Today, more and more people discard the hobby of hunting animals in the woods because they think it's immoral.

D) During the last hunting season, people hit by cars while walking on public sidewalks were more careless than those hurt in hunting accidents.

原始的选项顺序

A) During the last hunting season, people hit by cars while walking on public sidewalks were more careless than those hurt in hunting accidents.

B) During the last hunting season, there were more than twice as many people walking on public sidewalks as were walking in the woods. ✓

C) When it is not hunting season, more people get hurt in the woods than on public sidewalks.

D) Today, more and more people discard the hobby of hunting animals in the woods because they think it's immoral.

Questions 15-17 (Suggested completion time: 8 minutes)

Directions: Read the text about the revolution in education. Answer the questions according to the text.

The expansion of high schools was the first wave in a century-long broadening of education in the United States in response to the changing needs of the economy. The high-school movement was “truly path breaking,” wrote Claudia Goldin, a Harvard University economist, in a paper published by the National Bureau of Economic Research. “No other country underwent the transformation to virtually universal public secondary education” so early and so quickly. Goldin argued, “Without the rapid rise of the high school, America could not have put the GI Bill of Rights into immediate action after 1944 for American youth would not yet have graduated high school.”

The second wave in expanding education for a changing workforce occurred in the 1960s with the “college-for-all” movement. In 1965, President Lyndon B. Johnson signed the Higher Education Act, which bolstered federal aid for higher education. Meanwhile, states built community college campuses and widened the mission of state teachers’ colleges by adding a bevy of programs in all academic fields. Between 1970 and 2016, enrollment in higher education more than doubled from 8.5 million to 20.5 million students.

Now a third wave in education and training has arrived, argue economists, educators, and workforce-development officials. The level of

preparation that worked in the first two waves—adding more time to education early in life—does not seem sufficient in the 21st-century economy. Instead the third wave is likely to be marked by continual training throughout a person's lifetime—to keep current in a career, to learn how to complement rising levels of automation, and to gain skills for new work. Workers will likely consume this lifelong learning in short spurts when they need it, rather than in lengthy blocks of time as they do now when it often takes months or years to complete certificates and degrees.

With this third wave will come a shift in how workers perceive retraining, said Brent Parton, deputy director of the Center on Education and Skills at the think tank New America. “We tend to think of retraining now as something that follows a traumatic event—a job loss, for instance,” said Parton, who served as a policy advisor in the U.S. Department of Labor during the Obama administration. “We’re entering a stage where retraining will be the day-to-day world that people live in. It will be part of their daily life and a much quieter set of traditions compared with now.”

One big worry, however, is that the arrival of lifelong education will only exacerbate the economic divide that already exists in the United States.

Education levels in the U.S. are closely tied to income. Simply put: Rich kids are far more likely to graduate from college than are their poor and working-class peers. There' s no reason not to believe that trend won' t continue in this third wave of lifelong learning. It is likely to help workers who already have high levels of education get the training they need rather than assist underemployed or unemployed workers who need to upskill to keep a job or get a new one.

15. What can be learned from Goldin' s remark in the first paragraph?

考试时的选项顺序

A) Many people used the benefits of the GI Bill of Rights to graduate from high schools. ✓

B) The GI Bill of Rights played a very important part in promoting the high-school movement in America.

C) The passage of the GI Bill of Rights got support from high school graduates.

D) The implementation of the GI Bill of Rights paved the way for the following two education revolutions.

原始的选项顺序

A) The passage of the GI Bill of Rights got support from high

school graduates.

B) Many people used the benefits of the GI Bill of Rights to graduate from high schools. ✓

C) The GI Bill of Rights played a very important part in promoting the high-school movement in America.

D) The implementation of the GI Bill of Rights paved the way for the following two education revolutions.

16. How is the third wave in education different from the first two waves?

考试时的选项顺序

A) People in the third wave have to spare lengthy blocks of time for lifelong learning and retraining.

B) People in the third wave will come to regard retraining as a daily experience and a lifetime mission. ✓

C) People in the third wave have to keep learning and retraining in order to hold on to their jobs.

D) People in the third wave need to spend more time receiving education early in life to get a degree.

原始的选项顺序

A) People in the third wave need to spend more time receiving education early in life to get a degree.

- B) People in the third wave have to spare lengthy blocks of time for lifelong learning and retraining.
- C) People in the third wave have to keep learning and retraining in order to hold on to their jobs.
- D) People in the third wave will come to regard retraining as a daily experience and a lifetime mission. ✓
-

17. What kind of problem might the third wave in education bring about?

考试时的选项顺序

- A) A disbelief in the importance of lifelong learning.
- B) Increasingly rigid social classes.
- C) A decrease in financial aid for the unemployed.
- D) Growing disparities in wealth. ✓

原始的选项顺序

- A) Growing disparities in wealth. ✓
- B) Increasingly rigid social classes.
- C) A decrease in financial aid for the unemployed.
- D) A disbelief in the importance of lifelong learning.

Questions 18-21 (Suggested completion time: 8 minutes)

Directions: Read the following letter. Answer the questions according to

the letter.

Dear Dad

By Lisa Einstein on June 15, 2018

They don't celebrate Father's Day in West Africa where I am serving with the Peace Corps, but I think about you a lot here, and your impact on my love of science. I had incredible science teachers—you worked hard to find public school districts with great math and science educators—but it was your lessons that gave me the confidence to explore astrophysics and cancer biology research, major in physics at Princeton, and now teach physics in French to classes of over 100 in a rural village in Guinea. Many of the girls I teach are 17, the same age I was when you died suddenly of a heart attack. Nine years later the void you left remains, but I'm channeling your lessons to these girls and feel you with me when I do.

In Guinea only 15.4 percent of girls finish primary school, according to the Secrétariat Technique du Comité Genre et Equité (STCGE). And you worried about the gender disparities in STEM! I have been exploring the research on science education, which shows the impact of mentorship

and messaging on girls' retention and success in STEM fields. I now see that I may as well have been raised on this body of research, though most of it was published after your death. Three messages stand out in stark contrast to the messages that my students tend to hear:

"I love it when you prove me wrong!" You would exclaim gleefully when I challenged you in any of our discussions. Your flexibility took the conflict out of challenge and put us on the same team in pursuit of truth. Your exuberance fueled my audaciousness and goaded me to look deeper to find what others may be missing. Your willingness to be proven wrong by a young girl despite your Harvard MD/PhD gave me the confidence to question anyone. It also taught me ____18____. "We can only hope to be right some of the time," you reminded me. "That's why we call it RE-search." You showed me the power of an open mind: ____18____ insights may come from unlikely sources, even me, your young daughter.

I contrast my experiences to those of my student, Fatoumata, whose dad told her she must marry and stop school at age 13 because of "tradition." Challenging him would mean only trouble, not a joyous exploration of truth. She was taught to be submissive and diffident, not curious and confident. We worked with the school principal and were able to

convince her father to stop her forced marriage and let her stay in school. Empowered by our confidence in her, she co-founded an organization to support other girls and teach their parents that education offers a path out of poverty. “You proved me wrong,” her dad now says as he boasts about her leadership.

You knew that beliefs we have about ourselves change the ways our brains work. When I wondered why there were not more girls in 6th grade advanced math and speculated that boys may be genetically better at math than girls you exclaimed, **“They tricked you! I can’ t believe it! My own daughter.”** You never let me succumb to the subtle forces that could undermine my confidence and dissuade me from my passion.

Deep cultural beliefs about who should study are daunting barriers in Guinea, but you prepared me to surmount them by changing mindsets, not only of my students, but also the men and women at home, who have the power to hold them back or help them thrive. Your message rings in my ears, Dad. I won’ t let them trick me or my students.

A third message also rings so true. **“It’ s good that it’ s hard, that means that you’ re growing,”** you told me when I struggled with school

work or a social problem. You reminded me that we grow the most when we are out of our comfort zones. Now research shows that brains develop and change, and that mistakes grow your brain. "You never want things to be too easy," you said. It was a lesson I repeated over and over the year of your death and that I have revisited often during the difficult moments of isolation and hardship in my service. I cherish those challenges because I know they are forming me.

I share these gifts you gave me with the girls I teach, who face so many challenges from living in extreme poverty. We work to see their struggles as their sources of strength, and to bring the resilience they bring to their everyday lives to their learning and intellectual development. And because I experienced you learning from me as a young girl, I am prepared to receive the many lessons my students have to teach me.

Thank you, Dad. Happy Father's Day.

Love,

Lisa

18. Which of the following two words best fit in the blanks in the third paragraph?

考试时的选项顺序

- A) perseverance ... subtle B) skepticism ... laborious
C) humility ... priceless ✓ D) courage ... valueless

原始的选项顺序

- A) perseverance ... subtle B) courage ... valueless
C) humility ... priceless ✓ D) skepticism ... laborious
-

19. What do we know about the author?

考试时的选项顺序

- A) She teaches physics in French in a rural village of Guinea. ✓
B) She writes a letter on Father' s Day every year.
C) She has a Harvard master' s degree.
D) She leads the local people out of poverty in Guinea.

原始的选项顺序

- A) She has a Harvard master' s degree.
B) She writes a letter on Father' s Day every year.
C) She leads the local people out of poverty in Guinea.
D) She teaches physics in French in a rural village of Guinea. ✓

20. What can we infer about the author' s father from the "three messages" ?

考试时的选项顺序

- A) He didn' t like Lisa to challenge his authority.
- B) He is strong-willed in questioning established scientific truths.
- C) He believed mistakes and hardship help the brain grow. ✓**
- D) He was worried about gender disparities.

原始的选项顺序

- A) He didn' t like Lisa to challenge his authority.
- B) He was worried about gender disparities.
- C) He believed mistakes and hardship help the brain grow. ✓**
- D) He is strong-willed in questioning established scientific truths.

21. Which of the following best describes the letter?

考试时的选项顺序

- A) An expression of life reflections
- B) A message of gratitude ✓**
- C) A disclosure of true self and feeling

D) An introspection of voluntary work

原始的选项顺序

A) A message of gratitude ✓

B) An expression of life reflections

C) An introspection of voluntary work

D) A disclosure of true self and feeling

Questions 22-25 (Suggested completion time: 8 minutes)

Directions: Read the text and answer the questions according to the text.

The Cambridge Analytica data-breach scandal at Facebook led to a massive fall in the company' s stock price, governments around the world discussing new regulations, commenters *from the left and the right* calling for breaking Facebook up, multiple lawsuits and many Facebook users leaving the site. After three negative incidents involving pets on United Airlines in March 2018, the company' s favorability rating fell and customers who heard about the incidents were significantly more likely to choose another airline. Equifax is in the news—again—for discovering an additional 2.4 million victims of its data breach.

You might be surprised to learn that all of these disasters were avoidable,

as are many of the disasters suffered by all of us in our professional lives that do not make it into the news. Our brains make systematic and predictable errors—what behavioral scientists call *cognitive biases*—that lead us to make poor decisions. Fortunately, recent research shows that we can easily improve our ability to make better decisions. As a behavioral science expert, a consultant and speaker on decision-making and author of an Amazon bestseller on this topic, *The Truth-Seeker's Handbook: A Science-Based Guide*, I want to suggest an effective, research-based approach that anyone can use to avoid disasters in the workplace.

Were These Disasters Really Avoidable?

The CEOs of all three companies recognized that they and their organizations made errors that led to the business disasters. Facebook's CEO Mark Zuckerberg acknowledged that Facebook made many mistakes, such as allowing external apps to have massive data access to Facebook users, trusting the word of Cambridge Analytica and other companies about what they do with the data and failing to inform Facebook users about how their data is used.

Oscar Munoz, United's CEO, also stated that United got it wrong. He

committed not only to change the way United transports pets, but to put United crews through a new program focused on “safety, caring, dependability and efficiency.”

Equifax’ s former CEO Richard Smith, who was forced to retire after the data breach, apologized for the failure of Equifax to follow its own policies and procedures. Apparently, after the Department of Homeland Security warned Equifax of its vulnerability, the company failed to follow its own process and fix the security flaw, enabling hackers to access the data of over 140 million customers.

Why Do We Suffer Avoidable Disasters in the Workplace?

Avoidable professional disasters frequently stem from three major cognitive biases: the overconfidence effect, optimism bias and the planning fallacy.

[A] When asked whether they are more, less or equally skilled compared to the average driver, 93 percent of Americans report themselves as more skilled. When study subjects said they were 100 percent confident in their answers, they were wrong 20 percent of the time. **[B]** No wonder that the overconfidence effect — our tendency to be excessively

confident in our decision-making—has been found by researchers to harm performance in the workplace, whether by CEOs or professionals. Indeed, Zuckerberg describes how he was wrong in being confident that Facebook users prefer to be more public with their data for the sake of more opportunities for social engagement.

Optimism bias refers to us being excessively optimistic about the future. For example, studies show we tend to believe our risk of suffering negative events is less than it actually is, and we overestimate the likelihood of positive events. We fall into optimism bias frequently in the workplace, overemphasizing the benefits of projects and understating the costs. A related bias, the planning fallacy, refers to our tendency to assume our plans will go perfectly and fail to build in enough resources for potential problems. As a result, endeavors tend to run over budget and past deadlines. Both United and Equifax were excessively optimistic about their existing processes, the first in dealing with pets and the second in fixing the security flaw after it was found.

22. What does the phrase *from the left and the right* in the first paragraph mean?

考试时的选项顺序

- A) from the Democratic Party and the Republican Party
- B) from private groups to the public
- C) from all sides ✓
- D) from the outer world to the inner world

原始的选项顺序

- A) from all sides ✓
 - B) from private groups to the public
 - C) from the outer world to the inner world
 - D) from the Democratic Party and the Republican Party

Questions 26-28 (Suggested completion time: 8 minutes)

Directions: Read the text about a new discovery. Answer the questions according to the text.

【1】 On May 14, 2018, scientists announced the discovery of an entirely new resource that has the potential to remake some of those centuries-old arguments over Roman politics and history. A team of archaeologists, historians, and climate scientists have constructed a

history of Rome's lead pollution, which allows them to approximate Mediterranean economic activity from 1,100 B.C. to 800 A.D. They found it hiding thousands of miles from the Roman Forum: deep in the Greenland Ice Sheet, the enormous, miles-thick plate of ice that entombs the North Atlantic Island.

【2】 In short, they have reconstructed year-by-year economic data documenting the rise and fall of the Roman Republic and Empire. The first news of the record was published on the afternoon of May 14, 2018 in *Proceedings of the National Academy of Sciences*.

【3】 Why does the amount of lead in the atmosphere tell us something about the Roman economy? "It's a proxy for coin production. That's the biggest thing," said Seth Bernard, a professor of ancient history at the University of Toronto. When the Roman government needed to pay for something, it ordered the creation of new silver coins. These coins were produced, in part, in mines on the Iberian Peninsula. But the mines didn't excavate pure silver: Instead, they unearthed an ore of silver, lead, and copper that had to be smelted into silver. This process filled the air with lead pollution.

【4】 Once in the air, these lead emissions did not stay in one place.

Instead, it wafted with the winds, 26. When the storms deposited lead-tainted snow or sleet over the Arctic island, the precipitation fused with the ice sheet and became its newest layer. Century upon century of snow and ice fell on the ice sheet, burying but never disturbing that old layer of ice—until 1999, when climate scientists began coring the ice sheet at the NGRIP site. Four-inch tubes, documenting those ancient layers of snow and sleet, were hauled to the surfaces and pristinely preserved.

【5】“There isn’ t anything close to this detailed documenting the Roman economy” , said Joe McConnell, a professor of hydrology at the Desert Research Institute and one of the authors of the paper. “Our record is dramatically different both in its temporal resolution and in its dating precision.”

【6】 “The paper speaks for itself,” said Seth Bernard, who had early access to its findings but did not work on the research. “It feels sort of like we’ ve discovered the Americas. There was another continent over there, that was always there, that we can see now.”

【7】 The new paper contains findings that Roman historians can already apply to their work. It finds that Rome’ s economy waxed and waned,

following well-documented events in its history, including wars and plagues. In 218 B.C., for instance, when Rome fought with Carthage in the Second Punic War, lead pollution appears to fall—and then it rises, abruptly, as Roman soldiers seized Carthaginian mines in southern Spain and put them to use. It also detects nonviolent events: When Rome debased its currency, reducing the amount of silver in each denarius coin in 64 A.D., lead pollution in the air fell.

【8】 And it provides crucial economic context for some of the most pivotal events in Roman history, including the death of Julius Caesar (and the birth of Jesus of Nazareth). The Crisis of the Roman Republic—the series of civil wars and political strife, spanning 134 B.C. to 27 B.C., that brought the Roman Republic to an end—were associated with a broad period of economic stagnation and disintegration, the study finds. And the early Roman Empire—especially the Pax Romana (27 BC—AD 180), the 206 years of mostly uninterrupted peace throughout the Mediterranean—were accompanied by an economic boom. When compared with other studies, research suggests that Western Europe may have seen 27 lead emissions during the Pax Romana than at any time prior to the Industrial Revolution, nearly 1,800 years later.

【9】 This finding reverses a widely cited study from the 1990s that

reached almost exactly the opposite finding. That paper, which used a similar but rudimentary technique to pull lead emissions out of the Greenland ice, argued that Roman economic productivity peaked during the late Republic, then stagnated throughout the entire Roman Empire. But that study drew from 18 data points; this new research made 25,000 different measurements of the ice core.

26. Which of the following most logically completes the sentence in the fourth paragraph?

考试时的选项顺序

A) eventually blowing into squalls and storms over Greenland

✓

B) finally forming an on-again and off-again cycle in hurricanes near Greenland

C) and cooled near Greenland, leading to fewer, weaker storms

D) and then was attributed to the density-driven katabatic winds off the nearby Greenland

原始的选项顺序

C) Wars had little to do with the Roman economy since Rome

always won.

D) The paper provides similar data as in the 1990s but reaches

a different conclusion.

Questions 29-30 (Suggested completion time: 7 minutes)

Directions: Read the text and answer the questions according to the text.

The Internet age in which we already live prefigures some of the questions and issues that AI will only make more acute. The Internet' s purpose is to ratify knowledge through the accumulation and manipulation of ever expanding data. Human cognition loses its personal character. Individuals turn into data, and data become regnant.

Users of the Internet emphasize retrieving and manipulating information

over contextualizing or conceptualizing its meaning. They rarely interrogate history or philosophy; as a rule, they demand information relevant to their immediate practical needs. In the process, search-engine algorithms acquire the capacity to predict the preferences of individual clients, enabling the algorithms to personalize results and make them available to other parties for political or commercial purposes. Truth becomes relative. Information threatens to overwhelm wisdom.

Inundated via social media with the opinions of multitudes, users are diverted from introspection; in truth many technophiles use the Internet to avoid the solitude they dread. All of these pressures weaken the fortitude required to develop and sustain convictions that can be implemented only by traveling a lonely road, which is the essence of creativity.

The impact of Internet technology on politics is particularly pronounced. The ability to target micro-groups has broken up the previous consensus on priorities by permitting a focus on specialized purposes or grievances. Political leaders, overwhelmed by niche pressures, are deprived of time to think or reflect on context, contracting the space available for them to develop vision.

The digital world's emphasis on speed inhibits reflection; its incentive empowers the radical over the thoughtful; its values are shaped by subgroup consensus, not by introspection. For all its achievements, it runs the risk of turning on itself as its impositions overwhelm its conveniences.

29. What is the text mainly about?

考试时的选项顺序

- A) The characteristics and impacts of the Internet.
- B) The threats posed by the Internet to human cognition. ✓**
- C) The pros and cons of the Internet in the current era.
- D) The relations between humans' data control and the Internet.

原始的选项顺序

- A) The relations between humans' data control and the Internet.
- B) The threats posed by the Internet to human cognition. ✓**
- C) The pros and cons of the Internet in the current era.
- D) The characteristics and impacts of the Internet.

30. Which of the following is INCORRECT according to the text?

考试时的选项顺序

- A) Solitude can stimulate innovation and should be encouraged.
- B) People are becoming less rational in the Internet age.
- C) Political leaders need personal space to ensure their insightfulness. ✓
- D) "Haste makes waste" is one truth of the digital world.

原始的选项顺序

- C) Political leaders need personal space to ensure their insightfulness. ✓
- D) "Haste makes waste" is one truth of the digital world.

Directions: In Part III, you will read passages on the same subject. You will be required to identify the writer' s position and evaluate the effectiveness of the writer' s arguments. (Time allowed: 35 minutes)

Questions 31-40 (Suggested completion time: 35 minutes)

Directions: Read three passages about meat-eating. Answer the

questions according to the passages.

Passage A

Eating some of Britain' s most endangered animals could save them from extinction, conservationists have claimed.

Carnivores are often blamed for inflicting irreparable damage on vulnerable species' habitats and record numbers of people are adopting vegan lifestyles to try to save the planet. But demand for meat is key to keeping rare pigs, sheep and cows alive, the Rare Breeds Survival Trust said.

Dozens of historic breeds are disappearing from the countryside as farmers opt for modern hybrids, which have been bred to maximize their profits in intensive farming systems.

"Although it might sound odd, we want more people to eat rare breed meat to drive demand for the animals," Tom Beeston, head of the trust, said. "The more people eat rare breed meat, the greater the demand and the more animals will be bred."

Demand for beef from Highland cattle has already helped the long-horned hairy cows to escape the annual danger list, which the charity published on April 17, 2018.

The numbers of Gloucester old spot pigs have also risen, thanks to demand from gastropubs and restaurants, but the pigs are still "at risk" because there are fewer than 500 breeding females nationwide, Mr. Beeston said.

Small family farms, which were once a stronghold of rare breeds, have struggled to compete with mega-farms since the end of the Second World War. Today almost 90 per cent of the dairy herd comes from just two breeds and their crosses of Friesian and Holstein cows.

Britain's rarest farm animal is the Vaynol cow, a semi-feral beast, which originated in north Wales in 1872. There are 12 breeding females left and they have been dispersed across three sites to reduce the risk of disease wiping them all out.

"These rare breed animals are going to end up as dead as a dodo unless their numbers increase dramatically," Mr. Beeston said. "They are beautiful to look at, uniquely British and deserve to be protected for

future generations.”

Dominika Piasecka, spokeswoman for the Vegan Society, said that the trust’s claims were *ludicrous*, adding: “Animal agriculture is widely acknowledged as the leading driver of species extinction, habitat loss, water consumption and pollution.”

About 540,000 people in Britain are vegan. Ms. Piasecka said the society would like to see farm animals left to reproduce naturally “and live their lives in a sanctuary setting.”

Rehana Jomeen from The Save Movement, a vegan campaign group that protests outside abattoirs (屠宰场), said it did not matter if breeds disappeared because they only existed as a result of exploitative farming practices. “Ultimately, there should be no demand at all as we have no real justification for rearing animals and taking their lives for their flesh and by-products,” she said.

The British lop and the British landrace are among the most endangered breed of pigs, Mr. Beeston said, with 161 and 138 breeding females respectively. “The problem is that celebrity chefs and restaurant owners haven’t heard of these rare breeds so there is no market for them,” he

added.

Passage B

I think the first realization you have when you become vegan is just how exciting it is. Rather than finding yourself limited to a restrictive diet, which is the expectation of most new vegans, a whole new world of food and a new way of cooking are opened up to you. You start experimenting with ingredients you' ve never used before, or sometimes never even heard of, like nooch or seitan, with amazing culinary results (some of the time), and you want everybody to taste what you' ve tasted. If you' ve been a hardened cheese addict for most of your life, like I was, of course you want your family to try the latest plant-based cheese that melts just like mozzarella!

You can also find yourself feeling much more energetic and enthusiastic after the switch to a plant-based diet. I think this is in part because of the amount of healthy nutrients you' re getting on a daily basis; my fruit and veg intake has more than doubled. But for those who have become vegan for the animal rights side of things, every meal is guilt-free and eating almost becomes an exercise in mindfulness, leaving you with positive feelings. Who wouldn' t want their friends and family to feel this

too?

Most new vegans will join an online group or two; there are plenty to choose from, and Veganuary even has its own Facebook page. The sense of belonging can be invigorating, but it can also blind you to the fact that most of the people around you know very little about the vegan lifestyle, and at worst, have no or little interest.

But there is a more serious aspect to vegans shouting about their lifestyle for what feels like 24 hours a day. Although it has become trendy to “eat clean”, and a plant-based diet is often viewed as clean, veganism’s roots are deeply embedded in the world of animal rights activism.

Many people are unaware of the cruelty with which their meat, cheese and leather items are produced, whereas others have had fleeting glimpses and choose to ignore it. I was brought up vegetarian for most of my life, but it took 15 years after my mother went dairy-free and gave me explicit explanations of why she had done so before I opened my eyes to the brutality of the dairy and egg industries. I knew what happened on dairy farms: that female cows spend their lives being artificially inseminated, only to have their calves taken from them at birth; that those calves are usually slaughtered for veal while their mothers

spend their lives attached to machines draining the milk that was intended for their lost babies. But still I chose to ignore it. Once you open your eyes and have that lightbulb moment, it's hard to watch the rest of the world tucking into their cheese plates and burgers without feeling you should say something.

I often think that if I just told that friend how their omelette ended up on their plate, or that stranger in the fur coat how the mink or coyote that had worn it before had suffered, perhaps they'd reconsider. Maybe I could get them to see the world like how I now see it, and, just maybe, veganism could become the norm, rather than the radical.

Passage C

We eat meat, we love meat, and our bodies are built to digest meat. It would be nice if we could pick the stuff off the trees, but we can't. So apologies to goats and pigs and cows and chickens and fish and lobster and shrimp and all the other scrumptious stuff that flies and walks and swims, but you're going down.

That, of course, is the primal, flesh-craving part of our brain talking. But other parts—our softer, morally tormented parts—are consumed by

guilt over taking a life to make a meal. The only way to reconcile our minds, to say nothing of our menus, is either to go vegan—try that for a week—or to convince ourselves that despite the critter (家畜) murder we effectively endorse every time we tuck into a pork chop or a chicken salad, we are still somehow decent, somehow good. That takes some fancy ethical footwork.

The main dodge we usually rely on is the “_____ 36 _____” excuse. That may well be true when you get below a certain point on the cognitive scale. As no less a figure than Princeton bioethicist Peter Singer—whose 1975 book *Animal Liberation* launched the animal rights movement—told me in an interview a few years ago: “I think there’s very little likelihood that oysters, mussels and clams have any consciousness, so it’s defensible to eat them.”

But as a new study published in *Current Directions in Psychological Science* shows, we’ve found ways around that problem too. In a series of experiments and surveys, a team led by research psychologist Steve Loughnan of the University of Melbourne confirmed that while people across a broad range of cultures agree that the more mindful an animal is, the less defensible it is to eat it, we have a convenient way of deciding which critters think and which don’t. If you like beef, you’re more

inclined to believe cows can't think; if you eat only fish, you're likelier to see cattle as conscious, while the salmon on your plate was probably a non-conscious nincompoop.

That handy reasoning even works in an ex post facto way. Loughnan found that a subject who had just eaten beef and was then asked about cow consciousness tended to rate it low, while someone who had just eaten nuts gave cows more credit. We justify food even after we've already consumed it. We do something similar with any animal that, either through charisma or companionability, has achieved a sort of most favored fauna status. So a hamburger is fine, but a horseburger? We're not barbarians. Ditto shark fin versus dolphin fin soup, and turkey versus, say, eagle for Thanksgiving.

None of this ethical expedience is necessarily a bad thing; indeed it's a necessary skill for a species with a conscience like ours trying to make its way in a morally ambiguous world. But we shouldn't pretend it's more than expedience. The vegetarian's truth is no more legitimate than the pescetarian's (鱼类素食者) or the red-in-fang carnivore's. We can all agree that gratuitously subjecting animals to suffering is a bad thing, and it's the rare human who could look at unnaturally fat chickens or pigs in cages that barely allow them to move without thinking that we'

ve gone terribly wrong somewhere. Still, in most cases, we make our own peace in our own way with what' s on our own plates. Pay your own check and the meal is up to you.

31. According to Passage A, the Rare Breeds Survival Trust is an organization that _____.

考试时的选项顺序

A) encourages people to eat less meat in order to protect rare animals

B) aims to secure the continued existence of rare farm animals

✓

C) brings British farmers together to breed rare animals for meat

D) does scientific research about the demand and breeding of rare animals

原始的选项顺序

A) aims to secure the continued existence of rare farm animals

✓

B) brings British farmers together to breed rare animals for meat

- C) encourages people to eat less meat in order to protect rare animals
 - D) does scientific research about the demand and breeding of rare animals
-

32. Which of the following is true about Tom Beeston' s opinions in Passage A?

考试时的选项顺序

A) Eating rare breed meat can stimulate rare animal breeding.

✓

- B) Species extinction is closely related to animal agriculture.
- C) Rare breed animals should be protected from being eaten.
- D) Natural breeding of farm animals should be promoted.

原始的选项顺序

- A) Natural breeding of farm animals should be promoted.
- B) Species extinction is closely related to animal agriculture.
- C) Eating rare breed meat can stimulate rare animal breeding.

✓

- D) Rare breed animals should be protected from being eaten.
-

33. The word *ludicrous* in Passage A is closest in meaning to _____.

考试时的选项顺序

- A) luxurious **B) ridiculous** C) cautious D) fastidious
✓

原始的选项顺序

- A) cautious B) luxurious C) fastidious **D) ridiculous**
✓

34. According to Passage B, the benefits of being a vegan include the following EXCEPT _____.

- A) feeling positive and invigorated
B) experiencing a refreshing lifestyle
C) enjoying brand new ways of cooking
D) building a strong sense of belonging ✓

答案: D

35. It can be inferred from Passage B that _____.

考试时的选项顺序

- A) vegans are usually considered to be different from other people
B) the writer' s mother only eats plant-based food as the writer does

C) what happens on dairy and poultry farms made the writer

unwilling to eat meat ✓

D) a plant-based diet is becoming increasingly popular

because it is clean

原始的选项顺序

A) what happens on dairy and poultry farms made the writer

unwilling to eat meat ✓

B) a plant-based diet is becoming increasingly popular

because it is clean

C) the writer's mother only eats plant-based food as the writer

does

D) vegans are usually considered to be different from other

people

36. Which of the following best fits in the blank in Passage C?

考试时的选项顺序

A) it is fair enough that we eat the animals we breed

B) animals can't express their feelings as humans do

C) animals can't think so they never know what hit them ✓

D) it is our carnivorous nature that drives us to eat meat

原始的选项顺序

A) animals can't think so they never know what hit them ✓

B) it is our carnivorous nature that drives us to eat meat

C) animals can't express their feelings as humans do

D) it is fair enough that we eat the animals we breed

37. In Passage C, Steve Loughnan's experiments show that ____.

考试时的选项顺序

A) human beings usually try to justify their decision to eat
animals ✓

B) the most favored fauna is considered to be those with low
consciousness

C) there is no proof as to whether cows are more intelligent
than fish or salmon

D) it is relatively less likely that humans will eat animals that are
mindful

原始的选项顺序

A) there is no proof as to whether cows are more intelligent
than fish or salmon

B) the most favored fauna is considered to be those with low
consciousness

C) it is relatively less likely that humans will eat animals that are mindful

D) human beings usually try to justify their decision to eat animals ✓

38. Which is the best title for Passage C?

A) Be A Carnivore

B) Why We Eat Animals

C) The Paradox of Eating Animals

D) The Moral Dilemma of Eating Animals ✓

答案: D

39. What has been admitted in both Passage B and Passage C?

考试时的选项顺序

A) The wrongdoing of eating animals.

B) The immorality of making animals suffer. ✓

C) The justification for killing animals for food.

D) The benefits of being a vegan.

原始的选项顺序

A) The benefits of being a vegan.

- B) The wrongdoing of eating animals.
 - C) The immorality of making animals suffer. ✓
 - D) The justification for killing animals for food.
-

40. What can be learned from the three passages?

考试时的选项顺序

- A) Unlike Passage B, Passage A shows a neutral attitude towards eating animals. ✓
- B) None of the three passages criticizes the behavior of eating animals.
- C) Eating animals is encouraged in both Passage A and Passage C.
- D) All of the three passages are related to healthy eating habits.

原始的选项顺序

- A) All of the three passages are related to healthy eating habits.
- B) Eating animals is encouraged in both Passage A and Passage C.
- C) None of the three passages criticizes the behavior of eating animals.

D) Unlike Passage B, Passage A shows a neutral attitude towards eating animals. ✓

Directions: In Part IV, you will read two passages and then write a short essay according to them. You should write with clarity and logic. (Time allowed: 40 minutes)

41.

Question 41 (Suggested completion time: 40 minutes)

Directions: Read the following two passages. Write a short essay according to the passages.

Passage A

On one occasion when a disciple of Confucius was sent on a public mission to a foreign State, he left his mother at home unprovided for. Another disciple then asked Confucius to provide her with grain. "Give her," said Confucius, "so much," naming a certain quantity.

The disciple asked for more. Confucius then named a larger quantity. Finally the disciple gave her a larger quantity than the quantity which Confucius named.

When Confucius came to know of it, he remarked, "When that woman's son left on his mission he drove in a carriage with fine horses and was clothed with costly furs. Now I believe a wise and good man reserves his charity for the really needy; he does not help the well-to-do and rich."

On another occasion, when another disciple was appointed the chief magistrate of a town, Confucius appointed his salary at nine hundred measures of grain. The disciple declined it as being too much.

"Do not decline it," said Confucius to him, "If that is more than necessary for your own wants, cannot you share what you do not want with your relatives and neighbors at home?"

Passage B

...with respect to acting in the face of danger, courage is a mean between the excess of *rashness* and the deficiency of *cowardice*; with respect to the enjoyment of pleasures, temperance is a mean between the excess of *intemperance* and the deficiency of *insensibility*; **with respect to spending money, generosity is a mean**

between the excess of wastefulness and the deficiency of stinginess; with respect to relations with strangers, being friendly is a mean between the excess of being *ingratiating* and the deficiency of being *surly*...

Source: *Aristotle: Ethics and the Virtues*

41. Write a short essay of about 300 words based on your understanding of the two passages. Remember to write in your OWN words. Your essay should respond to the following questions:

- 1) In the first story, what was Confucius' attitude toward his disciple?
- 2) How did Confucius behave differently to his second disciple? And why?
- 3) Compare Confucius and Aristotle in their understanding of generosity. Please support your opinion with the information from the given passages.

答案:
